DRUGS IN PEDIATRICS Mrs. Shikha Gupta, Mrs. Neelofur Ibran Ali, Dr. Manju Rajput, Ms. Kanaz Dsouza, Dr. Milka D. Madhale, 2023-05-23 Medication administration is an essential part of healthcare, and there are many nursing responsibilities related to administering medications. Medications can be prescribed to patients by physicians, nurse practitioners, or physician's assistants to be taken at home. However, it is also possible that prescription and non-prescription, over-the-counter (OTC) drugs may be administered by healthcare staff (nurses, trained medication aides, medical assistants, pharmacists, and other trained professionals) in hospitals, clinics, nursing homes, assisted living facilities, schools, camps, group homes, hospice, and during in-home care services. Most of the pediatric drug doses are based on age or weight and the dose can be adjusted depending upon the child's clinical response. Toxicity/ ineffectiveness are the two extreme complications that need to be cautious while giving drugs to the child. The medication administration definition is a guide that teaches nurses and healthcare professionals the principles, rights, responsibilities, and roles expected when giving drugs to patients. Medication is a substance that is either taken internally or placed on the body (skin, eyes, ears, nose) usually for one of four purposes or a combination of these reasons.

*Applying Metalytics to Measure Customer Experience in the Metaverse* Bathla, Devesh, Singh, Amandeep, 2022-06-24 In many ways, the appearance of the metaverse is an unparalleled progression. A number of new technologies have come together to enable its vision. Augmented reality (AR) and virtual reality (VR) headsets have become cheaper and more powerful improving the user experience. Blockchain has enabled digital currencies and NFTs. The new methods to transact and own digital goods are allowing creators to monetize their activities through tokens. In addition to monetization, and as a means to exchange value, token-holders can also participate in the platform's governance (e.g., vote on decisions). This

democratic ownership economy coupled with the possibility of interoperability could unlock immense economic opportunities whereby digital goods and services are no longer captive to a singular gaming platform or brand. As the world steps into the metaverse, it is imperative to spark conversations with all objects and those interacting within the next dimension. Applying Metalytics to Measure Customer Experience in the Metaverse introduces metalytics, a new perspective on analytics for the new dimension of spatial and immersive Web 3.0. It presents the new conversations in the elements of a new digital age converging at a large scale. Covering topics such as big data analytics, financial services, and network analysis, this premier reference source is an essential resource for business leaders and executives, IT managers, entrepreneurs, financial specialists, consultants, statisticians, marketers, government officials, students and educators of higher education, librarians, researchers, and academicians.

*Biotechnology of Horticultural Crops* Donovan Stevens & Daxton Ware, 2018-10-06 Horticultural crops are high value crops ensuring maximum returns to the growers with multiple scopes for value addition. Market driven agriculture prescribes quality in every stage of production and total quality management is a challenge to the horticulturist. Present volume on 'Biotechnology of horticultural crops' elaborates the scientific crop management of horticultural crops starting from selection of soil and activities related to production and handling of fresh produces in the field. Scope of value addition, organic farming, protected cultivation, export potential and economic analysis of production are included. The average per

capita availability of fruits and vegetables in India is inadequate to meet requirements for nutritional and protective diet of the population. Of the total horticulture production, only 67 % is used for local consumption while 30 % is subjected to post harvest losses, 2 % for export and 0.8 % for processing. There is immense scope for developing horticultural produce market. Changing food habits, life styles and health consciousness and purchasing power have created an unprecedented opportunity for farmers and horticultural entrepreneur. Horticultural research and development which placed India as the second largest producer of fruits and vegetables, largest producer and consumer of cashew nut, tea spices, third largest producer of coconut, fourth largest producer and consumer of rubber and sixth largest producer of coffee in the world. Today, as a result synergy between focused research, technological and policy initiatives, high efficiency inputs, horticulture in India, has become a sustainable and viable venture for the small and marginal farmers. Besides, the sector has also started attracting entrepreneurs for taking up horticulture as a commercial venture. Therefore, there is a great scope for the horticulture industry to grow and flourish.
