*The Photomontages of Hannah Höch* Hannah Höch, Peter W. Boswell, Maria Martha Makela, Carolyn Lanchner, Kristin Makholm, 1996 Here, in the first comprehensive survey of her work by an American museum, authors Peter Boswell, Maria Makela, and Carolyn Lanchner survey the full scope of Hoch's half-century of experimentation in photomontage - from her politically charged early works and intimate psychological portraits of the Weimar era to her later forays into surrealism and abstraction.

**Pasture Landscapes and Nature Conservation** Bernd Redecker, Werner Härdtle, Peter Finck, Uwe Riecken, Eckhard Schröder, 2012-12-06 One of the main problems and aims of nature conservation in Europe is to protect semi-open landscapes. The development during the past decades is characterized by an ongoing intensification of land use on the one hand, and an increasing number of former meadows and pastures lying fallow caused by changing economic conditions on the other hand. In several countries the establishment of larger pasture landscapes with a mixed character of open grassland combined with shrubs and forests has been recognized as one solution to this problem. The book gives an overview of the European projects concerning to this topic - nature conservation policy and strategies, scientific results and practical experiences creating large scale grazing systems.

*Hermeneutics and Science* Márta Fehér, O. Kiss, L. Ropolyi, 2013-04-17 Hermeneutics was elaborated as a specific art of understanding in humanities. The discovered paradigmatic, historical characteristics of scientific knowledge, and the role of rhetoric, interpretation and contextuality enabled us to use similar arguments in natural sciences too. In this way a new research field, the hermeneutics of science emerged based upon the works of Husserl, Merleau-Ponty, Heidegger and Gadamer. A dialogue between philosophers and scientists begins in this volume on hermeneutic approaches to physics, biology, ethology, mathematics and cognitive science. Scientific principles, methodologies, discourse, language, and metaphors are analyzed, as well as the role of the lay public and the legitimation of science. Different hermeneutical-phenomenological approaches to perception, experiments, methods, discovery and justification and the genesis of science are presented. Hermeneutics shed a new light on the incommensurability of paradigms, the possibility of translation and the historical understanding of science.

*Future Narratives* Christoph Bode, Rainer Dietrich, 2013-10-29 This head volume of the 'Narrating Futures' series defines

and identifies Future Narratives. It parses their characteristic features and aims at an abstract classification of the whole corpus, irrespective of its concrete manifestations across the media. Drawing on different theorems and approaches, it offers a unified theory and a poetics of Future Narratives. Locating the media-historical moment of their emergence, this volume paves the way for the following volumes, which deal with how Future Narratives are refracted through different media.

Renal Transport and Diuretics / Renaler Transport und Diuretica K. Thureau, H. Jahrmärker, 2012-11-25 It is generally appreciated that large congresses are not the optimal means of facilitating communication within specialized areas of medical research. Small symposia, where scientific discussion can be confined to limited groups, have lately become successful vehicles of information transfer. However, such symposia, although eminently suited to the exploration of specific problems, often have the inherent disadvantage of not being able to successfully address themselves to larger themes. Accordingly, the planners of this symposium have solicited the participation of internationally acclaimed investigators to consider current problems both in the physiological and clinical domains of nephrology. The observant reader will note that the variety of theoretical and experimental approaches used by the physiologists are reflected in the clinical studies, while the clinicians, in turn, have provided the physiologists with useful insights. The part of the symposium which attempted to correlate metabolic characteristics of kidney cells with their transport functions has proven to be particularly fruitful. For example, the presentations dealing with aldosterone, angiotensin and diuretics have offered a multi-faceted approach that was previously unavailable. The contributions of investigators from many countries and their enthusiastic participation have led to the success of this symposium. To them we wish to express our deep gratitude. We also wish to sincerely thank Dr. K. H. BEYER, Senior Vice President of Merck, Sharp & Dohme Research Laboratories, and Dr. H. F. HOFMANN, Director of Medical Research of Sharp & Dohme GmbH for their full support and their constant attention to our many requests.

**Studies in Nietzsche and the Classical Tradition** James C. O'Flaherty, Timothy F. Sellner, Robert Meredith Helm, 1976 These fifteen essays on Nietzsche's indebtedness to the Classical Tradition were composed by scholars in the fields of philosophy, theology, German and Classics. The essays roughly cover the following epochs: the age of the Fathers of the Western Church, medieval scholasticism, the Renaissance, the Enlightenment, Weimar Classicism, Romanticism and the several other intellectual trends and movements in the nineteenth century. Collection includes three essays comparing Nietzsche's perceptions of Plato, Aristotle, and Socrates with those (respectively) of Augustine, Aquinas, and Hamann. Three essays treat Nietzsche's relationship to Goethe, Schiller, and Heine. Three deal with Nietzsche and French literature or thought, one explores possible parallels between Nietzsche and Dante, another the extent of his debt to Byron. Four contributions center on Nietzsche's view of tragedy, and an older study has been expanded to show the underlying harmony of Nietzsche's conception with that of the French classical tragedians. This book affirms and fulfills the need for serious

scholarship by the student of Nietzsche unable to work in German, while presenting a readable cross-section of the work being done relating Nietzsche to the intellectual tradition from which he sprang.

**Neuropsychotherapy** Klaus Grawe, 2017-09-25 Neuropsychotherapy is intended to inspire further development and continual empirical updating of consistency theory. It is essential for psychotherapists, psychotherapy researchers, clinical psychologists, psychiatrists, neuroscientists, and mental-health professionals. Profoundly important and innovative, this volume provides necessary know-how for professionals as it connects the findings of modern neuroscience to the insights of psychotherapy. Throughout the book, a new picture unfolds of the empirical grounds of effective psychotherapeutic work. Author Klaus Grawe articulates a comprehensive model of psychological functioning-consistency theory-and bridges the gap between the neurosciences and the understanding of psychological disorders and their treatment. Neuropsychotherapy illustrates that psychotherapy can be even more effective when it is grounded in a neuroscientific approach. Cutting across disciplines that are characteristically disparate, the book identifies the neural foundations of various disorders, suggests specific psychotherapeutic conclusions, and makes neuroscientific knowledge more accessible to psychotherapists. The book's discussion of consistency theory reveals the model is firmly connected to other psychological theoretical approaches, from control theory to cognitive-behavioral models to basic need theories.

Holisms of communication James McElvenny, Andrea Ploder, 2021 A central pillar of contemporary communication research is the analysis of filmed interactions between people. The techniques employed in such analysis first took on a recognizably modern form in the 1970s, but their roots go back to the earliest days of motion picture technology in the late nineteenth century. This book presents original essays accompanied by written responses which together create a dialogue exploring early efforts at audio-visual sequence analysis and their common goal to capture the whole of the communicative situation. The first three chapters of this volume look at the film-based research of Gestalt psychologists in Berlin as well as psychologists in the orbit of Karl and Charlotte Bühler in Vienna in the first decades of the twentieth century. Most of these figures - along with many other Central European scholars of this era - were driven into exile in the United States after the rise of National Socialism in the 1930s. This scientific migration led to the cross-pollination of communication studies in America, an outcome visible in the leading project in interaction research of the mid-twentieth century, the Natural History of an Interview. The following two chapters examine this project in its historical context. The volume closes with a critical edition of a treasure from the archives: the transcript of a speech delivered by Ray Birdwhistell, a key participant in the Natural History of an Interview project and founder of kinesics.

**Preservation in Digital Cartography** Markus Jobst, 2010-09-17 This book "Preservation in Digital Cartography: Archiving Aspects" should give an overview on how to preserve digital cartographic applications and geospatial data in a sustainable way. The intention of this book is to shape the opinion of affected parties and to bring together various d-

ciplines. Therefore adjacent chapters will generally deal with information technologies, Service-Oriented Architectures, cybercartography, reproduction and historic cartography, which all together can be subsumed in perspective cartographic heritage. The survival of this digital cartographic heritage will base on long-term preservation strategies that make use of intensive dissemination on the one hand and sustainable digital archiving methods on the other. This includes a massive development of paradigm that expands from "store-and-save" to "keep-it-online". The paradigm "store-and-save" is mainly used for analogue masters that consist of stage media, like vellum, and their visible content. Avoiding the storage - dia from degeneration in climate-controlled areas will help to keep the content accessible. In the digital domain the high interdependency of stage media, format, device and applications leads to the paradigm "keep-- online" which for example describes the migration to new storage devices. In fact this expansion of paradigm means that the digital domain calls for ongoing actions in order to preserve cartography for a long term.

**Knowledge, Science, and Literature in Early Modern Germany** Gerhild Scholz Williams, Stephan K. Schindler, 1996 Focusing on knowledge, science and literature in early modern Germany, this collection presents 12 essays on emerging epistemologies regarding: the transcendent nature of the Divine; the natural world; the body; sexuality; intellectual property; aesthetics; demons; and witches.

Grenzenlose Cyberwelt? Stefan Iske, Kompetenzzentrum Informelle Bildung KIB, Alexandra Klein, Nadia Kutscher, Hans-Uwe Otto, 2008-07-22 Welche Bedeutung haben technische Ausstattung und soziale Zugangsorte für die Teilhabe im virtuellen Raum? Welchen Einfluss haben soziale Rahmenbedingungen auf Nutzungsdifferenzen und welche Ausprägungen finden sich in dieser Hinsicht bei Jugendlichen? In der Beantwortung dieser neuen Fragestellungen führt der Band international herausragende ExpertInnen aus verschiedenen Disziplinen zusammen. Zentrale Fragen der Bildungsteilhabe in der Informations- und Wissensgesellschaft gerade für die nachwachsende Generation, die häufig als DIE Mediengeneration schlechthin gilt, werden im Zusammenhang mit der Problematik der digitalen Spaltung thematisiert und systematisiert. Die erstmalige Zusammenführung dieser unterschiedlichen Blickwinkel führt zu neuen Erkenntnissen über die Bildungsherausforderungen des Internet.

Ovarialtumoren G. Dallenbach-Hellweg, 1982-05-01 Die Ovarialtumoren gehören heute mit zu den häufigsten Tumoren des weiblichen Genitale. Ihre morphologische Differentialdiagnostik und die sich darauf aufbauende gezielte Therapie ist aufgrund der Vielfalt dieser Tumoren ungleich viel komplizierter als in anderen Organen. Dement sprechend liegt der

Schwerpunkt dieses Buches auf dem Gebiet der Histopathologie. Spezialkenntnisse insbesondere über die selteneren Formen der Ovarialtumoren hängen von großen Fallzahlen ab. Hier ist der internationale Erfahrungsaustausch von vorrangiger Bedeutung. Die derzeit weltweit anerkannte histogenetische Klassifikation der WHO erfährt an Hand der Erfahrungen an drei deutschen Frauenkliniken kleine Ergänzungen und Variationen. Einige Länder, z. B. Israel verfügen über große epidemiologische Untersuchungen, deren Ergebnisse korrelierend aufgenommen sind. Zur klinischen Diagnostik wurden in den letzten Jahren modernste Untersuchungsmethoden neu eingeführt; ihre Anwendung setzt jedoch individuell anzupassende kritische Indikationsstellungen voraus. Abschließend werden die sich sehr differenziert auf der histologischen Diagnostik aufbauenden modernen Möglichkeiten einer gezielten Therapie der Ovarialtumoren ausführlich diskutiert. Hier steht die Chemotherapie im Vordergrund. Im Hinblick auf die Frage einer Hormonbehandlung kommt neuerdings auch dem Rezeptornachweis im Tumorgewebe Bedeutung zu. Diese Zusammenstellung spricht somit gleichermaßen Pathologen, Onkologen und Gynakologen an und will versuchen, gegenseitige Informationslücken der Fachexperten auf dem Gesamtgebiet der Problematik der Ovarialtumoren in zumutbarer Kürze zu schließen. Daher nehmen gerade die selteneren und bisher weniger bekannten Tumoren in Bild und Text einen verhältnismäßig breiten Raum ein auf Kosten der hinlänglich bekannten häufigeren Formen, bei denen Spezialfragen der Differentialdiagnostik aufgrund neuester Erkenntnisse im Vordergrund stehen.

*Literature on Language* Christopher Brumfit, 1991 Presents a collection of literary extracts about experiences in language learning. The book is divided into four sections or topic areas: schools and tutors, language acquisition, literary experience, and linguistic insight and prejudice. Extracts are taken from writers from all over the world.
