The 5 Biological Laws and Dr. Hamer's New Medicine Andrea Taddei,2020 The German New Medicine discovered by Dr. Ryke Geerd Hamer and systematized in the 5 Biological Laws represents a change in the understanding of what is commonly called a disease. The German New Medicine is not a new method of treatment but the understanding of natural laws applicable to humans and animals. Through his studies, Dr. R.G. Hamer, came to the conclusion that the disease processes are not errors of nature but rather Significant Biological Programs of Nature stemming from sudden and dramatic events. This book was written with the intent of shedding light on the understanding of the 5 Biological Laws, for those looking for and wanting to understand the issue fully; the study of matter and the spirit, whether reflective, critical and scientific, is up to the reader. www.5biologicallaws.com

Digestive Intelligence Irina Matveikova,2014-06-06 Digestive Intelligence tells the fascinating story of how our digestive systems are the centre of our bodies' second brain and how we think and live our emotions via our stomachs. Not surprising when you consider there is something equivalent to the size of a village football pitch hiding inside our bellies-- that's the incredible magnitude of our digestive systems. Dr Matveikova answers the obvious questions: "How?" and "Why can this be so?" by explaining, in straight forward layman's language, that the digestive system contains more than one million neurones, identical to those in the brain and is responsible for producing 90% of the body's hormone, serotonin, the all-important hormone which makes us feel happy and full of wellbeing. It follows that, if our stomach is "out of sorts" we feel irritable and lacking in energy; and those feelings block our intellectual productivity, disorientate us and completely change our thought patterns and physical processes.

Human by Design Gregg Braden,2017 *Human by Design* invites you on a journey beyond Darwin's theory of evolution, beginning with the fact that we exist as we do, even more empowered, and more connected with ourselves and the world, than scientists have believed possible.* * *In one of the great ironies of the modern world, the science that was expected to solve life's mysteries has done just the opposite. New discoveries have led to more unanswered questions, created deeper

mysteries, and brought us to the brink of forbidden territory when it comes to explaining our origin and existence. These discoveries reveal the following facts: - Fact 1. Our origin--Modern humans appeared suddenly on earth approximately 200,000 years ago, with the advanced brain, nervous system, and capabilities that set them apart from all other known forms of life already developed, rather than having developed slowly and gradually over a long periods of time.- Fact 2. Missing physical evidence--The relationships shown on the conventional tree of human evolution are speculative connections only. While they are believed to exist, a 150-year search has failed to produce the physical evidence that confirms the relationships shown on the evolutionary family tree.- Fact 3. New DNA evidence--The comparison of DNA between ancient Neanderthals, previously thought to be our ancestors, and early humans tells us that we did not descend from the Neanderthals.- Fact 4. A rare DNA fusion--Advanced genome analysis reveals that the DNA that sets us apart from other primates, including in our advanced brain and nervous system, is the result of an ancient and precise fusion of genes occurring in a way that suggests something beyond evolution made our humanness possible.- Fact 5. Our extraordinary abilities--We are born with the capacity to self-heal, to self-regulate longevity, to activate an enhanced immune response, and to experience deep intuition, sympathy, empathy, and, ultimately, compassion--and to do each of these on demand.In this book, New York Times best-selling author and 2017 Templeton Award nominee Gregg Braden crosses the traditional boundaries of science and spirituality to answer the timeless question at the core of our existence--Who are we?--and to reveal science-based techniques that awaken our uniquely human experiences of deep intuition, precognition, advanced states of self-healing, and much more! Beyond any reasonable doubt, Human by Design reveals that we're not what we've been told, and much more than we've ever imagined.

The Spontaneous Healing of Belief Gregg Braden, 2009-04-01 What would it mean to discover that everything from the DNA of life, to the future of our world, is based upon a simple Reality Code—one that we can change and upgrade by choice? New revelations in physics and biology suggest that we're about to find out! A growing body of scientific evidence suggests that our universe works like a Consciousness Computer. Rather than the number codes of typical software, our Consciousness Computer uses a language that we all have, yet are only beginning to understand. Life's reality code is based in the language of human emotion and focused belief. Knowing that belief is our reality-maker, the way we think of ourselves and our world is now more important than ever! For us to change the beliefs that have led to war, disease, and the failed careers and relationships of our past we need a reason to see things differently. Our ancestors used miracles to change what they believed. Today we use science. The Spontaneous Healing of Belief offers us both: the miracles that open the door to a powerful new way of seeing the world, and the science that tells us why the miracles are possible, revealing: why we are not limited by the laws of physics and biology as we know them today. Once we become aware of the paradigm-shattering discoveries and true-life miracles, we must think of ourselves differently. And that difference is where the spontaneous healing of belief begins.

The 5 Biological Laws Andrea Taddei, 2013-09-02 The 5 Biological Laws discovered by Dr. Hamer, they represent a new key of reading and understanding of all the defined processes called pathological. This book, in particular, deals in a very in-depth way the conflicts regarding the inherent conflicts of devaluation of the bones, the muscles and the articulations. A somatic map of reference, with which it is possible to go back in a precise and verifiable way to the bony and muscular pains, is illustrated. Furthermore, they are explained from the point of view of the 5 Biological Laws, most common and diffuse pathologies regarding the osteo-muscular system like: the arthritis, the arthrosis, the osteoporosis, the scoliosis, the herniated disc, the fibromyalgia, the rheumatoid arthritis and the valgus big toe. The book is composed by 2 sections: a first one, from the first to the tenth chapter, illustrates and explains the 5 biological laws, their meaning and what they involve; while from the eleventh to fifteenth chapter the conflicts, concerning the tissues resulted from the mesoderm, bones, muscles and articulations, are dealt. The book does not want to supply only a "prescription pad" of the map of the muscular, bony and

articular pains, but it wants to make the reader understand the reason why, how, when and for how long the pains of the muscle-skeletal apparatus last in relation to the personal background. www.5biologicallaws.com

Cuando los que escuchan hablan María Esther Gilio,2020-09-25 A los 14 años, con la lectura de Análisis profano de Freud, se produce un quiebre en la vida de María Esther Gilio: “Después de haber pasado mi primera infancia diciendo ‘quiero ser médica de locos’, después de ver un film de Claudette Colbert en que ésta, con todo su encanto francés, convertía a locos furiosos en santos de estampita, quise ser psicoanalista”. Este es el testimonio de alguien que sospecha que hablar de uno mismo en el pasado es como hablar de otra persona, y que el presente surge permanentemente como un espejo que no siempre queremos enfrentar de manera directa (“Llegamos a hoy. Y yo no quiero escribir sobre mí misma”). Como si la conversación con quienes compartimos preciados intereses mostrara nuestra identidad más genuina, la autora -abogada, escritora, biógrafa y periodista- nos habla de experiencias de vida a través de una serie de entrevistas. Aparecen aquí algunos de los más importantes y prestigiosos psicoanalistas contemporáneos: Jean Laplanche, Jacques Alain Miller, Emilio Rodrigué, Elisabeth Roudinesco, Benzión Winograd, Silvia Bleichmar, Janine Altounian, Lito Benvenuti, Mordechai Benyakar, César Botella, Françoise Davoine, Jean-Max Gaudilliere, Daniel Gil, Max Hernández, Philippe Jeammet, François Marty, Paul Roazen y Teresa Yuan. De manera paulatina, el lector encontrará en estas páginas una impresión de coherencia ética y profesional en el tratamiento de temas que le dan sentido a aquel primer deseo, y que revelan que “nuestras decisiones siempre están estrechamente unidas a lo que imaginamos”.

Gabbard's Treatments of Psychiatric Disorders Glen O. Gabbard, 2014-05-05 The definitive treatment textbook in psychiatry, this fifth edition of Gabbard's Treatments of Psychiatric Disorders has been thoroughly restructured to reflect the new DSM-5® categories, preserving its value as a state-of-the-art resource and increasing its utility in the field. The editors have produced a volume that is both comprehensive and concise, meeting the needs of clinicians who prefer a single, user-friendly volume. In the service of brevity, the book focuses on treatment over diagnostic considerations, and addresses both empirically-validated treatments and accumulated clinical wisdom where research is lacking. Noteworthy features include the following: Content is organized according to DSM-5® categories to make for rapid retrieval of relevant treatment information for the busy clinician. Outcome studies and expert opinion are presented in an accessible way to help the clinician know what treatment to use for which disorder, and how to tailor the treatment to the patient. Content is restricted to the major psychiatric conditions seen in clinical practice while leaving out less common conditions and those that have limited outcome research related to the disorder, resulting in a more streamlined and affordable text. Chapters are meticulously referenced and include dozens of tables, figures, and other illustrative features that enhance comprehension and recall. An authoritative resource for psychiatrists, psychologists, and psychiatric nurses, and an outstanding reference for students in the mental health professions, Gabbard's Treatments of Psychiatric Disorders, Fifth Edition, will prove indispensable to clinicians seeking to provide excellent care while transitioning to a DSM-5® world.
