Ian Fleming

Artificial Intelligence in Society OECD,2019-06-11 The artificial intelligence (AI) landscape has evolved significantly from 1950 when Alan Turing first posed the question of whether machines can think. Today, AI is transforming societies and economies. It promises to generate productivity gains, improve well-being and help address global challenges, such as climate change, resource scarcity and health crises.

Thrilling Cities Ian Fleming,2017-07-11 'On November 2nd armed with a sheaf of visas...one suitcase...and my typewriter, I left humdrum London for the thrilling cities of the world...' In 1959, Ian Fleming, the creator of James Bond, was commissioned by the Sunday Times to explore fourteen of the world's most exotic cities. Fleming saw it all with a thriller writer's eye. From Hong Kong to Honolulu, New York to Naples, he left the bright main streets for the back alleys, abandoning tourist sites in favour of underground haunts, and mingling with celebrities, gangsters and geishas. The result is a series of vivid snapshots of a mysterious, vanished world.

The Devotion and Promotion of Stigmatics in Europe, C. 1800-1950 Tine Van Osselaer,Andrea Graus,Leonardo Rossi,Kristof Smeyers,2021 In the nineteenth century a new type of mystic emerged in Catholic Europe. While cases of stigmatisation had been reported since the thirteenth century, this era witnessed the development of the 'stigmatic': young women who attracted widespread interest thanks to the appearance of physical stigmata. To understand the popularity of these stigmatics we need to regard them as the 'saints' and religious 'celebrities' of their time. With their 'miraculous' bodies, they fit contemporary popular ideas (if not necessarily those of the Church) of what sanctity was. As knowledge about them spread via modern media and their fame became marketable, they developed into religious 'celebrities'--

At Home at Highclere Countess of Carnarvon,Fiona Carnarvon,2017-03-09 HISTORY OF ARCHITECTURE. Lady

Carnarvon's love of history is richly rewarded at Highclere Castle with its mine of family records going back some 300 years. She has delved into the archives to create a book that invites you inside the Castle, past and present. Throughout the centuries, Highclere has welcomed Royalty, Statesmen, Egyptologists and pioneers of technology along with men and women from the worlds of music, art and letters. The etiquette of the invitation, the balance of guests at a weekend house party, their 'placement' at dinners, and the entertainment of friends, as well as the domestic management required to execute the perfect occasion, have all preoccupied successive generations of chatelaines. This book tells the story four real life weekends - from 1866 to 1936 - when the great and the good gathered at Highclere to change the world in some large or small part. It then reflects on how the current Countess entertains 'At Home' at Highclere today.

The Stars of Galileo Galilei and the Universal Knowledge of Athanasius Kircher Roberto Buonanno,2016-08-27 In this fascinating book, the author traces the careers, ideas, discoveries, and inventions of two renowned scientists, Athanasius Kircher and Galileo Galilei, one a Jesuit, the other a sincere man of faith whose relations with the Jesuits deteriorated badly. The Author documents Kircher's often intuitive work in many areas, including translating the hieroglyphs, developing sundials, and inventing the magic lantern, and explains how Kircher was a forerunner of Darwin in suggesting that animal species evolve. Galileo's work on scales, telescopes, and sun spots is mapped and discussed, and care is taken to place his discoveries within their cultural environment. While Galileo is without doubt the "winner" in the comparison with Kircher, the latter achieved extraordinary insights by unconventional means. For all Galileo's fine work, the author believes that scientists do need to regain the power of dreaming, vindicating Kirchner's view.

Etruscan Roman Remains Charles Godfrey Leland,2007-01-01 The Etruscans are one of history's great mysteries -- a sophisticated society that flourished at the heart of the Classical world and then vanished, leaving relatively few archaeological remains and few records of their culture. The Etruscans were adept at magic, and Etruscan books of spells were common among the Romans but they have not survived. While greatly influenced by the Greeks, the Etruscans retained elements of an ancient non-Western culture, and these archaic traits contributed greatly to the civilization once thought of as purely Roman (gladiators, for example, and many kinds of divination). Leland retrieves elements of Etruscan culture from the living popular traditions of remote areas of the Italian countryside where belief in the old religion survives to an astonishing degree. Recorded when many of these secret beliefs and practices were fading away, this remarkable volume deals with ancient gods, spirits, witches, incantations, prophecy, medicine, spells, and amulets, giving full descriptions, illustrations, and instructions for practice.

Contrastive Phraseology Paola Cotta Ramusino,Fabio Mollica,2020 This volume is addressed to researchers in the field of phraseology, and to teachers, translators and lexicographers. It is a collection of essays offering a comprehensive, modern analysis of phrasemes, embracing a wide range of subjects and themes, from linguistic, both applied and theoretical, to

cultural aspects. The contrastive approach underlying this variety of themes allows the divergences and analogies between phraseological units in two or more languages to be outlined. The languages compared here are both major and minor, European and non-European, and the text includes contrastive analyses of the most commonly investigated languages (French-German, English-Spanish, Russian-German), as well as some less frequently investigated languages (like Ukrainian, Romanian, Georgian and Thai), which are not as well-represented in phraseological description, despite their scientific interest.

Neuroglycobiology Minoru Fukuda, Urs Rutishauser, Ronald L. Schnaar, 2005 Carbohydrates play a major role in brain function. In the past decade, tremendous progress has been made in understanding their structure and function within the nervous system. The Problem with Pleasure Laura Frost, 2013-07-16 A revealing study of the sensual tensions powering the period's formal and ideological innovations.

Microcosms Claudio Magris, 2011-01-11 Amid wars, failed revolutions and the shifting of frontiers, the bit-part players often have the best tales to tell - an astonishing, genre-blurring travelogue from Italian master Claudio Magris. In the tiny borderlands of Istria and Italy, from the forests of Monte Nevoso, to the hidden valleys of the Tyrol, to a Trieste café, Microcosms pieces together a mosaic of stories - comic, tragic, picaresque, nostalgic - from life's minor characters. Their worlds might be small, but they are far from minimalist: in them flashes the great, the meaningful, the unrepeatably significant of every existence.

Etruscan Magic and Occult Remedies Charles G. Leland, 2015-12-11 Part One of the book offers complete and detailed insight in the Etruscan and Roman rooted pantheon of the Tuscan Streghe (witches). Part Two describes many of their spells, incantations, sorcery and several lost divination methods. Much information in this book, Leland received first hand from the Tuscan witches Maddalena and Marietta.
