Storia, crocevia di discipline Associazione Clio '92,2024-12-22 Atti della XXVII Scuola Estiva di Arcevia progettata dall'Associazione "Clio '92" organizzata dall'Istituto Comprensivo di Arcevia (AN) 24-27 agosto 2021 La Storia, - dopo aver esplorato, nel passato, gli incroci con la Geografia, la Letteratura, la Musica, l'Arte e il Patrimonio culturale -, si è posta in un nuovo crocevia nel tentativo di abbattere gli steccati che tradizionalmente la separano da discipline apparentemente lontane, come le Scienze e la Tecnologia. È stato necessario, quindi, scandagliare territori sconosciuti e nuove vie di accesso al sapere, instaurare imprevisi scenari di cooperazione culturale e scambi conoscitivi alla ricerca di interdipendenze e possibili connessioni. D'altra parte, i bisogni formativi degli studenti non si soddisfano con il semplice accumulo di informazioni in vari campi, ma, insieme al dominio dei singoli ambiti disciplinari, è necessaria l'elaborazione delle loro molteplici connessioni; è "quindi decisiva una nuova alleanza fra scienza, storia, discipline umanistiche, arti e tecnologia, in grado di delineare la prospettiva di un nuovo umanesimo" (Indicazioni Nazionali per il curriculum della scuola dell'infanzia e del primo ciclo d'istruzione, 2012, pag. 7). Con i contributi di (in ordine alfabetico): Luca Bellucci, Gianni Catella, Giuseppina Cerrato, Cristina Cocilovo, Carla Cogliati, Luciana Coltri, Nadia del Favero, Enrica Dondero, Sara Galetta, Antonina Gambaccini, Claudia Gianolio, Giorgia Giusti, Ornella Mandelli, Ivo Mattozzi, Paola Palmini, Tiziano Pera, Maria Teresa Rabitti, Maria Rosa Ritonnale, Ciro Elio junior Saltarelli, Marco Tibaldini, M. Gabriella Vergani, Claudio Vicari, Patrizio Vignola

Inclusive Education in Italy Simona D'Alessio,2012-01-01 This book provides an innovative and thought-provoking analysis of the policy of integrazione scolastica from an inclusive perspective. Drawing on historical and empirical research methods the book arises out of an ethnographic study, which investigates the extent to which the policy of integrazione

scolastica can be considered an inclusive policy. The author poses two fundamental questions: why are there episodes of micro-exclusion and discrimination against disabled pupils still taking place in regular schools after more than 30 years have passed since the enactment of such a progressive policy? Can the policy of integration lead to the development of inclusion in Italy? The research findings presented in the book indicate that exclusion and discrimination towards disabled pupils in education do not result from a lack of implementation of the policy at a school level, rather from the perpetuation of dominant discourses, which construct disability as an individual deficit. The book does not deny the progress made in the country following the application of this anti-discriminatory policy; rather it challenges the hegemonic abilist culture and the traditional perspectives of disability and schooling that undermine the development of inclusive education. After having investigated the theoretical premises of the policy of integration, the author argues that this progressive policy is still rooted in a special needs education paradigm and that what was once a liberating policy has been transformed into a hegemonic tool which still manages, controls and normalizes disability leaving school settings and teaching and learning routines unchanged. She finally argues for a human rights approach for the development of an inclusive school for the 21st century. The book is an essential reading for academics, policy makers, researchers and students involved in education as it links ideological pressures to practical analyses.

The Self and Autism Michael Fordham, Rosemary Gordon, Judith Hubback, 2017-02-22 The Library of Analytical Psychology, Volume 3: The Self and Autism discusses the relationship between the concept of self and autism. The book primarily revolves around the work of Carl Jung. The first part of the book covers the theoretical aspects of analytical psychology; this part covers the concept of archetypes, self, and symbols. The importance of child experiences is also dealt with in the first chapter. The next part discusses the clinical techniques in treating children with autism. The last part presents case studies of infantile autism. The text will be of great use to psychologists, therapists, and councilors who are dealing with clients who have autism. The book will also be of great interest to readers who are concerned with autism.

The Childhood Autism Rating Scale (CARS) Eric Schopler, Robert J. Reichler, Barbara Rothen Renner, 2002

Parenting Loredana Benedetto, Massimo Ingrassia, 2018-02-06 Through parenting, adults raise their children and introduce them into the belonging community. Parents are active determinants of their children's well-being, but children themselves are too. The volume focuses on some relevant theoretical issues related to children's and adolescent adjustments, adult maternal and paternal behaviors, and their self-efficacy beliefs and competence interacting with children's characteristics. The volume also presents evidence-based treatments involving parents as key components of the intervention

strategies for childhood internalizing/externalizing disorders. Parent behaviors produce changes and consequences in the child's emotive-behavioral adjustment; thus, a modification of the parenting style may be an effective way to help children and to ameliorate the family climate. Practitioners interested in parenting will find in the updated studies here reviewed new suggestions for preventive family interventions.

Eating Disorders in Children and Adolescents Brett McDermott,2006-12-14 Anorexia Nervosa and other eating disorders are arguably the most complex mental health problems that a child or adolescent may experience. Numbers seeking help are on the increase, and the complexity of these disorders challenges even the most experienced clinician. In this 2006 book, the experience of numerous practitioners with international reputations in the field is brought to bear on the broad range of issues a good clinician needs to know about, from the history of the disorder through to treatment, psychopharmacology, the psychotherapies, epidemiology, comorbidities, eating disorders in boys, and neuroimaging. The book is divided into parts detailing the scientific underpinnings, abnormal states, the evidence base for treatments, and finally public health issues, including service delivery models and perspectives on prognosis and outcomes. Clinicians encountering eating disorders will

find this latest addition to the Cambridge Child and Adolescent Psychiatry series invaluable.

Femmes Et Éducation Margaret B. Sutherland, Claudine Baudoux, Université Laval. Laboratoire de recherche en administration et politique scolaires, 1994

A Shot in the Dark Harris Livermore Coulter, Barbara Loe Fisher, 1991-01-01 Every week, tens of thousands of children across America are injected with the DPT (diphtheria-pertussis-tetanus) vaccine. The law requires it, and most children will get four DPT shots before they are two years old. But what if one of the components of the vaccine was not safe? What if it caused not only pain, swelling, screaming, and high fever, but also shock, convulsions, brain damage, and even death? And, to make matters worse, what if there were a safer alternative but parents didn't know about it? Wouldn't the government require the drug manufacturers to produce the safer vaccine to protect the lives of the children who might otherwise suffer the shot's crippling side effects? The answer is, unfortunately, no. *A Shot in the Dark* is a chilling account of just how dangerous the whole-cell pertussis vaccine (the P part of the DPT shot) has proven to be. It provides accurate research into the history of the vaccine's development and usage. It exposes the roles played by the FDA and drug companies. It tells the tragic stories of the young victims of the vaccine. This book is also a guide for rightfully concerned parents who are looking for answers to important questions. What are the warning signs to look for to tell if your child is likely to be sensitive to the vaccine? What should parents ask their doctors about the vaccine and their child's medical profile? What is being done, here and in other countries, to combat this frightening situation? What can parents do now to help? *A Shot in the Dark* is a responsible, eye-opening look at a potential problem that every parent of every young child living in this country must face. Armed with the facts in this important book, parents will be able to make informed decisions about their real medical options. Book jacket.

Loners Dr Sula Wolff, 2020-07-24 Some children seem different, detached, disinterested in the games of other children. They prefer their hobbies to friends of their own age and if forced into community activities, as they often are at school, can become aggressive and difficult. In *Loners*, Sula Wolff describes a childhood personality syndrome that has frequently been neglected. Often using children's own words, their lives and problems become real as she unwraps their stories from first referral to adulthood. Some have become talented and successful adults, whilst others are less fortunate in later years. Carefully documented and meticulously researched, this study makes compelling reading.

Making a Difference Catherine Maurice, Gina Green, Richard M. Foxx, 2001 *Making a Difference: Behavioral Intervention for Autism* provides practitioners, researchers, and parents with information needed to make decisions about the individuals in their care with autism. Described in the work are the challenges parents face in obtaining effective treatment for their children and how they navigated those challenges. Also included are chapters written by professionals on finding creative and caring means of helping people with autism and their families. *Making a Difference* combines solid, data-based

information with practical problem-solving strategies and is a valuable resource for all who strive to maximize the achievements of individuals with autism.

Disability and Culture Benedicte Ingstad,Susan Reynolds Whyte,1995-02-15 This collection of essays both reframes disability in terms of social processes and offers a global, multicultural perspective on the subject. It explores the significance of mental, sensory and motor impairments in light of fundamental, culturally determined assumptions about humanity.

A History of Autism Adam Feinstein,2011-07-07 This unique book is the first to fully explore the history of autism - from the first descriptions of autistic-type behaviour to the present day. Features in-depth discussions with leading professionals and pioneers to provide an unprecedented insight into the historical changes in the perception of autism and approaches to it Presents carefully chosen case studies and the latest findings in the field Includes evidence from many previously unpublished documents and illustrations Interviews with parents of autistic children acknowledge the important contribution they have made to a more profound understanding of this enigmatic condition

Autism and the Environment Institute of Medicine,Board on Health Sciences Policy,Forum on Neuroscience and Nervous System Disorders,2008-03-12 Autism spectrum disorders (ASD) constitute a major public health problem, affecting one in every 150 children and their families. Unfortunately, there is little understanding of the causes of ASD, and, despite their broad societal impact, many people believe that the overall research program for autism is incomplete, particularly as it relates to the role of environmental factors. The Institute of Medicine's Forum on Neuroscience and Nervous System Disorders, in response to a request from the U.S. Secretary of Health and Human Services, hosted a workshop called Autism and the Environment: Challenges and Opportunities for Research. The focus was on improving the understanding of the ways in which environmental factors such as chemicals, infectious agents, or physiological or psychological stress can affect the development of the brain. Autism and the Environment documents the concerted effort which brought together the key public and private stakeholders to discuss potential ways to improve the understanding of the ways that environmental factors may affect ASD. The presentations and discussions from the workshop that are described in this book identify a number of promising directions for research on the possible role of different environmental agents in the etiology of autism.
