Sea Otter Conservation Shawn Larson,James L. Bodkin,Glenn R VanBlaricom,2014-12-23 Sea otters are good indicators of ocean health. In addition, they are a keystone species, offering a stabilizing effect on ecosystem, controlling sea urchin populations that would otherwise inflict damage to kelp forest ecosystems. The kelp forest ecosystem is crucial for marine organisms and contains coastal erosion. With the concerns about the imperiled status of sea otter populations in California, Aleutian Archipelago and coastal areas of Russia and Japan, the last several years have shown growth of interest culturally and politically in the status and preservation of sea otter populations. Sea Otter Conservation brings together the vast knowledge of well-respected leaders in the field, offering insight into the more than 100 years of conservation and research that have resulted in recovery from near extinction. This publication assesses the issues influencing prospects for continued conservation and recovery of the sea otter populations and provides insight into how to handle future global changes. - Covers scientific, cultural, economic and political components of sea otter conservation - Provides guidance on how to manage threats to the sea otter populations in the face of future global changes - Highlights the effects that interactions of coastal animals have with the marine ecosystem

Biodiversity Conservation: A Very Short Introduction David W. Macdonald,2023-06-27 Very Short Introductions: Brilliant, Sharp, Inspiring Extinction is a natural process. In geological time there have been several periods of mass extinction. One of these periods is unfolding right now but all the evidence suggests that current extinction rates are between a hundred and a thousand times greater than the background rate. To put this in to context, a quarter of all known mammalian species is at risk. The current extinction crisis is unique, because it is caused by the impact of one species, humans, on all others. This acceleration of species loss, and the much more widespread reductions in the populations of many species, is not merely a tragedy in aesthetics, it is also a threat to the quality of human life, indeed to the entire human enterprise. Biodiversity, the diversity of life, is not only fascinating and beautiful, it is the engine of all the world's natural cycles, and the source of many of the resources on which humanity depends. Concern about biodiversity conservation is, therefore, not merely the preoccupation of a few enthusiastic naturalists - it is the lifeline business of everybody. In this Very Short Introduction, David Macdonald introduces the concept of biodiversity and the basic biological processes that it involves - evolutionary, ecological, and behavioral. He considers the various threats to biodiversity, their impacts, and some of the

solutions to the problems; concluding by considering the future of biodiversity conservation. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Biological Diversity: Current Status and Conservation Policies Vinod Kumar, Sunil Kumar, Nitin Kamboj, Temin Payum, Pankaj Kumar, Sonika Kumari, 2021-10-25 The present book has been designed to bind prime knowledge of climate change-induced impacts on various aspects of our environment and its biological diversity. The book also contains updated information, methods and tools for the monitoring and conservation of impacted biological diversity.

Biodiversity Conservation Ethics in Major Religions H. S. A. Yahya, 2010-10-22 Covering three broader issues biodiversity conservation, religious doctrine and environment the book *Biodiversity Conservation Ethics in Major Religions* is the result of a unique approach. It attempts to initiate scientific discourse through the fabric of religions. Spread across 15 chapters, the book covers the essence of 10 religions on biodiversity, encompassing a wide range of issues related to conservation. The book promises to be a useful resource for biodiversity students, researchers and protected area managers and also for religious scholars who are invited to look at the broader themes of religions beyond theology.

Conservation Biology in Sub-Saharan Africa Richard Primack, Johnny W. Wilson, 2019-09-10 *Conservation Biology in Sub-Saharan Africa* comprehensively explores the challenges and potential solutions to key conservation issues in Sub-Saharan Africa. Easy to read, this lucid and accessible textbook includes fifteen chapters that cover a full range of conservation topics, including threats to biodiversity, environmental laws, and protected areas management, as well as related topics such as sustainability, poverty, and human-wildlife conflict. This rich resource also includes a background discussion of what conservation biology is, a wide range of theoretical approaches to the subject, and concrete examples of conservation practice in specific African contexts. Strategies are outlined to protect biodiversity whilst promoting economic development in the region. Boxes covering specific themes written by scientists who live and work throughout the region are included in each chapter, together with recommended readings and suggested discussion topics. Each chapter also includes an extensive bibliography. *Conservation Biology in Sub-Saharan Africa* provides the most up-to-date study in the field. It is an essential resource, available on-line without charge, for undergraduate and graduate students, as well as a handy guide for professionals working to stop the rapid loss of biodiversity in Sub-Saharan Africa and elsewhere.

Biodiversity Traditional Knowledge Intellectual Property Rights S. Ram Reddy, M. Surekha, V. Krishna Reddy, 2016-06-01 The present book "Biodiversity, Traditional Knowledge and Intellectual Property Rights" elaborates principles of biodiversity

right from definitions and concepts to strategies for conservation of biodiversity. It also explains the roles and functions of international organizations like CBD in biodiversity conservation. The unique feature of this book is it connects biodiversity, traditional knowledge and intellectual property rights. Different aspects of biodiversity related traditional knowledge and international initiatives undertaken to protect the rights of traditional knowledge holders are discussed.

Biodiversity and Conservation of Woody Plants M. R. Ahuja, S. Mohan Jain, 2017-11-21 This book provides complete, comprehensive, and broad subject-based reviews for students, teachers, researchers, policymakers, conservationists, and NGOs interested in the biodiversity and conservation of woody plants. Forests cover approximately 31 percent of the world's total landmass; 93 percent is natural forest and only 7 percent consists of planted trees. Forest decline is progressing at an alarming rate worldwide. In addition to human activities (logging, deforestation, and exploiting forest lands for agriculture and industrial use), a number of other factors - including pests and diseases, drought, soil acidity, radiation, and ozone - are cumulatively contributing to global forest decline. The present situation forces us to focus on forest conservation strategies for the present and future. Gene conservation and maintaining genetic diversity in forest ecosystems are crucial to the preservation of forest genetic resources. This calls for integrated action to implement both the in situ (on site) preservation of forest stands and ex situ (distant from the original site) strategies for the conservation of woody plants' genetic resources. Selected priority areas include: 1) assessing patterns of genetic diversity and threats, 2) understanding the biological processes regulating genetic diversity, 3) assessing the impact of human activities and climate change on genetic diversity, and 5) finding methods for prioritizing species and populations for the conservation of forest trees genetic resources. All chapters were written by leading scientists in their respective fields, which include: woody plant diversity, ecology and evolution; assessment of genetic diversity in forest tree populations; conservation planning under climate change; and in situ and ex situ strategies, including biotechnological approaches, for the conservation of woody plants genetic resources.

Encyclopedia of Food Security and Sustainability, 2018-11-08 The Encyclopedia of Food Security and Sustainability, Three Volume Set covers the hottest topics in the science of food sustainability, providing a synopsis of the path society is on to secure food for a growing population. It investigates the focal issue of sustainable food production in relation to the effects of global change on food resources, biodiversity and global food security. This collection of methodological approaches and knowledge derived from expert authors around the world offers the research community, food industry, scientists and students with the knowledge to relate to, and report on, the novel challenges of food production and sustainability. This comprehensive encyclopedia will act as a platform to show how an interdisciplinary approach and closer collaboration between the scientific and industrial communities is necessary to strengthen our existing capacity to generate and share research data. Offers readers a 'one-stop' resource on the topic of food security and sustainability Contains articles split into

sections based on the various dimensions of Food Security and Food Sustainability Written by academics and practitioners from various fields and regions with a “farm to fork understanding Includes concise and accessible chapters, providing an authoritative introduction for non-specialists and readers from undergraduate level upwards, as well as up-to-date foundational content for those familiar with the field

Sustainable Development Policy Directory W. Alan Strong, Lesley Hemphill, 2008-04-15 This Directory means that a whole range of built environment professionals need never be caught out by the perversities of policy – in its formulation or on its journey into the real life of you and me. To have in one place the means of not only burrowing down into any one policy, but also of exploring the interconnections is a precious resource for any professional – ‘sustainability literate’ or not. Today, nobody who delivers our built environment can be excused from taking responsibility for the future. Armed with this Directory their contribution can only be made more effective. Sara Parkin OBE Forum for the Future This desk-top reference on sustainable development provides essential information for all who need to be up-to-date and familiar with the implications of the legal, fiscal and planning frameworks around the global and local sustainability agenda. It is relevant to a range of organisations and individuals – from national and local authorities, professional bodies, built environment professions, academia, environmental consultancies, non-governmental organisations and others. Carefully designed to facilitate access for a diverse range of stakeholders, it covers international, European, British and local policies in key built environment themes, and develops their inter-relationship to sustainable development. The Directory addresses each theme in a series of tables which summarise the policy purpose and also provide web-links to view the specific policy documents. The themes covered are: · Biodiversity · Climate Change · Construction · Energy · Environment · Planning · Pollution · Social Issues · Sustainable Development Policy and Practice · Transport · Urban Development · Waste Management · Water Other books of interest: *The Green Guide to Specification* Anderson ISBN: 1405119616 *Smart & Sustainable Built Environments* Yang Hardback ISBN: 1405124229 *Sustainable Property Development Keeping* Paperback ISBN: 0632058048 *Previously Developed Land* Syms Paperback 1405106972 *Evaluating Sustainable Development* Brandon 0632064862 Cover design by Garth Stewart www.thatconstructionsite.com

Accessing Biological Resources Natalie P. Stoianoff, 2004-01-01 Stoianoff (law, University of Wollongong, Australia) collects contributions from lawyers, scientists, and policy makers on issues related to the use of biological and genetic resources for commercial and scientific purposes. While emphasis is on the Convention on Biological Diversity and the Interna.

Breaking New Ground Linda Starke, 2016-12-05 Mining is fundamental to our lives – we wear and travel in; build, cook and communicate with its products daily. However, it is also one of the most environmentally damaging industries. This study examines how such a huge and multi-faceted industry can be made sustainable, minimizing its harmful impacts and

maximizing its social and economic contribution. It analyses the different needs and risks of those affected, as well as issues of supply and demand of minerals throughout the world.

Environment and Ecology Ramdevsinh Jadeja, Environment and Ecology is a major section for Civil Services in last decade. This book covers environment, ecology and bio-diversity quite thoroughly. It is quite contemporary with all the important issues like global warming, threat to ecology, climate change, the Kyoto and other protocols and conventions covered in-depth.

Scaling-up Finance Mechanisms for Biodiversity OECD,2013-05-24 This report examines six mechanisms that can be used to scale-up financing for biodiversity conservation and sustainable use and to help meet the 2011-20 Aichi Biodiversity Targets.

Nature and Culture Sarah Pilgrim,Jules N. Pretty,2010 There is a growing recognition that the diversity of life comprises both biological and cultural diversity. But this division is not universal and, in many cases, has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature. This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity. The international team of authors explore the common drivers of loss, and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation, thus reducing the gap between science, policy and practice. While conserving nature alongside human cultures presents unique challenges, this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity.

Biodiversity and Traditional Knowledge Sarah A Laird,2010-09-23 Biodiversity research and prospecting are long-standing activities taking place in a new legal and ethical environment. Following entry into force of the Convention on Biological Diversity in 1993, and other recent policy developments, expectations and obligations for research and prospecting partnerships have changed. However, to date there are few guides to integrating these concepts with practice. This book offers practical guidance on how to arrive at equitable biodiversity research and prospecting partnerships. Drawing on experience and lessons learned from around the world, it provides case studies, analysis and recommendations in a range of areas that together form a new framework for creating equity in these partnerships. They include researcher codes of ethics, institutional policies, community research agreements, the design of more effective commercial partnerships and biodiversity prospecting contracts, the drafting and implementation of national 'access and benefit-sharing' laws, and institutional tools for the distribution of financial benefits. As part of the People and Plants initiative to enhance the role of communities in efforts to conserve biodiversity and use natural resources sustainably, Biodiversity and Traditional Knowledge will be invaluable to students, researchers and local communities, academic institutions, international agencies, government bodies and companies involved in biodiversity research, prospecting and conservation.

Forestry Principles And Applications A.J. Raj,S.B. Lal,2013-01-01 This textbook is written for undergraduates & postgraduates, university & college teachers, scientists and professional foresters. It offers a real-life introduction to the field of forestry and an interdisciplinary overview of the theory behind it. This textbook covers forestry in great depth and the real strength of the book lies in its focus on the context and applications of the field. Thanks to its wide scope, it not only serves as a useful introduction to the field but can also be used to understand how many other key forestry topics have changed in recent years as a consequence of the technology advancement. This textbook will significantly help the students for preparation of UPSC-Civil Service Exam, UPSC-Indian Forest Service Exam, ICFRE & ICAR Scientists/NET Exam, University Entrance Exam for admission to M.Sc. and Ph.D. programmes.

Human Values and Biodiversity Conservation Clement A. Tisdell,2014-08-01 This pioneering book explores the influence of human values on the willingness of individuals to pay for the conservation of individual wildlife species (and classes of these), to be for or against their survival, and to favour or oppose their harvesting.

Governance of Biodiversity Conservation in China and Taiwan Gerald A. McBeath,Tse-Kang Leng,2006-01-01 Written in a readable and concise manner, *Governance of Biodiversity Conservation in China and Taiwan* makes an interesting contribution to the study of Chinese environmental politics. Kathleen Burton, *The China Quarterly* McBeath and Leng s work on contemporary Chinese environmental governance and conservation provides an excellent overview of the key issues in the People s Republic as well as a timely comparison with environmental issues in Taiwan. . . McBeath and Leng s book is written in an concise and readable manner appropriate for undergraduate courses, while the breadth and depth of information makes it equally useful for graduate research. This book on China s environment makes a worthy contribution to contemporary conservation studies and policy issues, and should be essential reading for specialists and students working on biodiversity governance issues in China. Jack Patrick Hayes, *Pacific Affairs* This fascinating volume highlights the ongoing conflict between economic development and environmental protection in both mainland China and Taiwan. The authors value biological diversity and examine its loss and conservation from historical and comparative perspectives. Despite significant differences in institutional frameworks and environmental NGOs on the two sides of the Taiwan Strait, the authors also note a similar approach to biodiversity conservation and the entailed success or failure. This volume is a must read for people who are concerned with the endangered global ecosystem. Students in public policy comparison may find this volume instructive in combining institutional analysis with behavioral observation. Lin Gang, Shanghai Jiao Tong University, People s Republic of China China and Taiwan have roughly one-eighth of the world s known species. Their approaches to biodiversity issues thus have global as well as national repercussions. Gerald McBeath and Tse-Kang Leng explore the ongoing conflicts between economic development, typically pursued by businesses and governments, and communities seeking to preserve and protect local human and ecosystem values. China and Taiwan have sharply different political and economic systems. In

Taiwan, a public relatively more supportive of sustainable development, a free press, a more transparent decision-making process, and an autonomous civil society have influenced governance. Yet democratization has not guaranteed better environmental outcomes. In China, on the other hand, fragmentation of power and softer forms of authoritarianism than in the Maoist era have created openings for NGOs, scientists, journalists, and officials seeking a sustainable future to participate in the environmental policy making process. The authors provide an explicit and comparative treatment of the national policies preserving rare, threatened, and endangered species and ecosystems. Considerable attention is paid to the actors involved in policy formation and implementation as well as to recent cases concerning biodiversity conservation in China and Taiwan. This comprehensive volume will appeal to students and researchers in the areas of political science, environmental science and politics, environmental activists in national and international NGOs, and members of multinational corporations working in developing countries.
