Digital and Social Media Marketing Nripendra P. Rana,Emma L. Slade,Ganesh P. Sahu,Hatice Kizgin,Nitish Singh,Bidit Dey,Anabel Gutierrez,Yogesh K. Dwivedi,2019-11-11 This book examines issues and implications of digital and social media

marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

Energy Drinks John Higgins, Joshua D. Hahn, 2025-03-14 After reports of adverse events associated with energy drink consumption, including trouble sleeping, anxiety, cardiovascular events, seizures, and even death, concerns have been raised about their safety and efficacy. Energy Drinks: Composition, Consumption, and Cautions will focus on these popular beverages, their composition, ingredients, consumption patterns, performance-enhancing effects, and their potential negative side effects and health risks. This book will go on to make recommendations that call for education, regulatory actions, changes in marketing, and additional research. The research about energy drink safety and efficacy is often contradictory, and much of the available literature is industry sponsored. This book will offer a single, unbiased, up-to-date resource for researchers, healthcare providers, and industry regulators to understand the full scope of energy drinks and their associated

health risks. - Covers the composition, varieties, and ingredients of energy drinks - Details the performance-enhancing effects, as well as the adverse effects associated with energy drinks - Educates readers on safe consumption and makes safety recommendations for beverage producers and government regulators

Intelligent Systems, Business, and Innovation Research Rim El Khoury, Nohade Nasrallah, 2024-01-25 Intelligent systems research is a multidisciplinary field that focuses on the development of systems that can perceive, reason, and act autonomously. This can include areas such as machine learning, artificial intelligence, natural language processing, and robotics. The goal of intelligent systems research is to develop systems that can understand, learn from, and adapt to their environment, to perform tasks that would typically require human intelligence. Business and innovation research is an interdisciplinary field that examines how organizations can create, develop, and implement new ideas, products, and services. This can include areas such as organizational behaviour, strategic management, and marketing. The goal of business and innovation research is to understand how organizations can foster an environment that encourages creativity and innovation, and how they can develop and implement new ideas in a way that leads to success. Intelligent Systems, Business and Innovation Research is a research area that brings together these two fields to study the use of intelligent systems and technologies in the business context to drive innovation, improve operational efficiency and effectiveness of the organization. The book aims to understand how intelligent systems can be used in business applications, how to design and implement them, how to manage the associated challenges, and how to leverage them to foster innovation, create new business models, and gain competitive advantage. It offers guidance on how to navigate potential conflicts and challenges that may arise during multidisciplinary research in areas such as Industry 4.0, Internet of Things, modern machine learning, software agent applications, and data science. The book focuses on the various fields in which intelligent systems play a critical role in enabling the development of advanced technologies that can perform tasks that would typically require human intelligence. For example, in smart/control systems, intelligent algorithms can be used to optimize the performance of machines and devices, while in cyber security, they can be used to protect networks and data from cyber-attacks. In bioinformatics, intelligent systems can be used to analyse large amounts of biological data, while in virtual reality and robotics, they can be used to create realistic and responsive simulations and automatons. Additionally, the book also highlights the rapidly advancing theoretical foundations of fuzzy sets, mathematical logic, and non-classical logic. These are important theoretical frameworks for the development of intelligent systems, as they provide the foundation for the representation and manipulation of uncertainty, complexity, and imprecision. These theoretical foundations are essential in the development of intelligent systems that can make decisions and perform tasks in uncertain, complex, and dynamic environments.

Healthcare Mario Glowik, Slawomir Smyczek, 2015-05-19 Emerging challenges related to socio-demographics and

economics require new approaches for academics, politicians, hospital management, clinical staff, public institutions, and firms doing business in the healthcare industries. management, the book is a must-have for practising managers who want to stay abreast with the latest developments in their field.

A Practical Guide to Financial Services Lien Luu,Jonquil Lowe,Patrick Ring,Amandeep Sahota,2021-12-27 Financial services are an ever increasing part of the infrastructure of everyday life. From banking to credit, insurance to investment and mortgages to advice, we all consume financial services, and many millions globally work in the sector. Moreover, the way we consume them is changing with the growing dominance of fintech and Big Data. Yet, the part of financial services that we engage with as consumers is just the tip of a vast network of markets, institutions and regulators - and fraudsters too. Many books about financial services are designed to serve corporate finance education, focusing on capital structures, maximising shareholder value, regulatory compliance and other business-oriented topics. *A Practical Guide to Financial Services: Knowledge, Opportunities and Inclusion* is different: it swings the perspective towards the end-user, the customer, the essential but often overlooked participant without whom retail financial services markets would not exist. While still introducing all the key areas of financial services, it explores how the sector serves or sometimes fails to serve consumers, why consumers need protection in some areas and what form that protection takes, and how consumers can best navigate the risks and uncertainties that are inherent in financial products and services. For consumers, a greater understanding of how the financial system works is a prerequisite of ensuring that the system works for their benefit. For students of financial services - those aspiring to or those already working in the sector - understanding the consumer perspective is an essential part of becoming an effective, holistically informed and ethical member of the financial services community. *A Practical Guide to Financial Services: Knowledge, Opportunities and Inclusion* will equip you for both these roles. The editors and authors of *A Practical Guide to Financial Services: Knowledge, Opportunities and Inclusion* combine a wealth of financial services, educational and consumer-oriented practitioner experience.

Analysis and Evaluation of the Eurex Repo Market Model Monika Gruber,2005-01-19 Inhaltsangabe:Abstract: The first cross-border merger of exchanges in Europe, in 1999, happened even across the borders of the EU when the national derivatives markets of Germany and Switzerland created Eurex. In 2000, Euronext, the second big merger project, became reality. The Exchanges of Amsterdam, Paris and Brussels created a new joint platform with corporate structure. Norex, Virt-X, Newex are further merger projects. During the last decade, not only the institutional framework of exchanges has changed, but also the popularity of different products that are traded on the new platforms. Currently the derivatives market, in particular the trading with repurchase agreements, experiences major growth in Europe as well as in the U.S. The Eurex Repo platform observes a steady increase of outstanding volume, due to the fact that Eurex Repo is the only electronic market that offers repo transactions with the shortest possible term of just one night (overnight repo transaction). The goal of this paper is to analyse and to critically assess the Eurex Repo market model mentioned above, which is currently treated

as the most efficient and successful trading platform for derivatives, with a specific focus on repurchase agreements. Chapter 2 aims to give answers to the following questions: What is a repurchase agreement? Which are the characteristics of repo markets in general? Which risks are associated with repos and how does the pricing of repos work? Which other instruments for liquidity management do exist for banks? The purpose of Chapter 3 is to give an overview of the derivatives market in general, past business methods, the intermediating role of banks and exchanges, and the dynamic development of the derivatives market. In addition, the Eurex market model will be described, as well as competing market players in Europe and the U.S. In Chapter 4, the main focus is put on the examination and evaluation of the Eurex Repo market model in order to investigate the key drivers in this model. Considering Eurex expansion to the U.S., where the originally European exchange is competing with the major North American exchange CBoT since February 2004, and the advance of Eurex main competitor Euronext, the future perspectives for the Eurex Repo market model will be explored. This book addresses nanotechnology risk management.

The Extinction Market Vanda Felbab Brown,2017-11-15 The planet is currently experiencing alarming levels of species loss caused in large part by intensified poaching and wildlife trafficking driven by expanding demand, for medicines, for food, and for trophies. Affecting many more species than just the iconic elephants, rhinos, and tigers, the rate of extinction is now as much as 1000 times the historical average and the worst since the dinosaurs died out 65 million years ago. In addition to causing irretrievable biodiversity loss, wildlife trafficking also poses serious threats to public health, potentially triggering a global pandemic. The Extinction Market explores the causes, means, and consequences of poaching and wildlife trafficking, with a view to finding ways of suppressing them. Vanda Felbab-Brown travelled to the markets of Latin America, South and South East Asia, and eastern and southern Africa, to evaluate the effectiveness of various tools, including bans on legal trade, law enforcement, and interdiction; allowing legal supply from hunting or farming; alternative livelihoods; anti- money-

laundering efforts; and demand reduction strategies. This is an urgent book offering meaningful solutions to one of the world's most pressing crises.

Product Lifecycle Management for a Global Market Shuichi Fukuda, Alain Bernard, Balan Gurumoorthy, Abdelaziz Bouras, 2014-12-17 This book constitutes the refereed post-proceedings of the 11th IFIP WG 5.1 International Conference on Product Lifecycle Management, PLM 2014, held in Yokohama, Japan, in July 2014. The 51 full papers presented were carefully reviewed and selected from 77 submissions. They are organized in the following topical sections: BIM operations, maintenance, and renovation; BIM concepts and lifecycle management; design and education; naval engineering and shipbuilding; aeronautical and automotive engineering; industry and consumer products; interoperability, integration, configuration, systems engineering; change management and maturity; knowledge engineering; knowledge management; service and manufacturing; and new PLM.

Intellectual Property, Market Power and the Public Interest Inge Govaere, Hanns Ullrich, 2008 The main objective of the contributions to this book is to bring together two seemingly different strands of thought: the competition-law analysis of the exercise of intellectual property, and the discussion about the proper limits of protection, which at present takes place inside the intellectual property community. Both are burdened with their own problems, particularly so in Europe, where market integration and the divide between exclusionary and exploitative abuses ask for a more dimensional approach, and where the shaping of intellectual property protection is under not only the influence of many interests and policies, but a multi-level exercise of the Community and its member states. The question is whether, nevertheless, there is a common concern, or whether the frequently asserted convergence of the operation and of the goals of competition law and intellectual property law does not mask a fundamental difference - namely that of, on the one hand, protecting freedom of competition against welfare-reducing restrictions of competition only, and, on the other, limiting the protection of exclusive rights in the (public) interest of maintaining free access to general knowledge. The purpose of the workshop held in 2007 at the College of Europe, Bruges, and whose results are published here, was to ask which role market power plays in either context, which role it may legitimately play, and which role it ought not to play. A tentative answer might be found in the general principle that, just as intellectual property does not enjoy a particular status under competition law, so competition law may not come as a white knight to rescue intellectual property protection from itself. However, the meaning of that principle differs according to both the context of the acquisition and the exploitation of intellectual property, and it differs from one area of intellectual property to the other. Therefore, an attempt has also been made to cover more facets of the prism-like complex of problems than is generally done.

Services Marketing: People, Technology, Strategy (Ninth Edition) Jochen Wirtz, Christopher Lovelock, 2021-10-15 Services Marketing: People, Technology, Strategy is the ninth edition of the globally leading textbook for Services Marketing

by Jochen Wirtz and Christopher Lovelock, extensively updated to feature the latest academic research, industry trends, and technology, social media, and case examples. It features cases and examples from all over the world and is suitable for students who want to gain a wider managerial view.

Competition Law in the EU Johan W. van de Gronden, Catalin S. Rusu, 2024-05-02 This thoroughly revised and updated second edition provides an enhanced understanding of EU competition law, exploring significant substantive and enforcement issues relating to antitrust, merger control, the Digital Markets Act and state aid law. While considering well-established doctrines and landmark judgements, the textbook also addresses recent developments such as digitalisation, sustainability and globalisation, and how these issues will influence future inquiry into competition law.

Cross-Cultural Destination Image Assessment: Cultural Segmentation Versus the Global Tourist Wassim El Kadhi, 2009-03 Various scholars consider destination image - a vital part in tourism marketing- as the key in attracting tourists. It is often regarded, as the most important element in a destination's management and may induce success or failure. Within this research project, destination image is being assessed in cross-cultural terms. It scrutinises the extent to which destination image is culture specific. In other words, does a destination's image vary across people from different cultural backgrounds? This question evolves and is vindicated in an era that is subjected to globalisation and increasingly refers to the global tourist. Many academics are convinced that the world tourism market may be treated as a homogenous one due to globalisation. However, the literature also provides some opposing bearings and discusses them. Hence, the author of this book intended to investigate this issue in more depth in order to find a probable answer to the contradicting sources by conducting an exploratory study of Arab-Islamic and Protestant European youth's pre-visitation image on Berlin. In response to the objectives of this study, primary research was carried out. It involved both quantitative and qualitative data collection methods. Field and online surveys enabled the researcher to collect 239 completed questionnaires. Besides semi-structured interviews and focus group discussions were carried out. Obtained data was entered into SPSS and frequencies and means were calculated and several ANOVA tests and cross-tabulations conducted in order to stress destination image's specificity in terms of cultural background. This book further gives information on Berlin as a tourist destination, addresses destination image concerning influential cultural factors and the implications of globalisation on consumer behaviour. Finally, it studies the Arab-Islamic and Protestant European youth cultures in the light of globalisation and potential modifying effects. It also provides recommendations

China's Trade Policy in Latin America Dorotea López, Guoyou Song, Andrés Bórquez, Felipe Muñoz, 2022-06-30 This book examines China's trade insertion strategy in Latin America. Divided into five parts, the book features scholars from China, Chile, Costa Rica, Peru, and Mexico who present the main actors and dynamics around China's trade policy in the region in

twelve carefully selected contributions, with qualitative and quantitative case studies. Highlighting China's important trade presence in Latin America after joining the World Trade Organization (WTO), the book analyzes the effects of free trade agreements China signed with three countries in the region - Chile (2005), Peru (2010), and Costa Rica (2011) - as well as specific preferential agreements with other countries from Latin America. While the first part of this book reviews China and Latin America trade policies, the second part explores China's view of Latin America. In a third part of the book, the contributions provide a deeper look into the trade relations between China and the countries of Peru, Costa Rica, Mexico, and the United States. The fourth part of the volume focuses on the emerging trade agenda between the two regions. Finally, the fifth part of the book discusses the trade challenges between China and Latin American and Caribbean countries. The book will appeal to scholars of international relations, economics, and political science, as well as policy-makers interested in a Chinese and Latin American perspective on trade policy in general, and on China's trade policy in the region in particular.
