ROBuST: RCOG Assisted Birth Simulation Training George Attilakos, Sharon Jordan, Michele Mohajer, Glen Mola, Stephen O'Brien, Dimitrios Siassakos, 2024-06-20 Assisted vaginal birth (AVB) remains a key aspect of respectful, effective care for women in labour. In trained hands, it is associated with better maternal and neonatal outcomes than the alternative of a caesarean section in late labour. Written to accompany the RCOG Assisted Birth Simulation Training (ROBuST) course, this book provides guidance on the only RCOG-approved, evidence-based techniques for when and how to perform AVB and complex caesarean sections. There are clear descriptions of techniques, plus photographs, diagrams and videos to improve learning. Internationally recognised contributors discuss all aspects of assisted birth, including vacuum and forceps-assisted birth; caesarean section at full dilatation; safe and effective practice of Kielland's forceps; and essential non-technical skills. This second edition includes chapters on providing care within the medico-legal context of modern obstetric practice and on exploring the worldwide trends in AVB. This remains a much-valued, and much-consulted, part of any accoucheur's library.

RCOG Operative Birth Simulation Training [ROBuST] Course Manual George Attilakos, Sharon Jordan, Michele Mohajer, Glen Mola, Stephen O'Brien, Dimitrios Siassakos, 2024-06-30 A comprehensive, evidence-based guide to assisted vaginal birth, accompanying the RCOG Assisted Birth Simulation Training (ROBuST) course.

Eponyms and Names in Obstetrics and Gynaecology Thomas F. Baskett, 2019-01-24 Few specialties have a longer or richer eponymous background than obstetrics and gynaecology. Eponyms add a human side to an increasingly technical profession and represent the historic tradition and language of the speciality. This collection aims to perpetuate the names and contributions of pioneers and offer introductory profiles to the founders in whose steps we follow. This third edition includes 26 new entries, as well as expanded detail, illustration and quotation for existing entries. Biographical data and historical and medical context are discussed for each of the 391 names, with reference to 34 countries, reflecting the field's far reaching origins. More than 1700 original references feature, alongside an extensive bibliography of more than 2500 linked references to assist readers searching for more detailed information. This is a volume for physicians, midwives,

medical historians, medical ethicists and all those interested in the history and evolution of obstetrical and gynaecological treatment.

The Technological Evolution of Industrial Districts Fiorenza Belussi, Giorgio Gottardi, Enzo Rullani, 2012-12-06
Fiorenza Belussi, Giorgio Gottardi, and Enzo Rullani This volume collects some papers presented at the Vicenza conference The Future of Districts, held in June 1999, organised by the Department of Technology and Management of Industrial Systems of the Faculty of Engineering of Padua University, with the collaboration of several engineers, industrial economists, and experts in the issue of technology management. This was the starting point of a long-lasting and painful collective discussion, the results of which are documented here, during many meetings of this itinerant group, including the workshop in Padua, organised by Professor Luciano Pilotti and held in May 2001, Systems, governance & knowledge within firm networks at the Department of Economics of the University of Padua, and the recent international research seminar, held in May 2002, in Rome at the Tagliacarne Institute, within the EU sponsored project Industrial districts' re location processes: identifying policies of EU enlargement West-East ID. The reason we decided to organise this book was not only to underline the importance of the industrial district (ID) model as a tool of propulsive local growth in a country like Italy. On the contrary, the idea that moved us was the theoretical dissatisfaction with the way in which the phenomenon of local development and industrial clustering of specific industries was treated in the international approach of the various disciplines.
