Homosexuality and Italian Cinema Mauro Giori, 2017-11-18 This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

Darwinian Psychiatry Michael McGuire, Alfonso Troisi, 1998-04-16 For years, psychiatry has operated without a unified theory of behavior; instead, it has spawned a pluralism of approaches—including biomedical, psychoanalytic, behavioral, and sociocultural models—each with radically different explanations for various clinical disorders. In *Darwinian Psychiatry*, Michael T. McGuire and Alfonso Troisi provide a conceptual framework for integrating many features of prevailing models. Based on Darwinian theory rather than traditional approaches, the book offers clinicians a fundamentally new perspective for looking at the etiology, pathogenesis, diagnosis, and treatment of psychiatric disorders. Writing from this innovative theoretical position, the authors discuss the origin of pathological conditions, the adaptation of symptoms and syndromes, the biological basis of social relations, and many other key concepts. This groundbreaking book will introduce those who study and are involved in the alleviation of mental suffering to an approach that will lead to radical changes in clinical practice. The authors suggest that when making diagnostic assessments, psychiatrists should evaluate not only the patients' symptoms but also their functional capacities, and that therapeutic interventions should work toward the achievement of biological goals. Providing an essential framework for understanding both everyday human behavior and a range of mental disorders, *Darwinian Psychiatry* will appeal to all mental health professionals and general readers interested in human psychology and behavior.

Godard On Godard Jean-luc Godard, 1986-03-22 Jean-Luc Godard, like many of his European contemporaries, came to

filmmaking through film criticism. This collection of essays and interviews, ranging from his early efforts for *La Gazette du Cinéma* to his later writings for *Cahiers du Cinéma*, reflects his dazzling intelligence, biting wit, maddening judgments, and complete unpredictability. In writing about Hitchcock, Welles, Bergman, Truffaut, Bresson, and Renoir, Godard is also writing about himself—his own experiments, obsessions, discoveries. This book offers evidence that he may be even more original as a thinker about film than as a director. Covering the period of 1950-1967, the years of *Breathless*, *A Woman Is a Woman*, *My Life to Live*, *Alphaville*, *La Chinoise*, and *Weekend*, this book of writings is an important document and a fascinating study of a vital stage in Godard's career. With commentary by Tom Milne and Richard Roud, and an extensive new foreword by Annette Michelson that reassesses Godard in light of his later films, here is an outrageous self-portrait by a director who, even now, continues to amaze and bedevil, and to chart new directions for cinema and for critical thought about its history.

Images of the Self Estelle L. Weinrib, 2004 Formerly out of print and unavailable for almost 20 years, this book has remained the foundational text on sandplay psychotherapeutic theory. The theoretical mechanics of how sandplay, an effective nonverbal therapy, works to heal and transform the psyche are articulated and applied to a complete sandplay case. This updated edition includes a clarification of the function of Jung's personality theory in the sandplay therapy method and an examination of the process of growth and development undergone in sandplay therapy. The material provides the clinician and student the theoretical foundation necessary to develop the clinical tools for the practice of sandplay therapy.

The Promise of Politics Hannah Arendt, 2009-01-16 After the publication of *The Origins of Totalitarianism* in 1951, Hannah Arendt undertook an investigation of Marxism, a subject that she had deliberately left out of her earlier work. Her inquiry into Marx's philosophy led her to a critical examination of the entire tradition of Western political thought, from its origins in Plato and Aristotle to its culmination and conclusion in Marx. *The Promise of Politics* tells how Arendt came to understand the failure of that tradition to account for human action. From the time that Socrates was condemned to death by his fellow citizens, Arendt finds that philosophers have followed Plato in constructing political theories at the expense of political experiences, including the pre-philosophic Greek experience of beginning, the Roman experience of founding, and the Christian experience of forgiving. It is a fascinating, subtle, and original story, which bridges Arendt's work from *The Origins of Totalitarianism* to *The Human Condition*, published in 1958. These writings, which deal with the conflict between philosophy and politics, have never before been gathered and published. The final and longer section of *The Promise of Politics*, titled "Introduction into Politics," was written in German and is published here for the first time in English. This remarkable meditation on the modern prejudice against politics asks whether politics has any meaning at all anymore. Although written in the latter half of the 1950s, what Arendt says about the relation of politics to human freedom could hardly have greater relevance for our own time. When politics is considered as a means to an end that lies outside of itself,

when force is used to “create” freedom, political principles vanish from the face of the earth. For Arendt, politics has no “end”; instead, it has at times been—and perhaps can be again—the never-ending endeavor of the great plurality of human beings to live together and share the earth in mutually guaranteed freedom. That is the promise of politics.

The Sexual Politics of Disability Tom Shakespeare, Kath Gillespie-Sells, Dominic Davies, 1996 While the civil rights movement has put disability issues centre-stage, there has been minimal discussion of disabled people's sexuality. This book, based on first-hand accounts, takes a close look at questions of identity, relationships, sex, love, parenting and abuse and demolishes the taboo around disability and sex. It shows the barriers to disabled people's sexual rights and sexual expression, and also the ways in which these obstacles are being challenged. Various moving, angry, funny and proud, *The Sexual Politics of Disability* is about disabled people sharing their stories and claiming their place as sexual beings. It is a pioneering work, and essential reading for anyone interested in disability or sexual politics.

Contemporary Psychiatry Fritz Henn, Norman Sartorius, Hanfried Helmchen, Hans Lauter, 2013-11-11 The German version of this work has a long tradition, and this fourth edition is the first to see an English version. Its main feature is the international approach regarding both authors and topics. The four internationally renowned editors were able to acquire the leading specialists for each field as contributors to the book. No less than 120 authors, half of them from non-German speaking countries, ensure an extremely high standard and that cross-cultural aspects are considered. Another major feature is that the book presents the evidence such that it may be examined from at least four different entry points -- via basic disciplines of psychiatric knowledge about groups defined by demographic criteria. Detailed linkages to other chapters allow the inclusion of neighbouring disciplines, such as the neurosciences and molecular biology. *Contemporary Psychiatry* is also unique in including chapters on psychiatric disorders caused by catastrophes, disasters etc. -- aspects totally neglected by normal textbooks. While this book gives an overall view of the state of the art of psychiatric knowledge, it even goes so far as to suggest future perspectives.

Philosophical Issues in Psychiatry IV Kenneth S. Kendler, Josef Parnas, 2017-04-06 The revisions of both DSM-IV and ICD-10 have again focused the interest of the field of psychiatry and clinical psychology on the issue of nosology. This interest has been further heightened by a series of controversies associated with the development of DSM-5 including the fate of proposed revisions of the personality disorders, bereavement, and the autism spectrum. Major debate arose within the DSM process about the criteria for changing criteria, leading to the creation of first the Scientific Review Committee and then a series of other oversight committees which weighed in on the final debates on the most controversial proposed additions to DSM-5, providing important influences on the final decisions. Contained within these debates were a range of

conceptual and philosophical issues. Some of these - such as the definition of mental disorder or the problems of psychiatric “epidemics” - have been with the field for a long time. Others - the concept of epistemic iteration as a framework for the introduction of nosologic change - are quite new. This book reviews issues within psychiatric nosology from clinical, historical and particularly philosophical perspectives. The book brings together a range of distinguished authors - including major psychiatric researchers, clinicians, historians and especially nosologists - including several leaders of the DSM-5 effort and the DSM Steering Committee. It also includes contributions from psychologists with a special interest in psychiatric nosology and philosophers with a wide range of orientations. The book is organized into four major sections: The first explores the nature of psychiatric illness and the way in which it is defined, including clinical and psychometric perspectives. The second section examines problems in the reification of psychiatric diagnostic criteria, the problem of psychiatric epidemics, and the nature and definition of individual symptoms. The third section explores the concept of epistemic iteration as a possible governing conceptual framework for the revision efforts for official psychiatric nosologies such as DSM and ICD and the problems of validation of psychiatric diagnoses. The book ends by exploring how we might move from the descriptive to the etiologic in psychiatric diagnoses, the nature of progress in psychiatric research, and the possible benefits of moving to a living document (or continuous improvement) model for psychiatric nosologic systems. The result is a book that captures the dynamic cross-disciplinary interactions that characterize the best work in the philosophy of psychiatry.

Refugee Tales Ali Smith, Marina Lewycka, Patience Agbabi, Jade Amoli-Jackson, Chris Cleave, Stephen Collis, Inua Ellams, Abdulrazak Gurnah, David Herd, Avaes Mohammed, Hubert Moore, Dragan Todorovic, Carol Watts, Michael Zand, 2016-05-31 Two unaccompanied children travel across the Mediterranean in an overcrowded boat that has been designed to only make it halfway across... A 63-year-old man is woken one morning by border officers ‘acting on a tip-off’ and, despite having paid taxes for 28 years, is suddenly cast into the detention system with no obvious means of escape... An orphan whose entire life has been spent in slavery - first on a Ghanaian farm, then as a victim of trafficking - writes to the Home Office for help, only to be rewarded with a jail sentence and indefinite detention... These are not fictions. Nor are they testimonies from some distant, brutal past, but the frighteningly common experiences of Europe’s new underclass - its refugees. While those with ‘citizenship’ enjoy basic human rights (like the right not to be detained without charge for more than 14 days), people seeking asylum can be suspended for years in Kafka-esque uncertainty. Here, poets and novelists retell the stories of individuals who have direct experience of Britain’s policy of indefinite immigration detention. Presenting their

accounts anonymously, as modern day counterparts to the pilgrims' stories in Chaucer's Canterbury Tales, this book offers rare, intimate glimpses into otherwise untold suffering.

On Paedophilia Cosimo Schinaia,2020-06-16 This book deepens the communicative dynamics by which even through the mass media the paedophile has become the plague-spreader. It is an attempt to underline that only an integrative approach can give an appropriate answer to the clinical complexity characterising paedophilic pictures.

Vulnerability as generativity Cristiana Ottaviano,Alessia Santambrogio,2018-04-10T00:00:00+02:00 This book focuses on parenthood and generativity, considered not only a set of biological functions, but as human and socio-cultural capabilities above and beyond gender differences. The authors reconsider in particular the institution of motherhood, emphasizing the historical and social function of women. Alongside a reflection on the gender role of women as mothers and wives, this volume explores male identities and fatherhood. While claiming that parenthood and care are human characteristics - and not just gendered or female attributes - the authors suggest the adoption of a gylanic perspective on inter-gender relationships.

Taken for Grantedness Richard Ling,2012-10-26 An examination of how the mobile phone has become part of the fabric of society—as did such earlier technologies as the clock and the car. Why do we feel insulted or exasperated when our friends and family don't answer their mobile phones? If the Internet has allowed us to broaden our social world into a virtual friend-net, the mobile phone is an instrument of a more intimate social sphere. The mobile phone provides a taken-for-granted link to the people to whom we are closest; when we are without it, social and domestic disarray may result. In just a few years, the mobile phone has become central to the functioning of society. In this book, Rich Ling explores the process by which the

mobile phone has become embedded in society, comparing it to earlier technologies that changed the character of our social interaction and, along the way, became taken for granted. Ling, drawing on research, interviews, and quantitative material, shows how the mobile phone (and the clock and the automobile before it) can be regarded as a social mediation technology, with a critical mass of users, a supporting ideology, changes in the social ecology, and a web of mutual expectations regarding use. By examining the similarities and synergies among these three technologies, Ling sheds a more general light on how technical systems become embedded in society and how they support social interaction within the closest sphere of friends and family.
