Leon Battista Alberti Anthony Grafton,2002 The Visual Poetics of Raymond Carver draws on the study of visual arts to illuminate the short stories of noted author Raymond Carver, in the broader context of vision and visualization in a literary text. Ayala Amir examines Carver's use of the eye-of-the-camera technique. Amir uncovers the tensions that structure his visual aesthetics and examines assumptions that govern scholarly discussions of his work, relating these matters to the complex nature of photography and to the current visual turn of cultural studies. The research uses visual approaches to reflect upon traditional issues of narrative study-duration, dialogue, narration, description, frame, character, and meaning. Amir shows how Carver's visual aesthetics shapes the meaning of his stories, while also challenging accepted notions of the boundaries of the literary.

Leon Battista Alberti, 1404-1472, Renaissance Architect Carole Cable,1979 This collection of 700 quotes includes the last words of commoners, atheists, poets, and politicians along with noted Christians and martyrs. Excellent for casual reading and as a ready reference source for the pastor or public speaker.

The Art of Mantua Barbara Furlotti,Guido Rebecchini,2008 Although most of Mantua's artistic treasures were sold or claimed as war spoils upon the decline of the Gonzaga family, the rich cultural legacy of this fascinating city lives on in the city's many surviving frescoes and in the collections of some of the world's premier museums These priceless works of art are reunited in the pages of this beautifully illustrated volume.--BOOK JACKET.

On Alberti and the Art of Building Robert Tavernor,1998-01-01 Leon Battista Alberti (1404-72) - writer, painter and sculptor, mathematician and, most famously, architectural theorist and architect - came closer than anyone to the Renaissance ideal of the 'complete man'. Recognised by his contemporaries as an extraordinary person, he helped to shape, through his writings and his practical example in the arts, the way in which the natural and artificial world was perceived and represented during the Renaissance.

Understanding Architecture Leland M. Roth,Amanda C. Roth Clark,2024-07-18 The widely acclaimed and beautifully illustrated Understanding Architecture is now revised and expanded in its fourth edition, vividly examining the structure, function, history, and meaning of architecture, from prehistory to the present, in ways that are both accessible and engaging.

Significant features of the fourth edition include: Expanded global essays outlining the encounters and interchanges, conflicts and accommodations, between disparate global communities A brand-new final chapter addressing the twenty-first century during which Western and global architectural developments have increasingly become one broad, interwoven expression. This chapter includes sections on CAD, Contemporary Architecture of the Twenty-First Century, Starchitects, Contemporary Architectural Prizes, Architecture and Energy Consumption, and Architecture Integrated with Nature New sections on Frank Lloyd Wright and Late Twentieth-Century Expressionism Thoroughly revised and expanded illustration, including over 700 images, over half of which are in full color, and 120 original line art drawings Understanding Architecture continues to be the only text in the field to examine architecture as a cultural phenomenon as well as an artistic and technological achievement with its straightforward, two-part structure: The Elements of Architecture and the History and Meaning of Architecture. Comprehensive and clearly written, Understanding Architecture is both a primer for visual environmental literacy and a classic survey of architecture. This is an essential book for anyone interested in our built environment and the layered historical meaning embodied within it.

Leonardo da Vinci - Nature and Architecture Constance Moffatt, Sara Tagliagamba, 2019-06-17 The second volume of Leonardo Studies explores a dual theme of nature and architecture, offering a wide-ranging overview of current Leonardo scholarship on these two abundant subjects. While Leonardo worked on his Treatise on Painting, he noted that understanding the physical properties of nature must precede individual projects of painting or designing buildings. The volume begins with the Trattato, and follows with physics, geology, painting that imitates architectural structure and vice-versa, and proceeds to architectural projects, questions of attribution, urban planning, and and the dissemination of Leonardo's writings in the Trattato and its historiography. This impressive group of articles constitutes not only new research, but also a departure point for future studies on these topics. Contributors are: Janis Bell, Andrea Bernardoni, Marco Carpiceci, Paolo Cavagnero, Fabio Colonnese, Kay Etheridge, Diane Ghirardo, Claudio Giorgione, Domenico Laurenza, Catherine Luchek, Silvio Mara, Jill Pederson, Richard Schofield, Sara Tagliagamba, Cristiano Tessari, Marco Versiero, and Raffaella Zama.

"The Sculpture of Reform in North Italy, ca 1095-1130 " Dorothy F. Glass, 2017-07-05 Entirely original in its methodology, this study offers a fresh approach to the study of Romanesque fa?e sculpture. Declining to revisit questions of artistic personalities, artistic style and connoisseurship, Dorothy F. Glass delves instead into the historical and historiographical context for a group of significant monuments erected in Italy between the last decade of the eleventh century and the first third of the twelfth century. In her reading, local culture takes precedence over names, context over connoisseurship; she argues that it was the cultural, intellectual and religious life of the abbeys of San Benedetto Po and Nonantola that provided the framework for the Reformist ethos of much of the sculpture adorning the cathedral of Modena.

Glass argues that the monuments are deeply rooted in the concerns of the reform of the church, more commonly known as the Gregorian Reform, that these reform ideas and ideals were first fomented in monastic communities and then adopted by the new cathedrals built in cities that, freed of submission to imperial German rule, had recently rejoined the papal fold. The Sculpture of Reform in North Italy, ca 1095-1130: History and Patronage of Romanesque Façades moves scholarship beyond continuously reiterated opinions concerning style, attribution, chronology, origins and influence, instead opening new and fruitful lines of inquiry into the patronage and historical significance of these extraordinary monuments.

A Renaissance Architecture of Power, 2016-04-08 The growth of princely states in early Renaissance Italy brought a thorough renewal to the old seats of power. One of the most conspicuous outcomes of this process was the building or rebuilding of new court palaces, erected as prestigious residences in accord with the new 'classical' principles of Renaissance architecture. The novelties, however, went far beyond architectural forms: they involved the reorganisation of courtly interiors and their functions, new uses for the buildings, and the relationship between the palaces and their surroundings. The whole urban setting was affected by these processes, and therefore the social, residential and political customs of its inhabitants. This is the focus of *A Renaissance Architecture of Power*, which aims to analyse from a comparative perspective the evolution of Italian court palaces in the Renaissance in their entirety. Contributors are Silvia Beltramo, Flavia Cantatore, Bianca de Divitiis, Emanuela Ferretti, Marco Folin, Giulio Girondi, Andrea Longhi, Marco Rosario Nobile, Aurora Scotti, Elena Svalduz, and Stefano Zaggia.

The Architecture of the Christian Holy Land Kathryn Blair Moore, 2017-02-27 Moore traces and re-interprets the significance of the architecture of the Christian Holy Land within changing religious and political contexts.

On the Art of Building in Ten Books Leon Battista Alberti, 1991-07-01 *De Re Aedificatoria*, by Leon Battista Alberti (1404-1472), was the first modern treatise on the theory and practice of architecture. Its importance for the subsequent history of architecture is incalculable, yet this is the first English translation based on the original, exceptionally eloquent Latin text on which Alberti's reputation as a theorist is founded.

Handbook to Life in Renaissance Europe Sandra Sider, 2007 The word renaissance means rebirth, and the most obvious example of this phenomenon was the regeneration of Europe's classical Roman roots. The Renaissance began in northern Italy in the late 14th century and culminated in England in the early 17th century. Emphasis on the dignity of man (though not of woman) and on human potential distinguished the Renaissance from the previous Middle Ages. In poetry and literature, individual thought and action were prevalent, while depictions of the human form became a touchstone of Renaissance art. In science and medicine the macrocosm and microcosm of the human condition inspired remarkable strides in research and discovery, and the Earth itself was explored, situating Europeans within a wider realm of possibilities. Organized thematically, the *Handbook to Life in Renaissance Europe* covers all aspects of life in Renaissance Europe:

History; religion; art and visual culture; architecture; literature and language; music; warfare; commerce; exploration and travel; science and medicine; education; daily life.

All the King's Horses Indra Kagis McEwen, 2023-04-11 How the Italian Renaissance reinvented the power of princes by rediscovering Vitruvius and his architecture—and justified their right to rule. In *Vitruvius: Writing the Body of Architecture*, Indra Kagis McEwen argued that Vitruvius's first-century BC treatise *De architectura* was informed by imperial ideology, giving architecture a role in the imperial Roman project of world rule. In her sequel, *All the King's Horses*, McEwen focuses on the early Renaissance reception of Vitruvius's thought beginning with Petrarch—a political reception preoccupied with legitimating existing power structures. During this “age of princes” various signori took over Italian towns and cities, displacing independent communes and their avowed ideal of the common good. In turn, architects, taking up Vitruvius's mantle, designed for these princes with the intent of making their power manifest—and celebrating “the rule of one.” Through meticulous descriptions of the work of architects and artists from Leon Battista Alberti to Leonardo, McEwen explains how architecture became an instrument of control in the early Italian Renaissance. She shows how architectural magnificence supported claims to power, a phenomenon best displayed in one of the era's most prominent monumental themes: the equestrian statue of a prince, in which the horse became an emanation of the will of the rider, its strength the expression of his strength.

Aldo Rossi and the Spirit of Architecture Diane Ghirardo, 2019-01-01 This beautifully illustrated book provides a crucial new look at Aldo Rossi's built work in relationship to his writings, drawings, and product design, and explores his contributions to the architecture in postwar Italy.

Paper Palaces Vaughan Hart, Peter Hicks, 1998-01-01 A collection of essays examining early editions of Vitruvius' writings and all the major Renaissance architectural treatises by authors such as Alberti, Di Giorgio, Colonna, Serlio, and Palladio. The authors look at the significance of the treaty in the Renaissance, and trace its decline in the late 17th century.

Historical Dictionary of Renaissance Art Lilian H. Zirpolo, 2016-08-19 The art of the Renaissance is usually the most familiar to non-specialists, and for good reason. This was the era that produced some of the icons of civilization, including Leonardo da Vinci's *Mona Lisa* and *Last Supper* and Michelangelo's *Sistine Ceiling*, *Pietà*, and *David*. Marked as one of the greatest moments in history, the outburst of creativity of the era resulted in the most influential artistic revolution ever to have taken place. The period produced a substantial number of notable masters, among them Donatello, Filippo Brunelleschi, Masaccio, Sandro Botticelli, Raphael, Titian, and Tintoretto. This second edition of *Historical Dictionary of Renaissance Art* contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on artists from Italy, Flanders, the Netherlands, Germany, Spain, and Portugal, historical figures and events that impacted the production of Renaissance art. This book is an excellent access point for students, researchers, and anyone

wanting to know more about the Renaissance art.

The Renaissance of Empire in Early Modern Europe Thomas James Dandeleit,2014-04-14 Examines the intellectual and artistic foundations of the Imperial Renaissance in fourteenth- and fifteenth-century Italy and traces its political realization in sixteenth- and seventeenth-century Europe.

The Bishop's Palace Maureen C. Miller,2018-09-05 This lavishly illustrated book looks at the art and architecture of episcopal palaces as expressions of power and ideology. Tracing the history of the bishop's residence in the urban centers of northern Italy over the Middle Ages, Maureen C. Miller asks why this once rudimentary and highly fortified structure called a domus became a complex and elegant palace (palatium) by the late twelfth century. Miller argues that the change reflects both the emergence of a distinct clerical culture and the attempts of bishops to maintain authority in public life. She relates both to the Gregorian reform movement, which set new standards for clerical deportment and at the same time undercut episcopal claims to secular power. As bishops lost temporal authority in their cities to emerging communal governments, they compensated architecturally and competed with the communes for visual and spatial dominance in the urban center. This rivalry left indelible marks on the layout and character of Italian cities. Moreover, Miller contends, this struggle for power had highly significant, but mixed, results for western Christianity. On the one hand, as bishops lost direct governing authority in their cities, they devised ways to retain status, influence, and power through cultural practices. This response to loss was highly creative. On the other hand, their loss of secular control led bishops to emphasize their spiritual powers and to use them to obtain temporal ends. The coercive use of spiritual authority contributed to the emergence of a persecuting society in the central Middle Ages.

History of Construction Cultures Volume 1 João Mascarenhas-Mateus,Ana Paula Pires,2021-08-01 History of Construction Cultures Volume 1 contains papers presented at the 7ICCH - Seventh International Congress on Construction History, held at the Lisbon School of Architecture, Portugal, from 12 to 16 July, 2021. The conference has been organized by the Lisbon School of Architecture (FAUL), NOVA School of Social Sciences and Humanities, the Portuguese Society for Construction History Studies and the University of the Azores. The contributions cover the wide interdisciplinary spectrum of Construction History and consist on the most recent advances in theory and practical case studies analysis, following themes such as: - epistemological issues; - building actors; - building materials; - building machines, tools and equipment; - construction processes; - building services and techniques ; -structural theory and analysis ; - political, social and economic aspects; - knowledge transfer and cultural translation of construction cultures. Furthermore, papers presented at thematic sessions aim at covering important problematics, historical periods and different regions of the globe, opening new directions for Construction History research. We are what we build and how we build; thus, the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind. Therefore, History of

Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures, from ancient times to our century and all over the world.
