Injustice for All Chris Surprenant, Jason Brennan, 2019-12-06 American criminal justice is a dysfunctional mess. Cops are too violent, the punishments are too punitive, and the so-called Land of the Free imprisons more people than any other country in the world. Understanding why means focusing on color—not only on black or white (which already has been studied extensively), but also on green. The problem is that nearly everyone involved in criminal justice—including district attorneys, elected judges, the police, voters, and politicians—faces bad incentives. Local towns often would rather send people to prison on someone else's dime than pay for more effective policing themselves. Local police forces can enrich themselves by turning into warrior cops who steal from innocent civilians. Voters have very little incentive to understand the basic facts about crime or how to fix it—and vote accordingly. And politicians have every incentive to cater to voters' worst biases. *Injustice for All* systematically diagnoses why and where American criminal justice goes wrong, and offers functional proposals for reform. By changing who pays for what, how people are appointed, how people are punished, and which things

are criminalized, we can make the US a country which guarantees justice for all. Key Features: Shows how bad incentives, not bad apples, cause the dysfunction in American criminal justice Focuses not only on overincarceration, but on overcriminalization and other failures of the criminal justice system Provides a philosophical and practical defense of reducing the scope of what's considered criminal activity Crosses ideological lines, highlighting both the weaknesses and strengths of liberal, conservative, and libertarian agendas Fully integrates tools from philosophy and social science, making this stand out from the many philosophy books on punishment, on the one hand, and the solely empirical studies from sociology and criminal science, on the other Avoids disciplinary jargon, broadening the book's suitability for students and researchers in many different fields and for an interested general readership Offers plausible reforms that realign specific incentives with the public good.

A Feminist Post-transsexual Autoethnography Julie Peters,2018-08-14 Gender as a social class along with its concomitant heteronormative gender coercion seem to be intransigent across time and cultures. But across these cultures we also see a degree of nonconforming behaviour which very often carries significant multi-dimensions of stigma and risk;

because the exception proves the rule, an understanding of gender nonconformity sheds light on the normative operation of gender in society. A Feminist Post-transsexual Autoethnography attempts to demythologise trans and gender diversity by conducting an in-depth critical analysis of the life choices of the autoethnographic subject (the author), who was so uncomfortable with their culturally allocated masculinity that they chose to live an apparently normal female life. The research is post-transsexual in that the subject forgoes passing in their affirmed gender to ensure the integrity of the data. A Feminist Post-transsexual Autoethnography may primarily appeal to students and researchers interested in the Sociology of Gender and Sociology of Trans and Gender Diversity, as well as the broader areas of embodiment and power differentials based on gender, class, nationality, location, temporality, sexuality and gender (non)conformity. This insightful volume may also be of interest to those within the fields Health Promotion and Education, Human Rights, Social Justice and Equity or the Social and Cultural Anthropology of Gender.

I like things simple and if you like to use long words I hope you are not talking to me. This was a fun story to write and I hope you enjoy reading it. William
