Atlas of Ultrasonography in Urology, Andrology, and Nephrology Pasquale Martino, Andrea B. Galosi, 2017-03-28 This book provides the latest recommendations for ultrasound examination of the entire urogenital system, particularly in the male. The coverage encompasses the role of ultrasound in imaging of disorders of the kidneys, urinary tract, prostate, seminal vesicles, bladder, testes, and penis, including male infertility disorders. In addition, detailed consideration is given to intraoperative and interventional ultrasound and recently developed ultrasound techniques. Each chapter defines the purpose of and indications for ultrasound, identifies its benefits and limitations, specifies the technological standards for devices, outlines performance of the investigation, establishes the expected accuracy for differential diagnosis, and indicates the reporting method. Most of the recommendations are based on review of the literature, on previous recommendations, and on the opinions of the experts of the Imaging Working Group of the Italian Society of Urology (SIU) and the Italian Society of Ultrasound in Urology, Andrology, and Nephrology (SIEUN). The book will be of value for all physicians involved in the first-line evaluation of diseases of the renal/urinary system and male genital disorders.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Stereotomy José Calvo-López,2020-08-08 This book deals with the general concepts in stereotomy and its connection with descriptive geometry, the social background of its practitioners and theoreticians, the general methods and tools of this technology, and the specific procedures for the members built in hewn stone, including arches, squinches, stairs and vaults, ending with a chapter discussing the open problems in this field. Thus, it can be used as a reference book in the subject, but it can also read as a compelling narrative on this subject, one of the main branches of pre-industrial technology. Construction in hewn stone requires the use of geometrical methods and tools to assure that individual stones, either blocks or voussoirs, fit with one another and conform to the general shape of walls, arches or vaults. During the Late Middle Ages and the Renaissance, such techniques and instruments were developed empirically by masons and architects. Later on, learned mathematicians and engineers introduced refinements in these procedures and this branch of knowledge, known as stereotomy, furnished much material to descriptive geometry, a science born with the French Revolution which provided the foundation for projective geometry.

Our Great Qing Johan Elverskog,2006-01-01 Although it is generally believed that the Manchus controlled the Mongols through their patronage of Tibetan Buddhism, scant attention has been paid to the Mongol view of the Qing imperial project. In contrast to other accounts of Manchu rule, *Our Great Qing* focuses not only on what images the metropole wished to project into Mongolia, but also on what images the Mongols acknowledged themselves. Rather than accepting the Manchu's use of Buddhism, Johan Elverskog begins by questioning the static, unhistorical, and hegemonic view of political life implicit in the Buddhist explanation. By stressing instead the fluidity of identity and Buddhist practice as processes continually developing in relation to state formations, this work explores how Qing policies were understood by Mongols and how they came to see themselves as Qing subjects.

Defining Prevention Science Zili Sloboda,Hanno Petras,2014-07-08 Whoever coined the adage an ounce of prevention is worth a pound of cure could not have known how important this adage would become. The challenge of altering the health

trajectories of poor lifestyle decisions for such behaviors as smoking, drinking and using illicit drugs, violence, dropping out of school, engagement in risky sexual behaviors and crime through prevention research has led to a new discipline, prevention science. *Defining Prevention Science* covers this emerging field of science: its goals, its conceptual and theoretical foundations, its methods and especially its utility. Not content to simply differentiate the field from its close allies: epidemiology, psychology, neuroscience, sociology, economics, the text explains how these many disciplines enhance each other at both research and intervention levels and how prevention science draws on these biological, behavioral and social sciences to create an innovative knowledge base that has provided cost-effective, evidence-based prevention interventions and policies. To this end, familiar developmental benchmarks are recast in prevention/health promotion context, from the crucial importance of adolescence in encountering and deterring high-risk behaviors to the risks and resiliencies of single-mother families. An international group of contributors offers current findings, up-to-date methods for effective evidence-based interventions and improvements in research technologies in these key areas: Physical, cognitive and emotional vulnerability across the life course. The roles of developmental influences in prevention. Intervention development, delivery and implementation. Bringing the intervention approach to research design. New directions in analytic methods. Cost analysis and policy implications. *Advances in Prevention Science: Defining Prevention Science* aims to inspire further refinements in the field and encourage communication among researchers in its own and related disciplines, including public health, epidemiology, psychology, and criminology. This is the first volume in the series, *Advances in Prevention Science*, that provides the framework for other volume that will focus on such issues as: *Prevention Science in School Settings: Complex Relationships and Processes*; *Preventing Crime and Violence* and *The Prevention of Substance Use*.

Himalayan Hermitess Kurtis R. Schaeffer,2004 Orgyan Chokyi (1675-1729) spent her life in Dolpo, the highest inhabited region of the Nepal Himalayas. Illiterate and expressly forbidden by her master to write her own life story, Orgyan Chokyi received divine inspiration to compose one of the most forthright and engaging spiritual autobiographies of the Tibetan literary tradition. Her life story is the oldest of only four Tibetan autobiographies authored by women. It is also a rare example of writing by a pre-modern Buddhist woman, and thus holds a unique place in Buddhist literature as a whole. Translator Kurtis Schaeffer prefaces the text with an illuminating study of the life and times of Orgyan Chokyi and an extended analysis of the hermitess's view of the relation between gender, suffering, and liberation. Based almost entirely on primary Tibetan documents never before translated, this fascinating book will be of interest to those studying Buddhism, gender and religion, and the culture of the Tibetan world.

A Dictionary of Shakespeare's Sexual Puns and Their Significance Frankie Rubinstein,1989-12-11 '...Rubinstein is far from innocent and comes to our aid with a lot of learning...and is quite right to urge that not to appreciate the sexiness of

Shakespeare's language impoverishes our own understanding of him. For one thing, it was a strong element in his appeal to Elizabethans, who were much less woolly-mouthed and smooth-tongued than we are. For another, it has constituted a salty preservative for his work, among those who can appreciate it...an enlightening book.' A.L.Rowse, The Standard.

Among Tibetan Texts E. Gene Smith,2001-06-15 For three decades, E. Gene Smith ran the Library of Congress's Tibetan Text Publication Project of the United States Public Law 480 (PL480) - an effort to salvage and reprint the Tibetan literature that had been collected by the exile community or by members of the Bhotia communities of Sikkim, Bhutan, India, and Nepal. Smith wrote prefaces to these reprinted books to help clarify and contextualize the particular Tibetan texts: the prefaces served as rough orientations to a poorly understood body of foreign literature. Originally produced in print quantities of twenty, these prefaces quickly became legendary, and soon photocopied collections were handed from scholar to scholar, achieving an almost cult status. These essays are collected here for the first time. The impact of Smith's research on the academic study of Tibetan literature has been tremendous, both for his remarkable ability to synthesize diverse materials into coherent accounts of Tibetan literature, history, and religious thought, and for the exemplary critical scholarship he brought to this field.

Ut pictura amor Walter Melion,Michael Zell,Joanna Woodall,2017-11-06 Ut pictura amor: The Reflexive Imagery of Love in Artistic Theory and Practice, 1500-1700 examines the related themes of lovemaking and image-making in the visual arts of Europe, China, Japan, and Persia. The term 'reflexive' is here used to refer to images that invite reflection not only on their form, function, and meaning, but also on their genesis and mode of production. Early modern artists often fashioned reflexive images and effigies of this kind, that appraise love by exploring the lineaments of the pictorial or sculptural image, and complementarily, appraise the pictorial or sculptural image by exploring the nature of love. Hence the book's epigraph—ut pictura amor—'as is a picture, so is love'.

Food in Shakespeare Joan Fitzpatrick,2016-04-15 A study of common and exotic food in Shakespeare's plays, this is the first book to explore early modern English dietary literature to understand better the significance of food in Shakespearean drama. Food in Shakespeare provides for modern readers and audiences an historically accurate account of the range of, and conflicts between, contemporary ideas that informed the representations of food in the plays. It also focuses on the social and moral implications of familiar and strange foodstuff in Shakespeare's works. This new approach provides substantial fresh readings of Hamlet, Macbeth, As you Like It, The Winter's Tale, Henry IV Parts 1 and 2, Henry V, Titus Andronicus, Coriolanus, Pericles, Timon of Athens, and the co-authored Sir Thomas More. Among the dietaries explored are Andrew Boorde's A Compendyous Regyment or a Dyetary of Healthe (1547), William Bullein's The Gouvernement of Healthe (1595), Thomas Elyot's The Castle of Helthe (1595) and Thomas Cogan's The Hauen of Health (1636). These dietaries were republished several times in the early modern period; together they typify the genre's condemnation of surfeit and the tendency to blame human disease on feeding practices. This study directs scholarly attention to the importance of early modern dietaries, analyzing their role in wider culture as well as their intersection with dramatic art. In the dietaries food and drink are indices of one's position in relation to complex ideas about rank, nationality, and spiritual well-being; careful consumption might correct moral as well as physical shortcomings. The dietaries are an eclectic genre: some contain recipes for the reader to try, others give tips on more general lifestyle choices, but all offer advice on how to maintain good health via diet. Although some are more stern and humourless than others, the overwhelming impression is that of food as an ally in the battle against disease and ill-health as well as a potential enemy.
