The Perfect Score Project Debbie Stier, 2014-02-25 The Perfect Score Project is an indispensable guide to acing the SAT – as well as the affecting story of a single mom’s quest to light a fire under her teenage son. It all began as an attempt by Debbie Stier to help her high-school age son, Ethan, who would shortly be studying for the SAT. Aware that Ethan was a typical teenager (i.e., completely uninterested in any test) and that a mind-boggling menu of test-prep options existed, she decided – on his behalf -- to sample as many as she could to create the perfect SAT test-prep recipe. Debbie’s quest turned out to be an exercise in both hilarity and heartbreak as she took the SAT seven times in one year and in-between “went to school” on standardized testing. Here, she reveals why the SAT has become so important, the cottage industries it has spawned, what really works in preparing for the test and what is a waste of time. Both a toolbox of fresh tips and an amusing snapshot of parental love and wisdom colliding with teenage apathy, *The Perfect Score Project* rivets. In the book Debbie does it all: wrestles with Kaplan and Princeton Review, enrolls in Kumon, navigates khanacademy.org, meets regularly with a premier grammar coach, takes a battery of intelligence tests, and even cadges free lessons from the world’s most prestigious (and expensive) test prep company. Along the way she answers the questions that plague every test-prep rookie, including: “When do I start?” ... “Do the brand-name test prep services really deliver?” ... “Which should I go with: a tutor, an SAT class, or self study?” ... “Does test location really matter?” ... “How do I find the right tutor?” ... “How do SAT scores affect merit aid?” ... and “What’s the one thing I need to know?” *The Perfect Score Project’s* combination of charm, authority, and unexpected poignancy makes it one of the most compulsively readable guides to SAT test prep ever – and a book that will make you think hard about what really matters.

Assessing Competence in Professional Performance across Disciplines and Professions Paul F. Wimmers,Marcia Mentkowski,2016-04-19 This book examines the challenges of cross-professional comparisons and proposes new forms of performance assessment to be used in professions education. It addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of “performance assessment for learning” to the next level. In order to be better equipped to cope with increasing complexity, change and diversity in professional education and performance assessment, administrators and educators will engage in crucial systems thinking. The main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels. To answer this question, the book identifies unresolved issues and clarifies conceptual elements for performance assessment. It reviews the development of constructs that cross disciplines and professions such as critical thinking, clinical reasoning, and problem solving. It discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts, but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes. Finally, the book examines what it takes for administrators and educators to develop competence in assessment, such as reliably judging student work in relation to criteria from multiple sources. ... the co-editors of this volume, Marcia Mentkowski and Paul F. Wimmers, are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process ... U.S. Education Reform and National Security Joel I. Klein,Condoleezza Rice,2014-05-14 The United States' failure to educate its students leaves them unprepared to compete and threatens the country's ability to thrive in a global economy and

maintain its leadership role. This report notes that while the United States invests more in K-12 public education than many other developed countries, its students are ill prepared to compete with their global peers. According to the results of the 2009 Program for International Student Assessment (PISA), an international assessment that measures the performance of 15-year-olds in reading, mathematics, and science every three years, U.S. students rank fourteenth in reading, twenty-fifth in math, and seventeenth in science compared to students in other industrialized countries. The lack of preparedness poses threats on five national security fronts: economic growth and competitiveness, physical safety, intellectual property, U.S. global awareness, and U.S. unity and cohesion, says the report. Too many young people are not employable in an increasingly high-skilled and global economy, and too many are not qualified to join the military because they are physically unfit, have criminal records, or have an inadequate level of education. The report proposes three overarching policy recommendations: implement educational expectations and assessments in subjects vital to protecting national security; make structural changes to provide students with good choices; and, launch a national security readiness audit to hold schools and policymakers accountable for results and to raise public awareness.

Opportunities for Improving Programs and Services for Children with Disabilities National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Improving Health Outcomes for Children with Disabilities, 2018-08-06 Although the general public in the United States assumes children to be generally healthy and thriving, a substantial and growing number of children have at least one chronic health condition. Many of these conditions are associated with disabilities and interfere regularly with children's usual activities, such as play or leisure activities, attending school, and engaging in family or community activities. In their most severe forms, such disorders are serious lifelong threats to children's social, emotional well-being and quality of life, and anticipated adult outcomes such as for employment or independent living. However, pinpointing the prevalence of disability among children in the U.S. is difficult, as conceptual frameworks and definitions of disability vary among federal programs that provide services to this population and national surveys, the two primary sources for prevalence data. Opportunities for Improving Programs and Services for Children with Disabilities provides a comprehensive analysis of health outcomes for school-aged children with disabilities. This report reviews and assesses programs, services, and supports available to these children and their families. It also describes overarching program, service, and treatment goals; examines outreach efforts and utilization rates; identifies what outcomes are measured and how they are reported; and describes what is known about the effectiveness of these programs and services.

Educational Goods Harry Brighouse, Helen F. Ladd, Susanna Loeb, Adam Swift, 2018-01-24 This book, jointly authored by two distinguished philosophers and two prominent social scientists, has an ambitious aim: to improve decision-making in education policy. First they dive into the goals of education policy and explain the terms educational goods and childhood goods, adding precision and clarity to the discussion of the distributive values that are essential for good decision-making about education. Then they provide a framework for individual decision-makers that enables them to combine values and evidence in the evaluation of educational policy options. Finally they delve into the particular policy issues of school finance, school accountability, and school choice, and they show how decision makers might approach them in the light of this decision-making framework. The authors are not advocating particular policy choices, however. The focus instead is a smart framework that will make it easier for policymakers (and readers) to identify and think through what they disagree with others about.

The African-American Experience in the Civilian Conservation Corps Olen Cole, 1999 BETWEEN 1933 and 1942, nearly 200,000 young African-Americans participated in the Civilian Conservation Corps (CCC), one of Franklin D. Roosevelt's most successful New Deal agencies. In an effort to correct the lack of historical attention paid to the African-American contribution to the CCC, Olen Cole, Jr., examines their participation in the Corps as well as its impact on them. Though federal legislation establishing the CCC held that no bias of race, color, or creed was to be tolerated, Cole demonstrates that the very presence of African-Americans in the CCC, as well as the placement of the segregated CCC work camps in predominantly white California communities, became significant sources of controversy. Cole assesses community resistance to all-black camps, as well as the conditions of the state park camps, national forest camps, and national park camps where African-American work companies in California were stationed. He also evaluates the educational and recreational experiences of African-American CCC participants, their efforts to combat racism, and their contributions to the protection and maintenance of California's national forests and parks. Perhaps most important, Cole's use of oral histories gives voice to individual experiences: former Corps members discuss the benefits of employment, vocational training, and character development as well as their experiences of community reaction to all-black CCC camps. An important and much neglected chapter in

American history, Cole's study should interest students of New Deal politics, state and national park history, and the African-American experience in the twentieth century.
