National Dish Anya von Bremzen, 2024-06-18 Named a Best Book of 2023 by Financial Times, The Guardian, and BBC's The Food Programme “Anya von Bremzen, already a legend of food writing and a storytelling inspiration to me, has done her best work yet. National Dish is a must-read for all those who believe in building longer tables where food is what bring us all together.” —José Andrés “If you’ve ever contemplated the origins and iconography of classic foods, then National Dish is the sensory-driven, historical deep dive for you . . . [an] evocative, gorgeously layered exercise in place-making and cultural exploration, nuanced and rich as any of the dishes captured within.” —Boston Globe In this engrossing and timely journey to the crossroads of food and identity, award-winning writer Anya von Bremzen explores six of the world’s most fascinating and iconic culinary cultures—France, Italy, Japan, Spain, Mexico, and Turkey—brilliantly weaving cuisine, history, and politics into a work of scintillating connoisseurship and charm We all have an idea in our heads about what French food is—or Italian, or Japanese, or Mexican, or . . . But where did those ideas come from? Who decides what makes a national food canon? Anya von Bremzen has won three James Beard Awards and written several definitive cookbooks, as well as her internationally acclaimed memoir Mastering the Art of Soviet Cooking. In National Dish, she investigates the truth behind the eternal cliché—“we are what we eat”—traveling to six storied food capitals, going high and low, from world-famous chefs to culinary scholars to strangers in bars, in search of how cuisine became connected to place and identity. A unique and magical cook’s tour of the world, National Dish brings us to a deep appreciation of how the country makes the food, and the food the country.

Historia de la comida en España María José Sevilla, 2023-11-23 Una fascinante historia de la alimentación en España desde la Antigüedad hasta nuestros días. La cocina en España es un crisol de culturas, sabores e ingredientes. El clima, la geología y la topografía la han enriquecido y han propiciado una gran variedad de tradiciones gastronómicas y cocinas regionales. A su vez, la compleja historia del país, con pobladores e invasores diversos, y la llegada de nuevos alimentos e ideas procedentes de otras latitudes son también determinantes para entender las peculiaridades y la evolución de la comida. La presente obra, amena y rigurosa, nos muestra cómo ha sido la alimentación en España desde la Antigüedad hasta nuestros

días. María José Sevilla entreteje hábilmente la historia culinaria, las circunstancias que afectan a su desarrollo y características, así como la cambiante relación con la comida y la cocina.

La cocina española Fernando Villaverde Landa, 2023-10-10 El enorme desarrollo de las cocinas españolas en las últimas décadas no puede ocultar la relativa carestía de fuentes de información sobre el acervo culinario español, especialmente si lo comparamos con otras tradiciones de nuestro entorno. Este libro aporta recursos, muchos de ellos inéditos, que nos permiten equiparar la tradición al actual destacado nivel de nuestra gastronomía. No estamos sin embargo ante una fría compilación de documentos, sino ante el destilado de un proceso de selección, ordenación y comentario. Se revisan en primer lugar las fuentes directas, es decir, tratados y recetarios que proceden de las elites y que, por tanto, nada nos dicen de qué comían —y cómo lo preparaban— las clases medias y el pueblo. Esto incrementa la importancia de las fuentes secundarias, también objeto de este libro. Aquí destacan la gran literatura española y los testimonios de viajeros foráneos, así como la siempre valiosa contribución de los medios de comunicación. Otras secciones se refieren a los protagonistas, con más de 450 reseñas biográficas; a la actividad asociativa, desde academias y cofradías hasta ferias, congresos y premios; a las encendidas polémicas que han jalonado este largo recorrido, y al idioma de la cocina, más un exhaustivo glosario. Este libro único se completa con un singular diccionario de frases célebres, de muy amena lectura. Se trata de una obra imprescindible no solo para los estudiosos de nuestra gastronomía, sino también para los aficionados que ven la cocina como una manifestación de la cultura, a los que proporciona unos conocimientos que les ayudarán a disfrutar de ella desde una posición mejor informada.

Respuestas alimentarias a la crisis económica Isabel González Turmo y otros, Este primer número de la COLECCIÓN eBOOKS ICAF (International Commission on the Anthropology of Food and Nutrition) reúne textos en torno a las siguientes líneas de análisis de las respuestas alimentarias a la crisis económica: 1. Crisis económica y cambio de hábitos alimentarios. 2. Modificaciones y continuidad en las redes de distribución alimentaria y en los sistemas de venta. 3. Recursos genéticos y patrimonio alimentario. Huertas urbanas. 4. Productores, consumidores y redes sociales: estrategias e innovación. De acuerdo a la vocación pluridisciplinar de ICAF, se ha procurado hacer confluír a especialistas de varias disciplinas. En este caso, antropólogos sociales y biólogos, sociólogos, economistas, historiadores, geógrafos, psicólogos, ingenieros agrónomos, etnobotánicos, veterinarios y nutricionistas. El objetivo ha sido analizar de manera comparada esas respuestas y llamar la atención sobre la repercusión que la situación creada pueda tener en los estudios sobre alimentación. El libro ofrece, por otra parte, el análisis de profesionales de varios países y continentes. Las realidades observadas son, pues, muchas y diversas, y sus miradas plurales y contrastadas. Solo hay, sin embargo, un hilo conductor: el análisis de las respuestas, no de las causas ni las consecuencias, a crisis económicas que han tenido repercusiones y respuestas distintas.

Wine Drinking Culture in France Marion Demossier,2010-07-15 This book provides a new interpretation of the relationship between consumption, drinking culture, memory and cultural identity in an age of rapid political and economic change. Using France as a case-study it explores the construction of a national drinking culture -the myths, symbols and practices surrounding it- and then through a multisited ethnography of wine consumption demonstrates how that culture is in the process of being transformed. Wine drinking culture in France has traditionally been a source of pride for the French and in an age of concerns about the dangers of 'binge-drinking', a major cause of jealousy for the British. Wine drinking and the culture associated with it are, for many, an essential part of what it means to be French, but they are also part of a national construction. Described by some as a national product, or as a 'totem drink', wine and its attendant cultures supposedly characterise Frenchness in much the same way as being born in France, fighting for liberty or speaking French. Yet this traditional picture is now being challenged by economic, social and political forces that have transformed consumption patterns and led to the fragmentation of wine drinking culture. The aim of this book is to provide an original account of the various causes of the long-term decline in alcohol consumption and of the emergence of a new wine drinking culture since the 1970s and to analyse its relationship to national and regional identity.

The Mediterranean Diet Victor R Preedy,Ronald Ross Watson,2014-11-19 The Mediterranean Diet offers researchers and clinicians a single authoritative source which outlines many of the complex features of the Mediterranean diet: ranging from supportive evidence and epidemiological studies, to the antioxidant properties of individual components. This book embraces a holistic approach and effectively investigates the Mediterranean diet from the cell to the nutritional well-being of geographical populations. This book represents essential reading for researchers and practicing clinicians in nutrition, dietetics, endocrinology, and public health, as well as researchers, such as molecular or cellular biochemists, interested in lipids, metabolism, and obesity. - Presents one comprehensive, translational source for all aspects of how the Mediterranean diet plays a role in disease prevention and health - Experts in nutrition, diet, and endocrinology (from all areas of academic and medical research) take readers from the bench research (cellular and biochemical mechanisms of vitamins and nutrients) to new preventive and therapeutic approaches - Features a unique section on novel nutraceuticals and edible plants used in the Mediterranean region

Social Anthropology and Development Policy R. D. Grillo, Alan Rew, 1985 4e de couv. : In recent years there has been considerable interest among anthropologists throughout the world in the application of their discipline to policy questions. The involvement of anthropologists in policy matters has a lengthy history, especially during the colonial period, and has always stimulated controversy and debate. This volume arises from the 1983 ASA Conference, which was a major review of the state of anthropology with special emphasis on newer developments in the field, particularly in applied subjects. It is a timely and valuable contribution to the debate about the social and cultural dimensions of policy planning. The papers fall into three groups. The first examines the role of the anthropologist in a variety of historical/political contexts; the second looks at what specifically the anthropologist can contribute to policy work; the third attempts to spell out in more general terms what working in the applied field might mean for anthropologists and those who employ them as policy advisers.

Gender and Sociality in Amazonia Cecilia McCallum, 2020-05-11 This is the first book to focus directly on gender in Amazonia for nearly thirty years. Research on gender and sexual identity has become central to social science during that time, but studies have concentrated on other places and people, leaving the gendered experiences of indigenous Amazonians relatively unexplored. McCallum explores little-known aspects of the day-to-day lives of Amazonian peoples in Brazil and Peru. Taking a closer look at the lives of the Cashinahua people, the book provides fascinating insights into conception, pregnancy and birth; naming rituals and initiation ceremonies; concepts of space and time; community and leadership; exchange and production practices; and the philosophy of daily life itself. Through this prism it shows that in fact gender is not merely an aspect of Amazonian social life, but its central axis and driving force. Gender does not just affect personal identity, but has implications for the whole of community life and social organization. The author illustrates how gender is continually created and maintained, and how social forms emerge from the practices of gendered persons in interaction. Throughout their lives, people are 'being made' in this part of the Amazon, and the whole of social organization is predicated on this conception. The author reveals the complex inter-relationships that link gender distinctions with the body, systems of exchange and politics. In so doing, she develops a specific theoretical model of gender and sociality that reshapes our understanding of Amazonian social processes. Building on the key works from past decades, this book challenges and extends current understandings of gender, society and the indigenous people of Amazonia.

Food Activism Carole Counihan, Valeria Siniscalchi, 2013-12-05 Across the globe, people are challenging the agro-

industrial food system and its exploitation of people and resources, reduction of local food varieties, and negative health consequences. In this collection leading international anthropologists explore food activism across the globe to show how people speak to, negotiate, or cope with power through food. Who are the actors of food activism and what forms of agency do they enact? What kinds of economy, exchanges, and market relations do they practice and promote? How are they organized and what are their scales of political action and power relations? Each chapter explores why and how people choose food as a means of forging social and economic justice, covering diverse forms of food activism from individual acts by consumers or producers to organized social groups or movements. The case studies embrace a wide geographical spectrum including Cuba, Sri Lanka, Egypt, Mexico, Italy, Canada, France, Colombia, Japan, and the USA. This is the first book to examine food activism in diverse local, national, and transnational settings, making it essential reading for students and scholars in anthropology and other fields interested in food, economy, politics and social change.

Women and Plants Patricia L Howard, 2003-08 These in-depth case studies from Latin America, Asia, Africa, Europe and North America provide a state of the art overview of the gender dimensions of people-plant relations. The contributors reveal, among other things, the crucial role of women in plantbiodiversity management.
