Waltharius Ekkehard I (Dean of St. Gall),2016 The 'Waltharius', a medieval Latin epic poem of over 1400 lines, richly retells the story of a vigorous Germanic saga in the language and style of classical and Christian Latin poetry. Walter, its hero, is a pagan warrior ready to mock his enemies and mercilessly decapitate them, but also a pious Christian who refrains from premarital sex and stops to pray and ask for God's mercy in the middle of a battle. The poem varies remarkably in tone, providing both fervent moral commentary and bitter black comedy. The growing scholarship on the poem outside of Germany, where it has always been popular, no doubt results from its weird allure and eclectic nature. It has something for everyone. This new edition uses a fresh review of manuscripts - especially the recently discovered fragments at the University of Illinois at Urbana-Champaign - in order to provide a text and apparatus that will aid the reader in understanding the poem's tangled manuscript history. The notes are rather fuller than those of previous English-language editions, providing useful context to understand the complicated relationships among the Germanic, classical Latin, and Christian Latin traditions as well as tracking various themes and stylistic features that the poet employs.

The Chronicle of John Malalas ,1986-01-01 Malalas' purpose in writing his work is twofold: 1) to set out the course of sacred history as interpreted by the Christian chronicle tradition (covered by Books 1-9); and 2) to provide a summary account of events under the Roman emperors up to and including his own lifetime (covered by Books 10-18).

The Cambridge Companion to the Age of Attila Michael Maas,2015 This book considers the great cultural and geopolitical changes in western Eurasia in the fifth century CE. It focuses on the Roman Empire, but it also examines the changes taking place in northern Europe, in Iran under the Sasanian Empire, and on the great Eurasian steppe. Attila is presented as a contributor to and a symbol of these transformations.

The Ancient Mediterranean Environment between Science and History William V. Harris,2013-07-25 Scientists,

historians and archaeologists are at last beginning to collaborate seriously on studies of the long-term history of the environment. The fruit of an international conference held in Rome in 2011, *The Ancient Mediterranean Environment between Science and History* brings together scientists and scholars who are interested in the interaction of their several disciplines as well as in specific problems such as the effects of climate change and other environmental factors on historical developments and events, the sources of the energy and fuel used in ancient civilizations, and the effects of humans on the lands around the Mediterranean. The collection balances broad Mediterranean-wide studies and tightly focused studies of particular regions in Italy and Jordan.

The Fall of the Roman Empire Peter Heather, 2007-06-11 Shows how Europe's barbarians, strengthened by centuries of contact with Rome on many levels, turned into an enemy capable of overturning and dismantling the mighty Empire.

The Huns, Rome and the Birth of Europe Hyun Jin Kim, 2013-04-18 The Huns have often been treated as primitive barbarians with no advanced political organisation. Their place of origin was the so-called 'backward steppe'. It has been argued that whatever political organisation they achieved they owed to the 'civilizing influence' of the Germanic peoples they encountered as they moved west. This book argues that the steppes of Inner Asia were far from 'backward' and that the image of the primitive Huns is vastly misleading. They already possessed a highly sophisticated political culture while still in Inner Asia and, far from being passive recipients of advanced culture from the West, they passed on important elements of Central Eurasian culture to early medieval Europe, which they helped create. Their expansion also marked the beginning of a millennium of virtual monopoly of world power by empires originating in the steppes of Inner Asia. The rise of the Hunnic Empire was truly a geopolitical revolution.

Natural Spectaculars Michiel Meeusen, Luc Van der Stockt, 2015-11-17 The value of Plutarch's perception of physical reality and his attitude towards the natural spectacle Plutarch was very interested in the natural world around him, not only

in terms of its elementary composition and physical processes, but also with respect to its providential ordering and marvels. His writings teach us a lot about his perception of physical reality and about his attitude to the natural spectacle. He found his greatest inspiration in the ontological and epistemological framework of Plato's *Timaeus*, but a wide range of other authors were also of seminal interest to his project. Moreover, the highly literary value of Plutarch's natural philosophical writings should not be underrated. It is therefore not surprising that recently scholars have started to reassess the ancient scientific value of Plutarch's natural philosophical writings. *Natural Spectaculars* aims to give further impetus to this dynamic by treating several aspects of Plutarch's natural philosophy which have remained unexplored up to now.

Ancient China and its Enemies Nicola Di Cosmo, 2002-02-25 Relations between Inner Asian nomads and Chinese are a continuous theme throughout Chinese history. By investigating the formation of nomadic cultures, by analyzing the evolution of patterns of interaction along China's frontiers, and by exploring how this interaction was recorded in historiography, this looks at the origins of the cultural and political tensions between these two civilizations through the first millennium BC. The main purpose of the book is to analyze ethnic, cultural, and political frontiers between nomads and Chinese in the historical contexts that led to their formation, and to look at cultural perceptions of 'others' as a function of the same historical process. Based on both archaeological and textual sources, this 2002 book also introduces a new methodological approach to Chinese frontier history, which combines extensive factual data with a careful scrutiny of the motives, methods, and general conception of history that informed the Chinese historian Ssu-ma Ch'ien.

The Prosopography of the Later Roman Empire 2 Part Set: Volume 3, AD 527-641 J. R. Martindale, 1992-10-15

This is the final volume of the three-volume Prosopography which now provides a complete secular biographical dictionary for the Later Roman Empire from AD 260 to 641. This volume begins at the start of the reign of Justinian in 527 and ends at the death of Heraclius in 641. Like its predecessors, this volume has collected the surviving evidence about the personnel of the empire, about members of the senates of Rome and Constantinople and their families, about members of senatorial families still surviving and holding public office in the western lands (Gaul and Spain) no longer under Roman rule. It includes officials serving at the imperial court and in the civil and provincial administration, as well as army personnel at least of the rank of tribune and above. It also includes all persons, male and female, of the status of *perfectissimus* and above, whether holding office or not, and persons of learning, such as lawyers, doctors, teachers and writers. The project is intended as a tool for research works in the whole field of late empire studies.

Empires and Exchanges in Eurasian Late Antiquity Nicola Di Cosmo, Michael Maas, 2020-08-20 *Empires and Exchanges in Eurasian Late Antiquity* offers an integrated picture of Rome, China, Iran, and the Steppes during a formative period of world

history. In the half millennium between 250 and 750 CE, settled empires underwent deep structural changes, while various nomadic peoples of the steppes (Huns, Avars, Turks, and others) experienced significant interactions and movements that changed their societies, cultures, and economies. This was a transformational era, a time when Roman, Persian, and Chinese monarchs were mutually aware of court practices, and when Christians and Buddhists criss-crossed the Eurasian lands together with merchants and armies. It was a time of greater circulation of ideas as well as material goods. This volume provides a conceptual frame for locating these developments in the same space and time. Without arguing for uniformity, it illuminates the interconnections and networks that tied countless local cultural expressions to far-reaching inter-regional ones.

The Mediterranean World in Late Antiquity Averil Cameron, 2015-04-29 This thoroughly revised and expanded edition of *The Mediterranean World in Late Antiquity*, now covering the period 395-700 AD, provides both a detailed introduction to late antiquity and a direct challenge to conventional views of the end of the Roman empire. Leading scholar Averil Cameron focuses on the changes and continuities in Mediterranean society as a whole before the Arab conquests. Two new chapters survey the situation in the east after the death of Justinian and cover the Byzantine wars with Persia, religious developments in the eastern Mediterranean during the life of Muhammad, the reign of Heraclius, the Arab conquests and the establishment of the Umayyad caliphate. Using the latest in-depth archaeological evidence, this all-round historical and thematic study of the west and the eastern empire has become the standard work on the period. The new edition takes account of recent research on topics such as the barbarian 'invasions', periodization, and questions of decline or continuity, as well as the current interest in church councils, orthodoxy and heresy and the separation of the miaphysite church in the sixth-century east. It contains a new introductory survey of recent scholarship on the fourth century AD, and has a full bibliography and extensive notes with suggestions for further reading. *The Mediterranean World in Late Antiquity 395-700 AD* continues to be the benchmark for publications on the history of Late Antiquity and is indispensable to anyone studying the period.

The Giant Hero in Medieval Literature Tina Marie Boyer, 2016-05-18 In *The Giant Hero in Medieval Literature* Tina Boyer counters the monstrous status of giants by arguing that they are more broadly legible than traditionally believed. Building on an initial analysis of St. Augustine's *City of God*, Bernard of Clairvaux's deliberations on monsters and marvels, and readings in Tomasin von Zerclaere's *Welsche Gast* provide insights into the spectrum of antagonistic and heroic roles that giants play in the courtly realm. This approach places the figure of the giant within the cultural and religious confines of the twelfth and thirteenth centuries and allows an in-depth analysis of epics and romances through political, social, religious, and gender identities tied to the figure of the giant. Sources range from German to French, English, and Iberian works.
