Architects' Data Ernst Neufert, Peter Neufert, 1991-01-15 This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

AGC Glass Building Philippe Samyn, Jan de Coninck, 2014 A monograph documenting one of the biggest passive energy buildings in Belgium. It retraces the history of this project and its construction in Louvain-la-Neuve, Belgium. The sketches, drawings, photos and explanations show all the aspects of the realisation of an office supporting ecological sustainability.

Cradle to Cradle William McDonough, Michael Braungart, 2010-03-01 A manifesto for a radically different philosophy and practice of manufacture and environmentalism Reduce, reuse, recycle urge environmentalists; in other words, do more with less in order to minimize damage. But as this provocative, visionary book argues, this approach perpetuates a one-way, cradle to grave manufacturing model that dates to the Industrial Revolution and casts off as much as 90 percent of the materials it uses as waste, much of it toxic. Why not challenge the notion that human industry must inevitably damage the natural world? In fact, why not take nature itself as our model? A tree produces thousands of blossoms in order to create

another tree, yet we do not consider its abundance wasteful but safe, beautiful, and highly effective; hence, waste equals food is the first principle the book sets forth. Products might be designed so that, after their useful life, they provide nourishment for something new-either as biological nutrients that safely re-enter the environment or as technical nutrients that circulate within closed-loop industrial cycles, without being downcycled into low-grade uses (as most recyclables now are). Elaborating their principles from experience (re)designing everything from carpeting to corporate campuses, William McDonough and Michael Braungart make an exciting and viable case for change.

The Futurist Moment Marjorie Perloff, 2003-12-03 This volume examines the flourishing of Futurist aesthetics in the European art and literature of the early twentieth century. Futurism was an artistic and social movement that was largely an Italian phenomenon, though there were parallel movements in Russia, England and elsewhere. The Futurists admired speed, technology, youth and violence, the car, the airplane and the industrial city, all that represented the technological triumph of humanity over nature. This work looks at the prose, visual art, poetry, and the manifestos of Futurists from Russia to Italy. The author reveals the Moment's impulses and operations, tracing its echoes through the years to the work of postmodern figures like Roland Barthes. This updated edition reexamines the Futurist Moment in the light of a new century, in which Futurist aesthetics seem to have steadily more to say to the present

Enough Rope Barbara Nadel,2015-08-06 Private investigator and ex-soldier Lee Arnold and police superintendent Paul Venus are by no means friends, but when Venus' son Harry is kidnapped and ransom demands arrive from an address in Arnold's patch in east London, the superintendent doesn't know who else to turn to. Arnold and his Muslim assistant Mumtaz Hakim soon find themselves chasing leads into several of the East End's uneasily coexisting communities. Mumtaz uncovers a link to one of the area's powerful Bangladeshi families, whose property empire has always seemed suspicious, while Arnold suspects the involvement of more old-fashioned East End gangsters, and wonders if some of the nastier rumours about Venus himself might be true. And neither Mumtaz nor Lee like the look of the children of the super-rich, arriving in droves in the trendy parts of Hoxton and Shoreditch and living in luxury just a stone's throw from grinding urban poverty. The truth, however, is stranger and more dangerous than either Arnold or Hakim imagine. *Enough Rope* is a powerful and thrilling novel of London's ever-evolving dark side.

Return Of the Fallen Rita Vetere,2011-10-17 When a fiery Nephilim goes rogue, there's only one thing to do: Take cover. Israfael, the only member of the fallen race in existence, is on a mission: kill Jared Crow, head of a secret organization known as The Order, and the man who murdered her friends. She's highly trained in the martial arts, skilled in weaponry and won't allow anything to stand in her way, not even her mortal lover, Edmond. Unable to dissuade Israfael from hunting down Crow, Edmond joins her. He's only along for the ride, but it's one he'll wish he'd never taken. Raziel, the last Watcher on earth, has taken refuge in the desert, far from the mortals he is duty-bound to protect. Though tired of the task after thousands of years of lonely servitude, when he detects a threat to the Symphony--the universal flow of all living things--he has no choice but to track the dissonance. Knowing sooner or later Israfael must die, he joins in the chase. Jared Crow has an agenda none of them could have foreseen—and he's got some powerful help in the form of the Dark One. Nephilim, mortal and Watcher--it will take all three to reverse what Crow has set in motion. 27,000 Words

Impact and Explosion M. Y. H. Bangash,1993-07-15 Impact and Explosion: Structural Analysis and Design presents a comprehensive study of the structural dynamics of impact and explosion by providing a survey of types of aircraft, missiles, bombs, and detonators. Impact dynamics, including empirical models developed for different materials, water surfaces, and soil/rock mediums, is discussed. Other topics include load time history; explosion dynamics related to material damage capabilities; dynamic finite elements with provisions for impact and explosions; a discussion of solution procedures, acceleration, and convergence criteria; methods for designing structures resistant to impact and explosions; and how damage results due to impact or explosions. Case histories, comparative studies, numerous examples, appendices, and extensive references reinforce information presented in this important book for engineers and researchers working in government and private industry laboratories concerned with blast or impact loading effects on structures. Small firms that deal with impact loading (e.g., automobile collisions) will also find this book valuable.

In *The Garden of Burning Sand*, Addison, the bestselling author of *A Walk Across the Sun*, creates a powerful and poignant novel that takes the reader from the red light areas of Lusaka, Zambia, to the gilded chambers of the Washington, D.C. elite, to the splendor of Victoria Falls and Cape Town. Zoe Fleming, an accomplished young human rights attorney, has made a life for herself in Zambia, far from her estranged father--an American business mogul with presidential aspirations--and from the devastating betrayals of her past. When a young girl with Down syndrome is sexually assaulted in a Lusaka slum, Zoe joins Zambian police officer Joseph Kabuta in investigating the rape. Piecing together clues from the victim's past, they discover an unsettling connection between the girl--Kuyeya--and a powerful Zambian family who will stop at nothing to bury the truth. As they are drawn deeper into the complex web of characters behind this appalling crime, Zoe and Joseph forge a bond of trust and friendship that slowly transforms into love. Opposed on all sides, they find themselves caught in a dangerous clash between the forces of justice and power. To successfully prosecute Kuyeya's attacker and build a future with Joseph, Zoe must risk her life and her heart--and confront the dark past she thought she had left behind.
