The Trachtenberg Speed System of Basic Mathematics Jakow Trachtenberg,2011-03-01 Do high-speed, complicated arithmetic in your head using the Trachtenberg Speed System. Ever find yourself struggling to check a bill or a payslip? With The Trachtenberg Speed System you can. Described as the 'shorthand of mathematics', the Trachtenberg system only requires the ability to count from one to eleven. Using a series of simplified keys it allows anyone to master calculations, giving greater speed, ease in handling numbers and increased accuracy. Jakow Trachtenberg believed that everyone is born with phenomenal abilities to calculate. He devised a set of rules that allows every child to make multiplication, division, addition, subtraction and square-root calculations with unerring accuracy and at remarkable speed. It is the perfect way to gain confidence with numbers.

Qualitative Research for Education Robert Bogdan,Sari Knopp Biklen,2007 This concise, applied, and very clearly written introduction to qualitative research methods can be used effectively in a semester, or year-long course. This introductory-level text provides the reader with a background for understanding the uses of qualitative research in education (and other professions) examining its theoretical and historical underpinnings, and providing the how-to's of doing qualitative research. This new edition places qualitative research within current debates about research methods and alternative ways of knowing. While the authors approach the subject from a sociological perspective, they also take care to reflect the many changes in conceptualization of qualitative research brought by post-structural and feminist thought. New to This Edition: - Rewritten Chapter 5, Data Analysis, places more emphasis on the interpretive aspect of research and research writing. - Expanded coverage of action or practitioner research (Chapter 7) highlights a topic that is of immediate use. - Added emphasis on technology and qualitative analysis software in qualitative research helps students to use and incorporate technology

efficiently. Links to useful research websites have also been integrated throughout. - Expanded coverage of such topics as formal research designs, work with different cultures, critical race theory, and the debate over quantitative vs. qualitative research. - New end-of-chapter summaries, questions, and field assignments have been added to make this text easy to use with students. - A new Instructor's Manual/Test Bank is available online to adopters by contacting your local representative.

Teaching Personal and Social Responsibility Through Physical Activity Donald R. Hellison,2011 This edition presents practical, field-tested ideas for teaching personal and social responsibility (TPSR) through physical activity in schools and other settings. Includes guidance in teaching affective and social moral goals, an in-depth look into teaching character development and values, and a method for helping students develop personal and social responsibility.

Caliban and the Witch Silvia Federici,2021-07-29 'A groundbreaking work . . . Federici has become a crucial figure for . . . a new generation of feminists' Rachel Kushner, author of *The Mars Room* A cult classic since its publication in the early years of this century, *Caliban and the Witch* is Silvia Federici's history of the body in the transition to capitalism. Moving from the peasant revolts of the late Middle Ages through the European witch-hunts, the rise of scientific rationalism and the colonisation of the Americas, it gives a panoramic account of the often horrific violence with which the unruly human material of pre-capitalist societies was transformed into a set of predictable and controllable mechanisms. It is a study of indigenous traditions crushed, of the enclosure of women's reproductive powers within the nuclear family, and of how our modern world was forged in blood. 'Rewarding . . . allows us to better understand the intimate relationship between modern patriarchy, the rise of the nation state and the transition from feudalism to capitalism' Guardian

Screen Genealogies Craig Buckley,Rudiger Campe,Francesco Casetti,2019-11-15 Against the grain of the growing literature on screens, **Screen Genealogies** argues that the present excess of screens cannot be understood as an expansion and multiplication of the movie screen nor of the video display. Rather, screens continually exceed the optical histories in which they are most commonly inscribed. As contemporary screens become increasingly decomposed into a distributed field of technologically interconnected surfaces and interfaces, we more readily recognize the deeper spatial and environmental interventions that have long been a property of screens. For most of its history, a screen was a filter, a divide, a shelter, or a camouflage. A genealogy stressing transformation and descent rather than origins and roots emphasizes a deeper set of intersecting and competing definitions of the screen, enabling new thinking about what the screen might yet become.

Anti-Judaism David Nirenberg,2013-07-01 A magisterial history, ranging from antiquity to the present, that reveals anti-Judaism to be a mode of thought deeply embedded in the Western tradition. There is a widespread tendency to regard anti-Judaism - whether expressed in a casual remark or implemented through pogrom or extermination campaign - as somehow exceptional: an unfortunate indicator of personal prejudice or the shocking outcome of an extremist ideology married to

power. But, as David Nirenberg argues in this ground-breaking study, to confine anti-Judaism to the margins of our culture is to be dangerously complacent. Anti-Judaism is not an irrational closet in the vast edifice of Western thought, but rather one of the basic tools with which that edifice was constructed.

Short-Cut Math Gerard W. Kelly, 2014-11-18 Clear, concise compendium of about 150 time-saving math short-cuts features faster, easier ways to add, subtract, multiply, and divide. Each problem includes an explanation of the method. No special math ability needed.

Theories of the Policy Process Christopher M. Weible, Paul A. Sabatier, 2018-05-15 *Theories of the Policy Process* provides a forum for the experts in the most established and widely used theoretical frameworks in policy process research to present the basic propositions, empirical evidence, latest updates, and the promising future research opportunities of each framework. This well-regarded volume covers such enduring classics as Multiple Streams (Zahariadis et al.), Punctuated Equilibrium (Jones et al.), Advocacy Coalition Framework (Jenkins-Smith et al.), Institutional Analysis and Development Framework (Schlager and Cox), and Policy Diffusion (Berry and Berry), as well as two newer theories—Policy Feedback (Mettler and SoRelle) and Narrative Policy Framework (McBeth et al.). The fourth edition now includes a discussion of global and comparative perspectives in each theoretical chapter and a brand-new chapter that explores how these theories have been adapted for, and employed in, non-American and non-Western contexts. An expanded introduction and revised conclusion fully examines and contextualizes the history, trajectories and functions of public policy research. Since its first publication in 1999, *Theories of the Policy Process* has been, and remains, the quintessential gateway to the field of policy process research for students, scholars and practitioners.

Portrait of Myself Margaret Bourke-White, 2016-08-09 This is the story of the internationally acclaimed American woman Margaret Bourke-White, who for over thirty years made photographic history: as the first photographer to see the artistic and storytelling possibilities in American industry, as the first to write social criticism with a lens, and as the most distinguished and venturesome foreign correspondent-with-a-camera to report wars, politics and social and political revolution on three continents. In this poignant autobiography, Bourke-White details her fight against Parkinson's disease, and recounts tales of her struggles to master her art and craft, of photographing Stalin, Gandhi and many other notables, of being torpedoed off North Africa while reporting World War II, of flying combat missions, of photographing the dread murder camps of Nazi Germany, of touring Tobacco Road to produce the book *You Have Seen Their Faces* with Erskine Caldwell (whom she later married), of adventures—and wonderful picture-taking—in the mines of South Africa, in the frozen North, in war-torn Korea. Illustrated throughout with over 70 of Margaret Bourke-White's fine photographs, this is the great life story of a great American, greatly yet modestly told.

The Obamas Jodi Kantor, 2012-01-10 Award-winning reporter Jodi Kantor takes readers deep inside the White House in

an insightful and evocative portrait of Barack and Michelle Obama (Chicago Tribune) that will surprise even readers who thought they knew the two icons. When Barack Obama won the 2008 presidential election, he also won a long-running debate with his wife Michelle. Contrary to her fears, politics now seemed like a worthwhile, even noble pursuit. Together they planned a White House life that would be as normal and sane as possible. Then they moved in. In the Obamas, Jodi Kantor takes us deep inside the White House as they try to grapple with their new roles, change the country, raise children, maintain friendships, and figure out what it means to be the first black President and First Lady. The Obamas is filled with riveting detail and insight into their partnership, emotions and personalities, and written with a keen eye for the ironies of public life.

The Invention of Tradition Eric Hobsbawm, Terence Ranger, 1992-07-31 This book explores examples of this process of invention and addresses the complex interaction of past and present in a fascinating study of ritual and symbolism.

Mental Math Abhishek VR, 2019-05-19 Discover the Mental Math Secrets to Become a Human Calculator! Schools taught you a way to do math that works when you have a pen & paper. But the same methods, takes a lot of effort when you have to do math in your head. This is because it uses a lot of your working memory (the short term memory used to complete a mental task). For example, try to mentally multiply $73,201 \times 3$. It might take only a few seconds to multiply the individual digits. But if you multiply right to left the way you learnt in school, you will rely on your working memory. You will use it to recall every single digit you calculate to put it back together and get your final answer. You may even find yourself calculating some digits again because you forgot one of the numbers. The difficulty increases further when you have to multiply larger numbers like 732×323 . You will have to remember numbers across many steps. Mental arithmetic would be a lot easier to do in your head if you didn't have to remember so many numbers. In school, you learnt to write the down numbers as you calculate to free up your working memory. In mental math, there are many other ways to do the same thing. One of the tricks to free up your working memory is to calculate from left to right instead of right to left. Try multiplying $73,201 \times 3$ from left to right, starting from 7×3 and ending with 1×3 . You will find yourself calling out the answer before you even finish the whole problem. You can use this trick to solve any math problem in the future. But we have just scratched the surface. There are many more tricks inside the book that make doing mental math as easy as reading a comic. Here is a glimpse of what you will be able to master:

- Mentally add large numbers (Example: Add $8739 + 5492$ in your head in seconds)
- Subtract numbers fast. (Example: Mentally subtract $7520 - 4998$ without writing anything down)
- Multiplication tricks to multiply three-digit numbers. (Example: Multiply 323×123 in your head)
- Square large numbers in seconds (Example: Calculate 64×64 faster than a calculator)
- Mentally divide large numbers (Example: Divide 601324 by 73 entirely in your head)
- Quickly check a calculation with 90% accuracy without re-calculating
- Overcome math anxiety
- Cement your mental math skills with bonus weekly training.

This book only has the best techniques used by over 27 mental and Vedic math experts across the world. The techniques in this book are so simple you will wonder why nobody taught you this before.

You will be able to master it, even if you have failed math in school. Imagine waking up tomorrow being able to do lightning fast math in your head. Your family & friends will look at you like you are some kind of a genius. Since you do the calculations in your head, you will acquire better mental habits in the process. So you will not just look like a genius. You will actually be one. Buy Now To Become A Human Calculator Every minute you wait to buy this book, is another minute you don't see the benefit of being good with math & numbers. Put the power of mental math to work in your life so you can quickly & easily: • make math and numbers more useful • develop better memory habits • increase concentration • develop new ways to think • and do speed math entirely in your head faster than a calculator! Get your copy today! A MUST BUY for students of Vedic Mathematics, GMAT, GRE, SAT, Case Study Interview and Case Interview.

New Perspectives on Historical Writing Peter Burke, 1992 A new edition of this best-selling collection of essays by leading experts on historical methodology.

An Improbable Life Michael I. Sovern, 2014-02-18 Columbia University began the second half of the twentieth century in decline, bottoming out with the student riots of 1968. Yet by the close of the century, the institution had regained its stature as one of the greatest universities in the world. According to the New York Times, If any one person is responsible for Columbia's recovery, it is surely Michael Sovern. In this memoir, Sovern, who served as the university's president from 1980 to 1993, recounts his sixty-year involvement with the institution after growing up in the South Bronx. He addresses key issues in academia, such as affordability, affirmative action, the relative rewards of teaching and research, lifetime tenure, and the role of government funding. Sovern also reports on his many off-campus adventures, including helping the victims of the Tuskegee syphilis experiment, stepping into the chairmanship of Sotheby's, responding to a strike by New York City's firemen, a police riot and threats to shut down the city's transit system, playing a role in the theater world as president of the Shubert Foundation, and chairing the Commission on Integrity in Government.
