Chronic Graft Versus Host Disease Georgia B. Vogelsang, Steven Z. Pavletic, 2009-04-20 Chronic graft versus host disease (GVHD) is the most common complication of allogeneic bone marrow transplantation. Because of the protracted clinical course of chronic GVHD, transplant centers and hematology/oncology offices are inadequately equipped to manage these immuno-incompetent patients with a multi-system disorder. Practitioners need to be able to recognize and effectively manage chronic GVHD as a late effect of more than half of allogeneic transplantations. The text is oriented for the clinician, with chapters covering staging, organ site and system-specific manifestations, treatment options, and supportive care. Drs Georgia B. Vogelsang and Steven Z. Pavletic have been pioneers in the recognition of the multi-organ complexity of this disease and have gathered the input of a variety of subspecialist physicians for this book. This book fills the gap in practical literature on chronic GVHD, providing a comprehensive, up-to-date, and clinically relevant resource for anyone who deals with cancer patients post-transplant.

Medical Latin in the Roman Empire D. R. Langslow,2000-06-08 Despite the ubiquitous importance of medicine in Roman literature, philosophy, and social history, the language of Latin medical texts has not been properly studied. This book presents the first systematic account of a part of this large, rich field. Concentrating on texts of 'high' medicine written in educated, even literary, Latin Professor Langslow offers a detailed linguistic profile of the medical terminology of Celsus and Scribonius Largus (first century AD) and Theodorus Priscianus and Cassius Felix (fifth century AD), with frequent comparisons with their respective near-contemporaries. The linguistic focus is on vocabulary and word-formation and the book thus addresses the large question of the possible and the preferred means of extending the vocabulary in Latin at the beginning and end of the Empire. Some syntactic issues (including word order and nominalization) are also discussed, and sections on the sociolinguistic background and stylistic features consider the question to what extent we may speak of 'medical Latin' in the strong sense, as the language of a group, and draw comparisons and contrasts between ancient and modern technical languages.
