Commission on Development and Environment for Amazonia

Cities, Regions and Flows Peter V. Hall, Markus Hesse, 2013 *Cities, Regions and Flows* presents a theoretical framework for understanding the changing relationship between places and physical movement, and thoughtfully prepared case studies from five continents on how cities relate to value chains, and how they ensure accessibility and urban liveability in an increasingly contested policy environment. Moreover, the book discusses how urban policies attempt to solve related conflicts in terms of infrastructure provision, land use, local labour markets and environmental sustainability. The two subsystems that are of major interest here - urban regions on the one hand, and logistics management and physical distribution on the other - develop in quite distinct, and often contradictory, ways. Whereas urban regions face disintegration due to the expansion of the built environment and the spatio-temporal fragmentation of life-worlds and regional systems, the logistics system itself demands integration in order to keep flows moving and to reduce costs. Physical flows, networks and chains thus have a fundamental impact on urban restructuring.

The Amazon Várzea Miguel Pinedo-Vasquez, Mauro L. Ruffino, Christine Padoch, Eduardo S. Brondízio, 2010-11-30 This book takes a multi-disciplinary and critical look at what has changed over the last ten years in one of the world's most important and dynamic ecosystems, the Amazon floodplain or várzea. It also looks forward, assessing the trends that will determine the fate of environments and people of the várzea over the next ten years and providing crucial information that is needed to formulate strategies for confronting these looming realities.

How to Run a City Like Amazon, and Other Fables Mark Graham, Rob Kitchin, Shannon Mattern, Joe Shaw, 2019

City, State Ran Hirschl, 2020-06-12 More than half of the world's population lives in cities; by 2050, it will be more than three quarters. Projections suggest that megacities of 50 million or even 100 million inhabitants will emerge by the end of the century, mostly in the Global South. This shift marks a major and unprecedented transformation of the organization of society, both spatially and geopolitically. Our constitutional institutions and imagination, however, have failed to keep pace

with this new reality. Cities have remained virtually absent from constitutional law and constitutional thought, not to mention from comparative constitutional studies more generally. As the world is urbanizing at an extraordinary rate, this book argues, new thinking about constitutionalism and urbanization is desperately needed. In six chapters, the book considers the reasons for the constitutional blind spot concerning the metropolis, probes the constitutional relationship between states and (mega)cities worldwide, examines patterns of constitutional change and stalemate in city status, and aims to carve a new place for the city in constitutional thought, constitutional law and constitutional practice.

The Routledge Handbook of Sustainable Cities and Landscapes in the Pacific Rim Yizhao Yang, Anne Taufen, 2022-03-16
This handbook addresses a growing list of challenges faced by regions and cities in the Pacific Rim, drawing connections around the what, why, and how questions that are fundamental to sustainable development policies and planning practices. These include the connection between cities and surrounding landscapes, across different boundaries and scales; the persistence of environmental and development inequities; and the growing impacts of global climate change, including how physical conditions and social implications are being anticipated and addressed. Building upon localized knowledge and contextualized experiences, this edited collection brings attention to place-based approaches across the Pacific Rim and makes an important contribution to the scholarly and practical understanding of sustainable urban development models that have mostly emerged out of the Western experiences. Nine sections, each grounded in research, dialogue, and collaboration with practical examples and analysis, focus on a theme or dimension that carries critical impacts on a holistic vision of city-landscape development, such as resilient communities, ecosystem services and biodiversity, energy, water, health, and planning and engagement. This international edited collection will appeal to academics and students engaged in research involving landscape architecture, architecture, planning, public policy, law, urban studies, geography, environmental science, and area studies. It also informs policy makers, professionals, and advocates of actionable knowledge and adoptable ideas by connecting those issues with the Sustainable Development Goals (SDGs) of the United Nations. The collection of writings presented in this book speaks to multiyear collaboration of scholars through the APRU Sustainable Cities and Landscapes (SCL) Program and its global network, facilitated by SCL Annual Conferences and involving more than 100 contributors from more than 30 institutions. The Open Access version of chapters 1, 2, 4, 11, 17, 23, 30, 37, 42, 49, and 56 of this book, available at <http://www.taylorfrancis.com/books/e/9781003033530>, have been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

A Balancing Act for Brazil's Amazonian States The World Bank, 2023-01-11 Social deprivations coincide with vast

deforestation in Brazil's Legal Amazon, or Amazônia. Poverty reduction and sustainable development require renewed efforts to protect the region's exceptional natural wealth, coupled with a shift from an extractive to a productivity-oriented growth model.

Sustaining a City's Culture and Character Charles R. Wolfe, 2021-02-22 Somewhere, between character and caricature, there exists an authentic—a truly unique—urban place, that blends global and local, old and new. Yet, in a dramatically changing world dominated by crises of climate change, maintaining public health, and social justice, finding such places—and explaining their relevance—may be easier said than done. *Sustaining a City's Culture and Character* accepts that challenge, and provides a comprehensive method for assessing how and why successful places come to be, with an explicit emphasis on context: Authenticity, culture, character, and uniqueness are words with meanings that depend on who is using them and in what contexts. Through text interwoven with 160 full-color photographs by the author, and select illustrations by others, this book addresses how to enact blended and contextualized urban change, using the past and the status quo as catalysts rather than castaways. It provides resources and examples for the context-vetting process and for understanding how one era, object, or generation informs the next. This beautiful full-color book illustrates how we can understand—or unlock—a public place, neighborhood, or city. Based on comparative experiences around the world, the book proposes a new tool—called LEARN (Look, Engage, Assess, Review, and Negotiate)—as a way of sustaining urban culture and character in transformative times. Inspired by recent efforts and outcomes, the book is full of relevant examples. They include moving a small Swedish city, reviving Irish market towns, and revitalization efforts adjacent to London's Waterloo Station. *Sustaining a City's Culture and Character* provides a catalog of techniques that emphasize “bottom up,” resident-based input about local history, building forms, natural and open spaces, cultural assets and tradition, and related policy, planning, and regulatory examples. For those who seek an urbanism of distinctiveness to enhance city livability, rather than a bland, generic uniformity, the book examines on a global basis how the many interrelated facets of an urban area's unique, yet dynamic context—built, social, cultural and intangible—can be championed and advanced, rather than simply borrowed from another place.

Cities of the World, 1999 A compilation of current information on cultural, geographical, and political conditions in the countries and cities of six continents, based on the Department of State's 'Post reports'.

The Forgotten City Phil Allmendinger, 2021-05-25 We all want cities, where more than half of the world's population currently live, to be just, successful, clean, fair, green, sustainable, safe, healthy and affordable. Will 'smart cities' help achieve these aspirations or undermine them in the time of COVID-19? Phil Allmendinger, a world expert on cities, development, and urban governance, takes a critical approach to the role of 'smart' in future cities and the relationship with city development. Considering how technology can support active citizenship, he challenges the commercial drivers of big

tech and warns that these, not developments for 'social good', may dominate. Focusing on the dangers posed by social media, the platform economy and AI, he sets out what those making decisions on city development need to understand in order to save the planet through active politics and healthy cities.

How to Kill a City PE Moskowitz, 2017-03-07 "An exacting look at gentrification.... How to Kill a City elucidates the complex interplay between the forces we control and those that control us."—New York Times Book Review The term gentrification has become a buzzword to describe the changes in urban neighborhoods across the country, but we don't realize just how threatening it is. It means more than the arrival of trendy shops, much-maligned hipsters, and expensive lattes. The very future of American cities as vibrant, equitable spaces hangs in the balance. P. E. Moskowitz's *How to Kill a City* takes readers from the kitchen tables of hurting families who can no longer afford their homes to the corporate boardrooms and political backrooms where destructive housing policies are devised. Along the way, Moskowitz uncovers the massive, systemic forces behind gentrification in New Orleans, Detroit, San Francisco, and New York. In the new preface, Moskowitz stresses just how little has changed in those same cities and how the problems of gentrification are proliferating throughout America. The deceptively simple question of who can and cannot afford to pay the rent goes to the heart of America's crises of race and inequality. A vigorous, hard-hitting exposé, *How to Kill a City* reveals who holds power in our cities and how we can get it back.

Amazonia Without Myths Commission on Development and Environment for Amazonia,2001-12 This report, prepared by the Commission on Development and Environment for Amazonia at the initiative of the Amazon Cooperation Treaty and supported by the Inter-American Development Bank and the United Nations Development Programme, is based on the concept of an Amazonia that exists above and beyond the world of fantasy and myth: an Amazonia of flesh and blood, of human toil, of human history, of human faces and hopes, and future human beings. It is an analysis based not only on the experiences and technologies of today's world but also, and with greater emphasis, on the wisdom accumulated for centuries by Amazonia itself: standing Amazonia. The Amazon region has the largest area of tropical forest on the planet, and concern for its environmental deterioration extends well beyond the borders of the eight countries that form a part of it. With support from the IDB and UNDP, the Commission on Development and Environment for Amazonia prepared this report that provides data on the region's natural resources, population, health and infrastructure.

Understanding Urban Politics Timothy B. Krebs,Arnold Fleischmann,2020-02-17 In *Understanding Urban Politics: Institutions, Representation, and Policies*, Timothy B. Krebs and Arnold Fleischmann introduce a framework that focuses on the role of institutions in establishing the political "rules of the game," the representativeness of city government, the influence of participation in local democracy, and how each of these features influences the adoption and implementation of public policies. Part 1 lays the groundwork for the rest of the book by exploring the many meanings of "urban," analyzing what local governments do, and providing a history of American urban development. Part 2 examines the organizations and procedures that are central to urban politics and policy making: intergovernmental relations, local legislatures, and the local executive branch. Part 3 looks at elections and voting, local campaigns, and non-voting forms of participation. The four chapters in Part 4 focus on the policy process and the delivery of local services, local government finances, "Building the City" (economic development, land use, and housing), and policies affecting the quality of life (public safety, the environment, "morality" issues, and urban amenities). Krebs and Fleischmann bolster students' learning and skills with guiding questions at the start of each chapter, which ends with key terms, a summary, discussion questions, and research exercises. The appendix and website aid these efforts, as does a website for instructors.

Don't Be Evil Rana Foroohar, 2019-11-07 A TIMES BEST CURRENT AFFAIRS BOOK OF THE YEAR The award-winning Financial Times columnist exposes the threat that Big Tech poses to our democracies, our economies and ourselves 'Powerful' Sunday Times Google and Facebook receive 90% of the world's news advertising spend. Amazon takes half of all e-commerce in the US. Google and Apple operating systems run on all but 1% of cell phones globally. And 80% of corporate wealth is now held by 10% of companies - the digital titans. How did these once-idealistic and innovative companies come to manipulate elections, violate our privacy and pose a threat to the fabric of our democracy? Through her skilled reporting and unparalleled access, Rana Foroohar reveals the true extent to which the 'FAANG's (Facebook, Apple, Amazon, Netflix and Google) crush or absorb competitors, hijack our personal data and mental space and offshore their exorbitant profits. What's more, she shows how these threats to our democracies, livelihoods and minds are all intertwined. Yet Foroohar also lays out a plan for how we can resist, creating a framework that fosters innovation while protecting us from the dark side of digital technology. 'A masterful critique' Observer 'Insightful and powerfully argued' Daily Mail 'Essential reading ... whip-smart' Niall Ferguson 'Laser vision and trenchant business analysis' Shoshana Zuboff

Inequality and Uncertainty Marta Smagacz-Poziemska, M. Victoria Gómez, Patrícia Pereira, Laura Guarino, Sebastian Kurtenbach, Juan José Villalón, 2019-11-13 It is not possible to ignore the fact that cities are not only moving, vibrant and flourishing spaces, promising hope for better quality of life, but that they also accumulate and reflect significant problems. This book explores the relational and dynamic nature of urban inequalities, including their visible and invisible forms. By using the rather elusive term of 'uncertainty', the authors zoom in on specific aspects of urban inequalities that are difficult to measure, yet are acutely sensed and experienced by people and, more and more often, perceived as unfair. Here, in the recognition of inequalities as unjust and in the disagreement with the status quo, lies a positive aspect of uncertainty, which can lead to a social awakening and more active citizenship.
