The Sandwich Thief Andre Marois,2016-03-01 Marin loves the sandwiches his parents make for him—every day they're different and more delicious than the last. One morning, someone dares to steal his favorite sandwich: ham-cheddar-kale. Furious, Marin begins a fevered and famished investigation to unmask the thief. The days go by, the suspects multiply, and Marin's sandwiches continue to disappear. This droll, graphic caper is a funny school mystery exploring the high stakes of low blood sugar. The first in a series, the book's witty text and graphic illustrations make this funny school mystery perfect for early and advanced readers alike—and for anyone who's been the victim of lunchtime crime.

Mathematical Lives CLAUDIO BARTOCCI, Renato Betti, Angelo Guerraggio, Roberto Lucchetti,2010-10-01 Steps forward in mathematics often reverberate in other scientific disciplines, and give rise to innovative conceptual developments or find surprising technological applications. This volume brings to the forefront some of the proponents of the mathematics of the twentieth century, who have put at our disposal new and powerful instruments for investigating the reality around us. The portraits present people who have impressive charisma and wide-ranging cultural interests, who are passionate about defending the importance of their own research, are sensitive to beauty, and attentive to the social and political problems of their times. What we have sought to document is mathematics' central position in the culture of our day. Space has been made not only for the great mathematicians but also for literary texts, including contributions by two apparent interlopers, Robert Musil and Raymond Queneau, for whom mathematical concepts represented a valuable tool for resolving the struggle between 'soul and precision.'

Journeys Out of the Body Robert A. Monroe,2014-11-12 The definitive work on the extraordinary phenomenon of out-of-body experiences, by the founder of the internationally known Monroe Institute. Robert Monroe, a Virginia businessman, began to have experiences that drastically altered his life. Unpredictably, and without his willing it, Monroe found himself leaving his physical body to travel via a second body to locales far removed from the physical and spiritual realities of his life. He was inhabiting a place unbound by time or death. Praise for Journeys Out of the Body Monroe's account of his travels, Journeys Out of the Body, jam-packed with parasitic goblins and dead humans, astral sex, scary trips into mind-boggling other dimensions, and practical tips on how to get out of your body, all told with wry humor, quickly became a cult sensation

with its publication in 1971, and has been through many printings. Whatever their 'real' explanation, Monroe's trips made for splendid reading. —Michael Hutchinson, author of *Megabrain* Robert Monroe's experiences are probably the most intriguing of any person's of our time, with the possible exception of Carlos Castaneda's. —Joseph Chilton Pierce, author of *Magical Child* This book is by a person who's clearly a sensible man and who's trying to tell it like it is. No ego trips. Just a solid citizen who's been 'out' a thousand times now and wants to pass his experiences to others. —*The Last Whole Earth Catalog*

The Mercury 13 Martha Ackmann, 2003-06-03 For readers of *The Astronaut Wives Club*, *The Mercury 13* reveals the little-known true story of the remarkable women who trained for NASA space flight. In 1961, just as NASA launched its first man into space, a group of women underwent secret testing in the hopes of becoming America's first female astronauts. They passed the same battery of tests at the legendary Lovelace Foundation as did the Mercury 7 astronauts, but they were summarily dismissed by the boys' club at NASA and on Capitol Hill. The USSR sent its first woman into space in 1963; the United States did not follow suit for another twenty years. For the first time, Martha Ackmann tells the story of the dramatic events surrounding these thirteen remarkable women, all crackerjack pilots and patriots who sometimes sacrificed jobs and marriages for a chance to participate in America's space race against the Soviet Union. In addition to talking extensively to these women, Ackmann interviewed Chuck Yeager, John Glenn, Scott Carpenter, and others at NASA and in the White House with firsthand knowledge of the program, and includes here never-before-seen photographs of the Mercury 13 passing their Lovelace tests. Despite the crushing disappointment of watching their dreams being derailed, the Mercury 13 went on to extraordinary achievement in their lives: Jerrie Cobb, who began flying when she was so small she had to sit on pillows to see out of the cockpit, dedicated her life to flying solo missions to the Amazon rain forest; Wally Funk, who talked her way into the Lovelace trials, went on to become one of the first female FAA investigators; Janey Hart, mother of eight and, at age forty, the oldest astronaut candidate, had the political savvy to steer the women through congressional hearings and later helped found the National Organization for Women. A provocative tribute to these extraordinary women, *The Mercury 13* is an unforgettable story of determination, resilience, and inextinguishable hope.

Mereology A. J. Cotnoir, Achille C. Varzi, 2021-07-08 Is a whole something more than the sum of its parts? Are there things composed of the same parts? If you divide an object into parts, and divide those parts into smaller parts, will this process ever come to an end? Can something lose parts or gain new ones without ceasing to be the thing it is? Does any multitude of things (including disparate things such as you, this book, and the tail of a cat) compose a whole of some sort? Questions such as these have occupied us for at least as long as philosophy has existed. They define the field that has come to be known as mereology—the study of all relations of part to whole and of part to part within a whole—and have deep and far-reaching ramifications in metaphysics as well as in logic, the foundations of mathematics, the philosophy of language, the philosophy of science, and beyond. In *Mereology*, A. J. Cotnoir and Achille C. Varzi have compiled decades of advanced research into a

comprehensive, up-to-date, and formally rigorous picture. The early chapters cover the more classical aspects of mereology; the rest of the book deals with variants and extensions. Whether you are an established professional philosopher, an interested student, or a newcomer, inside you will find all the tools you need to join this ever-evolving field of inquiry and theorize about all things mereological.

Events Roberto Casati, Achille C. Varzi, 1996 Philosophical questions about events lie at the crossing of several disciplines, from metaphysics and logic to philosophy of language, action theory, the philosophy of space and time.

The Fanaticism of the Apocalypse Pascal Bruckner, 2013-04-25 The planet is sick. Human beings are guilty of damaging it. We have to pay. Today, that is the orthodoxy throughout the Western world. Distrust of progress and science, calls for individual and collective self-sacrifice to 'save the planet' and cultivation of fear: behind the carbon commissars, a dangerous and counterproductive ecological catastrophism is gaining ground. Modern society's susceptibility to this kind of thinking derives from what Bruckner calls "the seductive attraction of disaster," as exemplified by the popular appeal of disaster movies. But ecological catastrophism is harmful in that it draws attention away from other, more solvable problems and injustices in the world in order to focus on something that is portrayed as an Apocalypse. Rather than preaching catastrophe and pessimism, we need to develop a democratic and generous ecology that addresses specific problems in a practical way.

Surely You're Joking Mr Feynman Richard P Feynman, 2014-08-21 WITH A NEW INTRODUCTION BY BILL GATES In this warm, insightful portrait of the Winner of the Nobel Prize for Physics in 1965, we see the wisdom, humour and curiosity of Richard Feynman through a series of conversations with his friend Ralph Leighton. Winner of the Nobel Prize for Physics in

1965, Richard Feynman was one of the world's greatest theoretical physicists, but he was also a man who fell, often jumped, into adventure. An artist, safecracker, practical joker and storyteller, Feynman's life was a series of combustible combinations made possible by his unique mixture of high intelligence, unquenchable curiosity and eternal scepticism. Over a period of years, Feynman's conversations with his friend Ralph Leighton were first taped and then set down as they appear here, little changed from their spoken form, giving a wise, funny, passionate and totally honest self-portrait of one of the greatest men of our age.

The Daydreamer Ian McEwan,2011-08-03 A delightful literary foray for adults and children alike, from the inexhaustible imagination of Booker Prize-winning, best-selling author Ian McEwan. In these seven exquisitely interlinked episodes, the grown-up protagonist Peter Fortune reveals the secret journeys, metamorphoses, and adventures of his childhood. Living somewhere between dream and reality, Peter experiences fantastical transformations: he swaps bodies with the wise old family cat; exchanges existences with a cranky infant; encounters a very bad doll who has come to life and is out for revenge; and rummages through a kitchen drawer filled with useless objects to discover some not-so-useless cream that actually makes people vanish. Finally, he wakes up as an eleven-year-old inside a grown-up body and embarks on the truly fantastic adventure of falling in love. Moving, dreamlike, and extraordinary, *The Daydreamer* marks yet another imaginative departure for Ian McEwan.

Von Braun Michael Neufeld,2008-11-11 Curator and space historian at the Smithsonian's National Air and Space Museum delivers a brilliantly nuanced biography of controversial space pioneer Wernher von Braun. Chief rocket engineer of the Third Reich and one of the fathers of the U.S. space program, Wernher von Braun is a source of consistent fascination.

Glorified as a visionary and vilified as a war criminal, he was a man of profound moral complexities, whose intelligence and charisma were coupled with an enormous and, some would say, blinding ambition. Based on new sources, Neufeld's biography delivers a meticulously researched and authoritative portrait of the creator of the V-2 rocket and his times, detailing how he was a man caught between morality and progress, between his dreams of the heavens and the earthbound realities of his life.

Dates on My Fingers Muhsin al-Ramli, 2014-03-01 Saleem, fed up with all the violence, religiosity, and strict family hierarchies of his Iraqi village, flees to Spain to establish a new life for himself. But his lonely exile is turned upside down when he encounters his father, Noah, in a Madrid nightclub after not seeing him in more than a decade. Noah looks and acts like a new man, and Saleem sets out to discover the mystery of his father's presence in Spain and his altered life. In doing so, he recalls formative moments in Iraq of familial love, war, and the haunting accidental death of his cousin Aliya, Saleem's partner in the hesitant, tender exploration of sexuality. When the renewed relationship with his father erupts in a violent conflict, Saleem is forced to rediscover his sense of self and the hard-won stability of his life. Through Saleem's experiences and reflections, the fast-paced narrative carries the reader between Spain and Iraq to a surprising resolution.
