The Book of Emma Reyes Emma Reyes, 2017-08-08 “Startling and astringently poetic.” —The New York Times A literary discovery: an extraordinary account, in the tradition of *The House on Mango Street* and *Angela’s Ashes*, of a Colombian woman’s harrowing childhood This astonishing memoir was hailed as an instant classic when first published in Colombia in 2012, nearly a decade after the death of its author, who was encouraged in her writing by Gabriel García Márquez. Comprised of letters written over the course of thirty years, and translated and introduced by acclaimed writer Daniel Alarcón, it describes in vivid, painterly detail the remarkable courage and limitless imagination of a young girl growing up with nothing. Emma Reyes was an illegitimate child, raised in a windowless room in Bogotá with no water or toilet and only ingenuity to keep her and her sister alive. Abandoned by their mother, she and her sister moved to a Catholic convent housing 150 orphan girls, where they washed pots, ironed and mended laundry, scrubbed floors, cleaned bathrooms, sewed garments and decorative cloths for the nuns—and lived in fear of the Devil. Illiterate and knowing nothing of the outside world, Emma escaped at age nineteen, eventually establishing a career as an artist and befriending the likes of Frida Kahlo and Diego Rivera as well as European artists and intellectuals. The portrait of her childhood that emerges from this clear-eyed account inspires awe at the stunning early life of a gifted writer whose talent remained hidden for far too long. Deep Medicine Eric Topol,2019-03-12 A Science Friday pick for book of the year, 2019 One of America's top doctors reveals how AI will empower physicians and revolutionize patient care Medicine has become inhuman, to disastrous effect. The doctor-patient relationship--the heart of medicine--is broken: doctors are too distracted and overwhelmed to truly connect with their patients, and medical errors and misdiagnoses abound. In Deep Medicine, leading physician Eric Topol reveals how artificial intelligence can help. AI has the potential to transform everything doctors do, from notetaking and medical scans to diagnosis and treatment, greatly cutting down the cost of medicine and reducing human mortality. By freeing physicians from the tasks that interfere with human connection, AI will create space for the real healing that takes place between a doctor who can listen and a patient who needs to be heard. Innovative, provocative, and hopeful, Deep Medicine shows us how the awesome power of AI can make medicine better, for all the humans involved.

Cancer Immunology and Immunotherapy Mansoor M. Amiji,Lara Scheherazade Milane,2021-08-18 Delivery Technologies for Immuno-Oncology: Volume 1: Delivery Strategies and Engineering Technologies in Cancer Immunotherapy examines the challenges of delivering immuno-oncology therapies. Immuno-oncology (IO) is a growing field of medicine at the interface of immunology and cancer biology leading to development of novel therapeutic approaches, such as chimeric antigen receptor T-cell (CAR-T) and immune checkpoint blockade antibodies, that are clinically approved approaches for cancer therapy. Although currently approved IO approaches have shown tremendous promise for select types of cancers, broad application of IO strategies could even further improve the clinical success, especially for diseases such as pancreatic cancer, brain tumors where the success of IO so far has been limited. Nanotechnology-based targeted delivery strategies could improve the delivery efficiency of IO agents as well as provide additional avenues for novel therapeutic and vaccination strategies. Additionally, a number of locally-administered immunogenic scaffolds and therapeutic strategies, such as the use of STING agonist, could benefit from rationally designed biomaterials and delivery approaches. Delivery Technologies for Immuno-Oncology: Volume 1: Delivery Strategies and Engineering Technologies in Cancer Immunotherapy creates a comprehensive treaty that engages the scientific and medical community who are involved in the challenges of immunology, cancer biology, and therapeutics with possible solutions from the nanotechnology and drug delivery side. - Comprehensive treaty covering all aspects of immuno-oncology (IO) - Novel strategies for delivery of IO therapeutics and vaccines - Forecasting on the future of nanotechnology and drug delivery for IO

Start with No Jim Camp, 2011-12-07 *Start with No* offers a contrarian, counterintuitive system for negotiating any kind of deal in any kind of situation—the purchase of a new house, a multimillion-dollar business deal, or where to take the kids for dinner. Think a win-win solution is the best way to make the deal? Think again. For years now, win-win has been the paradigm for business negotiation. But today, win-win is just the seductive mantra used by the toughest negotiators to get the other side to compromise unnecessarily, early, and often. Win-win negotiations play to your emotions and take advantage of your instinct and desire to make the deal. *Start with No* introduces a system of decision-based negotiation that teaches you how to understand and control these emotions. It teaches you how to ignore the siren call of the final result, which you can't really control, and how to focus instead on the activities and behavior that you can and must control in order to successfully negotiate with the pros. The best negotiators: * aren't interested in "yes"—they prefer "no" * never, ever rush to close, but always let the other side feel comfortable and secure * are never needy; they take advantage of the other party's neediness * create a "blank slate" to ensure they ask questions and listen to the answers, to make sure they have no assumptions and expectations * always have a mission and purpose that guides their decisions * don't send so much as an e-mail without an agenda for what they want to accomplish * know the four "budgets" for themselves and for the other side: time, energy, money, and emotion * never waste time with people who don't really make the decision *Start with No* is full of dozens of business as well as personal stories illustrating each point of the system. It will change your life as a negotiator. If you put to good use the principles and practices revealed here, you will become an immeasurably better negotiator.

World Health Statistics 2008 World Health Organization, 2008 This annual edition presents the most recent statistics since 1990 of over 80 health indicators for WHO's 193 Member States. This fourth edition includes an expanded set of over 76 key indicators and a section with 10 highlights in global health statistics in the past year. This book has been collated from publications and databases of WHO's technical programmes and regional offices. The core set of indicators was selected on the basis of relevance for global health, availability and quality of data, and accuracy and comparability of estimates. The

statistics for the indicators are based on an interactive process of data collection, compilation, quality assessment, and estimation between WHO technical programmes and its Member States. In this process, WHO strives to maximize accessibility, accuracy, comparability, and transparency of country health statistics. In addition to national statistics, this publication presents statistics on the inequalities in health outcomes and interventions coverage within countries, disaggregated by urban/rural setting, wealth/assets, and educational level. Such statistics are primarily derived from the analysis of household surveys and are only available for a limited number of countries.

EBOOK: Nordic Health Care Systems: Recent Reforms and Current Policy Challenges Jon Magnussen, Karsten Vrangbaek, Richard Saltman, 2009-09-16 The book is very valuable as actual information about the health systems in the Nordic countries and the changes that have been made during the last two decades. It informs well both about the similarities within the 'Nordic Health Model' and the important differences that exist between the countries. Bo Könberg, County Governor, Former Minister of Health and Social Insurance in Sweden (1991-94) This book is a rich, interesting and very useful document. I have been looking, for example, today for precise information on political governing which is not displayed anywhere else. It will be of importance in many aspects! Johan Calltorp MD PhD, Professor of Health Policy and Management, The Nordic School of Public Health, Gotenburg The publishing of this book about the Nordic health care systems is a major event for those interested not only in Nordic health policy and health systems but also for everybody interested in comparative health policy and health systems. It is the first book in its kind. It covers the four 'large' Nordic countries, Denmark, Norway, Sweden and Finland, and does so in a very systematically comparative way. The book is well organized, covers 'everything' and is analytically sophisticated. Ole Berg, Institute of Health Management and Health Economics, University of Oslo, Norway This book examines recent patterns of health reform in Nordic health care systems, and the balance between stability and change in how these systems have developed. The health systems in Norway, Denmark, Sweden and Finland are investigated through detailed comparisons along a variety of policy-driven parameters. The following themes are explored: Politicians, patients, and professions Financing, production, and distribution The role of the primary health sector The role of public health Internal management mechanisms Impact of the European Union The book probes the impact of these topics and then contrasts the development across all four, allowing the reader to gain a sense of perspective both on the individual countries as well as on the region as a whole. The editors also explore the extent to which a Nordic Health Care Model exists, and the degree to which that model will continue to help explain the future direction of health policy-making in these four countries. An additional chapter on recent developments in Iceland completes the work. Contributors: Tinna L. Ásgeirsdóttir, Paula Blomquist, Johan Calltorp, Terje P. Hagen, Unto Häkkinen, Peter K. Jespersen, Pia M. Jonsson, Lars Erik Kjekshus, Allan Krasnik, Meri Larivaara, Juhani Lehto, Kalevi Luoma, Jon Magnussen, Dorte S. Martinsen, Pål E. The Organizational Complex Reinhold Martin, 2005-09-23 A historical and theoretical analysis of corporate architecture in the United States after the Second World War. The Organizational Complex is a historical and theoretical analysis of corporate architecture in the United States after the Second World War. Its title refers to the aesthetic and technological extension of the military-industrial complex, in which architecture, computers, and corporations formed a network of objects, images, and discourses that realigned social relations and transformed the postwar landscape. In-depth case studies of architect Eero Saarinen's work for General Motors, IBM, and Bell Laboratories and analyses of office buildings designed by Skidmore, Owings & Merrill trace the emergence of a systems-based model of organization in architecture, in which the modular curtain wall acts as both an organizational device and a carrier of the corporate image. Such an image—of the corporation as a flexible, integrated system—is seen to correspond with a humanization of corporate life, as corporations decentralize both spatially and administratively. Parallel analyses follow the assimilation of cybernetics into aesthetics in the writings of artist and visual theorist Gyorgy Kepes, as art merges with techno-science in the service of a dynamic new pattern-seeing. Image and system thus converge in the organizational complex, while top-down power dissolves into networked, pattern-based control. Architecture, as one among many media technologies, supplies the patterns—images of organic integration designed to regulate new and unstable human-machine assemblages.
