Medical Ethics: A Very Short Introduction Tony Hope,2004-09-23 Issues in medical ethics are rarely out of the media and it is an area of ethics that has particular interest for the general public as well as the medical practitioner. This short and accessible introduction provides an invaluable tool with which to think about the ethical values that lie at the heart of medicine. Tony Hope deals with the thorny moral questions such as euthanasia and the morality of killing, and also explores political questions such as: how should health care resources be distributed fairly? Each chapter in this book considers a different issue: genetics, modern reproductive technologies, resource allocation, mental health, medical research, and discusses controversial questions such as: · Who should have access to reproductive technology? Who should pay? · Is it right to fund expensive drug treatment for individuals? · Should active euthanasia be legalized? · Should treatment for mental illness be imposed on patients without their consent? · Who should have access to information from genetic testing? · Should we require consent for the use of dead bodies or organs in medical research? ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Easeful Death Mary Warnock,Elisabeth Macdonald,2008 iEaseful Death/i sets out in straightforward terms the main

arguments both for and against the legalization of assisted suicide and euthanasia. The legal choices confronting those caring for the terminally ill, and indeed those patients themselves who may be facing intolerable suffering towards the end of their lives, have been the cause of fierce public debate in recent years. The book takes as its starting point attempts in Britain and other countries to bring compassion into the rules governing the end of a patient's life. Drawing on experience in the Netherlands, Belgium, and the US state of Oregon, where either assisted dying or euthanasia have been legalized, the authors explore the philosophical and ethical views on both sides of the debate, and examine how different legislative proposals would affect different members of society, from the very young to the very old. They describe the practical, medical processes of palliative care, self-denial of food and water, and assisted dying and euthanasia, and ultimately conclude that the public is ready to embrace a more compassionate approach to assisted dying. This sensitive and authoritative short volume is informed throughout by a strong sense that, whatever the results of the legislative argument, compassion for one another must be both the guide and the restraint upon the way we treat people who are dying or who want to die.

Moral Literacy Colin McGinn, 1993-06-01 A great resource for beginning ethics courses. The book is short and yet it richly embodies the methods of ethical thinking about practical moral problems that are hard for students to learn unless they see them in action. McGinn perspicuously sets out a small set of basic principles and then attacks the problems of our treatment of animals, abortion, sex, censorship, and so on, with a masterful blend of attention to real-life cases and imaginary thought experiments. McGinn hardly claims to have the last word on the complex issues he discusses, and students will find many exciting problems and points to take up. —Owen Flanagan, Duke University

Being Good Simon Blackburn, 2002-03-14 It is not only in our dark hours that scepticism, relativism, hypocrisy, and nihilism dog ethics. Whether it is a matter of giving to charity, or sticking to duty, or insisting on our rights, we can be confused, or be paralysed by the fear that our principles are groundless. Many are afraid that in a Godless world science has unmasked us as creatures fated by our genes to be selfish and tribalistic, or competitive and aggressive. Simon Blackburn, author of the best-selling *Think*, structures this short introduction around these and other threats to ethics. Confronting seven different objections to our self-image as moral, well-behaved creatures, he charts a course through the philosophical quicksands that often engulf us. Then, turning to problems of life and death, he shows how we should think about the meaning of life, and how we should mistrust the sound-bite sized absolutes that often dominate moral debates. Finally he offers a critical tour of the ways the philosophical tradition has tried to provide foundations for ethics, from Plato and Aristotle through to contemporary debates.

Empirical Ethics in Psychiatry Guy Widdershoven, 2008-02-14 Psychiatry presents a unique array of difficult ethical questions. A major challenge is to approach psychiatry in a way that does justice to the real ethical issues. This book shows how ethics can engage more closely with the reality of psychiatric practice and how empirical methodologies from the social

sciences can help foster this link.

Cancer Nick James, 2011-05-26 In 1961 John F. Kennedy pledged to put a man on the moon by the end of the decade. Nine years later, Neil Armstrong and Buzz Aldrin walked on the moon. Ten years later, Richard Nixon echoed this pledge by declaring a 'war' on cancer. More than 30 years later, however, cancer remains one of the largest causes of death worldwide, with around 1 in 3 developing the disease. Curing cancer is not 'rocket science', but the question is, why has cancer proved to be harder to tackle than the moon landings turned out to be? Cancer research is a major economic activity. There are constant improvements in treatment techniques that result in better cure rates and increased quality and quantity of life for those with the disease, yet stories of breakthroughs in a cure for cancer are often in the media. In this Very Short Introduction Nick James, founder of the CancerHelp UK website, examines the trends in diagnosis and treatment of the disease, as well as its economic consequences. Asking what cancer is and what causes it, he considers issues surrounding expensive drug development, what can be done to reduce the risk of developing cancer, and the use of complementary and alternative therapies. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Trust Me, I'm a (junior) Doctor Max Pemberton, 2008 'Very funny and frank' Independent 'Reads like *Scrubs: The Blog ...* funny and awful in equal measure' Observer ***** The bestselling real life story of a hapless junior doctor, based on his columns written anonymously for the Telegraph. IF YOU'RE GOING to be ill, it's best to avoid the first Wednesday in August. This is the day when junior doctors graduate to their first placements and begin to face having to put into practice what they have spent the last six years learning. Starting on the evening before he begins work as a doctor, this book charts Max Pemberton's touching and funny journey through his first year in the NHS. Progressing from youthful idealism to frank bewilderment, Max realises how little his job is about 'saving people' and how much of his time is taken up by signing forms and trying to figure out all the important things no one has explained yet -- for example, the crucial question of how to tell

whether someone is dead or not. Along the way, Max and his fellow fledgling doctors grapple with the complicated questions of life, love, mental health and how on earth to make time to do your laundry. All Creatures Great and Small meets Bridget Jones's Diary, this is a humorous and accessible peek into a world which you'd normally need a medical degree to witness. If you enjoy Trust Me, I'm a (Junior) Doctor, don't miss the follow-up titles Where Does It Hurt? and The Doctor Will See You Now.

Mason and McCall Smith's Law and Medical Ethics Graeme T. Laurie, Shawn Harmon, Edward Dove, 2019 This classic textbook has provided students of medical law and ethics with a framework for exploring this fascinating subject for over 30 years. The new edition continues to evolve to reflect changes in the law and shifting ethical opinions.

The Ethics of Conditional Confidentiality Mary Alice Fisher, 2013-02-14 The Ethics of Conditional Confidentiality: A Practice Model for Mental Health Professionals is a guidebook designed to help therapists and other mental health professionals navigate the ethical and legal maze surrounding confidentiality.

Oxford Handbook of Medical Ethics and Law Anna Smajdor, Jonathan Herring, Robert Wheeler, 2022 Doctors have been concerned with ethics since the earliest days of medical practice. Traditionally, medical practitioners have been expected to be motivated by a desire to help their patients. Ethical codes and systems, such as the Hippocratic Oath, have emphasised this. During the latter half of the 20th century, advances in medical science, in conjunction with social and political changes, meant that the accepted conventions of the doctor/patient relationship were increasingly being questioned. After the Nuremberg Trials, in which the crimes of Nazi doctors, among others, were exposed, it became clear that doctors cannot be assumed to be good simply by virtue of their profession. Not only this, but doctors who transgress moral boundaries can harm people in the most appalling ways--

Euthanasia, Ethics and Public Policy John Keown, 2002-04-25 Whether the law should permit voluntary euthanasia or physician-assisted suicide is one of the most vital questions facing all modern societies. Internationally, the main obstacle to legalisation has proved to be the objection that, even if they were morally acceptable in certain 'hard cases', voluntary euthanasia and physician-assisted suicide could not be effectively controlled; society would slide down a 'slippery slope' to the killing of patients who did not make a free and informed request, or for whom palliative care would have offered an alternative. How cogent is this objection? This book provides the general reader (who need have no expertise in philosophy, law or medicine) with a lucid introduction to this central question in the debate, not least by reviewing the Dutch euthanasia experience. It will interest all in any country whether currently for or against legalisation, who wish to ensure that their

opinions are better informed.
