Translation of Evidence Into Nursing and Healthcare Kathleen M. White, PhD, RN, NEA-BC, FAAN, Sharon Dudley-Brown, PhD, RN, FNP-BC, FAAN, Mary F. Terhaar, PhD, RN, ANEF, FAAN, 2019-12-19 NAMED A DOODY'S CORE TITLE! Designed as both a text for the DNP curriculum and a practical resource for seasoned health professionals, this acclaimed book demonstrates the importance of using an interprofessional approach to translating evidence into nursing and healthcare practice in both clinical and nonclinical environments. This third edition reflects the continuing evolution of translation frameworks by expanding the Methods and Process for Translation section and providing updated exemplars illustrating actual translation work in population health, specialty practice, and the healthcare delivery system. It incorporates important new information about legal and ethical issues, the institutional review process for quality improvement and research, and teamwork and building teams for translation. In addition, an unfolding case study on translation is threaded throughout the text. Reorganized for greater ease of use, the third edition continues to deliver applicable theory and practical strategies to lead translation efforts and meet DNP core competency requirements. It features a variety of relevant change-management theories and presents strategies for improving healthcare outcomes and quality and safety. It also addresses the use of evidence to improve nursing education, discusses how to reduce the divide between researchers and policy makers, and describes the interprofessional collaboration imperative for our complex healthcare environment. Consistently woven throughout are themes of integration and application of knowledge into practice. NEW TO THE THIRD EDITION: Expands the Methods and Process for Translation section Provides updated exemplars illustrating translation work in population health, specialty practice, and the healthcare delivery system Offers a new, more user-friendly format Includes an entire new section, Enablers of Translation Delivers expanded information on legal and ethical issues Presents new chapter, Ethical Responsibilities of Translation of Evidence and Evaluation of Outcomes Weaves an unfolding case study on translation throughout the text KEY FEATURES: Delivers applicable theories and strategies that meet DNP core requirements Presents a variety of relevant change-management theories Offers strategies for improving outcomes and quality and safety Addresses the use of evidence to improve nursing education Discusses how to reduce the divide between researchers and policy makers Supplies extensive lists of references, web links, and other resources to enhance learning Purchase includes digital access for use on most mobile devices or computers

Navigating Miscarriage Susie Kilshaw, Katie Borg, 2023-02-10 Miscarriage is a significant women's health issue. Research has consistently shown that one in four pregnancies end in miscarriage. This collected volume explores miscarriage in diverse historical and cultural settings with contributions from anthropologists, historians and medical professionals. Contributors use rich ethnographic and historical material to discuss how pregnancy loss is managed and negotiated in a range of societies. The book considers meanings attached to miscarriage and how religious, cultural, medical and legal forces impact the way miscarriage is experienced and perceived.

Preparing Nurses for Disaster Management - E-Book Joanne Langan, 2022-02-15 Learn how to plan for and respond to disasters! Preparing Nurses for Disaster Management: A Global Perspective helps you build the skills you need to prepare for, respond to, and recover from emergency situations efficiently and effectively. It includes the personal stories of nurses who have experienced disasters, describing the specific incident, the response, what worked or didn't work, and the lessons learned. Case studies show how to apply international response guidelines in providing care for those in need. Written by Joanne Langan, an internationally known expert in disaster preparedness, this reference will help you feel more confident in handling the aftermath of both natural and man-made disasters. - Coverage of disaster management includes the stages of disaster response, nursing roles, and personal case studies of actual disasters and public health emergencies around the world, e.g., natural disasters, global earthquakes, radiation disasters, chemical disasters, biologic or infectious disease outbreaks, and man-made disasters. - Actual Disasters unit provides a description of each event, preparedness, response, recovery, personal preparedness equipment, legal and ethical issues, special considerations, and lessons learned. - Tabletop exercises and drills allow organizations and institutions to assess their readiness, determine community vulnerabilities, and prepare appropriate responses to disaster events such as an active shooter, cyberattacks, and the grid/power going down. - Case studies help you learn to apply concepts to practice. - User-friendly content includes definitions of key terms and the role expectations for different nurse specialties and levels. - Discussions of International Council of Nurses' Core Competencies in Disaster Nursing use this benchmark as an outline for effective nursing practice before, during, and after disasters. - Reviews of psychiatric/mental health issues discuss interventions to improve mental health following disasters. - Expert contributors share perspectives and experience from a number of different countries.

Health Literacy Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Health Literacy, 2004-06-29 To maintain their own health and the health of their families and communities, consumers rely heavily

on the health information that is available to them. This information is at the core of the partnerships that patients and their families forge with today's complex modern health systems. This information may be provided in a variety of forms — ranging from a discussion between a patient and a health care provider to a health promotion advertisement, a consent form, or one of many other forms of health communication common in our society. Yet millions of Americans cannot understand or act upon this information. To address this problem, the field of health literacy brings together research and practice from diverse fields including education, health services, and social and cultural sciences, and the many organizations whose actions can improve or impede health literacy. *Health Literacy: Prescription to End Confusion* examines the body of knowledge that applies to the field of health literacy, and recommends actions to promote a health literate society. By examining the extent of limited health literacy and the ways to improve it, we can improve the health of individuals and populations.

Psychological Impact of Behaviour Restrictions During the Pandemic Barrie Gunter, 2022-07-12 This volume examines the undesirable or harmful cognitive, emotional and behavioural side-effects of COVID-19 and of the behavioural restrictions imposed by governments on their populations during the pandemic. Societal lockdowns and other intervening behavioural restrictions, built significantly around social isolation, used by governments to control the spread of COVID-19 disrupted the lives of most people. There were economic costs for many as workplaces closed down, as well as severe stresses on friendships and romantic relationships, an increase in instances of abuse and domestic violence, and concerns about people drinking too much alcohol or gambling too much as compensatory behaviours. Understanding which people were at risk, and in what ways, could teach important lessons for the future. Presenting a timely review of the most recent international research and evidence, author Barrie Gunter assesses the major collateral, psychological side-effects of the pandemic. Looking forward, Gunter also considers how new models might be developed that take into account not just the need to halt the spread of a new virus, but also minimise collateral damage which could be every bit as severe in both the short term and long term. Identifying and analysing the nature and severity of collateral side-effects of pandemic-related behaviour restrictions, this is essential reading for students and researchers in psychology, public health and medical sciences and policymakers assessing government strategies, responses and performance.

The Orchid Folios Mok Zining, 2022-08-12 “When you take an orchid out of its pot, you must first loosen the roots’ hold on the soil. Late last evening as I unravelled the braids of the shattered phalaenopsis, I saw how the ends were white and shrivelled from neglect. You have to do it gently—it’s like combing hair. I remember Mum’s fingers running through mine,

and mine through hers, until the final months when all of it started to fall.” A pot shatters. An arrangement falls apart. A florist finds herself amidst the scattered leaves of history. At once a poetry collection and a documentary novella, *The Orchid Folios* reimagines the orchid as a living, breathing document of history: a history that enmeshes the personal, colonial, linguistic, and biotechnological with the Vanda Miss Joaquim, the symbol of Singapore’s postcolonial hybridity. While the Orchid has shaped the fantastical narratives that govern our multiracial City in a Garden, it continues to shape-shift and bloom on its own terms, challenging us to imagine a decolonised Singapore. This is the organism at the heart of *The Orchid Folios*—by turns stark and unruly, documenting and challenging the narratives that are the roots of our national consciousness.

Mentoring in Nursing through Narrative Stories Across the World Nancy Rollins Gantz, Thóra B.

Hafsteinsdóttir, 2023-07-15 The book explores how mentoring, theoretical background of mentoring and how mentoring is used by nurses in all arenas where they work in health care, education, research, policy, politics, and academia in supporting nurses with their professional and career development. Over 300 mentors and mentees, from a wide range of countries across all continents, share their stories of mentoring reflecting on their development in leadership, clinical practice, education, research and politics. The book describes various types of mentoring including more traditional types of mentoring as well as virtual, online and peer mentoring. During the mentorship trajectories the nurses address an inclusive collection of issues that they are faced with and share supporting strategies. The book highlights the importance of mentoring for nurses to support their personal, and professional leadership development. Also, it emphasizes the importance of mentoring for when nurses engaged in variety of projects that could entail or encompass evidence-based clinical practice, development within education, research in the clinical arena, policy formation, political affairs, or cultural inclusion that present significant impact in patient care and healthcare outcomes within and across countries. With *The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity* report from the National Academies of Sciences, published in 2021, the role of nursing will become ever more dynamic and therefore the profession of nursing must be visible in improving and securing the future for patients, families, and communities across the globe. Mentoring practices to build the profession’s leaders are forever essential, acute, and imperative. This book shows how mentoring can support nurses in further developing nursing as a profession and scientific discipline across countries to support clinical application of evidence based practice, and nursing education and research dissemination. Accordingly, this book shares essential, diverse and pioneering expertise through wide range of narrative stories that will benefit nurses at all years of experience, from early career nurses, emerging leaders, nurse educators, leaders, policy makers and nurse scientists around the globe. The nursing profession must magnify its position in health care and nurses need to proliferate their contributions throughout the globe. They can accomplish that through mentoring and “growing and nurturing other nurses” to advance and thrive in today’s world.
