Educating Second Language Children Fred Genesee,1994-03-25 This text brings together the work of 15 elementary education experts who support an integrative approach to educating second language children. The paperback edition is a collection of articles from fourteen elementary education experts who espouse an integrative approach to second language education - one that goes beyond language teaching methodology - to cover a wide range of issues affecting the academic and social success of language minority children. The volume deals not only with second language development, but with the development of the whole child. Rather than focusing on language instruction, it addresses the entire curriculum, and instead of restricting itself to classroom learning, it examines the role of the school, family, and community.

Disproving Christianity and Other Secular Writings (2nd edition, revised) David G McAfee,2011-10-01 Not only do I believe that it is possible to maintain moral standards without the crutch of religion but I would argue that it is the only way to achieve true goodness. *Disproving Christianity and Other Secular Writings* compiles popular and lesser-known arguments against the principles established by the Christian canon. Using a phenomenological approach to build his case based on in-depth study at the University of California, Santa Barbara McAfee analyzes the Hebrew Scriptures and New Testament doctrine to build a logical and reasonable case against their validity. From contradictions between lived and portrayed religions to factual errors within the texts themselves, no stone is left unturned in this fully updated and expanded refutation of Christianity.

Mediating Languages and Cultures Dieter Buttjes,Michael Byram,1991 The history of language teaching is shot through with methods and approaches to language learning - most recently with communicative language teaching - but this book demonstrates that a more differentiated and richer understanding of learning a foreign language is both necessary and desirable. Languages and cultures are interlinked and interdependent and their teaching and learning should be too. Learning another language is part of a complex process of learning and understanding other people's ways of life, ways of thinking and socio-economic experience

The linguistic integration of adult migrants: from one country to another, from one language to another Council of Europe,2014-01-01 The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to

reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

Goldilocks and the Three Bears, 2010 Lost in the woods, a tired and hungry girl finds the house of the three bears where she helps herself to food and goes to sleep.

I Wish Someone Were Waiting for Me Somewhere Anna Gavalda, 2014-07-30 I Wish Someone Were Waiting For Me Somewhere explores how a life can be changed irrevocably in just one fateful moment. A pregnant mother's plans for the future unravel at the hospital; a travelling salesman learns the consequences of an almost-missed exit on the motorway in the newspaper the next morning; while a perfect date is spoiled by a single act of thoughtlessness. In those crucial moments Gavalda demonstrates her almost magical skill in conveying love, lust, longing, and loneliness. Someone I Loved is a hauntingly intimate look at the intolerably painful, yet sometimes valuable consequences that adultery can have on a marriage and the individuals involved. A simple tale, yet long in substance, Someone I Loved ends like most great love affairs, forever leaving you wanting just one more moment.

Directed Algebraic Topology Marco Grandis, 2009-09-17 This is the first authored book to be dedicated to the new field of directed algebraic topology that arose in the 1990s, in homotopy theory and in the theory of concurrent processes. Its general aim can be stated as 'modelling non-reversible phenomena' and its domain should be distinguished from that of classical algebraic topology by the principle that directed spaces have privileged directions and directed paths therein need not be reversible. Its homotopical tools (corresponding in the classical case to ordinary homotopies, fundamental group and fundamental groupoid) should be similarly 'non-reversible': directed homotopies, fundamental monoid and fundamental category. Homotopy constructions occur here in a directed version, which gives rise to new 'shapes', like directed cones and directed spheres. Applications will deal with domains where privileged directions appear, including rewrite systems, traffic networks and biological systems. The most developed examples can be found in the area of concurrency.
