DESIGNOLOGY. A Designer is a Scientist who creates an Emotional Connection between a Brand and its Audiences Yasushi Kusume, 2016-10 Design is an essential element of business. It maximises the work of internal and external experts. It brings focus to foresight, ideas to innovation and expression to marketing. In short, it helps companies grow and prosper. Yet many businesses ignore the potential of design. They fail to make full use of the competences and skills designers have to offer. One reason for this is that there is no established academic science of design. This book takes steps to fill that gap by offering its own design science - a science called Designology. Designology should embrace a wide range of disciplines, from

neuroscience, psychology and sociology to anthropology, ethnology and behavioural science. This book, however, decides to focus on just two of these disciplines - neuroscience and psychology - to demonstrate that design is a science rather than an art, and that designers equipped with the knowledge they offer can provide a credible, expert and, above all, effective contribution to any business. Designology - the science of connecting a brand to its audience.

Heraclitus and Thales' Conceptual Scheme: A Historical Study Aryeh Finkelberg, 2017-02-06 In Heraclitus and Thales' Conceptual Scheme: A Historical Study Aryeh Finkelberg offers an alternative to the traditional teleological interpretation of early Greek thought. Instead of explaining it as targeted at later results, viz. philosophy, as this thought was first conceptualized by Aristotle and has been regarded ever since, the author seeks to determine its intended meaning by restoring it to its historical context as evinced, inter alia, by epigraphic and papyrological evidence, in particular the Gold Leaves, the Olbian bone plates, and the Derveni papyrus. This approach, together with a considerable amount of hitherto unidentified or largely disregarded evidence, yields a picture of early Greek thought significantly different from the traditional history of 'Presocratic philosophy'.

Post-Millennial Indian Speculative Fiction in English E. Dawson Varughese, 2025-03-20 Exploring expressions of 'Indianness' buried within and scattered across post-millennial Indian speculative fiction in English, this book asks questions around what it means to 'belong' to an India of 'now' and what it might mean to belong to multiple Indias of the (near) future. With dystopia, near-future, apocalyptic Indias and fantastical metropolises all imagined across this body of writing, *Post-Millennial Indian Speculative Fiction in English* traces economic, social and political transformations in post-2000 'New India' across these various narratives. Drawing on established notions of the speculative, Dawson Varughese argues for a recognized, post-millennial canon of Indian speculative writing in English which moves beyond Western-centric frames of reference, centring instead on Indian sensibilities, expressions of belonging to India and speculative 'Indian' futures. Organized around key tropes and characteristics of post-millennial Indian speculative fiction in English to date - urban infrastructures, citizenship, bodies and biotech, future (Indian) histories and climate catastrophes - it takes stock of a range of science fiction, fantasy, near-future and dystopian novels and short stories and offers critical insights into the writings of Samit Basu, Varun Thomas Mathew, Gautam Bhatia, Rimi B. Chatterjee, Prayaag Akbar and Anil Menon, alongside many others. *Post-millennial Indian Speculative Fiction in English* examines shifting ideas of what it means to belong to India and conceptions of India as a nation and pulls these ideas together, creating a workable framework of understanding for this nascent field as we move into the third decade of the millennium.

Earthly Bodies Vanessa Chakour,2024-09-24 Examining the cultural belief that our animal instincts are to be corrected or corralled, nature advocate and rewilding facilitator Vanessa Chakour explores our inner and outer landscapes through the lens of wild animals. How can wolves, misunderstood in myths but vital to ecosystems, teach us to rewrite dangerous stories and respect nature's wisdom? How do the peaceful coexistence strategies of black bears offer insights into sharing resources? How can the engineering feats of beavers guide us in fostering regenerative building solutions and vibrant ecosystems? What can the loyal partnership of seahorses teach us about nurturing and love? In Earthly Bodies, Vanessa draws parallels from struggles she has weathered in her own life to those endured by twenty-three wild animals—from wolves to sea lions—exploring our unease of feeling like prey; challenging the entrapment of our limiting beliefs; contextualizing the turmoil of fractured landscapes; and affirming our primal ache to belong. Vanessa's pivotal encounters with creatures in sync with their primal rhythms and demands illustrate the necessity of relying on the intelligence of gut instinct; of the magnetic pull of attraction; of the body's mandate for restorative rest; and of the sacred bonds of love. We often cut ourselves off from identifying with wild animals—like wolves, foxes, bats and bears, and other animal relatives—out of fear, ignorance, disgust, or misunderstanding, yet our earthly human bodies can lead us in our pursuits of pleasure, love, wonder, healing, and connection. With each section containing an aspect of injured animal's return home to their natural habitat, and—in our case—to an embodied, instinctual self, Earthly Bodies meditates on how this journey from enclosures, to rehabilitation, to soft release, and finally to homing raises questions about our humanity. In so learning, we understand how we might benefit from embracing our own animal nature to gain deeper self-actualization, find common ground with our fellow animals, and learn to thrive together.
