Working in Teams Alison Hardingham, 1998 One in a series of guides offering expert advice for managers, this book looks at the subject of teamworking from the inside. It shows how to make a more positive and effective contribution to ensure teams work together and achieve together.

Decision-Making Groups and Teams Steven Silver, 2013-11-12 In recent years, there has been increasing implementation of group and team decision-making within organizations, much of it managed electronically, between members of what are virtual groups or teams. Recent research into effective team implementation emphasizes trust as an intermediary process, and trust must be a part of any account of team decision-making. This book provides an integrated framework that represents process in decision-making by interactive groups and teams. This framework furthers both our understanding of process and our capabilities in implementation, based on an account of group decision-making that differentiates the information types contributing to decision quality and relates them to process in interactive groups and teams. Author Steve Silver emphasizes the social structure that is inherent in the interaction of decision-makers as group or team members and effects on the information they exchange.

The Discipline of Teams Jon R. Katzenbach, Douglas K. Smith, 2009-01-08 In *The Discipline of Teams*, Jon Katzenbach and Douglas Smith explore the often counter-intuitive features that make up high-performing teams—such as selecting team members for skill, not compatibility—and explain how managers can set specific goals to foster team development. The result is improved productivity and teams that can be counted on to deliver more than just the sum of their parts. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business

Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

Group and Team Work Ricardo Flores, Antonina Bauman, 2024-01-18 By setting out a step-by-step guide on the implementation of a theoretically robust team work-centric approach to education, *Group and Team Work* explains valuable team work theory and practical dynamics. It details specific approaches educators can take to effectively play different roles, such as that of the facilitator, instructor and coach, thus depicting a varied and detailed picture of team work in higher education.

The Wisdom of Teams Jon R. Katzenbach, Douglas K. Smith, 2015-09-22 The definitive classic on high-performance teams *The Wisdom of Teams* is the definitive work on how to create high-performance teams in any organization. Having sold nearly a half million copies and been translated into more than fifteen languages, the authors' clarion call that teams should be the basic unit of organization for most businesses has permanently shaped the way companies reach the highest levels of performance. Using engaging case studies and testimonials from both successful and failed teams—ranging from Fortune 500 companies to the U.S. Army to high school sports—the authors explain the dynamics of teams both in great detail and with a broad view. Their conclusions and prescriptions span the familiar to the counterintuitive: • Commitment to performance goals and common purpose is more important to team success than team building. • Opportunities for teams exist in all parts of the organization. • Real teams are the most successful spearheads of change at all levels. • Working in teams naturally integrates performance and learning. • Team “endings” can be as important to manage as team “beginnings.” Wisdom lies in recognizing a team's unique potential to deliver results and in understanding its many benefits—development of individual members, team accomplishments, and stronger companywide performance. Katzenbach and Smith's comprehensive classic is the essential guide to unlocking the potential of teams in your organization.

Group Dynamics and Team Interventions Timothy M. Franz, 2012-04-13 Organizations thrive or struggle as a result of interactions among team members. To optimize the performance of teams, *Group Dynamics and Team Interventions* bridges the gap between the most up-to-date academic research findings about group behavior and real-life practice. Chapters summarize the theories behind group and team behavior while offering proven application and intervention techniques that can be utilized in workplace settings. Topics addressed include team formation and development; understanding culture and team diversity; improving team cohesion, decision making, and problem solving; managing and reducing team conflict; team leadership, power, and influence; and others. Brief case studies and interventions that illustrate each theory help to enhance the clarity of the topics. *Group Dynamics and Team Interventions* will benefit academics and practitioners alike, who gain from a better understanding of the dynamics that inform team behavior, along with assessment tools and practical

intervention techniques to create and maintain a high-performing team.

Enhancing the Effectiveness of Team Science National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Team Science, 2015-07-15 The past half-century has witnessed a dramatic increase in the scale and complexity of scientific research. The growing scale of science has been accompanied by a shift toward collaborative research, referred to as team science. Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators, but the challenges of collaboration can slow these teams' progress in achieving their scientific goals. How does a team-based approach work, and how can universities and research institutions support teams? *Enhancing the Effectiveness of Team Science* synthesizes and integrates the available research to provide guidance on assembling the science team; leadership, education and professional development for science teams and groups. It also examines institutional and organizational structures and policies to support science teams and identifies areas where further research is needed to help science teams and groups achieve their scientific and translational goals. This report offers major public policy recommendations for science research agencies and policymakers, as well as recommendations for individual scientists, disciplinary associations, and research universities. *Enhancing the Effectiveness of Team Science* will be of interest to university research administrators, team science leaders, science faculty, and graduate and postdoctoral students.

The must-read book presents both practical and theoretical perspectives about how we can use leadership to create and deliver value for both the individual and common good in the twenty-first century. The book also challenges our thoughts about leadership to provide a key insight for today's leaders. The aim of Leadership Makes the Difference but Leaders Matter is to bring us to question our held assumptions about leadership to improve our leadership skills. It shows striking differences between the concept of leader and leadership and argues that though leaders' matter, leadership makes the difference in bringing about necessary and constructive change, which is the ultimate goal of leadership. Leadership Makes the Difference but Leaders Matter explains that being in a leader's position does not guarantee leadership, and that leadership itself is a concept of shared influence which begins not with influence but ideas and vision, and centers around communication and actions, with trust, power, influence, commitment and competence as core pillars. It also discusses trust and the sources of power as the main avenues for negotiating power in leadership. Are you driven to lead or driven to leadership? Leadership Makes the Difference but Leaders Matter is for Scholars, Practitioners, Governments and Trainers.

Team of Teams General Stanley McChrystal, David Silverman, Tatum Collins, Chris Fussell, 2015-11-26 What if you could combine the agility, adaptability, and cohesion of a small team with the power and resources of a giant organization? 'Team of Teams provides a blueprint for how to cope with increasing complexity in the world. A must read for anyone who cares about the future - and that means all of us' Daniel Levitin, author of *The Organized Mind* _____ When General Stanley McChrystal took command of the Joint Special Operations Task Force in Iraq in 2003, he quickly realized that conventional military tactics were failing. The allied forces had a huge advantage in numbers, equipment and training - but none of the enemy's speed and flexibility. McChrystal and his colleagues discarded a century of conventional wisdom to create a 'team of teams' that combined extremely transparent communication with decentralized decision-making authority. Faster, flatter and more flexible, the task force beat back al-Qaeda. In this powerful book, McChrystal and his colleagues show how the challenges they faced in Iraq can be relevant to any leader. Through compelling examples, the authors demonstrate that the 'team of teams' strategy has worked everywhere from hospital emergency rooms to NASA and has the potential to transform organizations large and small. _____ 'A bold argument that leaders can help teams become greater than the sum of their parts' Charles Duhigg, author of *The Power of Habit* 'An indispensable guide to organizational change' Walter Isaacson, author of *Steve Jobs* 'A must-read book for anyone serious about taking their leadership further, faster' John Venhuizen, president & CEO, Ace Hardware Corporation

Building a Team that Works Joe Johnson, 1998 This title helps you to develop your capabilities so that you can better guide your work team to acknowledged success. A secondary aim is to encourage you to identify the teams in your organisation of which you are a member, and to play your full part in making these teams successful.
