How to Escape Your Prison Gregory L. Little, Kenneth D. Robinson, 2006 A Moral Reconciliation Therapy Workbook. Moral Reconciliation Therapy is a systematic, cognitive-behavioral, step-by-step treatment strategy designed to enhance self-image, promote growth of a positive, productive identity, and facilitate the development of higher stages of moral reasoning. The term moral reconciliation was chosen for this system because the underlying goal was to change conscious decision-making to higher levels of moral reasoning--Amazon.

Criminal Justice and Mental Health Jada Hector, David Khey, 2018-04-18 This textbook provides an overview for students in Criminology and Criminal Justice about the overlap between the criminal justice system and mental health. It provides an accessible overview of basic signs and symptoms of major mental illnesses and size of scope of justice-involved individuals with mental illness. In the United States, the criminal justice system is often the first public service to be in contact with individuals suffering from mental illness or in mental distress. Those with untreated mental illnesses are often at higher risk for committing criminal acts, yet research on this population continues to shed light on common myths - such a prevailing assumption that those with mental illness tend to commit more violent crimes. Law enforcement agents may be called in as first responders for cases of mental distress; and due to a lack of mental health facilities, resources, and pervasive misconceptions about this population, those with mental illness often end up in the corrections system. In this

environment, students in Criminology and Criminal Justice are likely to encounter those with mental illness in their future career paths, and need to be prepared for this reality. This timely work covers the roles of each part of the criminal justice system interacting with mentally ill individuals, from law enforcement and first responders, social services, public health services, sentencing and corrections, to release and re-entry. It also covers the crucial topic of mental health for criminal justice professionals, who suffer from high rates of job stress, PTSD, and other mental health issues. The final section of the book includes suggestions for future research. This work will be of interest to students of criminology and criminal justice with an interest in working in the professional sector, as well as those in related fields of sociology, psychology, and public health. It will also be of interest to policy-makers and practitioners already working in the field. The overall goal of this work is to inform, educate, and inspire change.

What Works (and Doesn't) in Reducing Recidivism Edward J. Latessa, Shelley J. Listwan, Deborah Koetzle, 2014-09-19 This book offers criminologists and students an evidence-based discussion of the latest trends in corrections. Over the last several decades, research has clearly shown that rehabilitation efforts can be effective at reducing recidivism among criminal offenders. However, researchers also recognize that treatment is not a one size fits all approach. Offenders vary by gender, age, crime type, and/or addictions, to name but a few, and these individual needs must be addressed by providers. Finally, issues such as leadership, quality of staff, and evaluation efforts affect the quality and delivery of treatment services. This book synthesizes the vast research for the student interested in correctional rehabilitation as well as for the practitioner working with offenders. While other texts have addressed issues regarding treatment in corrections, this text is unique in that it not only discusses the research on what works but also addresses implementation issues as practitioners move from theory to practice, as well as the importance of staff, leadership and evaluation efforts.

Modelling the Criminal Lifestyle Glenn D. Walters, 2018-08-30 This book offers Walters's latest evolution of criminal lifestyle theory. It introduces the concept of criminal thought content to illustrate how the potential interplay between what offenders think and their thought processes can greatly aid our understanding of both crime and criminals. In this new study on criminal behaviour, Walters calls for criminological theory to be placed within a broader scientific context, and provides us with several key models which embrace constructs from numerous important theories including: the general theory of crime, social cognitive and social learning theories, general strain theory, psychopathic personality theories of crime, and labelling theory. Another unique aspect of this work is that it places lifestyle theory within a larger scientific framework, namely, nonlinear dynamical systems theory or chaos. Seven principles from chaos theory are used to explain relationships and processes central to lifestyle theory and Walters uses this to draw conclusions on what affects criminal decision-making and desistance from crime. Highly original and innovative in scope, this book will be useful to practitioners and scholars of criminal justice alike, with chapters focussed on decision-making, assessment, and intervention.
