Continuing Professional Education in Australia Barrie Brennan,2016-09-01 This book offers a history of Continuing Professional Development (CPD) in the Australian context. It presents an approach that links the development of CPD to a series of 'missed opportunities' and the identification of three key themes (mandatory CPD, competencies and regulation/registration) as well as with national regulation for select health professions. It not only relates the evolution of CPD in Australia but also serves as a guide to examining the situation in other countries and the emergence of CPD in individual professions. CPD has been provided for many decades, but it has not been rated as a 'high priority' or a key area of provision and has not been the focus of discussions or disputes in the higher education sector or in vocational education circles. Nevertheless in describing CPD's development, evidence is presented that CPD has made a significant contribution to the broad field of vocational education.

Nutrition in Crisis Richard David Feinman,2019 Why Low Carb Should Be the Default Approach for Managing and

Preventing Metabolic Syndrome and Other Chronic Diseases. Almost every day it seems a new study is published that shows you are at risk for diabetes, cardiovascular disease, or all-cause mortality due to something you've just eaten for lunch. Many of us no longer know what to eat or who to believe. In the Nutrition Revolution; distinguished biochemist Richard Feinman, PhD, cuts through the noise, explaining the intricacies of nutrition and human metabolism in accessible terms. He lays out the tools you need to navigate the current confusion in the medical literature and its increasingly bizarre reflection in the media. At the same time, The Nutrition Revolution offers an unsparing critique of the nutritional establishment, which continues to demonize fat and refute the benefits of low-carbohydrate and ketogenic diets, all despite decades of evidence to the contrary. Feinman tells the story of the first low-carbohydrate revolution fifteen years ago, how it began, what killed it, and why a second revolution is now reaching a fever pitch. He exposes the backhanded tactics of a regressive nutritional establishment that ignores good data and common sense, and highlights the innovative work of those researchers who have broken rank. Entertaining, informative, and irreverent, Feinman paints a broad picture of the nutrition world: the beauty of the underlying biochemistry; the embarrassing failures of the medical establishment; the preeminence of low-carbohydrate diets for weight loss, diabetes, other metabolic diseases, and even cancer; and what's wrong with the constant reports that common foods represent a threat rather than a source of pleasure.--

Metabical Dr Robert Lustig, 2021-05-04 'Metabical lays bare the depth of the relationship between the recent and profound perversion of the human diet and its overwhelming health consequences.' Dr David Perlmutter, author of the #1 New York Times bestsellers *Grain Brain* and *Brain Wash* Did you know that 62% of the food in our supermarkets is not only processed but 'ultra-processed' (ingredients from other foods are combined to make something 'new', often in colours that do not exist in nature)? Did you know data shows that by eating this kind of food over time we are literally slowly poisoning ourselves? In the hard-hitting, ground-breaking tradition of his NY Times bestseller *FAT CHANCE*, which revealed the dangers of sugar, Dr Robert Lustig persuasively presents a stark exposé of how our addiction to processed foods (aided and

abetted by the food industry, big ag, big pharma, institutional medicine and the government) is behind the lethal increase in major non-communicable diseases, including diabetes, heart disease, fatty liver disease, cancer and dementia. We have come to accept that these chronic diseases are simply part of the 'natural ageing process', but Dr Lustig makes the case that this is simply not true. The solution on both a personal and societal level is a return to unprocessed food and Dr Lustig offers a doable plan for us to heal and restore our own health and wellbeing with real food, and in the process boosting our immunity to viruses like Covid-19.

Primary Care Revisited Ben Yuk Fai Fong, Vincent Tin Sing Law, Albert Lee, 2020-06-03 This book adopts an interdisciplinary approach with a wide scope of perspectives on primary healthcare, describing related principles, care models, practices and social contexts. It combines aspects of development, research and education applied in primary health care, providing practitioners and scholars with a comprehensive overview of the current knowledge and delivery models of healthcare in community settings. It covers the practical, philosophical and scholarly issues pertinent to the delivery, financing, planning, ethics, health politics, professional and technological development, resources, and monitoring in primary health care. Contributors are from a diverse range of academic and professional backgrounds, bringing together collective expertise in mainstream medicine, nursing, allied health, Chinese medicine, health economics, administration, law, public policy, housing management, information technology and mass communications. As such, the book does not follow the common clinical practice or service-based approach found in most texts on primary care. The contents will serve as a useful reference work for policymakers, researchers, community health practitioners, health executives and higher education students.

Unaccountable Marty Makary, 2012-09-18 New York Times Bestseller "Every once in a while a book comes along that rocks the foundations of an established order that's seriously in need of being shaken. The modern American hospital is that establishment and Unaccountable is that book." -Shannon Brownlee, author of Overtreated Dr. Marty Makary is co-developer of the life-saving checklist outlined in Atul Gawande's bestselling The Checklist Manifesto. As a busy surgeon who has worked in many of the best hospitals in the nation, he can testify to the amazing power of modern medicine to cure. But he's also been a witness to a medical culture that routinely leaves surgical sponges inside patients, amputates the wrong limbs, and overdoses children because of sloppy handwriting. Over the last ten years, neither error rates nor costs have come down, despite scientific progress and efforts to curb expenses. Why? To patients, the healthcare system is a black box. Doctors and hospitals are unaccountable, and the lack of transparency leaves both bad doctors and systemic flaws unchecked. Patients need to know more of what healthcare workers know, so they can make informed choices. Accountability in healthcare would expose dangerous doctors, reward good performance, and force positive change nationally, using the power of the free market. Unaccountable is a powerful, no-nonsense, non-partisan diagnosis for healing our hospitals and reforming our

broken healthcare system.

Portfolios for Health Professionals Kate Andre, Marie Heartfield, 2016-10-13 Portfolios for Health Professionals 3e is a practical guide to designing and developing a portfolio that documents and communicates your professional achievements and competencies, in order to meet the Australian Health Practitioner Regulation Agency (AHPRA) annual registration requirements. Now revised to address a range of health professions, this third edition will help students to gain a basic understanding of what a portfolio is, how it is used, and why different types of portfolio may be required for different purposes. The book provides health professionals with detailed guidelines for developing a quality portfolio that will help them to review their professional practice, direct their continuing professional development, assess their learning and career planning, and communicate their professional achievements. Updated regulatory requirements for national registration Aligned to updated APRHA CPD standards New section on clinical reasoning Increased focus on reflective practice throughout, to encourage critical thinking Expanded section on ePortfolios, including examples Greater emphasis on evidence-based practice New Chapter 7, with practical examples of the approaches used by a range of health practitioners to develop their professional portfolios
