Current Issues in Economic Integration M. Bruna Zolin, 2016-05-13 The current economic crisis has called into question the long term viability of the decoupling between multinational firms and the banking system. It has also cast serious doubts on the US dollar-centred monetary system, and invited reassessment of the long term viability of US-China economic relations based on a US current account deficit absorbed by Chinese financial institutions. It is also an opportunity to analyse the rise in property prices, particularly in fast-growing economies. Long term food security is also an issue, bringing to the fore the multinational firms from emerging economies (such as China and India) and calling into question the response strategies of multinational firms from the West and Japan. This book engages these key issues within the broad theme of integration, to give an up-to-date consideration of the subject, opening debate on the future stimulating role that Asia could play vis-à-vis the West, particularly the European Union.

Solidarity Economy: Building Alternatives for People and Planet Jenna Allard, Carl Davidson, 2008 The emergence of the global grassroots economic structural reform movement known as the Solidarity Economy. This book contains the core papers, discussion and debates on the topic at the U.S. Social Forum of 10,000 people in Atlanta in the summer of 2007.

The Language of The Land: Mastering English in Agriculture - Jejak Pustaka Adi Mursalin, Pertanian adalah tulang punggung ekonomi banyak negara di seluruh dunia, dan bahasa Inggris telah menjadi bahasa universal dalam komunikasi global. Atas dasar tersebut, buku ini hadir sebagai panduan bagi siapa saja yang berkecimpung di bidang pertanian dan ingin memperkuat kemampuan berbahasa Inggris mereka. Tentu saja buku ini penting untuk dibaca karena memahami dan mampu menggunakan bahasa Inggris dalam konteks pertanian, bukan hanya sekedar keuntungan, tetapi tak jarang adalah sebuah kebutuhan.

The Economics and Law of Public Procurement Annalisa Castelli, Gustavo Piga, Tünde Tátrai, 2024-12-11 Public procurement makes up a significant part of national economies: 10-25% of gross domestic product (GDP), depending on the country. Appropriate laws and regulations are an essential tool to direct the action of procurers towards the public good and avoid corruption and misallocation of resources, while at the same time sustaining progress and social goals. The original approach of this book combines juridical, economic, and technical expertise to find common terrain and a common language

in order to debate the specific issues that affect public administrations across the world that need advancing and modernizing. The book features contributions across four specific themes of interest to the procurer's day-to-day job in modern public purchasing organizations: preferences and political economy in public procurement, climate change, defence procurement, and human rights in public procurement. The aim is to let the new emerging trade-offs between competition and sustainability emerge, highlighting at the same time the possible synergies between the relevant policy objectives. The book takes into account sectoral specificities, reinforced by recent global events such as wars, natural disasters, and populism. The unique format features in each section an interdisciplinary debate between two experts across different disciplines who deliberate and engage one another so as to improve the mutual understanding across disciplines, followed by two additional contributions. This book will be of interest to scholars, researchers, and policymakers worldwide.

Managing Strategic Design Ray Holland, Busayawan Lam, 2014-11-20 This core textbook emphasizes the power of design management to drive corporate strategic goals, showing how design strategies can be thoughtfully formulated and managed to improve the performance of organizations. Taking an engaging and accessible approach, this book will help design students and graduates to apply new concepts of design management in their works and to use design strategically to achieve organizational visions and targets. Throughout the book's tripartite structure - comprising an introduction to the topic, followed by sections on how strategic design can be used to support key businesses functions and how it can be used to push organisations forward - a strong link is made between design and marketing and the delivery of design-led branding. This textbook is essential for upper level undergraduate and postgraduate students studying design management on art and design degrees. It also caters for practitioners and specialist elective modules offered on business and management, and marketing and entrepreneurship courses in business schools.

Building the Knowledge Economy Paul M. Cunningham, Miriam Cunningham, Peter Fatelnig, 2003 The importance of the Internet and information and communication technologies to the global economy has never been greater. This volume aims to facilitate knowledge sharing relevant to everyone, irrespective of background, thematic or geographic focus.

North and South in the World Political Economy Rafael Reuveny, William R. Thompson, 2009-02-26 A broad yet distinctive analysis of the growing political, economic, and social gap existing between the world's northern and southern hemispheres. Featuring papers selected by the ISA President from the 2006 annual meeting, this upper-level volume examines the genesis of the North-South divide, the ongoing policy problems between developed and lesser developed states, and how these issues influence current and future world politics. An upper-level text ideal for academic libraries, think tanks, and libraries of policy institutions Organized into three distinct focus clusters: Problems afflicting the global South -- trade, development, financial crises, structural adjustment, democratization, human rights, disease; Specific conflicts between North and South -- energy, terrorism, weak states, nuclear weapon proliferation; Solutions to reduce the North-South gap --

foreign aid programs, global media, democratization, political power in the United Nations, the emerging powers phenomenon, transnational social movements, and Northern foreign policy adjustments Tackles the tough questions likely to dominate international relations discourse for decades to come

Enterprising Initiatives in the Experience Economy Britta Timm Knudsen, Dorthe Refslund Christensen, Per Blenker, 2014-09-19 Over the last decade, the close relationship between culture and economy - or the experience economy - has risen on the agenda. Although there is an established research field for analysing the economic impact of entrepreneurship, there is currently a limited amount of research that analyses the cultural impact and opportunity of entrepreneurship. Linking experience economy with enterprising behavior moves the term away from businesses' competitiveness and consumer behavior towards a more value-focused business in general. This ground-breaking book integrates entrepreneurship and empowerment into one central theme, drawing on research from both the social sciences (innovation, entrepreneurship, empowerment and activism) and the humanities (participatory culture, user-generated designs, creative networks). Enterprising Initiatives expands the definition of entrepreneurship beyond a primarily economic profit-seeking phenomenon to a broader understanding of enterprising behaviour based on an individual-opportunity nexus. Beyond social entrepreneurship, it explores a broad range of individual, collective and cooperative citizen initiatives under the umbrella of enterprising action. This innovative approach will be of great interest to scholars in entrepreneurship, social entrepreneurship, cultural entrepreneurship, cultural studies, and consumer culture, as well as for policy makers in public and local government, regional development and cultural event management.

Asia Pacific Economic Cooperation (APEC) Ippei Yamazawa, 2003-09-02 This book provides the most up-to-date and comprehensive account of the APEC (Asia Pacific Economic Cooperation) organisation and examines the challenges APEC now faces in the new century. Subjects covered include: * the history of APEC * APEC and the latest WTO round * case-studies of countries in the region including China, Japan, Malaysia, Korea and Taiwan * APECs approach to competition and deregulation policy * assessment of APECs standing as an international institution Featuring contributions from distinguished groups of international academic experts, this book is essential reading for all those interested in political and economic developments in the Asia-Pacific.

The Postcolonial Age of Migration Ranabir Samaddar, 2020-05-11 This book critically examines the question of migration that appears at the intersection of global neo-liberal transformation, postcolonial politics, and economy. It analyses the specific ways in which colonial relations are produced and reproduced in global migratory flows and their consequences for labour, human rights, and social justice. The postcolonial age of migration not only indicates a geopolitical and geo-economic division of the globe between countries of the North and those of the South marked by massive and mixed population flows from the latter to the former, but also the production of these relations within and among the countries of

the North. The book discusses issues such as transborder flows among countries of the South; migratory movements of the internally displaced; growing statelessness leading to forced migration; border violence; refugees of partitions; customary and local practices of care and protection; population policies and migration management (both emigration and immigration); the protracted nature of displacement; labour flows and immigrant labour; and the relationships between globalisation, nationalism, citizenship, and migration in postcolonial regions. It also traces colonial and postcolonial histories of migration and justice to bear on the present understanding of local experiences of migration as well as global social transformations while highlighting the limits of the fundamental tenets of humanitarianism (protection, assistance, security, responsibility), which impact the political and economic rights of vast sections of moving populations. Topical and an important intervention in contemporary global migration and refugee studies, the book offers new sources, interpretations, and analyses in understanding postcolonial migration. It will be useful to scholars and researchers of migration studies, refugee studies, border studies, political studies, political sociology, international relations, human rights and law, human geography, international politics, and political economy. It will also interest policymakers, legal practitioners, nongovernmental organisations, and activists.

The Rise of the Joyful Economy Michael Hutter, 2015-03-24 This book argues for the increasing importance of the arts as a major resource in fuelling growth through the experiential dimension of today's economy. As we move from the knowledge economy to a new stage called the joyful economy, consumers shift their spending from physical objects and technical know-how to experiences of joy and disappointment. This book investigates how artistic ideas are translated into successful commercial production, and how economic growth impacts artistic invention. It examines cases of successful innovation in the creative industries ranging from the Italian Renaissance to the present. The book suggests a framework where social players move in diverse worlds of value, which leads to a stream of controversies and manias that result in the establishment of new joy products. Studies include the effect of linear perspective, as pioneered by Filippo Brunelleschi, the discovery of taste as an argument for consumption, the serial production of Pop Art and the self-commercialization of contemporary works by artists like Takashi Murakami. This theoretical and empirical study brings together the fields of cultural economics, economic sociology, management studies and cultural history. In doing so, it offers a fascinating study of how creativity has shaped and fuelled commerce.

Exploring Civic Innovation for Social and Economic Transformation Kees Biekart, Wendy Harcourt, Peter Knorrinda, 2016-05-12 This edited collection examines the globally rising phenomenon of civic innovation. Combining nuanced theory with rich empirical examples, this book defines the dynamic and complex process of civic innovation as the multiple economic, political and social processes where peoples, organizations, movements and ideas are shaping struggles for global justice on the interface of capitalism. *Exploring Civic Innovation for Social and Economic Transformation* reflects

the increasingly holistic approach to development in terms of both teaching and research, and illustrates how civic innovation happens everywhere; at the global and institutional level as well as in communities and for individuals. Through conceptual debate and narrative accounts, this book explores the new practices emerging from varying economies, transformative empowerment strategies in global value chains, local politics of social movements and the struggles for rights in regards to race, gender and sexuality. Bringing together scholars from a range of disciplines, this book would be of interest to post-graduate students of development studies, with an interest in social research.

Competitiveness, Social Responsibility and Economic Growth Janez Prašnikar,2006 Globalisation of the economy have confronted Europe with a question of what are its real competitive capabilities, sustainability of its economy and of the values of typical Europeans. The famous Lisbon Strategy has been an attempt to answer this by creating the knowledge economy. This book analyses the Lisbon Strategy from various perspectives.

Co-operatives in a Global Economy J. J. McMurtry,Darryl Reed,2008-12-18 In their efforts to internationalize in the emerging global economy, co-operatives not only face a variety of problems that are common to all firms, but encounter specific challenges due to their particular value commitments, forms of incorporation and organizational structures. These features of cooperatives are generally seen as a major source of competitive disadvantages and may cause significant trade-offs, forcing cooperatives to choose between living up to their principles of member ownership and control and remaining economically viable. Critics argue that such trade-offs signal the increasing irrelevance of cooperatives in a global economy. Advocates, however, counter that cooperatives may have unique competitive advantages which can be exploited in a global economy and that current trade-offs facing cooperatives can be overcome with the development of new international and transnational cooperative institutions and practices. Cooperatives, they claim, represent a much more sustainable and equitable form of production and may form the basis for viable, alternative approaches to development. This collection examines these debates about the roles of cooperatives in our increasingly global economy.

Maritime Economics Martin Stopford,2013-04-15 Now in its second edition *Maritime Economics* provides a valuable introduction to the organisation and workings of the global shipping industry. The author outlines the economic theory as well as many of the operational practicalities involved. Extensively revised for the new edition, the book has many clear illustrations and tables. Topics covered include: * an overview of international trade * Maritime Law * economic organisation and principles * financing ships and shipping companies * market research and forecasting.

Creativity and the Global Knowledge Economy Michael A. Peters,Simon Marginson,Peter Murphy,2009 This is a major work by three international scholars at the cutting edge of new research that investigates the emerging set of complex

relationships between creativity, design, research, higher education and knowledge capitalism. It highlights the role of the creative and expressive arts, of performance, of aesthetics in general, and the significant role of design as an underlying infrastructure for the creative economy. This book tracks the most recent mutation of these serial shifts - from postindustrial economy to the information economy to the digital economy to the knowledge economy to the 'creative economy' - to summarize the underlying and essential trends in knowledge capitalism and to investigate post-market notions of open source public space. The book hypothesizes that creative economy might constitute an enlargement of its predecessors that not only democratizes creativity and relativizes intellectual property law, but also emphasizes the social conditions of creative work. It documents how these profound shifts have brought to the forefront forms of knowledge production based on the commons and driven by ideas, not profitability per se; and have given rise to the notion of not just 'knowledge management' but the design of 'creative institutions' embodying new patterns of work.

Innovation in the High-Tech Economy Pang Chuan, Vasil Khachidze, Ivan K.W. Lai, Yide Liu, Sohail Siddiqui, Tim Wang, 2014-01-03 This book constitutes the proceedings of the First International Conference on Management Science and Engineering: Innovation and High-tech Services, ICMSE 2013, held in Macau, in June 2013. The papers are contributed by innovative researchers, engineers and practitioners in the field of management science, information system, finance, economics and accounting and offer a platform for exchanging the latest research findings in the field of management science and management innovation, for looking forward to the future trends in the management science and management innovation field in the 21st century, and to promote management modernization and high-tech innovation services.
