The Wine-Dark Sea Leonardo Sciascia,2014-01-02 Here are some of Sciascia's greatest stories - brief and haunting, the realist tradition at its best. In one tale a couple of men talk, cynically yet earnestly, about the etymology of the word 'mafia' - who they are, and why their interest is so piqued by the word, becomes apparent with frightening clarity. In another story a group of peasants are taken on board ship and promised that they will be put ashore illegally at Trenton, New Jersey; after a long time at sea, their landfall is far from what they expected. And Mussolini himself takes an interest in the case of Aleister Crowley, whose presence in Sicily has become an embarrassment.

States Falling Apart? Eva Maria Belser,Alexandra Fang-Bär,Nina Massüger,Rekha Oleschak Pillai,2015-08-24 An increasing number of European countries are being faced with demands for greater autonomy or independence from regional groups. The legitimacy of nation states in Europe is thus being called into question not only by the forces of globalization and Europeanization from above, but also by growing pressure to recognize the autonomous or independent status of regional groups from below. From Scotland to Catalonia, from Flanders to South Tyrol, the movements vary in their intensity and demands, yet also have many commonalities. This book constitutes a compilation of papers presented at the international Conference States Falling Apart? Secessionist and Autonomy Movements in Europe at the University of Fribourg in 2013 and is a timely addition to the literature on secession, autonomy and federalism. With theoretical contributions and case studies,

it presents a wide range of opinions and facts on these issues.

Patterns of Commoning David Bollier,Silke Helfrich,2015-11-06 What accounts for the persistence and spread of commoning, the irrepressible desire of people to collaborate and share to meet everyday needs? How are the more successful projects governed? And why are so many people embracing the commons as a powerful strategy for building a fair, humane and Earth-respecting social order? In more than fifty original essays, Patterns of Commoning addresses these questions and probes the inner complexities of this timeless social paradigm. The book surveys some of the most notable, inspiring commons around the world, from alternative currencies and open design and manufacturing, to centuries-old community forests and co-learning commons - and dozens of others. David Bollier (www.bollier.org) is an American author, activist and independent scholar who has studied the commons for nearly twenty years. Silke Helfrich (commonsblog.wordpress.com) is a German author and independent activist of the commons who blogs at www.commonsblog.de, and cofounder of the Commons-Institut in Germany. With Michel Bauwens, Bollier and Helfrich are cofounders of the Common Strategies Group. For more information, go to the book's website, Patterns of Commoning (www.patternsofcommoning.org)

Regions in Europe Patrick Le Gales,Christian Lequesne,2006-02-27 Regions in Europe explores the state of regional politics in an increasingly integrated Europe. It argues that the predicted rise of increased political power at the regional level has failed to materialise and is fraught with paradox. In doing so this study locates regions in relation to European integration, globalisation, the nation state, local government, and comparative and national perspectives. Using case studies of the main players in Europe including: * Germany * France * UK * Italy * Spain * the Netherlands * Belgium. the contributors show how and why European regions remain remarkably weak in European governance.

Cultures of Voting in Pre-modern Europe Serena Ferente,Lovro Kunčević,Miles Pattenden,2018-01-02 Cultures of Voting in Pre-modern Europe examines the norms and practices of collective decision-making across pre-modern European history, east and west, and their influence in shaping both intra- and inter-communal relationships. Bringing together the work of twenty specialist contributors, this volume offers a unique range of case studies from Ancient Greece to the eighteenth century, and explores voting in a range of different contexts with analysis that encompasses constitutional and ecclesiastical history, social and cultural history, the history of material culture and of political thought. Together the case-studies illustrate the influence of ancient models and ideas of voting on medieval and early modern collectivities and document the cultural and conceptual exchange between different spheres in which voting took place. Above all, they foreground voting as a crucial element of Europe's common political heritage and raise questions about the contribution of pre-modern cultures of voting to modern political and institutional developments. Offering a wide chronological and geographical scope, Cultures of Voting in Pre-modern Europe is aimed at scholars and students of the history of voting and is

a fascinating contribution to the key debates that surround voting today.

Nations against the State M. Keating, 1996-02-07 This is a comparative study of nationalism and nation-building in Quebec, Catalonia and Scotland. All are historic nations within larger states. Nationalism is presented as a mechanism for dealing with the place of the territorial society in the new order. It is no longer concerned with the creation of a traditional nation state but with maximizing autonomy in a world where the nation state has lost its old powers and status.

Childhood in History Reidar Aasgaard, Cornelia Horn, 2017-07-20 Inquiring into childhood is one of the most appropriate ways to address the perennial and essential question of what it is that makes human beings – each of us – human. In *Childhood in History: Perceptions of Children in the Ancient and Medieval Worlds*, Aasgaard, Horn, and Cojocarú bring together the groundbreaking work of nineteen leading scholars in order to advance interdisciplinary historical research into ideas about children and childhood in the premodern history of European civilization. The volume gathers rich insights from fields as varied as pedagogy and medicine, and literature and history. Drawing on a range of sources in genres that extend from philosophical, theological, and educational treatises to law, art, and poetry, from hagiography and autobiography to school lessons and sagas, these studies aim to bring together these diverse fields and source materials, and to allow the development of new conversations. This book will have fulfilled its unifying and explicit goal if it provides an impetus to

further research in social and intellectual history, and if it prompts both researchers and the interested wider public to ask new questions about the experiences of children, and to listen to their voices.

Enlargement of the European Union Allan F. Tatham, 2009-01-26 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity – defined in terms of such factors as culture, history and economics – has supplanted the long-dominant theme of ‘widening and deepening,’ particularly since the Union’s expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the ‘identity’ conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between ‘widening’ and ‘deepening’ and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity, judicial capacity, and legal approximation in accession states; capacity of the EU to absorb new Member States; and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations (e.g., Greece, Spain, Portugal, Malta, and Cyprus), the still inconclusive negotiations with Turkey and the Western Balkan states, and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author’s conclusion shows that, absent further (and major) EU institutional reform, it will be difficult for an enlarging Union to continue to ‘deliver the goods.’ A watershed in the continuing great debate on the fulfilment of the EC Treaty’s determination to foster and promote ‘an ever closer union of the peoples of Europe,’ this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.

Federal Conceptions in EU Member States Franz Knipping, 1994

The Flight of the Creative Class Richard Florida, 2010-01-07 Research-driven and clearly written, bestselling economist Richard Florida addresses the growing alarm about the exodus of high-value jobs from the USA. Today’s most valued workers are what economist Richard Florida calls the Creative Class. In his bestselling *The Rise of the Creative Class*, Florida identified these variously skilled individuals as the source of economic revitalisation in US cities. In that book, he shows that investment in technology and a civic culture of tolerance (most often marked by the presence of a large gay community) are the key ingredients to attracting and maintaining a local creative class. In *The Flight of the Creative Class*, Florida expands his research to cover the global competition to attract the Creative Class. The USA once led the world in terms of creative capital. Since 2002, factors like the Bush administration’s emphasis on smokestack industries, heightened

security concerns after 9/11 and the growing cultural divide between conservatives and liberals have put the US at a large disadvantage. With numerous small countries, such as Ireland, New Zealand and Finland, now tapping into the enormous economic value of this class - and doing all in their power to attract these workers and build a robust economy driven by creative capital - how much further behind will USA fall?
