2024 Minor League Analyst Brent Hershey, 2024-03-12 The best resource for projecting future performance of minor league athletes— essential for fantasy league baseball players The first book of its kind to fully integrate sabermetrics and scouting, the *2024 Minor League Baseball Analyst* provides a distinctive brand of analysis for more than 1,000 minor league baseball players. Features include scouting reports for all players, batter skills ratings, pitch repertoires, performance trends, major league equivalents, and expected major league debuts. A complete sabermetric glossary is also included. This one-of-a-kind reference is ideally suited for baseball analysts and those who play in fantasy leagues with farm systems.

Industrial IoT Technologies and Applications Lourdes Peñalver, Lorena Parra, 2021-03-10 This book constitutes the thoroughly refereed post-conference proceedings of the 4th International Conference on Industrial IoT Technologies and Applications, IoT 2020, held in December 2020. Due to Covid-19 pandemic the conference was held virtually. The widespread deployment of wireless sensor networks, clouds, industrial robot, embedded computing and inexpensive sensors has facilitated industrial Internet of Things (IndustrialIoT) technologies and fostered some emerging applications. The 14 carefully reviewed papers are a selection from 28 submissions and detail topics in the context of IoT for a smarter industry.

Tirant Lo Blanc Joanot Martorell, 2013-09-04 Translated by David H. Rosenthal Here is a recovered Renaissance classic, a Catalan novel of chivalry done into English for the first time by a gifted poet and translator. Cervantes singles out *Tirant lo Blanc* for very special praise in *Don Quixote*—in the scene in which the don's friends, eager to save his sanity, are making a bonfire of the romances of chivalry which have constituted his sole intellectual and spiritual nourishments. Cervantes makes a pointed exception of this work, putting into the mouth of a character the suggestion that the book deserves to remain in print throughout the ages. So it has—and now it can be read in David H. Rosenthal's lively English. *Tirant lo Blanc* presents the life of the Renaissance nobility: politics, lovemaking, and war. The hero participates in all these activities with a great deal of dash and good humor, there is much excellent conversation along the way, and by the time the story has come to its satisfying conclusion, the modern reader is convinced that life was quite as complex 500 years ago as it is today—and, for the European nobility, perhaps a good deal more entertaining.

The Place of Narrative Marilyn Aronberg Lavin, 1990-12-15 Looking at more than two hundred Italian medieval and Renaissance mural cycles, Lavin examines—with the aid of computer technology—the rearranged chronologies of familiar

religious stories found therein. Like many masterpieces, Lavin's book builds upon a simple idea . . . it is possible to do a computer analysis of . . . visual narratives. . . . This is the first computer-based study of the visual arts of which I am aware that illustrates how those technologies can utterly transform the study of old master art. An extremely important book, one likely to become the most influential recent study of art of this period, *The Place of Narrative* is also a beautiful artifact.—David Carrier, *Leonardo Covering over a millennium and dealing with the whole of Italy*, Lavin makes pioneering use of new methodology employing a computer database . . . [and] novel terminology to describe the disposition of scenes of church and chapel walls. . . . We should recognize this as a book of high seriousness which reaches out into new areas and which will fruitfully stimulate much thought on a neglected subject of very considerable significance.—Julian Gardner, *Burlington Magazine*

Game of Spies Paddy Ashdown, 2016 'Game of Spies' tells the story of a lethal spy triangle between 1942 and 1944 in Bordeaux - and of France's greatest betrayal by aristocratic and right-wing Resistance leader Andre Grandclement. The story centres on three men: one British, one French and one German and the duel they fought out in an atmosphere of collaboration, betrayal and assassination, in which comrades sold fellow comrades, Allied agents and downed pilots to the Germans, as casually as they would a bottle of wine. It is a story of SOE, treachery, bed-hopping and executions in the city labelled 'la plus collaboratrice' in the whole of France.--Publisher description.

Open Tourism Roman Egger, Igor Gula, Dominik Walcher, 2016-03-02 This book examines the concepts of open innovation, crowdsourcing and co-creation from a holistic point of view and analyzes them considering their suitability to the tourism industry. Methods, theories and models are discussed and examined regarding their practical applicability in tourism. The book illustrates the theoretical mechanisms and principles of Open Innovation, Crowdsourcing and Co-creation with case studies and best practices examples. In addition to the scientific target group, the book is a useful resource for managers of the entire tourism industry. First, the book presents the theoretical fundamentals and concepts in 11 specific chapters. This basis is then enriched by three parts with case studies, focusing on information, creation and provision respectively. Finally in a concluding part the editors sum up the book and give an outlook on the implications, learnings and future perspectives of open innovation, crowdsourcing and collaborative consumption in the tourism industry.

A Brilliant Little Operation Paddy Ashdown, 2013-05-02 The complete story of the remarkable canoe raid on German ships in Bordeaux Harbour - by the man who himself served in the Special Boat Squadron. In 1942, before El Alamein turned the tide of war, the German merchant fleet was re-supplying its war machine with impunity. So Operation Frankton, a daring and secret raid, was launched by Mountbatten's Combined Operations and led by the enigmatic 'Blondie' Hasler - to paddle 'Cockleshell' canoes right into Bordeaux harbour and sink the ships at anchor. It was a desperately hazardous mission from the start - dropped by submarine to canoe some hundred miles up the Gironde into the heart of Vichy France, surviving

terrifying tidal races, only to face the biggest challenge of all: escaping across the Pyrenees. Fewer than half the men made it to Bordeaux; only four laid their mines; just two got back alive. But the most damage was done to the Germans' sense of impregnability. Paddy Ashdown, himself a member of the Royal Marines' elite Special Boat Squadron formed as a consequence of Frankton, has always been fascinated by this classic story of bravery and ingenuity - as a young man even meeting his hero Hasler once. Now, after researching previously unseen archives and tracing surviving witnesses, he has written the definitive account of the raid. The real truth, he discovers - a deplorable tale of Whitehall rivalry and breakdowns in communication - serves only to make the achievements of the 'Cockleshell' heroes all the more heroic.

Electric Currents in Geospace and Beyond Andreas Keiling, Octav Marghitu, Michael Wheatland, 2018-05-08 Electric currents are fundamental to the structure and dynamics of space plasmas, including our own near-Earth space environment, or "geospace." This volume takes an integrated approach to the subject of electric currents by incorporating their phenomenology and physics for many regions in one volume. It covers a broad range of topics from the pioneers of electric currents in outer space, to measurement and analysis techniques, and the many types of electric currents. First volume on electric currents in space in over a decade that provides authoritative up-to-date insight on the current status of research Reviews recent advances in observations, simulation, and theory of electric currents Provides comparative overviews of electric currents in the space environments of different astronomical bodies *Electric Currents in Geospace and Beyond* serves as an excellent reference volume for a broad community of space scientists, astronomers, and astrophysicists who are studying space plasmas in the solar system. Read an interview with the editors to find out more:

The Making of Modern Colombia David Bushnell, 1993-02-09 Colombia's status as the fourth largest nation in Latin America and third most populous—as well as its largest exporter of such disparate commodities as emeralds, books, processed cocaine, and cut flowers—makes this, the first history of Colombia written in English, a much-needed book. It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes—a country where military dictators are virtually unknown, where the political left is congenitally weak, and where urbanization and industrialization have spawned no lasting populist movement. There is more to Colombia than the drug trafficking and violence that have recently gripped the world's attention. In the face of both cocaine wars and guerrilla conflict, the country has maintained steady economic growth as well as a relatively open and democratic government based on a two-party system. It has also produced an impressive body of art and literature. David Bushnell traces the process of state-building in Colombia from the

struggle for independence, territorial consolidation, and reform in the nineteenth century to economic development and social and political democratization in the twentieth. He also sheds light on the modern history of Latin America as a whole.

Banking in the New Europe Edward P.M. Gardener, Barry Moore, 2002-10-02 The completion of the European Single Market Programme (SMP) and the launch of 'Euroland' are bold statements on the European Union and its future. Within this economic process, the particular importance of the banking and financial services sectors is widely emphasized. This collection explores the strategic impact of the Single Market Programme and European Monetary Union on European banks and banking systems. The contributors examine eleven banking systems: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Spain and the United Kingdom. Thoroughly up-to-date and with a common thematic overview of major trends in European banking systems, this book covers key strategic developments, structural changes, performance trends and strategies.

New Issues in Financial and Credit Markets Franco Fiordelisi, Philip Molyneux, Daniele Previati, 2010-10-06 This collection of conference papers presents a contemporary insight into key trends impacting on the global financial sector post crisis and highlights new policy and research areas affecting banks and other financial institutions. The four main themes are: financial crises, credit activity, capital markets and risk management.

Advances in Efficiency and Productivity II Juan Aparicio, C. A. Knox Lovell, Jesus T. Pastor, Joe Zhu, 2020-07-20 This book surveys the state-of-the-art in efficiency and productivity analysis, examining advances in the analytical foundations and empirical applications. The analytical techniques developed in this book for efficiency provide alternative ways of defining optimum outcome sets, typically as a (technical) production frontier or as an (economic) cost, revenue or profit frontier, and alternative ways of measuring efficiency relative to an appropriate frontier. Simultaneously, the analytical techniques developed for efficiency analysis extend directly to productivity analysis, thereby providing alternative methods for estimating productivity levels, and productivity change through time or productivity variation across producers. This book includes chapters using data envelopment analysis (DEA) or stochastic frontier analysis (SFA) as quantitative techniques capable of measuring efficiency and productivity. Across the book's 15 chapters, it broadly extends into popular application areas including agriculture, banking and finance, and municipal performance, and relatively new application areas including corporate social responsibility, the value of intangible assets, land consolidation, and the measurement of economic well-being. The chapters also cover topics such as permutation tests for production frontier shifts, new indices of total factor productivity, and also randomized controlled trials and production frontiers.

Low-Frequency Waves in Space Plasmas Andreas Keiling, Dong-Hun Lee, Valery Nakariakov, 2016-04-04 Low-

frequency waves in space plasmas have been studied for several decades, and our knowledge gain has been incremental with several paradigm-changing leaps forward. In our solar system, such waves occur in the ionospheres and magnetospheres of planets, and around our Moon. They occur in the solar wind, and more recently, they have been confirmed in the Sun's atmosphere as well. The goal of wave research is to understand their generation, their propagation, and their interaction with the surrounding plasma. *Low-frequency Waves in Space Plasmas* presents a concise and authoritative up-to-date look on where wave research stands: What have we learned in the last decade? What are unanswered questions? While in the past waves in different astrophysical plasmas have been largely treated in separate books, the unique feature of this monograph is that it covers waves in many plasma regions, including: Waves in geospace, including ionosphere and magnetosphere Waves in planetary magnetospheres Waves at the Moon Waves in the solar wind Waves in the solar atmosphere Because of the breadth of topics covered, this volume should appeal to a broad community of space scientists and students, and it should also be of interest to astronomers/astrophysicists who are studying space plasmas beyond our Solar System.

Advances in the Economics of Religion Jean-Paul Carvalho, Sriya Iyer, Jared Rubin, 2019-06-29 This edited collection brings together expertise from around the globe to overview and debate key concepts and concerns in the economics of religion. While the economics of religion is a relatively new field of research in economics, economists have made and continue to make important contributions to the understanding of religion. There is much scope for economists to continue to make a significant contribution to debates about religion, including its implications for conflict, political economy, public goods, demography, education, finance, trade and economic growth.

Nein! Paddy Ashdown, 2019-08-19 From bestselling and prize-winning author Paddy Ashdown, a revelatory new history of German opposition to Hitler. 'Ashdown has a great gift for narrative history. He unearths little known stories and places them in context with great dexterity. His new book throws fresh and important light on a crucial topic.' JONATHAN DIMBLEBY In his last days, Adolf Hitler raged in his bunker that he had been betrayed by his own people, defeated from the inside. In part, he was right. By 1945, his armies were being crushed on all fronts, his regime collapsing with many fleeing retribution for their crimes. Yet, even before the war started, there were Germans very high in Hitler's command committed to bringing about his death and defeat. Paddy Ashdown tells, for the first time, the story of those at the very top of Hitler's Germany who tried first to prevent the Second World War and then to deny Hitler victory. Based on newly released files, the repeated attempts of the plotters to warn the Allies about Hitler's plans are revealed. What is revealed is that the anti-Hitler bomb plots, which have received so much attention are, in fact only a small part of a much wider story; one in which those at the highest levels of the German state used every means possible - conspiracy, assassination, espionage - to ensure that, for the sake of the long-term reputation of their country and the survival of liberal and democratic values, Hitler could not be

allowed to win the war. It is a matter of record that the European Union we have today and the nature and central position of Germany within it, is, in very large measure, the future envisaged by the plotters and for which they gave their lives.
