**Models of Visuospatial Cognition** Manuel de Vega, 1996-05-23 This second volume in the Counterpoints Series, which explores issues in psychology, child development, linguistics, and neuroscience, focuses on alternative models of visual-spatial processing in human cognition. This text offers extended chapters from three of the most respected and recognized investigators in the field: Michel Denis, Margaret Intons-Peterson, and Philip Johnson-Laird. Denis considers the role of mental imagery in spatial cognition and topographical orientation; images are viewed as a form of mental representation that is similar to real-world objects. Intons-Peterson examines spatial representation in short-term, or working-memory, considering the relationship of visual-spatial processes to subjects' expectations and individual differences. Johnson-Laird approaches the issue of visual-spatial representation from a mental models perspective, considering the relationship of images to various cognitive events. The editors provide a historical and theoretical introduction; and a final chapter integrates the arguments of the chapters, offering ideas about new directions and new research designs.

**Representational Systems and Practices as Learning Tools** Christopher Andersen, Nora Scheurer, María del Puy Leonor Pérez Echeverría, Eva Teubal, 2009 Learning and teaching complex cultural knowledge calls for meaningful participation in different kinds of symbolic practices, which in turn are supported by a wide range of external representations, as gestures, oral language, graphic representations, writing and many other systems designed to account for properties and relations on some 2- or 3-dimensional objects. Children start their apprenticeship of these symbolic practices very early in life. But being able to understand and use them in fluid and flexible ways poses serious challenges for learners and teachers across educational levels, from kindergarten to university. This book is intended as a step in the path towards a better understanding of the dynamic relations between different symbolic practices and the acquisition of knowledge in various learning domains, settings and levels. Researchers from almost twenty institutions in three different continents present first hand research in this emerging area of study and reflect on the particular ways and processes whereby participation in symbolic practices based on a diversity of external representations promotes learning in specific fields of knowledge. The book will be useful for persons interested in education, as well as cognitive psychologists, linguists

and those concerned by the generation, appropriation, transmission and communication of knowledge.

*Implementing Standards-based Mathematics Instruction* Mary Kay Stein,2000 Presents prevalent cases of maths instruction drawn from research of classroom lessons. The Mathematical Tasks Framework, developed by the authors, offers teachers the means to evaluate instructional decisions, choice of materials and learning outcomes.

**A History of Argentina in the Twentieth Century** Luis Alberto Romero,2013-10-31 A History of Argentina in the Twentieth Century, originally published in Buenos Aires in 1994, attained instant status as a classic. Written as an introductory text for university students and the general public, it is a profound reflection on the “Argentine dilemma” and the challenges that the country faces as it tries to rebuild democracy. Luis Alberto Romero brilliantly and painstakingly reconstructs and analyzes Argentina’s tortuous, often tragic modern history, from the “alluvial society” born of mass immigration, to the dramatic years of Juan and Eva Perón, to the recent period of military dictatorship. For this second English-language edition, Romero has written new chapters covering the Kirchner decade (2003–13), the upheavals surrounding the country’s 2001 default on its foreign debt, and the tumultuous years that followed as Argentina sought to reestablish a role in the global economy while securing democratic governance and social peace.

These Rebel Waves Sara Raasch,2018-08-07 A thrilling new fantasy series—full of deadly magic, double crosses, and a dangerous quest in a new world—from Sara Raasch, the New York Times bestselling author of the Snow Like Ashes series. Adeluna is a soldier. Five years ago, she helped the magic-rich island of Grace Loray overthrow its oppressor, Argrid, a country ruled by religion. But adjusting to postwar life has not been easy. When an Argridian delegate vanishes during peace talks with Grace Loray’s new Council, Argrid demands brutal justice—but Lu suspects something dangerous is at work. Devereux is a pirate. As one of the stream raiders who run rampant on Grace Loray, he scavenges the island’s magic plants and sells them on the black market. But after Argrid accuses raiders of the diplomat’s abduction, Vex becomes a target. An expert navigator, he agrees to help Lu find the Argridian—but the truth they uncover could be deadlier than any war. Benat is a heretic. The crown prince of Argrid, he harbors a secret obsession with Grace Loray’s forbidden magic. When Ben’s father, the king, gives him the shocking task of reversing Argrid’s fear of magic, Ben has to decide if one prince can change a devout country—or if he’s building his own pyre. As conspiracies arise, Lu, Vex, and Ben will have to decide who they really are . . . and what they are willing to become for peace.

**What the Best College Teachers Do** Ken Bain,2011-09-01 What makes a great teacher great? Who are the professors students remember long after graduation? This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators. The short answer is—it’s not what teachers do, it’s what they understand. Lesson plans and lecture notes matter less than the special way teachers

comprehend the subject and value human learning. Whether historians or physicists, in El Paso or St. Paul, the best teachers know their subjects inside and out—but they also know how to engage and challenge students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn. In stories both humorous and touching, Ken Bain describes examples of ingenuity and compassion, of students' discoveries of new ideas and the depth of their own potential. What the Best College Teachers Do is a treasure trove of insight and inspiration for first-year teachers and seasoned educators.

*A Companion to the Anthropology of Education* Bradley A. **Education Through Work** Célestin Freinet, 1993

**Research as a Basis for Teaching** Lawrence Stenhouse, 1985 These selections from the work of Lawrence Stenhouse make a sustained argument for research as a basis for teaching.

**The Book of Fantasy** Jorge Luis Borges, Silvina Ocampo, Adolfo Bioy Casares, 1990 Gathers stories by Ballard, Bierce, Bradbury, Chesterton, Cortazar, Hawthorne, Joyce, Kafka, Kipling, de la Mare, de Maupassant, Poe, Saki, Shelley, Stapledon, Traven, Voltaire, Wharton, and Wilde

Foucault, Biopolitics and Governmentality Jakob Nilsson, Sven-Olov Wallenstein, 2013 About the book: Foucault's work on biopolitics and governmentality has inspired a wide variety of responses, ranging from philosophy and political science to history, legal studies, and urban planning. Drawing on historical sources from antiquity to twentieth century liberalism, Foucault presented us with analyses of freedom, individuality, and power that cut right to the heart of these matters in the present. About the series: Sodertorn Philosophical Studies is a book series published under the direction of the Department of Philosophy at Sodertorn University, Sweden. The series consists of monographs and anthologies in philosophy, with a special focus on the Continental-European tradition. It seeks to provide a platform for innovative contemporary philosophical research. The volumes are published mainly in English and Swedish. The series is edited by Marcia Sa Cavalcante Schuback and Hans Ruin.

**The Presence of the Past** Rupert Sheldrake,1995 Rupert Sheldrake's theory of morphic resonance challenges the fundamental assumptions of modern science. An accomplished biologist, Sheldrake proposes that all natural systems, from crystals to human society, inherit a collective memory that influences their form and behavior. Rather than being ruled by fixed laws, nature is essentially habitual. The Presence of the Past lays out the evidence for Sheldrake's controversial theory, exploring its implications in the fields of biology, physics, psychology, and sociology. At the same time, Sheldrake delivers a stinging critique of conventional scientific thinking. In place of the mechanistic, neo-Darwinian worldview he offers a new understanding of life, matter, and mind.
