Judaism and the West Robert Erlewine, 2016-08-08 Grappling with the place of Jewish philosophy at the margin of religious studies, Robert Erlewine examines the work of five Jewish philosophers—Hermann Cohen, Martin Buber, Franz Rosenzweig, Abraham Joshua Heschel, and Joseph Soloveitchik—to bring them into dialogue within the discipline. Emphasizing the tenuous place of Jews in European, and particularly German, culture, Erlewine unapologetically contextualizes Jewish philosophy as part of the West. He teases out the antagonistic and overlapping attempts of Jewish thinkers to elucidate the philosophical and cultural meaning of Judaism when others sought to deny and even expel Jewish influences. By reading the canon of Jewish philosophy in this new light, Erlewine offers insight into how Jewish thinkers used religion to assert their individuality and modernity.

The Way of Man Martin Buber, 1966

Interreligious Theology Ephraim Meir, 2015-08-17 This book is the first greater attempt to construct a dialogical theology from a Jewish point of view. It contributes to an emerging new theology that promotes the interrelatedness of religions in which encounter, openness, hospitality and permanent learning are central. The monograph is about the self and the other, inner and outer, own and strange; about borders and crossing borders, and about the sublime activities of passing and translating. Meir analyses and critically discusses the writings of great contemporary Jewish dialogical thinkers and argues that the values of interreligious theology are moored in their thoughts. In his view interreligious dialogue supposes attentive listening, humility, a critical attitude towards oneself and others, a good amount of self-relativism and humor. It is about proximity, dialogical reading, engagement and interconnectedness.

Ich und Du, 1947

Contemporary Jewish Philosophy Irene Kajon, 2020-04-02 This text introduces the most important Jewish philosophers of contemporary times from the point of view of their original approach to both Judaism and philosophy and include: Hermann Cohen, Franz Rosenzweig, Martin Buber, Leo Strauss, Emmanuel Levinas. It shows how for them the dialogue between Judaism and philosophy is necessary in order to avoid on one side, an attachment to Jewish tradition which is only nationalistic or non-rational; and on the other, an idea of philosophy which first of all focuses the problems of nature, human existence in the world, or God as the origin of being. In reconstructing the intellectual evolution of each of these twentieth-century philosophers with a view to their meaning today, this book is unique and goes beyond the standard historical account provided by other books. Contemporary Jewish Philosophy is essential reading for researchers and students of philosophy, Judaism and the history of religions.

The Existential Philosophy of Etty Hillesum Meins G. S. Coetsier, 2014-01-09 In *The Existential Philosophy of Etty Hillesum* Meins G.S. Coetsier breaks new ground by demonstrating the Jewish existential nature of Etty Hillesum's spiritual and cultural life in light of the writings of Martin Buber, Emmanuel Levinas and Dietrich Bonhoeffer. Hillesum's diaries and letters, written between 1941 and 1943, illustrate her struggle to come to terms with her personal life in the context of the Second World War and the Shoah. By finding God under the rubble of the horrors, she rediscovers the divine presence between humankind, while taking up responsibility for the Other as a way to embrace justice and compassion. In a fascinating, accessible and thorough study, Coetsier dispels much of the confusion that assails readers when they are exposed to the bewildering range of Christian and Jewish influences and other cultural interpretations of her writings. The result is a convincing and profound picture of Etty Hillesum's path to spiritual freedom.

Volume 9: Kierkegaard and Existentialism Jon Stewart, 2016-12-05 There can be no doubt that most of the thinkers who are usually associated with the existentialist tradition, whatever their actual doctrines, were in one way or another influenced by the writings of Kierkegaard. This influence is so great that it can be fairly stated that the existentialist movement was largely responsible for the major advance in Kierkegaard's international reception that took place in the twentieth century. In Kierkegaard's writings one can find a rich array of concepts such as anxiety, despair, freedom, sin, the crowd, and sickness that all came to be standard motifs in existentialist literature. Sartre played an important role in canonizing Kierkegaard as one of the forerunners of existentialism. However, recent scholarship has been attentive to his ideological use of Kierkegaard. Indeed, Sartre seemed to be exploiting Kierkegaard for his own purposes and suspicions of misrepresentation and distortions have led recent commentators to go back and reexamine the complex relation between Kierkegaard and the existentialist thinkers. The articles in the present volume feature figures from the French, German, Spanish and Russian traditions of existentialism. They examine the rich and varied use of Kierkegaard by these later thinkers, and, most importantly, they critically analyze his purported role in this famous intellectual movement.

Martin Buber's Dialogical Thought as a Philosophy of Action Asaf Ziderman,

Situating Existentialism Jonathan Judaken, Robert Bernasconi, 2012 This anthology provides a history of the systemization and canonization of existentialism, a quintessentially antisystemic mode of thought. Situating existentialism within the history of ideas, it features new readings on the most influential works in the existential canon, exploring their formative contexts and the cultural dialogues of which they were a part. Emphasizing the multidisciplinary and global nature of existential arguments, the chosen texts relate to philosophy, religion, literature, theater, and culture and reflect European, Russian, Latin American, African, and American strains of thought. Readings are grouped into three thematic categories: national contexts, existentialism and religion, and transcultural migrations that explore the reception of existentialism. The volume explains how literary giants such as Dostoevsky and Tolstoy were incorporated into the existentialist fold and how

inclusion into the canon recast the work of Kierkegaard and Nietzsche, and it describes the roles played by Jaspers and Heidegger in Germany and the Paris School of existentialism in France. Essays address not only frequently assigned works but also underappreciated discoveries, underscoring their vital relevance to contemporary critical debate. Designed to speak to a new generation's concerns, the collection deploys a diverse range of voices to interrogate the fundamental questions of the human condition.

The Knowledge of Man Martin Buber, 1988 These six essays present one of the most significant stages in the development of Buber's philosophical thought and particularly his philosophical anthropology. This edition includes an appendix consisting of an interesting dialogue between Buber and psychologist Carl R. Rogers.

Prophecy J. A. Emerton, 2011-11-30 The series Beihefte zur Zeitschrift für die alttestamentliche Wissenschaft (BZAW) covers all areas of research into the Old Testament, focusing on the Hebrew Bible, its early and later forms in Ancient Judaism, as well as its branching into many neighboring cultures of the Ancient Near East and the Greco-Roman world.

Art and Belief Ruth Illman, 2014-09-19 'Art and Belief' explores communication between faiths through an examination of contemporary artistic practice. The book discusses how a range of artists formulate their worldview and what motivates them to engage in dialogue. These artists are engaged in a wide range of artistic forms and practice and come to dialogue from diverse religious positions. The aim of the book is to question the assumptions of interreligious dialogue as a largely intellectual exercise in defining the religious other and to explore dialogue as a manifestation of interpersonal ethics.

Learning Through Dialogue Kenneth Paul Kramer, 2013-04-08 Educational practice today often fails to make the crucial distinction between learning as an accumulation of information and learning as a dialogical interaction that elicits one's personal response to the material. Learning Through Dialogue offers an alternative approach to teaching and learning, which utilizes Martin Buber's dialogical principles: turning toward, addressing affirmatively, listening attentively, and responding responsibly. The book first presents Buber's educational theory and method and second presents specific examples of how Buber's dialogical philosophy can be applied in the classroom. Rather than imposing one's own views, this approach enables teachers and students to develop course content in uniquely appropriate ways. If you are a teacher, a student, an educator at any level, or anyone interested in furthering his or her ability to engage more meaningfully with the educational process, this book will challenge you with fresh perspectives.

The Palgrave Handbook of German Idealism and Existentialism Jon Stewart, 2020-08-25 This Handbook explores the complex relations between two great schools of continental philosophy: German idealism and existentialism. While the existentialists are commonly thought to have rejected idealism as overly abstract and neglectful of the concrete experience of the individual, the chapters in this collection reveal that the German idealists in fact anticipated many key existentialist ideas. A radically new vision of the history of continental philosophy is thereby established, one that understands

existentialism as a continuous development from German idealism. Key Features Operates at both the macro-level and micro-level, treating both the two schools of thought and the individual thinkers associated with them Explores the relations from shifting perspectives by examining how the German idealists anticipated existentialist themes and how the existentialists concretely drew on the work of the idealists Meticulously uncovers and documents many little-known points of contact between the German idealists and the existentialists Includes often neglected figures such as Jacobi and Trendelenburg This Handbook is an essential resource for researchers and advanced students interested in thinking critically about the broad development of continental philosophy. Moreover, the individual chapters on specific philosophers contain a wealth of information that will compel experts in the field to reconsider their views on these figures.

Thinking for Clinicians Donna M. Orange,2009-06-24 Thinking for Clinicians provides analysts of all orientations with the tools and context for working critically within psychoanalytic theory and practice. It does this through detailed chapters on some of the philosophers whose work is especially relevant for contemporary theory and clinical writing: Emmanuel Levinas, Martin Buber, Ludwig Wittgenstein, Maurice Merleau-Ponty, and Hans-Georg Gadamer. Orange presents the historical background for their ideas, along with clinical vignettes to help contextualize their theories, further grounding them in real-world experience. With a hermeneutic sensibility firmly in mind, Thinking for Clinicians rewards as it challenges and will be a valuable reference for clinicians who seek a better understanding of the philosophical bases of contemporary psychoanalytic theory.
