The Oxford Handbook of Nineteenth-century Christian Thought Joel D. S. Rasmussen, Judith E. Wolfe, Johannes Zachhuber, 2017 This Handbook considers Christian thought in the long nineteenth century (from the French Revolution to the First World War), encompassing not only doctrine and theology, but also Christianity's mutual influence on literature and the arts, political and economic thought, and the natural and social sciences.

New Dictionary of Theology Martin Davie, Tim Grass, Stephen R. Holmes, 2016 Since its first publication in 1988, the New Dictionary of Theology has been widely appreciated by students and readers as a trustworthy and informative guide. After almost thirty years, however, there are many new writers, issues and themes on the agenda, for theology does not stand still. Hence, this completely revised second edition includes over 400 new articles in the full set of over 800. Many of the original articles have been expanded and updated, and almost all have additional bibliographical references. Since material on biblical theology is now covered at length in IVP's New Dictionary of Biblical Theology, this volume is therefore more specifically a dictionary of historical and systematic theology. The New Dictionary of Theology: Historical and Systematic has an international team of contributors, and many are acknowledged experts in their fields. The Dictionary combines excellence in scholarship with a high standard of clarity and insight into current theological issues, yet it avoids being unduly technical. Students, teachers and ministers, as well as scholars and everyone seeking a better understanding of theology, will value it as an indispensable reference work. The volume is enhanced by a spacious and clear design, an extensive and easy-to-use cross-reference system and bibliographies which feature the best and most readily available works in English.

Evangelical Calvinism Myk Habets, Bobby Grow, 2012-06-08 In this exciting volume, new and emerging voices join senior Reformed scholars in presenting a coherent and impassioned articulation of Calvinism for today's world. Evangelical Calvinism represents a mood within current Reformed theology. The various contributors are in different ways articulating that mood, of which their very diversity is a significant element. In attempting to outline features of an Evangelical Calvinism, a number of the contributors compare and contrast this approach with that of Federal Calvinism currently dominant in North American Reformed theology, challenging the assumption that Federal Calvinism is the only possible expression of orthodox Reformed theology. This book does not, however, represent the arrival of a new Calvinism or even a neo-Calvinism, if by those terms are meant a novel reading of the Reformed faith. An Evangelical Calvinism highlights a Calvinistic tradition that

has developed particularly within Scotland, but is not unique to the Scots. The editors have picked up the baton passed on by John Calvin, Karl Barth, Thomas Torrance, and others, in order to offer the family of Reformed theologies a reinvigorated theological and spiritual ethos. This volume promises to set the agenda for Reformed-Calvinist discussion for some time to come.

Transcendence and Self-transcendence Merold Westphal, 2004 The question of the transcendence of God has traditionally been thought in terms of the difference between pantheism, which affirms that God is wholly within the world, and theism, which affirms that God is both within and outside the world, both immanent and transcendent. Against Heidegger's critique of onto-theology and the general postmodern concern for respecting and preserving the difference of the other, Merold Westphal seeks to rethink divine transcendence in relation to modes of human self-transcendence. Touching upon Spinoza, Hegel, Augustine, Pseudo-Dionysius, Aquinas, Barth, Kierkegaard, Levinas, Derrida, and Marion, Westphal's work centers around a critique of onto-theology, the importance of alterity, the decentered self, and the autonomous transcendental ego. Westphal's phenomenology of faith sets this book into the main currents of Continental philosophy of religion today.

The One Creator God in Thomas Aquinas and Contemporary Theology Michael J. Dodds, OP, 2020-08-21 This book provides a fundamental introduction to Aquinas's theology of the One Creator God. Aimed at making that thought accessible to contemporary audiences, it gives a basic explanation of his theology while showing its compatibility with contemporary science and its relevance to current theological issues. Opening with a brief account of Aquinas's life, it then describes the purpose and nature of the *Summa Theologica* and gives a short review of current varieties of Thomism. Without neglecting other works, it then focuses primarily on the discussion of the One God in the first part of the *Summa Theologica*. God's transcendence and immanence is a recurrent theme in that discussion. Evidence of God's immanent causality in the natural world grounds Aquinas's five arguments for the existence of God (the Five Ways) which then open onto God's transcendence. The subsequent discussion of the divine attributes builds on the modes of God's causality established in the Five Ways. It also shows the need for a language of analogy to preserve God's transcendence and prevent us from reducing God to the level of creatures, even as qualities such as goodness and love, which we first know from creatures, are applied to God. The discussion of God's providence and governance establishes that the transcendent Creator God is most intimately present in creation. God acts in all creatures in a way that does not diminish their proper causality, but is rather its source. As there is no contradiction between God's transcendence and immanence, so there is no competition between the primary causality of God and the secondary causality of creatures. Empirical science, which is limited by its method to the secondary causality of creatures, is shown to be compatible with the broader discipline of theology which also embraces the primary causality of the Creator.

Basic Christian Doctrine John H. Leith,1993-01-01 John Leith provides a brief but comprehensive statement of Christian faith for contemporary Christians. He considers the theologians of the ancient church and affirm the faith of the ancient creeds.

Kierkegaard and the Theology of the Nineteenth Century George Pattison,2012-11-15 This book situates Kierkegaard in the nineteenth-century debates which influenced him and discusses his relevance to contemporary Christian theology.

True Worshipers Bob Kauflin,2015 This book connects Sunday worship to the rest of our lives, walking readers through what it looks like to live as a true worshiper of God who has been transformed by the gospel of Jesus Christ.

Speech and Theology James K.A. Smith,2005-06-29 God is infinite, but language finite; thus speech would seem to condemn Him to finitude. In speaking of God, would the theologian violate divine transcendence by reducing God to immanence, or choose, rather, to remain silent? At stake in this argument is a core problem of the conditions of divine revelation. How, in terms of language and the limitations of human understanding, can transcendence ever be made known? Does its very appearance not undermine its transcendence, its condition of unknowability? Speech and Theology posits that the paradigm for the encounter between the material and the divine, or the immanent and transcendent, is found in the Incarnation: God's voluntary self-immersion in the human world as an expression of His love for His creation. By this key act of grace, hinged upon Christ's condescension to human finitude, philosophy acquires the means not simply to speak of perfection, which is to speak theologically, but to bridge the gap between word and thing in general sense.

Nouvelle Théologie and Sacramental Ontology Hans Boersma,2009-05-08 In the decades leading up to the Second Vatican Council, the movement of nouvelle théologie caused great controversy in the Catholic Church and remains a subject of vigorous scholarly debate today. In Nouvelle théologie and Sacramental Ontology Hans Boersma argues that a return to mystery was the movement's deepest motivation. Countering the modern intellectualism of the neo-Thomist establishment, the nouvelle theologians were convinced that a ressourcement of the Church Fathers and of medieval theology would point the way to a sacramental reintegration of nature and the supernatural. In the context of the loss suffered by both Catholics and Protestants in the de-sacramentalizing of modernity, Boersma shows how the sacramental ontology of nouvelle théologie offers a solid entry-point into ecumenical dialogue. The volume begins by setting the historical context for nouvelle théologie with discussions of the influence of significant theologians and philosophers like Möhler, Blondel, Maréchal, and Rousselot. The exposition then moves to the writings of key thinkers of the ressourcement movement including de Lubac, Bouillard, Balthasar, Chenu, Daniélou, Charlier, and Congar. Boersma analyses the most characteristic elements of the movement: its reintegration of nature and the supernatural, its reintroduction of the spiritual interpretation of Scripture, its approach to Tradition as organically developing in history, and its communion ecclesiology that regarded the Church as sacrament of Christ. In each of these areas, Boersma demonstrates how the nouvelle theologians advocated a return to mystery by means

of a sacramental ontology.

Encyclopedia of Sciences and Religions Anne Runehov, Lluís Oviedo, 2013-05-18 To all who love the God with a 1000 names and respect science” In the last quarter century, the academic field of Science and Theology (Religion) has attracted scholars from a wide variety of disciplines. The question is, which disciplines are attracted and what do these disciplines have to contribute to the debate? In order to answer this question, the encyclopedia maps the (self)-identified disciplines and religious traditions that participate or might come to participate in the Science and Religion debate. This is done by letting each representative of a discipline and tradition answer specific chosen questions. They also need to identify the discipline in relation to the Science and Religion debate. Understandably representatives of several disciplines and traditions answered in the negative to this question. Nevertheless, they can still be important for the debate; indeed, scholars and scientists who work in the field of Science and Theology (Religion) may need knowledge beyond their own specific discipline. Therefore the encyclopedia also includes what are called general entries. Such entries may explain specific theories, methods, and topics. The general aim is to provide a starting point for new lines of inquiry. It is an invitation for fresh perspectives on the possibilities for engagement between and across sciences (again which includes the social and human sciences) and religions and theology. This encyclopedia is a comprehensive reference work for scholars interested in the topic of ‘Science and Religion.’ It covers the widest spectrum possible of academic disciplines and religious traditions worldwide, with the intent of laying bare similarities and differences that naturally emerge within and across disciplines and religions today. The A-Z format throughout affords easy and user-friendly access to relevant information. Additionally, a systematic question-answer format across all Sciences and Religions entries affords efficient identification of specific points of agreement, conflict, and disinterest across and between sciences and religions. The extensive cross-referencing between key words, phrases, and technical language used in the entries facilitates easy searches. We trust that all of the entries have something of value for any interested reader. Anne L.C. Runehov and Lluís Oviedo

Rethinking Philosophy and Theology with Deleuze Brent Adkins, Paul R. Hinlicky, 2013-06-06 The debate between faith and reason has been a dominant feature of Western thought for more than two millennia. This book takes up the problem of the relation between philosophy and theology and proposes that this relation can be reconceived if both philosophy and theology are seen as different ways of organising affects. Brent Adkins and Paul R. Hinlicky break new ground in this timely debate in two ways. Firstly, they lay bare the contemporary dependence on Kant and propose that our Kantian inheritance leaves us with an insuperable dualism. Secondly, the authors argue that the philosophy of Gilles Deleuze provides a way of resolving the debate between faith and reason that does justice to philosophy and theology by reconceiving of both as assemblages. Deleuze's philosophy differentiates domains of thought in terms of what they create. This seems like a particularly fruitful way to pursue the problem of the relations among philosophy and theology because it allows their

distinction without at the same time placing them in opposition to one another.

A Secular Age Charles Taylor,2018-09-17 The place of religion in society has changed profoundly in the last few centuries, particularly in the West. In what will be a defining book for our time, Taylor takes up the question of what these changes mean, and what, precisely, happens when a society becomes one in which faith is only one human possibility among others.

An Architecture of Immanence Mark A. Torgerson,2007-01-22 Torgerson begins by discussing God's transcendence and immanence and showing how church architecture has traditionally interpreted these key concepts. He then traces the theological roots of immanence's priority from liberal theology and liturgical innovation to modern architecture. Next, Torgerson illustrates this new architecture of immanence through particular practitioners, focusing especially on the work of theologically savvy architect Edward Anders Sövik. Finally, he addresses the future of church architecture as congregations are buffeted by the twin forces of liturgical change and postmodernism.

Pagans and Christians in the City Steven D. Smith,2018-11-15 Traditionalist Christians who oppose same-sex marriage and other cultural developments in the United States wonder why they are being forced to bracket their beliefs in order to participate in public life. This situation is not new, says Steven D. Smith: Christians two thousand years ago faced very similar challenges. Picking up poet T. S. Eliot's World War II-era thesis that the future of the West would be determined by a contest between Christianity and "modern paganism," Smith argues in this book that today's culture wars can be seen as a reprise of the basic antagonism that pitted pagans against Christians in the Roman Empire. Smith's *Pagans and Christians in the City* looks at that historical conflict and explores how the same competing ideas continue to clash today. All of us, Smith shows, have much to learn by observing how patterns from ancient history are reemerging in today's most controversial issues.

Approaching God Patrick Masterson,2013-08-15 *Approaching God* explores the ways in which phenomenology, metaphysics and theological enquiry can throw light upon each other. This is a matter of great interest and importance to the future of philosophical theology and the philosophy of religion. What, if anything, has philosophical reflection about God to contribute to Christian theology? And if indeed philosophy plays a positive role in theological reflection-what kind of philosophy? The first-person philosophical perspective of phenomenology or the objective philosophical perspective of metaphysics? Masterson devotes three chapters to, respectively, phenomenological, metaphysical, and theological approaches to God. Each are seen as animated by a first principle from which a comprehensive account of everything is said to follow-'Human Consciousness' in the case of phenomenology; 'Being' in the case of metaphysics; and 'God' in the case of theology. Although philosophers and theologians such as Ricoeur, Levinas, Kearney, Caputo, and Barth are considered briefly, *Approaching God* essentially provides a dialogue about theological and theistic issues between the phenomenological

approach of the leading French Christian phenomenologist Jean-Luc Marion and the realist metaphysical approach of Aquinas. Masterson maintains that all three approaches are needed in trying to speak appropriately about God—they are irreducible but complementary.

Bantu Philosophy Placide Tempels, 1969

The Self-Emptying Subject Alex Dubilet, 2018-04-03 Against the two dominant ethical paradigms of continental philosophy—Emmanuel Levinas’s ethics of the Other and Michel Foucault’s ethics of self-cultivation—The Self-Emptying Subject theorizes an ethics of self-emptying, or kenosis, that reveals the immanence of an impersonal and dispossessed life “without a why.” Rather than aligning immanence with the enclosures of the subject, The Self-Emptying Subject engages the history of Christian mystical theology, modern philosophy, and contemporary theories of the subject to rethink immanence as what precedes and exceeds the very difference between the (human) self and the (divine) other, between the subject and transcendence. By arguing that transcendence operates and subjects life in secular no less than in religious domains, this book challenges the dominant distribution of concepts in contemporary theoretical discourse, which insists on associating transcendence exclusively with religion and theology and immanence exclusively with modern secularity and philosophy. The Self-Emptying Subject argues that it is important to resist framing the relationship between medieval theology and modern philosophy as a transition from the affirmation of divine transcendence to the establishment of autonomous subjects. Through an engagement with Meister Eckhart, G.W.F. Hegel, and Georges Bataille, it uncovers a medieval theological discourse that rejects the primacy of pious subjects and the transcendence of God (Eckhart); retrieves a modern philosophical discourse that critiques the creation of self-standing subjects through a speculative re-writing of the concepts of Christian theology (Hegel); and explores a discursive site that demonstrates the subjecting effects of transcendence across theological and philosophical operations and archives (Bataille). Taken together, these interpretations suggest that if we suspend the antagonistic relationship between theological and philosophical discourses, and decenter our periodizing assumptions and practices, we might encounter a yet unmapped theoretical fecundity of self-emptying that frees life from transcendent powers that incessantly subject it for their own ends.

Divine Transcendence and Immanence in the Work of Thomas Aquinas Harm J. M. J. Goris, 2009 The terms 'transcendence' and 'immanence' are often used casually and as self-evident. The spatial imagery contained in their meaning determines the way they are understood and used: as opposites, like 'there' and 'here'. As a consequence, the two concepts are seen as mutually exclusive when applied to God's being and to his activity and presence in our world and in our history. This view on the relationship between God and world is characteristic not only of deism and pantheism, but also of theism. However, in the view of Thomas Aquinas, such an opposition cannot adequately capture the central tenets of the Christian faith. This book explores Aquinas' thought on transcendence and immanence in his discussions of creation, analogy, the

Trinity, grace and Christ, and offers interpretations in which God's transcendence and his immanence do not exclude but imply one another. >br/>The papers contained in this volume were originally presented at the third international conference of the Thomas Instituut at Utrecht in 2005.

Kierkegaard and the Paradox of Religious Diversity George B. Connell, 2016 S ren Kierkegaard (1813-1855) famously critiqued Christendom -- especially the religious monoculture of his native Denmark. But what would he make of the dizzying diversity of religious life today? In this book George Connell uses Kierkegaard's thought to explore pressing questions that contemporary religious diversity poses. Connell unpacks an underlying tension in Kierkegaard, revealing both universalistic and particularistic tendencies in his thought. Kierkegaard's paradoxical vision of religious diversity, says Connell, allows for both respectful coexistence with people of different faiths and authentic commitment to one's own faith. Though Kierkegaard lived and wrote in a context very different from ours, this nuanced study shows that his searching reflections on religious faith remain highly relevant in our world today.
