Accounting Ethics Education Margarida Pinheiro, Alberto Costa, 2020-11-04 Accounting Ethics Education: Teaching Virtues and Values gathers a diversity of contributions from invited, well-known experts. It promotes a comprehensive reflection around how ethics can and should be taught to accounting students, discussing and highlighting the most updated research on accounting ethics education, and it is an essential reference in the field. The subject of accounting ethics education is critical to foster ethical awareness that may prevent the way in which one acts or behaves, especially towards others. The point is that accounting education cannot exist without ethical education and accountants must be technically

proficient and ethically sensible since ethical behavior is vital to the status and credibility of the accountancy profession. And this sensibility must be developed while the future professional is still cultivating his or her moral and intellectual structure within the school learning environment: character and practical reasoning are crucial because they include not only knowledge of rules and principles, and their correct application but also values and virtues. Examining multiple perspectives, *Accounting Ethics Education: Teaching Virtues and Values* advances the scholarly debate by providing cutting-edge and insightful research vital for all those interested and immersed in these matters. It begins with a historical perspective of accounting ethics education and continues by exploring challenges, opportunities and developments in the area. It will be of great value to academics, students, researchers and professionals in the fields of accounting, accounting education and ethics.

Restorative Justice and the Law Lode Walgrave, 2012-12-06 Restorative justice has developed rapidly from being a barely known term to occupying a central role in debates on the future of criminal justice. But as it has become part of the mainstream of debate, so new tensions and issues have emerged. One of the most crucial issues is to find an appropriate combination of restorative justice, based essentially on informal deliberation, and the law. The purpose of this book is to analyse the several dimensions to this issue. It explores the social and ethical foundations of restorative justice, seeks to position it in relation to both rehabilitation and punishment, and examines the possibility of developing and incorporating restorative justice as the mainstream response to crime in terms of the principles of constitutional democracy. Amongst the questions it addresses are the following: How are informal processes to be juxtaposed with formal procedures? What is the appropriate relationship between voluntarism and coercion? How can the procedures and practices of restorative justice be combined with legal standards, safeguards and precepts? How can one balance restorative responses with legally sanctioned punishment? In this book a distinguished team of contributors consider this crucial set of relationships between restorative justice and the law, building upon papers and discussions at the fifth international restorative justice conference in Leuven, Belgium, in September 2001. Restorative justice has grown rapidly throughout the world this book addresses the central issue of relationship of restorative justice to existing law and legal systems chapters from world leading authorities

STUDIES IN THE HISTORY OF ACCOUNTING A. C. LITTLETON,2018

The Philosophy of Ralph Waldo Emerson Joseph Urbas,2020-09-07 This study offers the first comprehensive account of Emerson's philosophy since his philosophical rehabilitation began in the late 1970s. It builds on the historical reconstruction proposed in the author's previous book, *Emerson's Metaphysics*, and like that study draws on the entire Emerson corpus—the poetry and sermons included. The aim here is expository. The overall though not exclusive emphasis is on identity, as the first term of Emerson's metaphysics of identity and flowing or metamorphosis. This metaphysics, or general conception of the nature of reality, is what grounds his epistemology and ethics, as well as his esthetic, religious, and political thought. Acknowledging its primacy enables a general account like this to avoid the anti-realist overemphasis on epistemology and language that has often characterized rehabilitation readings of his philosophy. After an initial chapter on Emerson's metaphysics, the subsequent chapters devoted to the other branches of his thought also begin with their necessary foundation in identity, which is the law of things and the law of mind alike. Perception of identity in metamorphosis is what characterizes the philosopher, the poet, the scientist, the reformer, and the man of faith and virtue. Identity of mind and world is felt in what Emerson calls the moral sentiment. Identity is Emerson's answer to the Sphinx-riddle of life experienced as a puzzling succession of facts and events.

Bread and Democracy in Germany Alexander Gerschenkron,1989 A classic in its field, *Bread and Democracy in Germany* has been widely praised since its publication in 1943 for its account of German political and economic development. In his preface, Alexander Gerschenkron states: The primary purpose of this study is to show, first, how, before 1914, the machinery of Junker protectionism is agriculture, coupled with the Junker philosophy... delayed the development of democratic institutions in Germany; and second, how the Junkers contrived to escape almost unscathed from the German revolution of 1918 and how this fact contributed to the constitutional weakness and subsequent disintegration of the Weimar Republic. Emphasizing the importance of the problem of German agriculture in its relation to democratic reconstruction, Gerschenkron asserts that the political attitude of farmers in several European countries had a decisive influence on the fate of European democracy. Nowhere is this more true than in Germany. The German farmers bear their full share of responsibility for the advent of fascism in that country.
