Pacific Presences Lucie Carreau, Alison Clark, Alana Jelinek, Erna Lilje, Nicholas Thomas, 2018 Hundreds of thousands of works of art and artefacts from many parts of the Pacific are dispersed across European museums. They range from seemingly quotidian things such as fish-hooks and baskets to great sculptures of divinities, architectural forms and canoes. These collections constitute a remarkable resource for understanding history and society across Oceania, cross-cultural encounters since the voyages of Captain Cook, and the colonial transformations that have taken place since. They are also collections of profound importance for Islanders today, who have varied responses to their disp.

A Companion to Islamic Art and Architecture Finbarr Barry Flood, Gulru Necipoglu, 2017-06-16 The two-volume Companion to Islamic Art and Architecture bridges the gap between monograph and survey text by providing a new level of access and interpretation to Islamic art. The more than 50 newly commissioned essays revisit canonical topics, and include original approaches and scholarship on neglected aspects of the field. This two-volume Companion showcases more than 50 specially commissioned essays and an introduction that survey Islamic art and architecture in all its traditional grandeur. Essays are organized according to a new chronological-geographical paradigm that remaps the unprecedented expansion of the field and reflects the nuances of major artistic and political developments during the 1400-year span. The Companion represents recent developments in the field, and encourages future horizons by commissioning innovative essays that provide fresh perspectives on canonical subjects, such as early Islamic art, sacred spaces, palaces, urbanism, ornament, arts of the book, and the portable arts while introducing others that have been previously neglected, including unexplored geographies and periods, transregional connectivities, talismans and magic, consumption and networks of portability, museums and collecting, and contemporary art worlds; the essays entail strong comparative and historiographic dimensions. The volumes are accompanied by a map, and each subsection is preceded by a brief outline of the main cultural and historical developments during the period in question. The volumes include periods and regions typically excluded from survey books including modern and contemporary art-architecture; China, Indonesia, Sub-Saharan Africa, Sicily, the New World (Americas)

Physical Techniques in the Study of Art, Archaeology and Cultural Heritage, 2006-05-02 The first of its kind, this series is devoted to the use of physical principles in the study and scientific conservation of objects with cultural heritage significance. It begins with a review of the modern museum, which discusses new techniques employed in the conservation of museum artifacts such as X-ray tomography and other techniques used to study Egyptian mummies, bones and mineralization of bones in the archaeological context, and the degradation of parchment. All of these topics and techniques are essential for the preservation of our history. This includes finding ways to preserve parchment documents and letters, which much of our written heritage is documented on, so that it can be used and understood for generations to come. This book is a must have for any museum as well as any university that teaches or employs the techniques discussed. - Written in a style that is readily

understandable by conservation scientists, archaeologists, museum curators, and students - Provides an introduction to the advanced fields of synchrotron radiation science, neutron science, and computed tomography - Outstanding review of the use of modern technology to study museum and archaeological artifacts - Offers solutions through advanced scientific techniques to a wide range of problems facing museum staff

A Companion to the History of the Book Simon Eliot, Jonathan Rose, 2011-08-24 *A COMPANION TO THE HISTORY OF THE BOOK* Edited by Simon Eliot and Jonathan Rose “As a stimulating overview of the multidimensional present state of the field, the Companion has no peer.” Choice “If you want to understand how cultures come into being, endure, and change, then you need to come to terms with the rich and often surprising history Of the book ... Eliot and Rose have done a fine job. Their volume can be heartily recommended. “ Adrian Johns, *Technology and Culture* From the early Sumerian clay tablet through to the emergence of the electronic text, this Companion provides a continuous and coherent account of the history of the book. A team of expert contributors draws on the latest research in order to offer a cogent, transcontinental narrative. Many of them use illustrative examples and case studies of well-known texts, conveying the excitement surrounding this rapidly developing field. The Companion is organized around four distinct approaches to the history of the book. First, it introduces the variety of methods used by book historians and allied specialists, from the long-established discipline of bibliography to newer IT-based approaches. Next, it provides a broad chronological survey of the forms and content of texts. The third section situates the book in the context of text culture as a whole, while the final section addresses broader issues, such as literacy, copyright, and the future of the book. Critical Terms for Art History, Second Edition Robert S. Nelson, Richard Shiff, 2010-03-15 Art has always been contested terrain, whether the object in question is a medieval tapestry or Duchamp's Fountain. But questions about the categories of art and art history acquired increased urgency during the 1970s, when new developments in critical theory and other intellectual projects dramatically transformed the discipline. The first edition of *Critical Terms for Art History* both mapped and contributed to those transformations, offering a spirited reassessment of the field's methods and terminology. Art history as a field has kept pace with debates over globalization and other social and political issues in recent years, making a second edition of this book not just timely, but crucial. Like its predecessor, this new edition consists of essays that cover a wide variety of loaded terms in the history of art, from sign to meaning, ritual to commodity. Each essay explains and comments on a single term, discussing the issues the term raises and putting the term into practice as an interpretive framework for a specific work of art. For example, Richard Shiff discusses Originality in Vija Celmins's *To Fix the Image in Memory*, a work made of eleven pairs of stones, each consisting of one original stone and one painted bronze replica. In addition to the twenty-two original essays, this edition includes nine new ones—performance, style, memory/monument, body, beauty, ugliness, identity, visual culture/visual studies, and social history of art—as well as new introductory material. All help expand the book's scope while retaining its central goal of stimulating discussion of theoretical issues in art history and making that discussion accessible to both beginning students and senior scholars. Teaching Art History with New Technologies Kelly Donahue-Wallace, Laetitia La Follette, Andrea Pappas, 2009-05-05 Digital images, Internet resources, presentation and social software, interactive animation, and other new technologies offer a host of new possibilities for art history instruction. *Teaching Art History with New Technologies: Reflections and Case Studies* assists faculty in negotiating the digital teaching terrain. The text documents the history of computer-mediated art history instruction in the last decade and provides an analysis of the increasing number of tools now at the disposal of art historians. It presents a series of reflections and case-studies by early adopters who have not just replaced older materials with new, but who have advanced the discipline's pedagogy in doing so. The essays illustrate how new technologies are changing the way art history is taught, summarize lessons learned, and identify challenges that remain. Given the transitional

state of the field, with faculty ranging from the computer-phobic to the computer-savvy, these case studies represent a broad spectrum, from those that focus on the thoughtful integration of new technologies into traditional teaching to others that look beyond the familiar art history lecture or seminar format. They provide both practical suggestions and theoretical models for historians of art and visual culture interested in what computer-mediated applications have been successful in art history teaching and where such new approaches may be leading us.
