Rethinking education: towards a global common good? UNESCO,2015-05-26 Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world. Unsustainable patterns of economic production and consumption promote global warming, environmental degradation and an upsurge in natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future. It proposes that we consider education and knowledge as global common goods, in order to reconcile the purpose and organization of education as a collective societal endeavour in a complex world.

The Psychology Of The Child Jean Piaget,Barbel Inhelder,2019-04-23 The definite account of psychologist Jean Piaget's work Jean Piaget's influence on psychology has been profound. His pathbreaking investigations and theories of cognitive development have set child psychology moving in entirely new directions. His bold speculations have provided the inspiration for the work of others. His studies have been the subject of many books and countless articles. And, significantly, his influence has spread to other disciplines and is having an ever-growing impact on the general culture at large. Here Jean Piaget, with the assistance of his long-time collaborator Bâel Inhelder, offers a definitive presentation of the developmental psychology he has elaborated over the last forty years. This comprehensive synthesis traces each stage of the child's cognitive development, over the entire period of childhood, from infancy to adolescence.

Approaches to Teaching, 5th Edition Gary D. Fenstermacher,Jonas F. Soltis,Matthew N. Sanger,2015-04-18 This popular text continues using the format of the three approaches—The Executive, The Facilitator, and The Liberationist. For theFifth Edition, the authors add four new case studies: “Scripted Teaching,” “Accountability and Merit,” “What Is the Value of Caring Relationships?” and “School Funding.” Using these and other realistic case studies, they explore the strengths and weaknesses of each approach so that teachers can critically assess their own philosophical positions on teaching. Teachers are urged to ask themselves such questions as: What is the main goal of teaching? What is the most important purpose of education? What do I expect my students to eventually become? Is the way I structure my teaching influenced by how I view my role and goals? This updated edition also adds a new section called “Topics and Resources” to encourage further inquiry into teaching. Approaches to Teachingis one of the five books in the highly regarded Teachers College Press THINKING ABOUT EDUCATION SERIES, now in itsFifth Edition. All of the books in this series are designed to help pre- and in-service teachers bridge the gap between theory and practice. Gary D Fenstermacheris Professor of Education at the University of Michigan, Ann Arbor.Jonas F. Soltisis William Heard Kilpatrick Professor Emeritus of Philosophy and Education at Teachers College, Columbia University.Matthew N Sangeris Assistant Professor of Educational Foundations at Idaho State University.

La identidad mexicana en libros escolares y narrativas Alba Nalleli García Agüero,2021-10-04 Los libros de texto gratuitos (LTG) repartidos desde 1960 como textos de enseñanza escolar obligatoria para todos los niños mexicanos constituyen una herramienta utilizada por el gobierno para inculcar, entre otras cosas, un modelo compartido de identidad

nacional. Este libro propone analizar las estrategias de construcción discursiva mediante las cuales se estructuró el modelo cognitivo idealizado (MCI) de identidad nacional mexicana en cuatro generaciones de LTG de primero de primaria (1960-1971; 1972-1980; 1981-1993; 1994-2009); verificar cuál fue la evolución de dicho MCI; y dilucidar en qué medida se refleja en las narrativas de personas que estudiaron con estos libros. El volumen se estructura en dos partes. La primera comprende el análisis multimodal (icónico y verbal) de los libros, mediante herramientas de la lingüística cognitiva, los estudios críticos del discurso de orientación sociocognitiva y la semiótica social. La segunda parte de la investigación es de tipo empírico y se basa en entrevistas semidirigidas y el análisis de la manifestación de estos MCI en las narrativas de personas que utilizaron los manuales durante su educación primaria. La naturaleza del corpus, que incluye cuatro generaciones tanto de LTG como de individuos, hace posible un estudio diacrónico y contrastivo del esquema mental identitario. Además, el análisis aquí propuesto forma parte de los pocos trabajos sobre los libros escolares mexicanos que se anclan en perspectivas lingüísticas, y no en el ámbito de la antropología, la historiografía, la sociología o las ciencias educativas. Muy novedoso en el campo de los estudios del discurso en español es también la orientación altamente interdisciplinaria del estudio. En particular, el análisis crítico con herramientas de la lingüística cognitiva constituye un terreno prácticamente ignoto.

Medicina de los seguros de vida César Borobia Fernández, 2014-05-24 Séptimo volumen de la serie Valoración del Daño Corporal dirigida por el doctor César Borobia en el que se analizan diferentes aspectos que giran entorno a la medicina de los seguros de vida y que han de conocer los profesionales médicos vinculados a este ámbito. En este nuevo título se analizan las patologías que se tratan con mayor frecuencia en la sociedad actual y a las que se hace referencia habitualmente en los manuales de seguros de vida. La estructura de la obra es similar a la del resto de títulos de la colección y se abordarán cuestiones relacionadas con la fisiopatología, alteraciones y enfermedades más frecuentes y relevantes, complicaciones, pronóstico, baremización, selección del riesgo y tarificación. Aunque la colección Valoración del daño corporal está dirigida fundamentalmente a cuestiones vinculadas con los seguros privados, el proceso de selección y el estudio de los siniestros en los seguros de fallecimiento y enfermedad, este nuevo título se desmarca de los anteriores centrándose en los seguros de vida.
