The Spanish Lake Oskar Hermann Khristian Spate, 2004-11-01 This work is a history of the Pacific, the ocean that became a theatre of power and conflict shaped by the politics of Europe and the economic background of Spanish America. There could only be a concept of the Pacific once the limits and lineaments of the ocean were set and this was undeniably the work of Europeans. Fifty years after the Conquista, Nueva España and Peru were the bases from which the ocean was turned into virtually a Spanish lake.

Manual on the Production and Use of Live Food for Aquaculture Patrick Lavens, Patrick Sorgeloos, 1996 The cultivation of fish and shellfish larvae under controlled hatchery conditions requires not only the development of specific culture techniques, but in most cases also the production and use of live food organisms as feed for the developing larvae. The present manual describes the major production techniques currently employed for the cultivation of the major types of live food commonly used in larviculture, as well as their application potential in terms of their nutritional and physical properties and feeding methods. The manual is divided into different sections according to the major groups of live food organisms used in aquaculture, namely micro-algae, rotifers, Artemia, natural zooplankton, and copepods, nematodes and trochophores.

Pesticides Sonia Soloneski, 2014-02-20 The edited book Pesticides - Toxic Aspects contains an overview of attractive researchers of pesticide toxicology that covers the hazardous effects of common chemical pesticide agents employed every day in our agricultural practices. The combination of experimental and theoretical pesticide investigations of current interest will make this book of significance to researchers, scientists, engineers, and graduate students who make use of those

different investigations to understand the toxic aspects of pesticides. We hope that this book will continue to meet the expectations and needs of all interested in different aspects of pesticide toxicity.

Geologic Modeling and Simulation John Warvelle Harbaugh, 2001-08-31 Modeling and simulation were introduced to the earth sciences about four decades ago. Modeling has proven its worth and now it is an accepted procedure for analyzing and solving geological problems. The papers in this collection are focused on modeling sediment deposition and sedimentary sequences and have a decidedly practical flavor. Some of the leading simulation packages, such as CORRELATOR, SEDFLUX, SEDpak, SEDSIM, STRATA, and STRATSIM are applied to problems in hydrocarbon exploration, oil production, groundwater development, coal-bed appraisal, geothermics, and environmental diagnosis. All of these subjects fall under the broad heading of sedimentary basin analysis. The fifteen papers in this volume are written by internationally recognized experts from academia and industry. The contributions represent the status of geologic modeling and simulation at the start of the 21st century, and will give the reader an insight into current research problems and their possible solutions.

The Truth about Crime Jean Comaroff, John L. Comaroff, 2016-12-05 This new book by the well-known anthropologists Jean and John L. Comaroff explores the global preoccupation with criminality in the early twenty-first century, a preoccupation strikingly disproportionate, in most places and for most people, to the risks posed by lawlessness to the conduct of everyday life. Ours in an epoch in which law-making, law-breaking, and law-enforcement are ever more critical registers in which societies construct, contest, and confront truths about themselves, an epoch in which criminology, broadly defined, has displaced sociology as the privileged means by which the social world knows itself. They also argue that as the result of a tectonic shift in the triangulation of capital, the state, and governance, the meanings attached to crime and, with it, the nature of policing, have undergone significant change; also, that there has been a palpable muddying of the lines between legality and illegality, between corruption and conventional business; even between crime-and-policing, which exist, nowadays, in ever greater, hyphenated complicity. Thinking through Crime and Policing is, therefore, an excursion into the contemporary Order of Things; or, rather, into the metaphysic of disorder that saturates the late modern world, indeed, has become its leitmotif. It is also a meditation on sovereignty and citizenship, on civility, class, and race, on the law and its transgression, on the political economy of representation.

Pursuing Good Governance Hugh Corder, Justice Mavedzenge, 2019 In the age of democratic constitutional government, every citizen expects to be treated fairly by the public administration. Constitutions adopted after 1990 have increasingly contained provisions that oblige the public administration to act lawfully, reasonably and procedurally fairly, and frequently grant citizens the legal right to seek review of administrative action affecting them. Southern African nations have led the way in this movement, closely followed by those in east Africa. This book brings together critical accounts of the development of the broad administrative justice landscape in seven national jurisdictions located in these regions. It does this by analysing trends in the review authority and practice of the superior courts, as well as significant developments in non-judicial monitoring institutions, such as ombuds offices, human rights commissions, and mechanisms to access official information.-- Back cover.

Half - Lion Vinay Sitapati, 2016-06-27 When P.V. Narasimha Rao became the unlikely prime minister of India in 1991, he inherited a nation adrift, violent insurgencies, and economic crisis. Despite being unloved by his people, mistrusted by his party, and ruling under the shadow of 10 Janpath, Rao transformed the economy and ushered India into the global arena. With exclusive access to Rao's never-before-seen personal papers and diaries, this definitive biography provides new revelations on the Indian economy, nuclear programme, foreign policy and the Babri Masjid. Tracing his early life from a

small town in Telangana through his years in power, and finally, his humiliation in retirement, it never loses sight of the inner man, his difficult childhood, his corruption and love affairs, and his lingering loneliness. Transformative Constitutionalism Oscar Vilhena,Upendra Baxi,Frans Viljoen,2013

Mysterious Skin Scott Heim,2009-03-17 A disturbing incident sends two young boys down vastly different paths that reunite ten year later in this “impressive” debut novel (Publishers Weekly). At the age of eight Brian Lackey is found bleeding under the crawl space of his house, having endured something so traumatic that he cannot remember an entire five-hour period of time. During the following years he slowly recalls details from that night, but these fragments are not enough to explain what happened to him, and he begins to believe that he may have been the victim of an alien encounter . . . Neil McCormick is fully aware of the events from that summer of 1981. Wise beyond his years, curious about his developing sexuality, Neil found what he perceived to be love and guidance from his baseball coach. Now, ten years later, he is a teenage hustler, unaware of the dangerous path his life is taking. His recklessness is governed by idealized memories of his coach, memories that unexpectedly change when Brian comes to Neil for help and, ultimately, the truth.
