Manuale di criminologia Marco Monzani,2016

Manuale operativo di metodologia peritale Marco Monzani,Miriam Lazzarettoi,2019-10-23 Il volume affronta l'importante questione della metodologia peritale applicata al contesto forense, in particolare penale. Gli autori, consapevoli che il contesto forense è molto diverso rispetto al contesto clinico/terapeutico, intendono presentare uno strumento di agile consultazione per coloro che operano in qualità di periti e consulenti. Le questioni di carattere meramente teorico fanno da sfondo a un'opera che vuole essere uno strumento applicativo, per questo gli autori hanno preferito approfondire in particolare le questioni di carattere operativo. I tre case report presentati nella seconda parte del volume esemplificano oltremodo la metodologia che gli autori ritengono corretta in situazioni e contesti peritali e consulenziali penali.

La Tutela della Vittima del Reato Valter Biscotti,Mauro Tenca,2018 Il volume esamina, con completezza e chiarezza espositiva, i riferimenti normativi, interni e comunitari, che disciplinano la tutela della vittima del reato nel nostro ordinamento. Scopo del testo è soprattutto individuare e approfondire profili di discussione a favore di una revisione della Carta Costituzionale al fine di riconoscere una specifica disciplina volta a ricercare una maggior tutela per tutte le vittime del reato. La prefazione è a cura dell'avv. Enrico Sirotti Gaudenzi. I compensi degli autori verranno devoluti all'Osservatorio Nazionale Sostegno Vittime.

L'Indagine Investigativa. Manuale Teorico-Pratico Stefano Pais,Giulio Perrotta,2015 Il manuale propone un'attenta analisi dei profili logici, analitici, dinamici, pratici, tecnici, criminologici, criminalistici, probatori e processuali dell'attività investigativa, ponendo l'accento sulla gestione generale dell'indagine, soffermandosi sulla fase organizzativa, operativa, emotiva, informativa e valutativa. Corredato di esempi pratici e riferimenti normativi, adotta un taglio versatile e giovanile, lontano dai linguaggi troppo tecnici e privi di qualunque capacità espressiva. Ogni capitolo è accompagnato da un riferimento giuridico, psicologico, sociologico e scientifico, in modo tale da adattare il testo allo studio base della disciplina investigativa. Corposo ma scorrevole, lo stile adottato promuove una nuova cultura logica, improntata sulla comprensione dei fenomeni sotto ogni profilo possibile, arricchendo l'opera con una sezione finale dedicata ai principali atti di Polizia Giudiziaria.

Criminologia Esoterica Giulio Perrotta,2016 Il manuale propone un'attenta analisi degli aspetti scientifici e tecnici dei

fenomeni occulti ponendo l'accento sulla gestione generale dell'indagine legata ai culti settari e ai culti improntati sul fenomeno spiritico, demoniaco e ufologico. Ogni capitolo è accompagnato da materiale fotografico, oltre i riferimenti tecnici per imparare a distinguere i genuini fenomeni legati al culto esoterico e delle origini dal culto moderno, filosofie new age e paranormali. Un viaggio intenso nei meandri della criminologia esoterica, spiegato passo passo. Agile e scorrevole, il testo si propone per tutti coloro che vogliono approfondire le materie legate al mondo dell'occulto e ai crimini con sfondo satanico. L'opera è arricchita da due contributi interviste, il primo a Mauro Biglino e il secondo a Daniele Gullà.

Serial Killer. Un viaggio alla scoperta dell'oscuro mondo degli assassini seriali Alessandro Cariulo, 2023-02-28
Cariulo fornisce un contributo fondamentale allo studio e alla comprensione della mente e dei comportamenti dei serial killer. Attraverso un approccio rigorosamente scientifico, basato sullo studio di migliaia di casi e di quanto finora le diverse discipline - psicologia, genetica, medicina e altre - hanno offerto, Cariulo dona alla materia nuove interessanti prospettive volte non solamente alla comprensione di un fenomeno affascinante quanto apparentemente alieno, ma anche al trattamento e alla possibile prevenzione di una manifestazione della mente e del comportamento umano molto più ampia e diffusa di quanto si potrebbe pensare. Alessandro Cariulo nasce a Firenze il 17 settembre 1988, ed è psicologo iscritto all'Ordine degli Psicologi della Regione Toscana. Nel 2018 ha conseguito il Master di II Livello in Criminologia e Psicopatologia Forense presso la Facoltà di Medicina e Chirurgia di Firenze. Formatore dal 2014 in ambito criminologico (stalking, criminal profiling, crimini seriali e rituali) e psicologico (comunicazione, gestione e risoluzione dei conflitti e tematiche psico-sociali).

La vita in uno specchio Tamara Merizzi, 2019-11-22 Questo breve volume è il frutto dell'esperienza personale dell'autrice presso la Casa Circondariale di Ascoli Piceno e si propone di fornire al lettore un contributo interdisciplinare relativamente al sistema penitenziario. In ambito giuridico vengono ripercorse le tappe storiche dell'internamento in Italia, fino a giungere alle più recenti modifiche legislative dell'Ordinamento penitenziario. In chiave sociologica, è richiamato il concetto di carcere come "Istituzione totale" e sono operate delle riflessioni sulla vita esperita dal detenuto all'interno del sistema "totalizzante e inglobante" rappresentato dall'istituto di reclusione. Sotto il profilo psicologico viene proposto l'uso combinato di tre strumenti diagnostici ai fini della valutazione della pericolosità sociale e del rischio di recidiva criminale. Viene altresì illustrato un caso clinico la cui analisi è basata sul colloquio criminologico a cui è stato sottoposto un detenuto del circuito di media sicurezza della Casa Circondariale di Ascoli Piceno. Il colloquio criminologico è imperniato sulla traccia fornita dalla Società Italiana di Criminologia, arricchita da elementi selezionati nella guida all'intervista elaborata da Robert Hare per la PCL-R, come l'empatia, l'impulsività, il rimorso e il senso di colpa. Il testo conclude con l'auspicio che la collettività, con spirito critico e grande sensibilità, riesca a recuperare il "potenziale curativo dell'empatia, non solo per gli altri, ma anche per noi stessi", poiché ritenere che la "malvagità esiste soltanto all'esterno - di noi - resta puramente illusorio".

Mobbing Gaetano Amoruso,2020-01-07 Il parallelismo con la Metamorfosi di Ovidio potrebbe sembrare azzardato ma non lo è. Il Caos caratteristico degli inizi primordiali con la nascita degli dei va letto come l'inizio di un cambiamento e i libri XI e XII, citati spesso, hanno una palese ridondanza con il cominciamento della problematica del mobbing, una vera e propria guerra che porterà alla Metamorfosi interna, spirituale ma soprattutto tangibile di chi teoricamente risulterà sconfitto. Tutti gli episodi hanno come origine dalle cinque forze motrici del mondo antico (ma soprattutto moderno): l'amore, l'ira, l'invidia, la paura e la sete di conoscenza. Quest'ultima, con molta probabilità, sarà l'evento scatenante della Metamorfosi, il dogma superato grazie al quale o per effetto del quale vi apprestate a leggere questo libro frutto di un continuo cambiamento metamorfico e paradossalmente figlio della stasi individualistica che caratterizza i nostri tempi dove la lascivia e l'assenza di valori ben precisi dominano incontrastati e vincenti e dove la Fenice che risorge in questi fogli vive adesso perennemente alla ricerca della vera essenza della vita. Le vicende di mobbing, così come le metamorfosi, esprimono il carattere fluido e precario dell'identità, l'effimero equilibrio tra il giusto e l'ingiusto, l'incerto confine tra l'inconsistenza delle apparenze e la concretezza delle cose. Nel fluire ininterrotto dell'esistente, ogni trasformazione, ogni metamorfosi, è un dramma più doloroso della morte vera: per la sua ambiguità, perché non è né vita né morte. La vita è mutamento, nessun essere animato è mai identico a se stesso, ma, come il sole di Orazio, è alius et idem , uguale e diverso nel medesimo tempo: ciò che gli dà il senso dell'identità e dell'unità è la coscienza, o l'anima. Dunque le Metamorfosi di Ovidio, come quelle di altri poeti e scrittori (quali Apuleio, Nicandro di Colofone, Kafka) hanno le loro radici nella natura stessa. È da lì che nasce il mito e poiché mito significa parola, possiamo dire che in principio era il Mito. Una ricerca approfondita, appassionata ma anche caustica sul fenomeno del mobbing partendo dall'esilio di Ovidio a Tomi per giungere ai nostri giorni con particolare riferimento ai centri commerciali. Una tesi di Laurea Magistrale diventato un libro conservato nel cassetto per otto lunghi anni fino all'ambito traguardo, straordinariamente dipinto dalla fotografia di Giuseppe Marano in copertina.

Handbook of Research on Trends and Issues in Crime Prevention, Rehabilitation, and Victim Support Balloni, Augusto,Sette, Raffaella,2019-12-27 A complex and vulnerable contemporary society continually poses new challenges in terms of social conflict, and as crime advances, so must strategies for prevention and rehabilitation. The Handbook of Research on Trends and Issues in Crime Prevention, Rehabilitation, and Victim Support is a scholarly publication that examines existing knowledge on crime dynamics and the implementation of crime victims' rights. Highlighting a wide array of topics such as cyberbullying, predatory crimes, and psychological violence, this book is ideal for criminologists, forensic psychologists, psychiatrists, victim advocates, law enforcement, criminal profilers, crime analysts,

therapists, rehabilitation specialists, psychologists, correctional facilities, wardens, government officials, policymakers, academicians, researchers, and students.

The Anatomy of Violence Adrian Raine, 2013-04-30 Adrian Raine is one of the world's leading authorities on the minds of the violent, the criminal, the dangerous, the unstable. *An Anatomy of Violence* is the culmination of his life's work so far, offering the latest answers to some of the most difficult questions: what are the causes of violence? Can it be treated? And might it one day be stopped? Are some criminals born, not made? What causes violence and how can we treat it? *An Anatomy of Violence* introduces readers to new ways of looking at these age-old questions. Drawing on the latest scientific research, Adrian Raine explains what it reveals about the brains of murderers, psychopaths and serial killers. While once it was thought upbringing explained all, and subsequently explanations shifted to genetics, Raine goes to great pains to explain that anti-social behaviour is complex, and based on the interaction between genetics and the biological and social environment in which a person is raised. But the latest statistical evidence between certain types of biological and early behavioural warning signs is also very strong. Through a series of case studies of famous criminals, Raine shows how their criminal behaviour might be explained on the basis of these new scientific discoveries. But the conclusions point to a host of philosophical and moral issues. What are the implications for our criminal justice system? Should we condemn and punish individuals who have little or no control over their behaviour? Should we act preemptively with people who exhibit strong biological predispositions to becoming dangerous criminals? These are among the thorny issues we can no longer ignore as our understanding of criminal behaviour grows. Praise for Adrian Raine's *The Psychopathology of Crime*: 'An extremely informative, thoughtful and illuminating book ... a tour de force', David P Farrington, *Psychological Medicine* Adrian Raine is the Richard Perry University Professor in the Departments of Criminology, Psychiatry, and Psychology at the University of Pennsylvania. For the past 35 years, his research has focused on the neurobiological and biosocial bases of antisocial and violent behavior, and ways to both prevent and treat it in both children and adults.

Il suicidio - Responsabilità sociale? Tamara Merizzi, 2021-07-21 "Il suicidio: responsabilità sociale?" Tratta il tema del suicidio quale grave problematica di salute pubblica, e pone interrogativi circa il ruolo del nostro attuale contesto socioculturale nella "scelta" dell'individuo di darsi la morte. Il breve volume si suddivide essenzialmente in due parti. Nella prima si cerca di delineare l'origine del disagio individuale proprio della nostra società contemporanea a partire dal contributo di Emile Durkheim (1858-1917) fino a giungere alla concezione di società "evanescente" elaborata da Giuliano Piazzi (1934-2014), disagio che in taluni casi può esplicitarsi in gesti autodistruttivi. Seguono la rappresentazione dello studio sul suicidio condotto da Emile Durkheim, la definizione dell'atto suicidario secondo l'OMS, e la complessità fenomenica della condotta suicida che impone, in chiave interpretativa, una visione necessariamente multidimensionale di tipo bio-psico-sociale. Sono esposti alcuni dati epidemiologici sulla dimensione del fenomeno in ambito globale, le linee guida fornite

dall'OMS relativamente alla diffusione della notizia di suicidio da parte dei media, e il trauma subito dai survivors per la perdita del loro caro. La prima parte termina con l'esposizione degli indizi prodromici, dei fattori di rischio e dei fattori protettivi connessi al compimento della condotta autodistruttiva. Nella seconda parte dell'elaborato è ripercorsa la storia di Sofia, una donna che decide di togliersi la vita dopo aver tentato due volte il suicidio, per giungere a un'autopsia psicologica il più possibile esplicativa del suo atto estremo. Il testo si conclude con alcune brevi considerazioni sull'impatto che l'attuale situazione pandemica di Covid-19 può avere sul suicidio e sul rischio di suicidio, nonché sulla "responsabilità" che, secondo l'autrice, ricade sulla società quando il singolo "sceglie" la morte autoinflitta per "fuggire dalla vita."

Psychodynamic Psychiatry in Clinical Practice Glen O. Gabbard, 2014-04-16 It is difficult to improve on a classic, but the fifth edition of *Psychodynamic Psychiatry in Clinical Practice* does just that, offering the updates readers expect with a deft reorganization that integrates DSM-5® with the author's emphasis on psychodynamic thinking. The individual patient is never sacrificed to the diagnostic category, yet clinicians will find the guidance they need to apply DSM-5® appropriately. Each chapter has been systematically updated to reflect the myriad and manifold changes in the 9 years since the previous edition's publication. All 19 chapters have new references and cutting-edge material that will prepare psychiatrists and residents to treat patients with compassion and skill. The book offers the following features: Each chapter integrates new neurobiological findings with psychodynamic understanding so that clinicians can approach their patients with a truly biopsychosocial treatment plan. Excellent writing and an intuitive structure make complicated psychodynamic concepts easy to understand so that readers can grasp the practical application of theory in everyday practice. The book links clinical understanding to the new DSM-5® nomenclature so that clinicians and trainees can adapt psychodynamic thinking to the new conceptual models of disorders. New coverage of psychodynamic thinking with relation to the treatment of patients on the autism spectrum addresses an increasingly important practice area. Posttraumatic stress and dissociative disorders have been combined to allow for integrated coverage of primary psychiatric disorders related to trauma and stressors. A boon to clinicians in training and practice, the book has been meticulously edited and grounded in the latest research. The author firmly believes that clinicians must not lose the complexities of the person in the process of helping the patient. *Psychodynamic Psychiatry in Clinical Practice, Fifth Edition*, keeps this approach front and center as it engages, instructs, and exhorts the reader in the thoughtful, humane practice of psychodynamic psychiatry.

Crime Classification Manual John E. Douglas, Ann W. Burgess, Allen G. Burgess, Robert K. Ressler, 2011-01-06 This is the second edition of the landmark book that standardized the language and terminology used throughout the criminal justice system. It classifies the critical characteristics of the perpetrators and victims of major crimes—murder, arson, sexual assault, and nonlethal acts—based on the motivation of the offender. The second edition contains new classifications on computer crimes, religion-extremist murder, and elder female sexual homicide. This edition also contains new information on stalking and child abduction, the use of biological agents as weapons, cybercrimes, Internet child sex offenders, burglary and rape, and homicidal poisoning. In addition, many of the case studies and crime statistics have been updated.

Psychodynamic Diagnostic Manual (PDM) American Psychoanalytic Association, Alliance of Psychoanalytic Organizations, 2006 This manual is based on current neuroscience and treatment outcome studies that demonstrate the importance of focusing on the full range and depth of emotional and social functioning. Beginning with a classification of the spectrum of personality patterns and disorders found in individuals and then describing a profile of mental functioning that permits a clinician to look in detail at each of the patient's capacities, the entries include a description of the patient's symptoms with a focus on the patient's internal experiences as well as surface behaviors. Intended to expand on the DSM (Diagnostic and Statistical Manual of Mental Disorders) and ICD (International Statistical Classification of Diseases and Related Health Problems) efforts in cataloging the symptoms and behaviors of mental health patients, this manual opens the door to a fuller understanding of the functioning of the mind, brain, and their development.
