Health Promotion Nova Corcoran,2023-12-21 Health Promotion: The Basics introduces not only the fundamental theories and key concepts within this important area of health and social care, but translates these into practice for anyone working in the field. The chapters are structured around the WHO's Ottawa Charter (1986) which underpins the discipline, and cover a comprehensive range of topics. From developing personal skills to understanding government policy, the book looks at health promotion on both an individual and a societal level. It spotlights key topic areas from behaviour change to climate change, as well as exploring how where we live impacts our health, and features practical examples for integrating health promotion into existing service provision and through community action. Including case studies throughout, and further reading for those wishing to explore specific topics, this is the perfect introduction to what health promotion means and how it can improve everyday lives.

PD, Health and PE Fay Courtney,David Thomas,2005

Health Promotion in Health Care - Vital Theories and Research Gørill Haugan,Monica Eriksson,2021-03-11 This open access textbook represents a vital contribution to global health education, offering insights into health promotion as part of patient care for bachelor's and master's students in health care (nurses, occupational therapists, physiotherapists, radiotherapists, social care workers etc.) as well as health care professionals, and providing an overview of the field of health science and health promotion for PhD students and researchers. Written by leading experts from seven countries in Europe, America, Africa and Asia, it first discusses the theory of health promotion and vital concepts. It then presents updated evidence-based health promotion approaches in different populations (people with chronic diseases, cancer, heart failure, dementia, mental disorders, long-term ICU patients, elderly individuals, families with newborn babies, palliative care patients) and examines different health promotion approaches integrated into primary care services. This edited scientific anthology provides much-needed knowledge, translating research into guidelines for practice. Today's medical approaches are highly developed; however, patients are human beings with a wholeness of body-mind-spirit. As such, providing high-quality and effective health care requires a holistic physical-psychological-social-spiritual model of health care is required. A great number of patients, both in hospitals and in primary health care, suffer from the lack of a holistic oriented health approach: Their condition is treated, but they feel scared, helpless and lonely. Health promotion focuses on improving people's health in spite of illnesses. Accordingly, health care that supports/promotes patients' health by identifying their health resources will result in better patient outcomes: shorter hospital stays, less re-hospitalization, being better able to cope at home and improved well-being, which in turn lead to lower health-care costs. This scientific anthology is the first of

its kind, in that it connects health promotion with the salutogenic theory of health throughout the chapters. The authors here expand the understanding of health promotion beyond health protection and disease prevention. The book focuses on describing and explaining salutogenesis as an umbrella concept, not only as the key concept of sense of coherence.

Stimson, 2003-09-02 Drug Injecting and HIV Infection is a comparative international study of drug injecting behaviour and HIV infection based on the World Health Organization's study of 13 cities as disparate as Athens, Bangkok, Glasgow and Rio de Janeiro. Using a standardized methodology for the collection of data, as well as central data management and analysis, this study represents the largest international project of its kind. It presents a comprehensive overview of what is currently known about drug injecting, HIV infection, epidemic dynamics and possibilities for prevention. Topics covered within the chapters include: Exploring the Potential of the Arts to Promote Health and Social Justice Drawing as a Salutogenic Therapy Aid for Grieving Adolescents in Botswana Community Theater for Health Promotion in Japan From Arts to Action: Project SHINE as a Case Study of Engaging Youth in Efforts to Develop Sustainable Water, Sanitation, and Hygiene Strategies in Rural Tanzania and India Movimiento Ventana: An Alternative Proposal to Mental Health in Nicaragua Using Art to Bridge Research and Policy: An Initiative of the United States National Academy of Medicine Arts and Health Promotion is an innovative and engaging resource for a broad audience including practitioners, researchers, university instructors, and artists. It is an important text for undergraduate- and graduate-level courses, particularly in program planning, research methods (especially qualitative methodology), community health, and applied art classes. The book also is useful for professional development among current health promotion practitioners, community nurses, community psychologists, public health professionals, and social workers.
