K2, Quest of the Gods Ralf Ellis, *** The Great Pyramid in the Himalaya *** In 'Thoth, Architect of the Universe' Ralf discovered evidence for megalithic maps. But if these megalithic maps are to be of any use in a quest for the mythical Hall of Records, then they need to be a little more detailed than a simple representation of continents. Luckily, the shaft angles inside the Great Pyramid can refine these maps down to just a few tens of meters. And so Ralf embarked on a long trek into the high Himalaya, to see what lay at the heart of the Giza map. Strangely enough, what he found there was a giant snow-white pyramid, aligned with the cardinal points, with a causeway aligned at 14° from its base - exactly the same as the Great Pyramid itself. Sequel to Thoth, Architect of the Universe. v3.6

The Giza Enigma Miles Augustus Navarr,2022-10-17 There are many mysteries about ancient Egypt. But perhaps the most enigmatic puzzle is the Great Pyramid. Established Egyptologists insist with fervor and uncommon zeal that it was built as a tomb by Khufu or Cheops, the fourth dynasty pharaoh who reigned about forty-five hundred years ago. No mummy has ever been found in any of the one hundred or so Egyptian pyramids so far discovered, particularly the Great Pyramid. There are no funerary hieroglyphics or paintings in the Great Pyramid. In-fact there is not a single hieroglyph or painting within or without the whole structure. The mathematical and geometrical skills as well as advance precision engineering attest to an erudite company with capabilities far beyond what was available to ancient Egyptians. Giza Enigma is an attempt to highlight the discrepancies and inconsistencies inherent in the assertion by the mainline Egyptologists who have, for the past century, vehemently maintained the "Tomb Theory". Despite being a fictional tale, our protagonist, Dr. Sebastian Crane, an independent Egyptologist, dares to challenge a team of conformists Egyptologists in a public debate. Furnishing well documented facts and detail evidence, he manages to deliver a credible and convincing argument against the "Tomb Theory". But this is just the beginning. Dr. Crane is enticed to investigate a recently discovered clay disc that may give him the physical proof he needs to validate his unconventional hypothesis. Eventually, his quest leads him to Egypt and the underground halls of Giza, where he encounters codes and cyphers, steering him to a discovery more sensational than he ever envisaged. A discovery with potential to change the course of human civilization, for better or worse.

L. C. Laird,2007-12-01 IS THERE A MAP OF 12,000 YEAR-OLD CITIES, OR A MAYAN STYLE CALENDAR OF THE END OF DAYS In the most CONTROVERSIAL BOOK OF ALL TIME? YES, THERE IS! NOW you, too, will know...THE ULTIMATE ANSWER! The Mayan Calendar called it Blackened Earth; the ancient texts called it...Armageddon! So many have died...the brutal murders in France, the torture of a young Testari mother, has it been for nothing after 6000 years? Will they succeed before the Nahasha find them?

Cosmic Womb Chandra Wickramasinghe, Ph.D., Robert Bauval, 2017-12-19 Compelling evidence that life, intelligence, and evolution on Earth were seeded by comets and cosmic intelligence • Explains how life first came from interstellar dust and comets and how later arrivals of cosmic dust and comets spurred evolution • Explores the possibility that universal knowledge may be stored in human DNA and how ancient cultures may have known a way to retrieve this knowledge • Reveals new discoveries about the dimensions of the Great Pyramid of Giza All ancient cultures link humanity's origins to the heavens. The Egyptians, for example, were adamant that their ancestors came from the stars of Orion and Sirius. Today, however, religion and science assert that life arose spontaneously here on Earth. Did the ancients know our true cosmic origins? Have they left us clues? Expanding on the panspermia theory developed with the celebrated astronomer Sir Fred Hoyle--namely that the building blocks of life were imported to Earth by comets in the distant past--Chandra Wickramasinghe and Robert Bauval explore the latest findings in support of a cosmic origin for humanity. They detail the astrobiological discoveries of organic molecules deep in space, how microbes are incredibly resistant to the harshest conditions of space--enabling the transfer of genes from one star system to another, and the recent recovery of microorganisms from comets still in space. They argue that the universe was "born" and preset with the blueprint of life and that the cosmos must be teeming with lifeforms far older and perhaps far more developed than us. They show how life arrived on our planet in the form of interstellar dust containing alien bacteria approximately 3.8 billion years ago and how later comets, meteoroids, and asteroids brought new bacterial and viral genetic material, which was vital for evolution. Using the latest advances in physics, cosmology, and neuroscience, the authors explore how universal knowledge may be stored in human DNA and cells, and they postulate that ancient cultures, such as the pyramid builders of Egypt and the temple builders of India, may have known a way to retrieve this knowledge. Sharing new discoveries from experienced architects, engineers, and mathematicians, they show how the Great Pyramid is a three-dimensional mathematical equation in stone, bearing a potent message for humanity across time and space about who we are and where we come from.

Forbidden History J. Douglas Kenyon, 2005-03-29 Challenges the scientific theories on the establishment of civilization and technology • Contains 42 essays by 17 key thinkers in the fields of alternative science and history, including Christopher Dunn, Frank Joseph, Will Hart, Rand Flem-Ath, and Moira Timmes • Edited by Atlantis Rising publisher, J. Douglas Kenyon In *Forbidden History* writer and editor J. Douglas Kenyon has chosen 42 essays that have appeared in the bimonthly journal *Atlantis Rising* to provide readers with an overview of the core positions of key thinkers in the field of ancient mysteries and alternative history. The 17 contributors include among others, Rand Flem-Ath, Frank Joseph, Christopher Dunn, and Will Hart, all of whom challenge the scientific establishment to reexamine its underlying premises in understanding ancient civilizations and open up to the possibility of meaningful debate around alternative theories of humanity's true past. Each of the essays builds upon the work of the other contributors. Kenyon has carefully crafted his vision and selected writings in six

areas: Darwinism Under Fire, Earth Changes--Sudden or Gradual, Civilization's Greater Antiquity, Ancestors from Space, Ancient High Tech, and The Search for Lost Origins. He explores the most current ideas in the Atlantis debate, the origins of the Pyramids, and many other controversial themes. The book serves as an excellent introduction to hitherto suppressed and alternative accounts of history as contributors raise questions about the origins of civilization and humanity, catastrophism, and ancient technology. The collection also includes several articles that introduce, compare, contrast, and complement the theories of other notable authors in these fields, such as Zecharia Sitchin, Paul LaViolette, John Michell, and John Anthony West.

Deus Ordini Fundamentum Richard E. Ford, 2024-10-17 There is a unifying Pattern that underlies much if not all of science, which manifests itself in the measures of dimension; i.e. time, distance, volume, mass, and of those measures that derive from them. This Pattern arises from a simple geometric progression, based on the numbers 2 and 3. *Deus Ordini Fundamentum*—"God Begins, Lays the Order of the Foundation"—traces this Pattern through much of modern science, including: astronomy, physics, geodesy, metrology, cartography, etc., and arrives at the almost inescapable conclusion that mankind did not devise this system, since it is all too perfect; rather, it was given to him by the Creator of the cosmos. *Deus Ordini Fundamentum* then proceeds to examine several world-renowned ancient monuments and documents a startling sophistication of knowledge embedded in them that embodies many of the measures from the Pattern. These monuments were specifically designed and built to memorialize much of this vast knowledge—the collected inheritance of a sophisticated civilization. Number and Geometry were central to this process. And, finally, *Deus Ordini Fundamentum* examines six carved stelae in the Step Pyramid complex of Saqqara, Egypt, and finds that they hold mankind's deepest held beliefs and understandings, regarding the origins and manifestations of time and the other dimensions that are the framework of our perceived reality.

The Great Ground Plan - A Study of the True Pyramids of Egypt Jani Laasonen, 2020-08-11 True pyramids are the oldest, the largest, and yet mathematically and geometrically the most advanced structures ever built on Earth. They have stood the test of time throughout the whole written history of humankind remaining their original shape and thus conveying the timeless information of their advanced architecture over the millennia. But what exactly is a true pyramid? A true pyramid is a pyramid, that follows these five characteristics: 1) It is regarded by modern Egyptologists as 4th dynasty pyramid. 2) It has a square base that is aligned very precisely with the cardinal points of compass. 3) It was built to last: Despite being built nearly 5,000 years ago it still represents almost flawless geometry. 4) No mummies, funerary scriptures, funerary art or any grave goods have ever been found inside of it. 5) It was designed and built in royal cubits (1 royal cubit = 0.5236 meters). There are only five pyramids in Egypt that meet all these five requirements. Three of them are in Giza and two of them in Dahshur. In this book will be shown how these pyramids form three different ground plans on map: one to Giza, one to Dahshur, and finally the Great Ground Plan comprising all five true pyramids of Egypt. The side lengths and the diagonals of these ground plans follow a clear mathematical pattern, which can no longer be mere accident, but a sign of systematic planning.

Building the Pyramids Bob Moores, 2019-06-20 This book examines the architectural achievements of the Egyptian pyramid builders and how they may have accomplished those deeds. Many of their building techniques we today cannot explain. The baffling puzzle of how the stones were raised is one of these. The big puzzle aside, many minor mysteries are for the first time explained. Egyptologists agree that those performing the heavy labor were conscripted citizens, not slaves. The builders were inventive, motivated, daring, and superbly organized. They made mistakes, the price of innovation. Still, they persevered, and created some of the most impressive monuments in history. This book should help the reader understand the problems the builders faced, and instill admiration of their work.

The Origin and Significance of Zero, 2024-03-11 Zero has been axial in human development, but the origin and discovery of zero has never been satisfactorily addressed by a comprehensive, systematic and above all interdisciplinary research program. In this volume, over 40 international scholars explore zero under four broad themes: history; religion, philosophy & linguistics; arts; and mathematics & the sciences. Some propose that the invention/discovery of zero may have been facilitated by the prior evolution of a sophisticated concept of Nothingness or Emptiness (as it is understood in non-European traditions); and conversely, inhibited by the absence of, or aversion to, such a concept of Nothingness in the West. But not all scholars agree. Join the debate.

From the streets of Toronto to a secretive Washington book shop, from the heart of Cairo to the peaks of the great pyramids, *Pharaohs of the Sky* lures you into a world where nothing is as it seems, and where clandestine operatives conspire to hide the truth.
