Megan E. Jenkins,Randy T. Simmons,Camille H. Wardle

The Great North Korean Famine Andrew S. Natsios,2001 An administrator of the US Agency for International Development with first-hand experience of conditions and events, Natsios provides a provocative analysis of the 1995-99 disaster. He focuses on its political elements--both the North Korean policies that exacerbated the problems and the politics that prevented governments and NGOs from acting quickly.

Governing the Commons Elinor Ostrom,2015-09-23 Tackles one of the most enduring and contentious issues of positive political economy: common pool resource management.

Toward a Political Economy of the Commons Cai, Meina,Murtazashvili, Ilia,Brick Murtazashvili, Jennifer,Salahodjaev, Raufhon,2022-01-14 Since Garrett Hardin published *The Tragedy of the Commons* in 1968, critics have argued that population growth and capitalism contribute to overuse of natural resources and degradation of the global environment. They propose coercive, state-centric solutions. This book offers an alternative view. Employing insights from new institutional economics, the authors argue that property rights, competitive markets, polycentric political institutions, and social institutions such as trust, patience and individualism enable society to conserve natural resources and mitigate harms to the global environment.

Building Bridges David Alton,Rob Chidley,2013-05-17 How much do you know about North Korea? Depending on whom you ask, the Democratic People's Republic of Korea (DPRK) is an international laughing-stock, a terrifying nuclear-powered war machine, or a humanitarian crisis of nightmarish proportion. For David Alton, the DPRK is Asia's tragic and prodigal son, long overdue 'coming in from the cold' and returning to the embrace of the international community. The obstacles are gigantic and the record of human suffering is almost beyond description, yet there is still hope for a better future, if only the political and military powers have the courage to seize it. In this book, David Alton and Rob Chidley paint a practical and compassionate picture of North Korea, from the earliest history to the tragic division and right up to the present day. In doing so, they present a North Korea that we can understand, approach, and reach out to with a glimmer of hope.

Local Commons and Democratic Environmental Governance Takeshi Murota, Ken Takeshita, 2013 The rising tide of globalization poses a direct threat to the viability of small communities worldwide. Such communities, however, are our greatest hope for sustainable environmental governance, as they possess unparalleled ability to directly manage common-pool resources. Providing a much needed antidote in this age of globalization, this volume advances the idea of collaborative governance as an integration of open and closed commons. Taking into consideration the dimension of conflict resolution, it studies examples of governance structures in various countries around the world to develop a new type of democracy towards multilevel environmental governance that involves the public, private, and commons spheres. With contributions from researchers in a wide variety of disciplines, this volume demonstrates through institutional and empirical analyses the essential role of local commons in providing an axis of resistance to increasing environmental devastation and social inequality towards creating a sustainable future for local communities as well as society at large.

Global Waves of Debt M. Ayhan Kose, Peter Nagle, Franziska Ohnsorge, Naotaka Sugawara, 2021-03-03 The global economy has experienced four waves of rapid debt accumulation over the past 50 years. The first three debt waves ended with financial crises in many emerging market and developing economies. During the current wave, which started in 2010, the increase in debt in these economies has already been larger, faster, and broader-based than in the previous three waves. Current low interest rates mitigate some of the risks associated with high debt. However, emerging market and developing economies are also confronted by weak growth prospects, mounting vulnerabilities, and elevated global risks. A menu of policy options is available to reduce the likelihood that the current debt wave will end in crisis and, if crises do take place, will alleviate their impact.

The Orange Economy Inter American Development Bank, Iván Duque Márquez, Pedro Felipe Buitrago Restrepo, 2013-10-01 This manual has been designed and written with the purpose of introducing key concepts and areas of debate around the creative economy, a valuable development opportunity that Latin America, the Caribbean and the world at large cannot afford to miss. The creative economy, which we call the Orange Economy in this book (you'll see why), encompasses the immense wealth of talent, intellectual property, interconnectedness, and, of course, cultural heritage of the Latin American and Caribbean region (and indeed, every region). At the end of this manual, you will have the knowledge base necessary to understand and explain what the Orange Economy is and why it is so important. You will also acquire the analytical tools needed to take better advantage of opportunities across the arts, heritage, media, and creative services.

The Tragedy of Great Power Politics (Updated Edition) John J. Mearsheimer, 2003-01-17 A superb book...Mearsheimer has made a significant contribution to our understanding of the behavior of great powers.—Barry R. Posen, *The National Interest* The updated edition of this classic treatise on the behavior of great powers takes a penetrating look at the question likely to dominate international relations in the twenty-first century: Can China rise peacefully? In clear, eloquent prose, John Mearsheimer explains why the answer is no: a rising China will seek to dominate Asia, while the United States, determined to remain the world's sole regional hegemon, will go to great lengths to prevent that from happening. The tragedy of great power politics is inescapable.

Meeting China Halfway Lyle J. Goldstein, 2015-05-01 Though a US-China conflict is far from inevitable, major tensions are building in the Asia-Pacific region. These strains are the result of historical enmity, cultural divergence, and deep ideological estrangement, not to mention apprehensions fueled by geopolitical competition and the closely related “security dilemma.” Despite worrying signs of intensifying rivalry, few observers have provided concrete paradigms to lead this troubled relationship away from disaster. This book is dramatically different in that Lyle J. Goldstein’s focus is on laying bare both US and Chinese perceptions of where their interests clash and proposing new paths to ease bilateral tensions through compromise. Each chapter contains a “cooperation spiral” —the opposite of an escalation spiral—to illustrate these policy proposals. Goldstein makes one hundred policy proposals over the course of this book to inaugurate a genuine debate regarding cooperative policy solutions to the most vexing problems in US-China relations. Goldstein not only parses findings from American scholarship but also breaks new ground by analyzing hundreds of Chinese-language sources, including

military publications, never before evaluated by Western experts. *Meeting China Halfway*, new in paperback, remains a refreshing and unique contribution to the study of the world's most important bilateral relationship.

Social Capital Partha Dasgupta, Ismail Serageldin, 2000 This book contains a number of papers presented at a workshop organised by the World Bank in 1997 on the theme of 'Social Capital: Integrating the Economist's and the Sociologist's Perspectives'. The concept of 'social capital' is considered through a number of theoretical and empirical studies which discuss its analytical foundations, as well as institutional and statistical analyses of the concept. It includes the classic 1987 article by the late James Coleman, 'Social Capital in the Creation of Human Capital', which formed the basis for the development of social capital as an organising concept in the social sciences.

The Cancer Stage of Capitalism John McMurtry, 1999 In this bold new look at the recent uncontrolled spread of global capitalism, John McMurtry, professor of philosophy at the University of Guelph, develops the metaphor of modern capitalism as a cancer. Its invasive growth, he argues, threatens to break down our society's immune system and--if not soon restrained--could reverse all the progress that has been made toward social equity and stability. On every continent, in every state, there are indicators of profound economic and environmental collapse. From the lands of indigenous communities to the currency markets of Asia, from the ocean floors to the ozone layer, the collapse is all-encompassing and deep-reaching. John McMurtry traces the causes of this global disorder back to the mutating assumptions of market theory that now govern the world's economy. He diagnoses the malaise as a pathologist would a biological cancer, tracking the delinked circuits of the global system's monetised growth as a carcinogenic disorder at the social level of life-organization. In the wide-lensed tradition of Adam Smith, Marx and Keynes, McMurtry cuts across academic disciplines and boundaries to penetrate the inner logic of the system's problems. Far from pessimistic, he argues that the way out of the global crisis is to be found in an evolving substructure of history which provides a common ground of resolution across ethnic and national divisions. Reaching beyond conventional textbooks, this fascinating study offers a new paradigm which is accessible to intelligent citizens the world over.

World Development Report 2019 World Bank, 2018-10-31 Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality.

Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the available evidence.

The Leisure Commons Payal Arora, 2014-06-27 There is much excitement about Web 2.0 as an unprecedented, novel, community-building space for experiencing, producing, and consuming leisure, particularly through social network sites. What is needed is a perspective that is invested in neither a utopian or dystopian posture but sees historical continuity to this cyberleisure geography. This book investigates the digital public sphere by drawing parallels to another leisure space that shares its rhetoric of being open, democratic, and free for all: the urban park. It makes the case that the history and politics of public parks as an urban commons provides fresh insight into contemporary debates on corporatization, democratization and privatization of the digital commons. This book takes the reader on a metaphorical journey through multiple forms of public parks such as Protest Parks, Walled Gardens, Corporate Parks, Fantasy Parks, and Global Parks, addressing issues such as virtual activism, online privacy/surveillance, digital labor, branding, and globalization of digital networks. Ranging from the 19th century British factory garden to Tokyo Disneyland, this book offers numerous spatial metaphors to bring to life aspects of new media spaces. Readers looking for an interdisciplinary, historical and spatial approach to staid Web 2.0 discourses will undoubtedly benefit from this text.
