The Female Offender Cesare Lombroso, 1897

Victors' Justice Danilo Zolo, 2020-01-28 Victors' Justice is a potent and articulate polemic against the manipulation of international penal law by the West, combining historical detail, juridical precision and philosophical analysis. Zolo's key thesis is that contemporary international law functions as a two-track system: a made-to-measure law for the hegemons and their allies, on the one hand, and a punitive regime for the losers and the disadvantaged, on the other. Though it constantly advertised its impartiality and universalism, international law served to bolster and legitimize, ever since the Tokyo and Nuremberg trials, a fundamentally unilateral and unequal international order.

The New Criminology Ian Taylor, Ian Taylor, M.B, Paul Walton, Jock Young, 2002-11 A major contribution to criminology in which Taylor, Walton and Young provide a framework for a fully social theory of crime.

The Future of Criminology Rolf Loeber, Brandon C. Welsh, 2012-05-01 Criminology is a dynamic and evolving field of study. In recent decades, the study of the causes, development, prevention, and treatment of juvenile delinquency and adult crime has produced many important discoveries. This volume addresses two questions about crucial topics facing criminology - from causation to prevention to public policy: Where are we now? What does the future hold? Rolf Loeber and Brandon C. Welsh lead a team of more than forty top scholars from across the world to present the future of research, policy, and practice in the discipline.

Inventing the Criminal Richard F. Wetzell, 2003-06-19 Recent years have witnessed a resurgence of biological research into the causes of crime, but the origins of this kind of research date back to the late nineteenth century. Here, Richard Wetzell presents the first history of German criminology from Imperial Germany through the Weimar Republic to the end of the Third Reich, a period that provided a unique test case for the perils associated with biological explanations of crime. Drawing on a wealth of primary sources from criminological, legal, and psychiatric literature, Wetzell shows that German biomedical research on crime predominated over sociological research and thus contributed to the rise of the eugenics

movement and the eventual targeting of criminals for eugenic measures by the Nazi regime. However, he also demonstrates that the development of German criminology was characterized by a constant tension between the criminologists' hereditarian biases and an increasing methodological sophistication that prevented many of them from endorsing the crude genetic determinism and racism that characterized so much of Hitler's regime. As a result, proposals for the sterilization of criminals remained highly controversial during the Nazi years, suggesting that Nazi biological politics left more room for contention than has often been assumed.

Memoria del Primer Congreso Mexicano de Derecho Penal (1981) Elpidio Ramírez, Javier Piña y Palacios, 1982

Prisons of Poverty Loïc J. D. Wacquant, 2009 In this title, the author examines how penal policies emanating from the United States have spread throughout the world. The author argues that the policies have their roots in a network of Reagan-era conservative think tanks, which used them as weapons in their crusade to dismantle the welfare state and, in effect, criminalise poverty.

Entrenamiento Policial/ Police Training Sergio Enrique Varela Aviles, 2007-01-08

Against Criminology Stanley Cohen, During the 1960s, traditional thinking about crime and its punishment, deviance and its control, came under radical attack. The discipline of criminology split into feuding factions, and various schools of thought emerged, each with quite different ideas about the nature of the crime problem and its solutions. These differences often took political form, with conservative, liberal, and radical supporters, and the resulting controversies continue to reverberate throughout the fields of criminology and sociology, as well as related areas such as social work, social policy, psychiatry, and law. Stanley Cohen has been at the center of these debates in Britain and the United States. This volume is a selection of his essays, written over the past fifteen years, which contribute to and comment upon the major theoretical conflicts in criminology during this period. Though associated with the new or radical criminology, Cohen has always been the first to point out its limitations--particularly in translating its theoretical claims into real world applications. His essays cover a wide range of topics-political crime, the nature of individual responsibility, the implications of new theories for social work practice, models of crime used in the Third World, banditry and rebellion, and the decentralization of social control. Also included is a previously unpublished paper on how radical social movements such as feminism deal with criminal law. Many criminology textbooks present particular theories or research findings. This book uniquely reviews the main debates of the last two decades about just what the role and scope of the subject should be.

The Guiltless Hermann Broch, 2000 Murder, lust, shame, hypocrisy, and suicide are at the center of *The Guiltless*, Hermann Broch's postwar novel about the disintegration of European society in the three decades preceding the Second World War. Broch's characters - an apathetic man who can barely remember his own name; a high-school teacher and his lover who return from the brink of a suicide pact to carry on a dishonest relationship; Zerline, a lady's maid who enslaves her

mistresses, prostitutes the young country girl Melitta, and metes out her own justice against the empty wickedness of her betters - are trapped in their indifference, prisoners of a sort of wakeful somnolence. These men and women may mention the imbecile Hitler, yet they prefer a nap or sexual encounter to any social action. Broch thought the kind of ethical perversity and political apathy exhibited by his characters paved the way for Nazism. He believed in the purifying power of writing and hoped that by revealing Germany's underlying guilt he could purge indifference from his own and future generations. In *The Guiltless*, Broch captures how apathy and ennui - very human failings - evolve into something dehumanizing and dangerous. -- Book Jacket.

Crimes, Harms, and Wrongs A P Simester, Andreas von Hirsch, 2011-06-24 When should we make use of the criminal law? *Crimes, Harms, and Wrongs* offers a philosophical analysis of the nature and ethical limits of criminalisation. The authors explore the scope of harm-based prohibitions, proscriptions of offensive behaviour, and 'paternalistic' prohibitions aimed at preventing self-harm, developing guiding principles for these various grounds of state prohibition. Both authors have written extensively in the field. They have produced an integrated, accessible, philosophically-sophisticated account that will be of great interest to legal academics, philosophers, and advanced students alike. 'this elegant, closely argued and convincing book is of great value and can be expected to be of lasting influence.' James Chalmers 'Crimes, Harms, and Wrongs . . . is a welcome addition to this field, and should clarify the reader's thinking on a breathtakingly broad range of issues. . . . This is an important book, and [its] consideration of not only Anglo-American theory and law, but also German legal doctrines and writings on criminalisation, should ensure that this debate reaches new heights in the future.' Findlay Stark 'the result of [the authors'] many decades of thought and writing on this fundamental subject is an integrated, accessible, philosophically sophisticated discussion of this subject.' Justice Gilles Renaud 'A.P. Simester and Andreas von Hirsch present an informed and systematic account of the principles that, in their view, should structure decisions about what to criminalize, and when.' Vincent Chiao 'an outstanding work, original in many respects and meticulous in its arguments. It represents the greatest advance on this subject since Feinberg's four volumes . . . an outstanding contribution to the re-invigorated criminalization debate.' Andrew Ashworth 'important, original, interesting, and often ingenious. Unlike

some recent competitive books it has the virtue of making sound arguments. And like everything else the authors have written, it is a joy to read ...This is an absolutely wonderful book.' Douglas Husak

Trials and Punishments Antony Duff,1986 This book discusses whether a system of criminal punishment can be justified within our legal system.

A Dictionary of Legal Theory Brian Bix,2004 Modern legal theory contains a wide range of approaches and topics: from economic analysis of law to feminist legal theory to traditional analytical legal philosophy to a range of theories about justice. This healthy variety of jurisprudential work has created a problem: students and theorists working in one tradition may have difficulty understanding the concepts and terminology of a different tradition. This book works to make terminology and ways of thinking accessible. This dictionary covers topics from the 'autonomy of law' to the 'will theory of rights', from 'autopoiesis' to 'wealth maximization', and from 'John Austin' to 'Ludwig Wittgenstein'. The most important concepts and ideas are presented in a simple dictionary format. There are also many longer entries, where the initial definition gives an accessible explanation, but the entry goes on to give more detailed information about the history of an idea and the debates currently surrounding it.
