Philip Roth David Brauner,2013-07-19 This is a groundbreaking study of the most important contemporary American novelist, Philip Roth. Reading the author alongside a number of his contemporaries, and focusing particularly on his later fiction, this book offers a highly accessible, informative and persuasive view of Roth as an intellectually adventurous and stylistically brilliant writer who constantly reinvents himself in surprising ways. At the heart of this book are a number of detailed and nuanced readings of Roth's works both in terms of their relationships with each other and with fiction by Nathaniel Hawthorne, Thomas Pynchon, Tim O'Brien, Brett Easton Ellis, Stanley Elkin, Howard Jacobson and Jonathan Safran Foer. Brauner identifies as a thread running through all of Roth's work the use of paradox, both as a rhetorical device and as an organising intellectual and ideological principle.

Beckett's Dantes Daniela Caselli,2005 With original and informative intertextual reading of Beckett's work, detecting previously unknown quotations, allusions to and parodies of Dante, Daniela Caselli presents a study of the relationship between Beckett and Dante.

Agonistics Janet Lungstrum,Elizabeth Sauer,1997-09-11 Focuses on a very significant psycho-cultural concept (that of agonistics or contestatory creativity) with ramifications in several areas of the postmodern debate: cultural philosophy, psychologies of race, gender and the body, and narratology.

Stolen Future, Broken Present David Collings,2014-05-20 This book argues that climate change has a devastating effect on how we think about the future. Once several positive feedback loops in Earth's dynamic systems, such as the melting of the Arctic icecap or the drying of the Amazon, cross the point of no return, the biosphere is likely to undergo severe and irreversible warming. Nearly everything we do is premised on the assumption that the world we know will endure into the future and provide a sustaining context for our activities. But today the future of a viable biosphere, and thus the purpose of our present activities, is put into question. A disappearing future leads to a broken present, a strange incoherence in the feel of everyday life. We thus face the unprecedented challenge of salvaging a basis for our lives today. That basis, this book argues, may be found in our capacity to assume an infinite responsibility for ecological disaster and, like the biblical Job, to

respond with awe to the alien voice that speaks from the whirlwind. By owning disaster and accepting our small place within the inhuman forces of the biosphere, we may discover how to live with responsibility and serenity whatever may come.-- Publisher's description.

Kicking a Dead Horse Sam Shepard,2011-04-20 A solitary man digs a hole in the ground, near a dead horse. Amidst the clutter of food and equipment stands Hobart Struther, who has ridden all the way out to the middle of nowhere on a holy mission. But one day into his "Great Sojourn," things are looking bleak. His horse has choked to death, he's miles away from civilization, and there's not a person around to talk to - other than himself. As Hobart examines his rise — how he built a vast art collection while ensconced in a comfortable Park Avenue lifestyle — he digs deep into his own history, unearthing truths about his past while still struggling to find the answers he needs. With Shepard's linguistic flair, subtle humor, and probing insights, *Kicking a Dead Horse* is an invigorating addition to the works of one of America's most innovative playwrights.

The Truth about Crime Jean Comaroff,John L. Comaroff,2016-12-05 This new book by the well-known anthropologists Jean and John L. Comaroff explores the global preoccupation with criminality in the early twenty-first century, a preoccupation strikingly disproportionate, in most places and for most people, to the risks posed by lawlessness to the conduct of everyday life. Ours in an epoch in which law-making, law-breaking, and law-enforcement are ever more critical registers in which societies construct, contest, and confront truths about themselves, an epoch in which criminology, broadly defined, has displaced sociology as the privileged means by which the social world knows itself. They also argue that as the result of a tectonic shift in the triangulation of capital, the state, and governance, the meanings attached to crime and, with it, the nature of policing, have undergone significant change; also, that there has been a palpable muddying of the lines between legality and illegality, between corruption and conventional business; even between crime-and-policing, which exist, nowadays, in ever greater, hyphenated complicity. Thinking through Crime and Policing is, therefore, an excursion into the contemporary Order of Things; or, rather, into the metaphysic of disorder that saturates the late modern world, indeed, has become its leitmotif. It is also a meditation on sovereignty and citizenship, on civility, class, and race, on the law and its transgression, on the political economy of representation.

Figures of Dissent Stoffel Debuysere,2016 How can the relation between cinema and politics be thought today? This question was the starting point for 'Figures of Dissent', a project consisting of an extensive series of discussions, dialogues and screenings that were organized by Debuysere over the course of four years. Some of the thoughts and doubts that have been simmering as a result of these encounters were expressed in the form of letters. This manuscript assembles six of those letters, addressed to fellow filmmakers, artists, producers and theorists. They are six tentative forms of study that blend various impressions, associations and digressions in an attempt to make sense of this conundrum that has been haunting the past century: how does the art of moving shadows pertain to the realities of political struggle?

Archaeologies of the Future Fredric Jameson, 2020-05-05 In an age of globalization characterized by the dizzying technologies of the First World, and the social disintegration of the Third, is the concept of utopia still meaningful? *Archaeologies of the Future*, Jameson's most substantial work since *Postmodernism, Or, the Cultural Logic of Late Capitalism*, investigates the development of this form since Thomas More, and interrogates the functions of utopian thinking in a post-Communist age. The relationship between utopia and science fiction is explored through the representations of otherness . alien life and alien worlds . and a study of the works of Philip K. Dick, Ursula LeGuin, William Gibson, Brian Aldiss, Kim Stanley Robinson and more. Jameson's essential essays, including *The Desire Called Utopia*, conclude with an examination of the opposing positions on utopia and an assessment of its political value today.

Fictional and Historical Worlds J. Hart, 2012-01-30 Examines possible and fictional worlds, author and authority, otherness and recognition, translation, alternative critique, empire, education, imagination, comedy, history, poetry, and culture. The analyzed works include classical and modern texts and theorists of the past sixty years ranging from Jerome Bruner to Stephen Greenblatt.

The Masculine Century Michael Antony, 2008-05 Now that the Twentieth Century is behind us . what made it what it was? 200 million human beings killed by war, totalitarianism, and extermination programs. What made the twentieth century the most murderous age in human history, as well as the age that made the greatest advances ever in science and technology, while art and serious music declined into abstraction, non-communication, and grotesque hoaxes-blank canvases, old urinals, cans of excrement, and concertos consisting of four minutes of silence? This book argues that the century was marked by an over-masculinization of the Western mind, leading to autism and psychopathic aggression, and the eclipse of the feminine, expressive, emotional, empathetic side of human nature. Hence the unprecedented culture of total war and genocide, and the totalitarian projects to raze the human past and start again-which Modernism carried out in the arts. Hence also the masculinization of sexual behavior (as romance gave way to pornography, and marriage to promiscuity), the adoption by women of a male work role, the decline of motherhood and family, and the collapse of Western birthrates. This is all traced back to the rise of two aggressive, ultra-masculine ideologies in the nineteenth century, Darwinism and Marxism (which gave birth to Fascism and Feminism.) These ideologies put violence, conflict and aggression at the heart of life, and changed human mentalities. This book examines these developments through the literature and art of the past hundred and fifty years, and discusses their implications for the future of Western Civilization.

European Existentialism Nino Langiulli, *European Existentialism* is a rich collection of major texts and is made all the more significant by the range and depth of its contributions. This book aims to give greater intelligibility to existentialism by providing samples from antecedents of and influences upon it. Although existentialism is regarded as an example of twentieth-century philosophizing, the book presents nineteenth-century thinkers such as Kierkegaard and Nietzsche as its

forerunners. Thinkers, such as Dilthey, Husserl, and Scheler, frequently associated with other trends in philosophy, such as historicism and phenomenology, are included because of their influence upon existentialism. Informative biographies of each author represented are also included. European Existentialism includes a broad range of philosophers working in the existentialist mode - not only French and German, but also Spanish, Italian, Jewish, and Russian philosophers. This volume is also distinctive in that it omits existentialists from the literary world. While Dostoevsky is often included in other existentialist collections, Langiulli represents Russian philosophy with a selection by Berdyaev. In his new introduction, Langiulli discusses how the themes of existentialism have led to contemporary aberrations. He uses the language of political rights as an example; whereas we once referred to freedom of speech, we have transformed that phrase into a much wider category, freedom of expression. Langiulli also examines various trends that have derived from existentialism: postmodernism, deconstructionism, and multiculturalism. Langiulli's introduction and the contributions place existentialism as a genuine tradition in the history of philosophy - a tradition which stresses the radical contingency and mortality of human existence. European Existentialism is an invaluable collection for philosophers, educators, and all those interested in the existentialist tradition.

Food, Poetry, and the Aesthetics of Consumption Michel Delville, 2012-08-06 From Plato's dismissal of food as a distraction from thought to Kant's relegation of the palate to the bottom of the hierarchy of the senses, the sense of taste has consistently been devalued by Western aesthetics. Kant is often invoked as evidence that philosophers consider taste as an inferior sense because it belongs to the realm of the private and subjective and does not seem to be required in the development of higher types of knowledge. From a gastrosophical perspective, however, what Kant perceives as a limitation becomes a new field of enquiry that investigates the dialectics of diet and discourse, self and matter, inside and outside. The essays in this book examine the importance of food as a pivotal element - both materially and conceptually - in the history of the Western avant-garde. From Gertrude Stein to Alain Robbe-Grillet and Samuel Beckett, from F.T. Marinetti to Andy Warhol, from Marcel Duchamp to Eleanor Antin, the examples chosen explore the conjunction of art and foodstuff in ways that interrogate contemporary notions of the body, language, and subjectivity.

Victorian Writers and the Environment Laurence W. Mazzeno, Ronald D. Morrison, 2016-12-08 Applying ecocritical theory to the work of Victorian writers, this collection explores what a diversity of ecocritical approaches can offer students and scholars of Victorian literature, at the same time that it critiques the general effectiveness of ecocritical theory. Interdisciplinary in their approach, the essays take up questions related to the nonhuman, botany, landscape, evolutionary science, and religion. The contributors cast a wide net in terms of genre, analyzing novels, poetry, periodical works, botanical literature, life-writing, and essays. Focusing on a wide range of canonical and noncanonical writers, including Charles Dickens, the Brontes, John Ruskin, Christina Rossetti, Jane Webb Loudon, Anna Sewell, and Richard Jefferies, Victorian

Writers and the Environment demonstrates the ways in which nineteenth-century authors engaged not only with humans' interaction with the environment during the Victorian period, but also how some authors anticipated more recent attitudes toward the environment.

The Cambridge Companion to Adorno Tom Huhn, 2004-07-05 The great German philosopher and aesthetic theorist Theodor Wiesengrund Adorno (1903-1969) was one of the main philosophers of the first generation of the Frankfurt School of critical theory. An accomplished musician Adorno first focused on the theory of culture and art. Later he turned to the problem of the self-defeating dialectic of modern reason and freedom. In this collection of essays, imbued with the most up-to-date research, a distinguished roster of Adorno specialists explore the full range of his contributions to philosophy, history, music theory, aesthetics and sociology.

Intelligent Projects Using Python Santanu Pattanayak, 2019-01-31 Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key Features A go-to guide to help you master AI algorithms and concepts 8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillance Use TensorFlow, Keras, and other Python libraries to implement smart AI applications Book Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn Build an intelligent machine translation system using seq-2-seq neural translation machines Create AI applications using GAN and deploy smart mobile apps using TensorFlow Translate videos into text using CNN and RNN Implement smart AI Chatbots, and integrate and extend them in several domains Create smart reinforcement, learning-based applications using Q-Learning Break and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need.

Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

Poetry and Pedagogy J. Retallack, J. Spahr, 2016-04-30 This anthology is a new reading of the contemporary poetries. The collection gathers together the work of a number of scholars, poets, and teachers on the challenges and productive possibilities that arise when teaching contemporary writing today.

Future Primitive John Zerzan, 1994 This neo-Luddite sequel to *Elements of Refusal* includes *Future Primitive*, *The Mass Psychology of Misery*, *Tonality and the Totality*, *The Catastrophe of Postmodernism*, excerpts from *The Nihilists Dictionary*, and other essays, columns, and reviews. From the editor of *Against Civilization* and the confidant of alleged Unabomber Ted Kaczynski.

The Field of Drama Martin Esslin, 1987 This book of criticism brings both theatre and film studies within a single theoretical framework.

The Art of Poetry Paul Valéry, 2014-07-14 All of the major meditations on the theory and practice of poetry by one of the greatest poets of our time--and perhaps the one who has most scrupulously analyzed his art--are included in *The Art of Poetry*. Originally published in 1985. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Jacques Lacan Elizabeth Grosz, 2002-09-11 Grosz gives a critical overview of Lacan's work from a feminist perspective. Discussing previous attempts to give a feminist reading of his work, she argues for women's autonomy based on an indifference to the Lacanian phallus.
