*Disability as Diversity in Higher Education* Eunyoung Kim,Katherine C. Aquino,2017-02-03 Addressing disability not as a form of student impairment—as it is typically perceived at the postsecondary level—but rather as an important dimension of student diversity and identity, this book explores how disability can be more effectively incorporated into college environments. Chapters propose new perspectives, empirical research, and case studies to provide the necessary foundation for understanding the role of disability within campus climate and integrating students with disabilities into academic and social settings. Contextualizing disability through the lens of intersectionality, *Disability as Diversity in Higher Education* illustrates how higher education institutions can use policies and practices to enhance inclusion and student success.

**From Disability to Diversity** Lynne C. Shea,Linda Hecker,Adam R. Lalor,2019-02-25 Colleges and universities are seeing increasing numbers of students with a range of disabilities enrolling in postsecondary education. Many of these disabilities are invisible and, despite their potential for negative impact on students' academic and social adjustment, some students will choose not to identify as having a disability or request support. Approaching disability from the perspective of difference, the authors of this new volume offer guidance on creating more inclusive learning environments on campus so that all students—whether or not they have a recognized disability—have the opportunity to succeed. Strategies for supporting students with specific learning disabilities, attention-deficit/hyperactivity disorder, autism spectrum disorder or who display learning and behavioral characteristics associated with these profiles are described. A valuable resource for instructors, advisors, academic support personnel, and others who work directly with college students.

Teaching Students With High-Incidence Disabilities Mary Anne Prater,2016-12-29 To ensure that all students receive quality instruction, *Teaching Students with High-Incidence Disabilities* prepares preservice teachers to teach students with learning disabilities, emotional behavioral disorders, intellectual disabilities, attention deficit hyperactivity, and high

functioning autism. It also serves as a reference for those who have already received formal preparation in how to teach special needs students. Focusing on research-based instructional strategies, Mary Anne Prater gives explicit instructions and includes models throughout in the form of scripted lesson plans. The book also has a broad emphasis on diversity, with a section in each chapter devoted to exploring how instructional strategies can be modified to accommodate diverse exceptional students. Real-world classrooms are brought into focus using teacher tips, embedded case studies, and technology spotlights to enhance student learning.

Barnartt, 2016-12-22 The purpose of this volume is to explore existing literature, with an eye towards encouraging scholars not to ask “the same old” questions but to use older writings as a basis for revolutionary and evolutionary thinking. **Controversies and Disputes in Disability and Rehabilitation** Roland Meinert, Francis Yuen, 2014-06-11 Although the field of disability services and societal understanding of disability issues have advanced in recent decades there remain controversial subjects and unresolved disputes. These cover a wide spectrum from legislation impacting the entire disability community such as the ADA, to culture clashes within a minority group such as the deaf community. Experts analyze and discuss nine of these controversies of particular interest to professional social workers. They are ones about which there are obvious disagreements and no readily available solutions . All sides of the issues are examined to enable readers to draw their own conclusions. The overall intent is to draw attention to each controversy and to motivate professional social workers to engage in personal as well as public dialogue about them. This book was originally published as a special issue of *Journal of Social Work in Disability and Rehabilitation*.

**Accessibility and Diversity in Education: Breakthroughs in Research and Practice** Management Association, Information Resources, 2019-12-06 Education is a necessary foundation for improving one’s livelihood in today’s society. However, traditional learning has often excluded or presented a challenge to students with visual, physical, or cognitive disabilities and can create learning gaps between students of various cultures. It is vital that learning opportunities are tailored to meet individual needs, regardless of individual disabilities, gender, race, or economic status in order to create more inclusive educational practices. *Accessibility and Diversity in Education: Breakthroughs in Research and Practice* examines emerging methods and trends for creating accessible and inclusive educational environments and examines the

latest teaching strategies and methods for promoting learning for all students. It also addresses equal opportunity and diversity requirements in schools. Highlighting a range of topics such as open educational resources, student diversity, and inclusion barriers, this publication is an ideal reference source for educators, principals, administrators, provosts, deans, curriculum developers, instructional designers, school boards, higher education faculty, academicians, students, and researchers.

*Disability as Diversity* Leslie Neal-Boylan, Lisa M. Meeks, 2020-10-31 Administrators in medical, nursing and health science programs are witnessing a substantial increase in the number of students with disabilities entering their programs. Concurrently, the benefits of diversity in healthcare are becoming increasingly apparent and important. A commitment to disability inclusion for qualified students should be a high-level goal of nursing, medical, and other health science programs. To support this goal, leaders in these areas must develop robust programs and an understanding of the needs of qualified students with disabilities in the health sciences and accompanying best practices for inclusion. This book of case studies is the perfect companion to Meeks' and Neal-Boylan's recently-published book *Disability as Diversity*. It contains ten cases related to medicine and nursing but with significant relevance to other health professions. Each case is preceded by an introduction with instructions on how to use it. The cases are followed by discussion questions and perspectives from the student, faculty and disability resource professional viewpoints. The cases are then deconstructed with reference to the book *Disability as Diversity*, relevant citations from the literature and case law. Developed by some of the most notable researchers and clinicians in the field this case book serves as truly invaluable resource for deans, program directors, faculty and student affairs personnel. Offices can use these cases as a platform for critical discussion and training about disability processes, policies and decision-making regarding accommodations and inclusion.

**Understanding Contemporary Issues in Higher Education** Brendan Bartram, 2020-10-29 This insightful book offers a wide-ranging collection of lively discussions on contemporary issues, policies and practices in higher education.
