Women's Human Rights Niamh Reilly, 2013-04-23 *Women's Human Rights: Seeking Gender Justice in a Globalising Age* explores the emergence of transnational, UN-oriented, feminist advocacy for women's human rights, especially over the past three decades. It identifies the main feminist influences that have shaped the movement: liberal, radical, third world and cosmopolitan, and exposes how the Western, legalist, state-centric, and liberal biases of mainstream human rights discourse impede the realisation of human rights in women's lives everywhere. The book traces the evolution of the women's human rights movement through an examination of its key issues, debates, and practical interventions in international law and policy arenas. This includes efforts to: Develop global gender equality norms via the UN Women's Convention; Frame violence against women as a human rights issue; Address gender-based crimes in conflict situations, including women in conflict resolution and post-conflict reconstruction, and challenge new forms of militarism; Highlight the gendered human rights dimensions of widening inequalities in a context of neo-liberal globalisation; Develop human rights responses to anti-feminist fundamentalist movements with a focus on reproductive and sexual rights. Ultimately, *Women's Human Rights* reaffirms a commitment to critically reinterpreted universal human rights principles and demonstrates the vital role that bottom-up, transnational movements play in making them a reality in women's lives.

Schaum's Outline of Theory and Problems of Trigonometry Frank Ayres, Robert E. Moyer, 1999 This edition reflects the changes in the trigonometry curriculum that have taken place between 1993 and 1998. Contrastive Phraseology Paola Cotta Ramusino, Fabio Mollica, 2020 This volume is addressed to researchers in the field of phraseology, and to teachers, translators and lexicographers. It is a collection of essays offering a comprehensive, modern analysis of phrasemes, embracing a wide range of subjects and themes, from linguistic, both applied and theoretical, to cultural aspects. The contrastive approach underlying this variety of themes allows the divergences and analogies between phraseological units in two or more languages to be outlined. The languages compared here are both major and minor, European and non-European, and the text includes contrastive analyses of the most commonly investigated languages.

(French-German, English-Spanish, Russian-German), as well as some less frequently investigated languages (like Ukrainian, Romanian, Georgian and Thai), which are not as well-represented in phraseological description, despite their scientific interest.

Motherless Tongues Vicente L. Rafael,2016-04-01 In *Motherless Tongues*, Vicente L. Rafael examines the vexed relationship between language and history gleaned from the workings of translation in the Philippines, the United States, and beyond. Moving across a range of colonial and postcolonial settings, he demonstrates translation's agency in the making and understanding of events. These include nationalist efforts to vernacularize politics, U.S. projects to weaponize languages in wartime, and autobiographical attempts by area studies scholars to translate the otherness of their lives amid the Cold War. In all cases, translation is at war with itself, generating divergent effects. It deploys as well as distorts American English in counterinsurgency and colonial education, for example, just as it re-articulates European notions of sovereignty among Filipino revolutionaries in the nineteenth century and spurs the circulation of text messages in a civilian-driven coup in the twenty-first. Along the way, Rafael delineates the untranslatable that inheres in every act of translation, asking about the politics and ethics of uneven linguistic and semiotic exchanges. Mapping those moments where translation and historical imagination give rise to one another, *Motherless Tongues* shows how translation, in unleashing the insurgency of language, simultaneously sustains and subverts regimes of knowledge and relations of power.

Museum Theory Andrea Witcomb,Kylie Message,2020-11-17 MUSEUM THEORY EDITED BY ANDREA WITCOMB AND KYLIE MESSAGE Museum Theory offers critical perspectives drawn from a broad range of disciplinary and intellectual traditions. This volume describes and challenges previous ways of understanding museums and their relationship to society. Essays written by scholars from museology and other disciplines address theoretical reflexivity in the museum, exploring the contextual, theoretical, and pragmatic ways museums work, are understood, and are experienced. Organized around three themes—Thinking about Museums, Disciplines and Politics, and Theory from Practice/Practicing Theory—the text includes discussion and analysis of different kinds of museums from various, primarily contemporary, national and local contexts. Essays consider subjects including the nature of museums as institutions and their role in the public sphere, cutting-edge museum practice and their connections with current global concerns, and the links between museum studies and disciplines such as cultural studies, anthropology, and history.

Pot-Honey Patricia Vit, Silvia R. M. Pedro, David Roubik, 2013-01-17 The stingless bees are one of the most diverse, attractive, fascinating, conspicuous and useful of all the insect groups of the tropical world. This is a formidable and contentious claim but I believe it can be backed up. They are fifty times more species rich than the honey bees, the other tribe of highly eusocial bees. They are ubiquitous in the tropics and thrive in tropical cities. In rural areas, they nest in a diversity of sites and are found on the flowers of a broad diversity of crop plants. Their role in natural systems is barely studied but they almost certainly deserve that hallowed title of keystone species. They are popular with the general public and are greatly appreciated in zoos and gardens. The chapters of this book provide abundant further evidence of the ecological and economic importance of stingless bees.

Geography of public service delivery in rural Ethiopia Abate, Gashaw T., Dereje, Mekdim, Hirvonen, Kalle, Minten, Bart, 2019-07-24 Remote areas are often characterized by lower welfare outcomes due to economic disadvantages and higher transaction costs for trade. But their worse situation may also be linked to worse public service delivery. Relying on large household surveys in rural Ethiopia, we explore this by assessing the association of two measures of remoteness – (1) the distance of villages and primary service centers to district capitals and (2) the distance of households to service centers (the last mile) – with public service delivery in agriculture and health sectors. In the agriculture sector, we document statistically significant and economically meaningful associations between exposure to agriculture extension and the two measures of remoteness. For health extension, only the last mile matters. These differences between the two sectors could be due to the fact that more remote villages tend to have fewer agriculture extension workers who also put in fewer hours than their peers in more connected areas. This does not apply in the health sector. These findings provide valuable inputs for policymakers aiming to improve inclusiveness in poor rural areas.

Escritos de Gaveta Comisión de Juristas Creativos del Colegio de Abogados y Abogadas de PR,2020-11-14 La casa de cultura que siempre ha sido el Colegio de Abogados y Abogadas de Puerto Rico ha rebuscado en las gavetas del foro para dar a conocer la creatividad literaria de nuestra abogacía, sobre todo la hasta ahora inédita de colegas y de Amigos y Amigas del Colegio que no se habían animado a compartir su talento con el público lector. Hay en este muestrario de piezas de poesía y de prosa confirmación de talentos ya conocidos, a la vez que sorpresas gratas de plumas que solo se habían expresado dentro de los límites austeros de la redacción jurídica o de otra naturaleza profesional cotidiana. Esta antología recoge una gran variedad de temas, estilos y voces que nos hablan con notable madurez e ingenio de la realidad vivida, transformada por el toque creador o imaginada por la capacidad de fabular del autor.

Welcome to Your World Sarah Williams Goldhagen,2017-04-11 One of the nation's chief architecture critics reveals how the environments we build profoundly shape our feelings, memories, and well-being, and argues that we must harness this knowledge to construct a world better suited to human experience Taking us on a fascinating journey through some of the world's best and worst landscapes, buildings, and cityscapes, Sarah Williams Goldhagen draws from recent research in cognitive neuroscience and psychology to demonstrate how people's experiences of the places they build are central to their well-being, their physical health, their communal and social lives, and even their very sense of themselves. From this foundation, Goldhagen presents a powerful case that societies must use this knowledge to rethink what and how they build: the world needs better-designed, healthier environments that address the complex range of human individual and social needs. By 2050 America's population is projected to increase by nearly seventy million people. This will necessitate a vast amount of new construction—almost all in urban areas—that will dramatically transform our existing landscapes, infrastructure, and urban areas. Going forward, we must do everything we can to prevent the construction of exhausting, overstimulating environments and enervating, understimulating ones. Buildings, landscapes, and cities must both contain and spark associations of natural light, greenery, and other ways of being in landscapes that humans have evolved to need and expect. Fancy exteriors and dramatic forms are never enough, and may not even be necessary; authentic textures and surfaces, and careful, well-executed construction details are just as important. Erudite, wise, lucidly written, and beautifully illustrated with more than one hundred color photographs, *Welcome to Your World* is a vital, eye-opening guide to the spaces we inhabit, physically and mentally, and a clarion call to design for human experience.
