**Coastal and Marine Environments** José Simão Antunes Do Carmo,2020-01-22 This book systematizes the concepts of contemporary coastal zone management and suggests possible structural and non-structural management tools for decision-making processes. Some successful adaptation measures and case studies on oceanic processes and coastal protection are discussed. High-frequency communications in coastal and marine environments are also addressed. All chapters contribute relevant information and useful content to scientists and other readers interested or concerned about the lack of adequate management actions and the installation of appropriate protections or their ineffectiveness in containing coastal vulnerabilities and risks.

*Australian Pentecostal and Charismatic Movements* Cristina Rocha,Mark Hutchinson,Kathleen Openshaw,2020 In *Australian Pentecostal and Charismatic Movements: Arguments from the Margins*, Rocha, Hutchinson and Openshaw argue that Australia has made and still makes important contributions to how Pentecostal and charismatic Christianities have developed worldwide. This edited volume fills a critical gap in two important scholarly literatures. The first is the Australian literature on religion, in which the absence of the charismatic and Pentecostal element tends to reinforce now widely debunked notions of Australia as lacking the religious tendencies of old Europe. The second is the emerging transnational literature on Pentecostal and Charismatic movements. This book enriches our understanding not only of how these movements spread worldwide but also how they are indigenised and grow new shoots in very diverse contexts.

**A Modern Epidemic** Louise A. Baur,Stephen M. Twigg,Roger S. Magnusson,2012 Diabetes, obesity and their related diseases make up one of the greatest challenges to human health in the 21st century. In *A Modern Epidemic: Expert Perspectives on Obesity and Diabetes*, a diverse group of researchers and clinicians from the University of Sydney has joined forces to discuss how to tackle these major health challenges. Obesity and diabetes are not just problems for the individual. They pose risks to the environmental, psychological and economic stability of the entire world. The solutions, therefore, need to be equally wide-ranging and accessible to all. Acknowledging this, the authors write in an engaging style about the causes and consequences of obesity and diabetes, as well as prevention and treatment: how to identify and mitigate the risk factors,

deliver targeted and effective healthcare, and formulate global strategies to ultimately turn the tide on the 21st century's most devastating diseases.

Fostering Culturally Diverse Leadership in Organisations Karen Loon,2022-08-15 Leveraging academic research and case studies, knowledge as a business leader and diversity practitioner, and personal experience, Karen Loon examines how successful culturally diverse leaders at work resolve the contradictions and tensions of their identities within organisations. What can we learn from those leaders who have thrived and smashed the 'bamboo ceiling'? Moreover, are there other factors holding organisational change back? The book proposes research-based recommendations for aspiring leaders and corporate practitioners whilst revealing the potential inhibitors to progress. Split into three sections, Loon examines current research on identities in multicultural nations and organisations, delves into the career progression of successful Asian-Australian leaders to explore how they negotiate identity in the workplace, and provides a roadmap of actions for business leaders looking to create more inclusive and diverse cultures in their organisations. Written for both people new to diversity and those keen on new perspectives, the book is well-suited for aspiring leaders at any stage of their careers looking to accelerate their careers, as well as C-Suite, HR, and Diversity leads.

*Debt Recovery and Insolvency* ,

*Creating Sustainable Work Systems* Peter Docherty,Mari Kira,A.B. (Rami) Shani,2008-10-30 Since the first edition of this book was published, the subject of sustainability has risen to the forefront of thinking in almost every subject within business and management. Tackling the latest developments and integrating practical perspectives with rigorous research, this new edition sheds light on a vital aspect of working life. Current trends reveal that increasing intensity at work has major consequences at individual, organizational and societal levels. Sustainability in work systems thus requires a multi-stakeholder approach, emphasising a value-based choice to promote the concurrent development of various resources in the work system. This sustainability grows from intertwined individual and collective learning processes taking place within and between organizations in collaboration. In exploring the development of sustainable work systems, this book analyzes these problems, and provides the basis for designing and implementing 'sustainable work systems' based on the idea of regeneration and the development of human and social resources. The authors, who are leading researchers and practitioners from around the world, consider the existing possibilities and emerging solutions and explore alternatives to intensive work systems.

A Fishery Manager's Guidebook Kevern L. Cochrane,Serge M. Garcia,2009-06-15 Co-published with the Food and Agriculture Organization of the United Nations. Fisheries management is the process that has evolved to try to ensure that fisheries operate in a manner that provides the immediate benefits in a sustainable manner. The widely accepted goal is that

the full range of benefits should not only be available for this generation but for generations to come. Fisheries management has been successful in some cases but there have also been many, many cases of failure. This volume is intended to contribute to improving this unsatisfactory state by addressing the widespread need for information and guidance on the broad and often complex task of fisheries management. It is an updated and expanded edition of the first version of A fishery manager's guidebook which was published as a FAO Fisheries Technical Paper in 2002. The major part of this new edition is divided into five parts intended to cover the range of concerns, tools and techniques essential to the modern fisheries manager, whether that manager is an individual or a formal or informal group. Following the Introduction: Part I examines the primary dimensions of fisheries: biological, ecological, social and economic Part II looks at the legal and institutional characteristics of fisheries Part III explores the tools that fishery managers have to achieve the objectives expected from a fishery Part IV discusses the role of scientific information of indicators and reference points Part V moves into implementation of fisheries management and includes a chapter on special considerations in small-scale fisheries This landmark publication is aimed at fishery managers and scientists. All libraries in research establishments and universities where fisheries and aquatic sciences are studied and taught will need copies of this important volume. Fisheries around the world make essential contributions to human well-being including the provision of basic food supplies, employment, recreational opportunities, foreign currency and others, providing benefits to hundreds of millions of people. Despite these benefits, our record of managing fisheries so that the benefits can be sustained has been poor, at best, and most fisheries around the world are experiencing serious ecological, social or economic problems and usually all three. Today there is global concern about the state of fishery resources and aquatic ecosystems, their resilience to future stresses such as climate change and their ability to continue to provide benefits.

*State of the World's Cities 2010/2011*, 2010 One billion people worldwide live in slums and that figure is predicted to reach 2 billion by 2030. This new volume from UN-HABITAT unpacks the complex social and economic issues using the novel conceptual framework of the urban divide.

*Incerteza viva*, 2017 Sixteen artists from 9 countries created works of art inspired by ecology and the environment that were specifically developed for the exhibition, in dialogue with the MAMBO curatorial team. Most of the artistic projects were specially commissioned for the 32nd São Paulo Biennial. *Incerteza viva* is a collective process that began in early 2015 and brings together teachers, students, artists, activists, educators, scientists and thinkers in Brazil, Colombia and other places. --Page [1].

**Doing Business 2014** World Bank, 2013-10-01 Eleventh in a series of annual reports comparing business regulations in 189 economies, *Doing Business 2014* measures regulations affecting 11 areas of everyday business activity around the world.

**Henry Adams** James Truslow Adams, 2022-05-14 This book, first published in 1933, examines the life and achievements of Henry Adams, the American historian and political journalist. It looks at his youth and early development of his ideas, and goes on to look at his time as a diplomat, historian and journalist - and his impact upon American political and intellectual life.

**A Fishery Manager's Guidebook** K. L. Cochrane, 2002 This publication was prepared to promote and to provide support in the implementation of the Code of Conduct for Responsible Fisheries, especially Article 7 : Fisheries Management. As such, it also, supplements the FAO Technical Guidelines for Responsible Fisheries NO. 4: Fisheries management. It is intended primarily for the practising fishery manager and decision-maker, with particular emphasis on developing countries, although it is hoped that the volume will also be of interest to managers in developed countries.

*Cultural Parks and National Heritage Areas* Pablo Alonso González, 2013-11-13 The number of cultural parks has been steadily increasing in recent years throughout the world. But what is a cultural park? This book provides a detailed answer to this question and sets out the basis for an academic debate that moves beyond the technical narratives that have prevailed to date. It is important to open up the topic to academic scrutiny given that cultural parks are becoming widespread devices being employed by different institutions and social groups to manage and enhance cultural and natural heritage assets and landscapes. The main problem in dealing with this topic is the predominant lack of theory-grounded, critical reflection in the literature about cultural parks. These remain largely conceived as technical instruments deployed by institutions in order to solve an array of problems they must deal with. As cultural parks are generally regarded as positive and constructive tools whose performance is associated with the preservation of heritage, the overcoming of the nature/culture divide, the reinforcing of identity and memory and the strengthening of social cohesion and economic development, this book critically

explores these issues through the analysis of the literature on cultural parks. In addition, it provides a novel theoretical conceptualization of cultural parks that is connected with, and underpins, a tentative methodology developed for their empirical analysis.

Advances in Psychiatry Afzal Javed, Kostas N. Fountoulakis, 2018-07-06 This book is the newest edition on the series 'advances in psychiatry'. *Macrosocial Determinants of Population Health* Sandro Galea, 2007-10-24 This book explores social factors such as culture, mass media, political systems, and migration that influence public health while systematically considering how we may best study these factors and use our knowledge from this study to guide public health interventions. Throughout, contributors emphasize the potential of population strategies to influence traditional risk factors associated with health and disease. Each section ends with Galea's integrative chapters, bringing the observations and conclusions from the chapters into clear, usable focus.
