Marcus Vega Doesn't Speak Spanish Pablo Cartaya,2019-07-09 One boy's search for his father leads him to Puerto Rico in this moving-middle grade novel, for fans of Ghost and See You in the Cosmos. Marcus Vega is six feet tall, 180 pounds, and the owner of a premature mustache. When you look like this and you're only in the eighth grade, you're both a threat and a target. After a fight at school leaves Marcus facing suspension, Marcus's mom decides it's time for a change of environment. She takes Marcus and his younger brother to Puerto Rico to spend a week with relatives they don't remember or have never met. But Marcus can't focus knowing that his father--who walked out of their lives ten years ago--is somewhere on the island. So begins Marcus's incredible journey, a series of misadventures that take him all over Puerto Rico in search of his elusive namesake. Marcus doesn't know if he'll ever find his father, but what he ultimately discovers changes his life. And he even learns a bit of Spanish along the way.

Conéctate Grant Goodall, Darcy Lear, 2020-12 *Conéctate* is a fresh approach in every way. With its focus on the most critical language for communication, its active presentation of vocabulary and grammar, and its inclusion of real-world culture throughout, the program provides a unique framework for the Introductory Spanish course, with two separate but complementary goals in mind: learning to use the language and appreciating the world that it comes from--

**An Introduction to Young Children With Special Needs** Richard M. Gargiulo, Jennifer L. Kilgo, 2018-12-07 *An Introduction to Young Children with Special Needs: Birth Through Age Eight* is a comprehensive introduction to educational policies, programs, practices, and services for future practitioners serving young children with delays or disabilities in early intervention-early childhood special education (EI-ECSE). Thoughtfully addressing the needs of children at risk for learning or development delays or disabilities, revered authors Richard M. Gargiulo and Jennifer L. Kilgo offer evidence-based interventions and instructional techniques that provide students with a broad understanding of important theoretical and philosophical foundations, including evidence-based decision making, developmentally appropriate practices, cultural responsiveness, and activity-based intervention.

*Culture, Learning, and Technology* Angela D. Benson, Roberto Joseph, Joi L. Moore, 2017-02-17 *Culture, Learning, and Technology: Research and Practice* provides readers with an overview of the research on culture, learning, and technology (CLT) and introduces the concept of culture-related theoretical frameworks. In 13 chapters, the book explores the theoretical and philosophical views of CLT, presents research studies that examine various aspects of CLT, and showcases projects that employ best practices in CLT. Written for researchers and students in the fields of Educational Technology, Instructional Design, and the Learning Sciences, this volume represents a broad conceptualization of CLT and encompasses a variety of settings. As the first significant collection of research in this emerging field of study, *Culture, Learning, and Technology* overflows with new insights into the increasing role of technology use across all levels of education.

**Technofuturos** Nancy Raquel Mirabal, Agustín Laó-Montes, 2007 *Technofuturos* offers a critical and innovative exploration of the forms of representation found in Latina/o studies. The editors, Nancy Raquel Mirabal and Agustín Laó-Montes, challenge conventional notions of Latina/o identities, histories, and cultures by historicizing and differentiating the multiple discourses of Latinidad. The essays examine the temporality and spatiality of socio-historical processes, the multiple and varied constellations of power, and the complicated geographies of desire. By analyzing the discursive, performative, and aesthetic dimensions of knowledge, this book contests and reconstructs Latina/o studies. *Technofuturos* is a captivating and sophisticated read that will appeal to scholars of Latina/o studies and those interested in postcolonial critique.

New Technologies in Public Administration Giorgio Petroni, Fanie Cloete, 2005 Research on the relationship between technology dynamics and Public Administration (PA) began some years ago and was inspired by the realization that

technological development has produced a far-reaching interaction with PA. It is emphasized how technological development and PA influence each other, as investments are managed by public agencies. There are some branches of PA that heavily rely on technology for their activities; such as the defense sector, the space agencies, the agencies for environmental protection, and those that are responsible for food control and safety and so on. Some technological advancements have found fertile ground in PA. The impact of technologies such as ICT or space technologies on PA is from a political and social point of view the most important. The adoption of such technologies can make it possible to offer more services to citizens. The adoption of new technologies can also enhance the efficiency and effectiveness of the bureaucratic apparatus and can even influence positively the mechanisms of political representation. The most interesting applications of technology are those relating to earth observations because these are able to strengthen en

Handbook of Research on Integrating Technology Into Contemporary Language Learning and Teaching Zou, Bin,Thomas, Michael,2018-02-23 Technology has become an integral part of our everyday lives. As today's teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom, but "how?" The Handbook of Research on Integrating Technology Into Contemporary Language Learning and Teaching is a critical scholarly publication that examines the relationship between language education and technology and the ability to improve language education through technological advances. Featuring coverage on a wide range of topics, such as computer-assisted language learning, flipped instruction, and teacher education, this publication is geared toward researchers, practitioners, and education professionals seeking relevant research on the improvement of language education through the use of technology.

*Best Practices in Online Teaching and Learning across Academic Disciplines* Ross C. Alexander,2017-10-17 Online teaching and learning has surged in recent years, and faculty who normally teach in face-to-face settings are increasingly called upon to teach blended, hybrid, and fully online courses. *Best Practices in Online Teaching and Learning across Academic Disciplines* provides insights from experienced university teachers and scholars across multiple disciplines—including social sciences, humanities, natural sciences, mathematics, and professional programs such as nursing, education, and business administration—who share innovative practices, pedagogies, and instructional design techniques. This work highlights and features effective, practical, innovative, and engaging best-practices and approaches in online teaching and instructional design that can assist university faculty members and teachers, course designers and developers, and administrators invested and involved in online education. Using a common theme and structure, each chapter is co-authored by faculty members possessing a wealth of experience and credentialing in online teaching and instructional design in the relevant discipline or sub-discipline. Chapters include best-practices, approaches, and techniques within the discipline as well as relevant, innovative, and specific tools and strategies that improve student engagement and outcomes. The book will appeal to faculty members and administrators in higher education teaching or designing online courses or entire online curricula, as well as instructional design staff working with and training faculty. Readers will be especially interested to discover lessons about how contributors have successfully taught and designed courses in disciplines not typically associated with online learning, such as mathematics, composition/writing, drawing, hard sciences, and speech, among others.
