**Analysing Political Speeches** Jonathan Charteris-Black, 2018-08-24 Exploring speeches by public figures such as Emma Watson, Tony Blair, Donald Trump, Julia Gillard and Lady Gaga, this engaging textbook explains the ways in which political speeches can be analysed. It examines the role of language in speeches and how it can be used to challenge or reinforce prevailing social, cultural and political attitudes. Each chapter introduces a particular discourse approach and then applies this in a model analysis of a passage of text. The chosen texts concern issues of social, cultural and political importance that address topics of significant importance to the audience to which they were delivered. Students are encouraged to engage with the text and consider how approaches to text analysis, such as cohesion, context analysis and metaphor analysis, may be adapted to provide a more critical perspective. This text will be essential reading for students of English language, linguistics, communication studies and politics on critical discourse and discourse analysis modules.

*Analysing Political Speeches* Christina Schäffner, 1997 This volume deals with political speeches, particularly commemorative addresses, from the perspective of critical discourse analysis. Such addresses are characterized as representative and epideictic, as exemplified by an address by the Dutch Queen Beatrix to the Knesset during her 1995 state visit to Israel. Critical consideration is given to the role of rhetoric within political discourse analysis.

**Analysing Political Discourse** Paul Chilton, 2004-08-02 This is an essential read for anyone interested in the way language is used in the world of politics. Based on Aristotle's premise that we are all political animals, able to use language

to pursue our own ends, the book uses the theoretical framework of linguistics to explore the ways in which we think and behave politically. Contemporary and high profile case studies of politicians and other speakers are used, including an examination of the dangerous influence of a politician's words on the defendants in the Stephen Lawrence murder trial. International in its perspective, *Analysing Political Discourse* also considers the changing landscape of political language post-September 11, including the increasing use of religious imagery in the political discourse of, amongst others, George Bush. Written in a lively and engaging style, this book provides an essential introduction to political discourse analysis.

*Political Discourse Analysis* Isabela Fairclough, Norman Fairclough, 2013-06-17 In this accessible new textbook, Isabela and Norman Fairclough present their innovative approach to analysing political discourse. *Political Discourse Analysis* integrates analysis of arguments into critical discourse analysis and political discourse analysis. The book is grounded in a view of politics in which deliberation, decision and action are crucial concepts: politics is about arriving cooperatively at decisions about what to do in the context of disagreement, conflict of interests and values, power inequalities, uncertainty and risk. The first half of the book introduces the authors' new approach to the analysis and evaluation of practical arguments, while the second half explores how it can be applied by looking at examples such as government reports, parliamentary debates, political speeches and online discussion forums on political issues. Through the analysis of current events, including a particular focus on the economic crisis and political responses to it, the authors provide a systematic and rigorous analytical framework that can be adopted and used for students' own research. This exciting new text, co-written by bestselling author Norman Fairclough, is essential reading for researchers, upper undergraduate and postgraduate students of discourse analysis, within English language, linguistics, communication studies, politics and other social sciences.

**Silence and Concealment in Political Discourse** Melani Schröter, 2013-05-08 This book constitutes a significant contribution to political discourse analysis and to the study of silence, both from the point of view of discourse analysis as well as pragmatics, and it is also relevant for those interested in politics and media studies. It promotes the empirical study of silence by analysing metadiscourse about politicians' silence and by systematically conceptualising the communicativeness of silence in the interplay between intention (to be silent), expectation (of speech) and relevance (of the unsaid). Three cases of sustained metadiscourse about silent politicians from Germany are analysed to exemplify this approach, based on media texts and protocols of parliamentary inquiries. Ideals of political transparency and communicative openness are identified as a basis for (disappointed) expectations of speech which trigger and determine metadiscourse about politicians' silences. Finally, the book deals critically with the role of those who act as advocates of 'the public's' demand to speak out.

*Analysing Political Discourse* Paul Chilton, 2004-08-02 Written in a lively and engaging style, this book offers a new theoretical perspective on the study of language and politics, and provides an essential introduction to political discourse analysis.

*Political Discourse in the Media* Anita Fetzer, Gerda Eva Lauerbach, 2007-06-27 This book departs from the premise that political discourse is intrinsically connected with media discourse, as shaped by its cultural and transcultural characteristics. It presents a collection of papers which examine political discourse in the media from a cross-culturally comparative perspective in Arab, Dutch, British, Finnish, Flemish, French, German, Israeli, Swedish, US-American and international contexts. By using different theoretical frameworks, such as conversation analysis, discourse analysis, pragmatics and systemic functional linguistics, the papers reflect current moves in political discourse analysis to cross-disciplinary and methodological boundaries by integrating semiotics, particularly multimodality, cognition, context, genre and recipient design.

*Analysing Citizenship Talk* Heiko Hausendorf, Alfons Bora, 2006-02-15 Citizenship talk refers to various types of discourse initiated to make citizens take part in politically and socially contested decision-making processes ('citizen participation'). 'Citizenship' has, accordingly, become one of the dazzling key words whenever the democratic deficit of modern societies is moaned about. Asking for citizenship to be conceived of as a communicative achievement, the present book shows that sociolinguistics and pragmatics can essentially contribute to this interdisciplinary up-to-date issue of research: the volume offers a theoretically innovative concept of communicated citizenship and it presents a set of methodological approaches suited to deal with this concept at an empirical level (including contributions from Conversation Analysis, Critical Discourse Analysis, Social Positioning Theory, Speech Act Theory and Ethnography). Furthermore, concrete data and empirical analyses are provided which take up the case of decision-making processes around the application of modern 'green' biotechnology ('GMO field trials'). The volume thus illustrates the kind of findings and results that can be expected from this new and promising approach towards citizenship talk.

*Analyzing Genres in Political Communication* Piotr Cap, Urszula Okulska, 2013-07-16 Featuring contributions by leading specialists in the field, the volume is a survey of cutting edge research in genres in political discourse. Since, as is demonstrated, "political genres" reveal many of the problems pertaining to the analysis of communicative genres in general, it is also a state-of-the-art addition to contemporary genre theory. The book offers new methodological, theoretical and empirical insights in both the long-established genres (speeches, interviews, policy documents, etc.), and the modern, rapidly-evolving generic forms, such as online political ads or weblogs. The chapters, which engage in timely issues of genre mediatization, hybridity, multimodality, and the mixing of discursive styles, come from a broad range of perspectives spanning Critical Discourse Studies, pragmatics, cognitive psychology, sociolinguistics, applied linguistics and media studies. As such, they constitute essential reading for anyone seeking an interdisciplinary yet coherent research agenda within the vast and complex territory of today's forms of political communication.

**Politicians and Rhetoric** J. Charteris-Black, 2016-01-03 This book analyzes the rhetoric of speeches by major British or

American politicians and shows how metaphor is used systematically to create political myths of monsters, villains and heroes. Metaphors are shown to interact with other figures of speech to communicate subliminal meanings by drawing on the unconscious emotional association of words.

**Critical Discourse Analysis** Simon Statham, 2022-04-03 This book provides a comprehensive account of the discipline of Critical Discourse Analysis (CDA) and demonstrates multiple linguistic methods through which it exposes and demystifies ideologies that are present in institutional discourse. The book enables readers to critique the complexities of the relationship between language and power to expose the ideological operation of discourse. Proceeding from a theoretical grounding for CDA in contemporary society, the book comprises analysis of a wide range of discourse examples, including the news media, political speeches, public service leaflets and social media. Readers are guided through a diverse range of models in CDA in order to scrutinise and assess the role of language in society and to consider and challenge the principles of powerful networks, institutions and organisations.

**Speechwriting in Theory and Practice** Jens E. Kjeldsen, Amos Kiewe, Marie Lund, Jette Barnholdt Hansen, 2019-03-14 This book provides students, researchers, and practitioners of speechwriting with a unique insight in the theory, history, and practice of speechwriting. The combination of theory and practice with case studies from the United States and Europe makes this volume the first of its kind. The book offers an overview of the existing research and theory, analysing how

speeches are written in political and public life, and paying attention to three central subjects of contemporary speechwriting: convincing characterization of the speaker, writing for the ear, and appealing with words to the eye. Chapters address the ethics and the functions of speechwriting in contemporary society and also deliver general instructions for the speechwriting process. This book is recommended reading for professional speechwriters wishing to expand their knowledge of the rhetorical and theoretical underpinnings of speechwriting, and enables students and aspiring speechwriters to gain an understanding of speechwriting as a profession.

**Understanding Political Persuasion: Linguistic and Rhetorical Analysis** Douglas Mark Ponton, 2020-04-02 This book builds on the consolidated research field of Political Discourse Analysis and attempts to provide an introduction suitable for adoption amongst a readership wishing to understand some of the principles underlying such research, and above all to appreciate how the tools of discourse analysis might be applied to actual texts. It summarises some of the work that has been done in this field by authorities such as Halliday, Fairclough, Wodak, Chilton, Van Dijk, Martin, Van Leeuwen and others to provide the would-be analyst with practical ideas for their own research. Naturally, this would not be the first time that such a handbook or introductory reference book has been proposed. Fairclough himself recently produced one; however, his work, simply entitled *Political Discourse Analysis*, inevitably includes theoretical insights from his own research. The beginning analyst can, at times, experience a sense of bewilderment at the mass of theoretical writing in linguistics, in the search for some practical, usable tools. I explain a variety of such tools, demonstrating their usefulness in application to the analysis of a number of political speeches, from different historical periods and diverse social contexts. The author's hope is that would-be students of political rhetoric, of whatever level and from a variety of research areas, will be able to pick up this book and find tools and techniques that will assist them in actual work on texts. Naturally, it is also hoped that they will be inspired to follow up the suggestions for further reading which they will find in the bibliography.

Qualitative Discourse Analysis in the Social Sciences Ruth Wodak, Michal Krzyzanowski, 2017-09-16 What can language tell us about society? Looking at a range of genres, from political speeches to internet chat, this book shows how qualitative methods are used to analyse discourses throughout the social sciences. The practical problems of designing and conducting discourse-based research are solved in this key resource for all social scientists.

When They Go Low, We Go High: Speeches that shape the world - and why we need them Philip Collins, 2017-10-05 A TIMES BOOK OF THE YEAR 'For all those who believe in the politics of principle and hope this a wonderful reminder that they do not always lose. For all those who despair that politics can ever be inspiring again this is a must-read to shake you out of your misery' Paddy Ashdown

**CDA and PDA Made Simple** Bahaa-eddin M. Mazid, 2014-11-24 CDA and PDA Made Simple cuts many long stories short and encapsulates a long-standing tradition in modern and contemporary linguistics. The theoretical scope of the book

encompasses a lengthy review of relevant studies in the area of critical discourse analysis (CDA), and, more broadly, in the areas of power, control, ideology and politics as realized and enacted in discourse. The book also brings together a detailed theoretical background on the main tenets and assumptions, tools and recipes, trends and extensions and critiques and applications of critical and political discourse analysis (PDA). Its analytical focus is predominantly on how ideology and power are linguistically and meta-linguistically realized, specifically through transitivity, modality, metadiscourse and presupposition in some discourse genres in English.
