The Black Hole War Leonard Susskind,2008-07-07 What happens when something is sucked into a black hole? Does it disappear? Three decades ago, a young physicist named Stephen Hawking claimed it did, and in doing so put at risk everything we know about physics and the fundamental laws of the universe. Most scientists didn't recognize the import of Hawking's claims, but Leonard Susskind and Gerard t'Hooft realized the threat, and responded with a counterattack that changed the course of physics. The Black Hole War is the thrilling story of their united effort to reconcile Hawking's revolutionary theories of black holes with their own sense of reality -- effort that would eventually result in Hawking admitting he was wrong, paying up, and Susskind and t'Hooft realizing that our world is a hologram projected from the outer boundaries of space. A brilliant book about modern physics, quantum mechanics, the fate of stars and the deep mysteries of black holes, Leonard Susskind's account of the Black Hole War is mind-bending and exhilarating reading.

The Holographic Universe Michael Talbot,2011-09-06 Nearly everyone is familiar with holograms—three-dimensional images projected into space with the aid of a laser. Two of the world's most eminent thinkers believe that the universe itself may be a giant hologram, quite literally a kind of image or construct created, at least in part, by the human mind. University of London physicist David Bohm, a protégé of Einstein and one of the world's most respected quantum physicists, and Stanford neurophysiologist Karl Pribram, an architect of our modern understanding of the brain, have developed a remarkable new way of looking at the universe. Their theory explains not only many of the unsolved puzzles of physics but also such mysterious occurrences as telepathy, out-of-body and near-death experiences, lucid dreams, and even religious and mystical experiences such as feelings of cosmic unity and miraculous healings. Now featuring a foreword by Lynne McTaggart, Michael Talbot's *The Holographic Universe* is a landmark work whose exciting conclusions continue to be proven true by today's most advanced physics, cosmology, and string theory.

Everything Is an Illusion Ramana Maharshi,Nisargadatta Maharaj,Vasistha,2011-11 What is helpful about reading these types of quotes is that the more you can realize that everything is an illusion the better you can ignore everything and turn inward. One of the most significant aspects to this collection of quotes by the Sages is that in addition to pointing out that everything is a dreamlike illusion, the also point out in many of their quotes that upon Self Realization everything disappears. They also state that realizing that the world, etc. is an illusion is essential for Self Realization. The type is Palatino 15 for

crisp clear easy reading. This book contains all of the quotes in Chapter (Step) Two from the book The Seven Steps to Awakening. Everything is an Illusion is Book Five in the Self Realization Series. One purpose of the Self Realization Series is to put just one category of quotes into a small book that has the advantage of making it easier to focus, meditate on, grasp and have insight into just one subject at a time. That makes the approach simple, easier and less complicated. The idea is to stay focused on just one subject until you have received everything you need to receive from that one subject. Most people go on to the next subject without ever having learned to apply to their lives the subject they are studying now. The Self Realization series of books are portable practice manuals aimed at helping sincere seekers of Self Realization master one Key to Self Realization at a time. The six titles in the Self Realization Series are: 1. Self Awareness Practice Instructions. 2. The Desire for Liberation. 3. The False self. 4. Inspiration and Encouragement on the Path to Self Realization. 5. Everything is an Illusion. 6. How Not to Get Lost in Concepts.

Introduction to Everything Everywhere All at Once Gilad James, PhD, Everything Everywhere All at Once is a sci-fi film directed by the Canadian filmmaker siblings Dan Kwan and Daniel Scheinert. The film follows the story of a Chinese-American woman named Billi (played by Awkwafina), who discovers that she has the power to communicate with her ancestors from multiple dimensions and time periods. The film's storyline involves the concept of 'Elder', a supreme being that created the universe, and how Billi must find a way to stop Elder from destroying all of existence. The movie features a diverse cast of actors, including Michelle Yeoh, Jamie Lee Curtis, and Daniel Dae Kim. The film's trailer promises a wild ride through quantum physics, philosophy, and emotion. The movie deals with themes of identity, belonging, and the interconnectedness of life, making it both intellectually stimulating and emotionally resonant. From the stunning visuals to the intricate plot to the powerful performances, Everything Everywhere All at Once aims to deliver an experience unlike any other sci-fi film.

Wholeness and the Implicate Order David Bohm, 2005-07-12 David Bohm was one of the foremost scientific thinkers and philosophers of our time. Although deeply influenced by Einstein, he was also, more unusually for a scientist, inspired by mysticism. Indeed, in the 1970s and 1980s he made contact with both J. Krishnamurti and the Dalai Lama whose teachings helped shape his work. In both science and philosophy, Bohm's main concern was with understanding the nature of reality in general and of consciousness in particular. In this classic work he develops a theory of quantum physics which treats the totality of existence as an unbroken whole. Writing clearly and without technical jargon, he makes complex ideas accessible to anyone interested in the nature of reality.

COSMIC CODE IS ILLUSION T. S. VISWANATHAN, 2017-01-01 I firmly declare that I am not an Atheist but an advocate of Advaita i.e., world is one, and all of us are one. Atheists also call the world as an illusion, but as an Advaitist I do believe that all of us are God just veiled by senses. As German Mystic, Meister Eckhart says: "The eye in which I see God is the same eye in which God sees me." Atheist denies the existence of God which could lead to immorality in our life though under illusion. I do believe in contacting various levels of energies available in the cosmos as per Vedic Shastras for various types and levels of happiness to live a good life, though, it is illusion. The cosmos to me is an illusory field. Beyond the concept of Cosmos lies the web-wave field which is discussed extensively in this book. Atheist defines the final power as infinite which has no motive and thereby does not grant human wishes, whereas I do believe in the infinite atman called as Paramaatma which absorbs us in its web-wave field of pure bliss and never again to give us the illusion of birth death cycles. If one merges with it he escapes the illusion of birth and death. To the question of existence of God, I had explained in this book that during the cycles of birth and death through the illusory field there are various degrees and levels of cosmic power which does helps to mitigate the illusory effects and come out of the illusory field to merge with Paramaatma. I do make a distinction between consciousness and illusion. Both are same but marginally different. In consciousness one has the awareness whether inside or outside the body. Consciousness permits to have awareness outside the body. It could have a motive. But illusion exists inside a body and not necessarily outside the body. Illusion is a particle that pertains to the matter and its awareness is inside a body only. But consciousness is not. Consciousness exists outside the body too but inside the illusory field. Outside the body there is no illusion. Illusion gets dissipated when the body no longer exists totally with its senses. All senses pertain to illusion. All our scope, our sciences and philosophy, particularly life, death, rebirth, beliefs pertain to the body which gets the illusion, because the body is matter. Vedas and Adi Shankar Acharya call illusion as Maya, and consciousness as Prajnaa. The illusion has to be perfect for all of us during the illusory life, giving us the utmost happiness in all walks of this life. Everything to us happens only in illusion and so we must evoke the divine power to be

happy in this illusion in the short life and thereafter free us from this illusory world. On this score the invocation of divine or cosmic energies are absolutely a must. Though it is easier to talk about illusion in theory, in practical life it is not easy either. Everyone has their daily routine to follow, like attending their work, begetting children, raising children, getting them married, owning property, engagement in business or agriculture or profession and so on. No one can quit these and gloat on illusion. Except for a very few no one would sacrifice anything or give up their rights, based on a concept called illusion or the illusory field. They feel real during their sojourn in this worldly life and they would like to feed their senses with pleasures. One would not gift his house to charity because of the fact that everything is illusion, as they find these philosophical talks are not practically appealing. They feel they are living a real life. A life in which they own and have to own properties, joy, children, education, as if they are going to live for long. The idea to write this book came to me as I went through Vedic / Upanishad teachings. Whether the world we live is real? Or illusory? Therefore, the main idea of this book is to make an honest attempt to investigate who is behind our lives, and if so, why is he required to play the drama of creating us, and what he wants to achieve through our creation. More fully what is that cosmic code that is behind creation? Physics describes it as fermions and bosons. But it is more than that. It is illusion. Fermions and Bosons themselves come from illusion. Particularly illusion of existence. Everything we feel, see, hear, touch, and smell is illusion. This illusion defines an impartial God or infinities. The illusion can alone define an impartial God. Many religions have come out with answers recently during the last 2200 years or so, but I find the Upanishads and other spiritual texts and teachers in India offer answers to this question conforming to modern physics and experiments. This is what this book is all about. An inquiry into secret of Human life. Most of the religious texts describe God in human form. The prophets or teachers are described as an incarnation or children of God or to whom God revealed himself in a place, at a time and handed over the words of wisdom. The main purpose of all religious texts is to tell humanity that there is a super power who is watching us and he would guide us to heaven where he lives, if we live our human lives conforming to the teachings laid down by his messengers or prophets. If such conformity is not accepted, then we would be doomed to hell. Or in other terms there would be no salvation for such person. The biggest irony is God also permits them to kill persons who do not follow such religious teachings. God treats them as enemies. The enemies of God must be killed. The tribes who are enemies of God can be killed. Well this is the irony. When God must be all LOVE, one fails to understand that such God asks for killing, when he can kill them himself. Why seek the help of other humans to kill fellow humans when he can himself do the killing? And again, why should he kill after creation. If so, why create at all! Why create such evil persons at all in this earth, who steal, or cheat or commit adultery, or who murder others? What is the purpose of such creation and evaluation? What is the purpose of God having such a character? Persons who are responsible in writing these texts know very well that unless you use the name of God no one is going to believe their own writings. Every piece of their own advice has to be stated as if they come from the mouth of God

himself for mankind to believe. Their own opinions are stated as if they originated from God. Therefore, God is a convenient tool. This book goes into the semantics of the main topic that Cosmic code is illusion and I have used scientific, philosophical, mathematical, and Vedic teachings, to prove clearly my conviction, that the world we live is only illusion. It is not for the sake of writing a book I have written but it is out of my own strong feeling that the Universe has to be illusory to have an Impartial God. I trust the readers will find it interesting and get convinced.

The Cognitive-Theoretic Model of the Universe: A New Kind of Reality Theory Christopher Michael

Langan,2002-06-01 Paperback version of the 2002 paper published in the journal Progress in Information, Complexity, and Design (PCID). ABSTRACT Inasmuch as science is observational or perceptual in nature, the goal of providing a scientific model and mechanism for the evolution of complex systems ultimately requires a supporting theory of reality of which perception itself is the model (or theory-to-universe mapping). Where information is the abstract currency of perception, such a theory must incorporate the theory of information while extending the information concept to incorporate reflexive self-processing in order to achieve an intrinsic (self-contained) description of reality. This extension is associated with a limiting formulation of model theory identifying mental and physical reality, resulting in a reflexively self-generating, self-modeling theory of reality identical to its universe on the syntactic level. By the nature of its derivation, this theory, the Cognitive Theoretic Model of the Universe or CTMU, can be regarded as a supertautological reality-theoretic extension of logic. Uniting the theory of reality with an advanced form of computational language theory, the CTMU describes reality as a Self Configuring Self-Processing Language or SCSPL, a reflexive intrinsic language characterized not only by self-reference and recursive self-definition, but full self-configuration and self-execution (reflexive read-write functionality). SCSPL reality embodies a dual-aspect monism consisting of infocognition, self-transducing information residing in self-recognizing SCSPL elements called syntactic operators. The CTMU identifies itself with the structure of these operators and thus with the distributive syntax of its self-modeling SCSPL universe, including the reflexive grammar by which the universe refines itself from unbound telesis or UBT, a primordial realm of infocognitive potential free of informational constraint. Under the guidance of a limiting (intrinsic) form of anthropic principle called the Telic Principle, SCSPL evolves by telic recursion, jointly configuring syntax and state while maximizing a generalized self-selection parameter and adjusting on the fly to freely-changing internal conditions. SCSPL relates space, time and object by means of conspansive duality and conspansion, an SCSPL-grammatical process featuring an alternation between dual phases of existence associated with design and actualization and related to the familiar wave-particle duality of quantum mechanics. By distributing the design phase of reality over the actualization phase, conspansive spacetime also provides a distributed mechanism for Intelligent Design, adjoining to the restrictive principle of natural selection a basic means of generating information and complexity. Addressing physical evolution on not only the biological but cosmic level, the CTMU addresses the most evident deficiencies and paradoxes associated with conventional discrete and continuum models of reality, including temporal directionality and accelerating cosmic expansion, while preserving virtually all of the major benefits of current scientific and mathematical paradigms.

The Déjà Vu Experiment J. G. Renato,2015-02-27 They're everywhere around us, but usually we choose to ignore them. They happen in space. They happen in time. They're little moments of discontinuity in our experience, but they can become

portals to the greater experience of our world as illusion, as the veil, as maya, as the collective dream - and the experience of ourselves as the dreamers. If we choose not to ignore them, but to follow them, like Alice down a cosmic rabbit hole, we might just begin to understand how it was that we got here in the first place. Offering unique ways to look at light, quantum physics, string theory, the universe existing as a single unified melody, the power of imagination, free will, the language of mathematics, death, and more, Renato successfully challenged me to consider not just “Who am I?” but “What am I?” — Patricia Reding, Readers’ Favorite

J. G. Renato attempts to uncover the deeper meaning behind that often disconcerting déjà vu we’ve all experienced at some time or other. He skillfully uses this sense of stepping out of one plane of reality and seeing things from a different perspective to explore the whole nature of being, presence, and existence. Most crucially, he poses the thorny question of how spiritual phenomena can fit within a world obsessed by rationality and tangible productivity. ... The key achievement of this slight volume is managing to be metaphysical while remaining lighthearted and fun. — Seamus Mullarkey, ForeWord Reviews

The Apocalypse of the Reluctant Gnostics Stuart Douglas, 2018-04-19 This book presents a comparison of the Gnostic worldviews of Carl G. Jung and science-fiction author, Philip K. Dick, two figures who have done far more than most to revive an interest in the Gnostic tradition in the modern world. Despite profoundly different approaches - one was a depth psychologist whose unique insights and approach to psychology forced him to explore the depths of the unconscious in a way that inevitably led him to touch frequently on metaphysical or spiritual matters; the other was an author of science-fiction - there are some striking parallels between their unique Gnostic visions. With the relatively recent publication of both Jung's and Dick's personal journals - *The Red Book* (2009), and, *The Exegesis of Philip K. Dick* (2011), respectively - in which they articulate their Gnostic visions, it seems timely to make this comparison.

The Hidden Geometry of Life: The Science and Spirituality of Nature Karen L. French, 2014-05-10 Encompassing nature, science, art, architecture, and spirituality, and illustrated with over 700 photographs and line drawings, *The Hidden Geometry of Life* illuminates the secret underpinnings of existence. In her trademark easy-to-understand style, mathematician Karen French shows how sacred geometry permeates every level of being, manifesting itself in simple shapes and numbers, music and sounds, light and color, even in the mysteries of creation itself. But these geometrical archetypes are more than the building blocks of reality: they are gateways to profound new levels of awareness.

The Cosmic Hologram Jude Currivan, 2017-02-16 How holographic patterns of information underlie our physical reality • 2017 Nautilus Silver Award • Includes myriad evidence from a wide range of cutting-edge scientific discoveries showing our Universe is an interconnected hologram of information • Explains how consciousness is a major component of the cosmic hologram of information, making us both manifestations and co-creators of our reality • Reconciles Quantum Mechanics and

Einstein's Theory of Relativity by showing that energy-matter and space-time are complementary expressions of information. Our understanding of the Universe is about to transform at all levels, from the tiniest Planck scale to the vast reaches of space. Recent scientific discoveries show that the information that upholds all of our modern technologies is exactly the same as the universal in-formation that underpins, pervades, and is all we call physical reality. Exploring how information is more fundamental than energy, matter, space, or time, Jude Currivan, Ph.D., examines the latest research across many fields of study and many scales of existence to show how our Universe is in-formed and holographically manifested. She explains how the fractal in-formational patterns that guide behavior at the atomic level also guide the structure of galactic clusters in space. She demonstrates how the in-formational relationships that underlie earthquakes are the same as those that play out during human conflicts. She shows how cities grow in the same in-formational ways that galaxies evolve and how the dynamic in-formational forms that pervade ecosystems are identical to the informational structures of the Internet and our social behaviors. Demonstrating how information is physically real, the author explores how consciousness connects us to the many interconnected layers of universal in-formation, making us both manifestations and co-creators of the cosmic hologram of reality. She explains how Quantum Mechanics and Einstein's Theory of Relativity can at last be reconciled if we consider energy-matter and space-time as complementary expressions of information, and she explores how the cosmic hologram underlies the true origin of species and our own evolution. Concurring too with ancient spiritual wisdom, the author offers solid evidence that consciousness is not something we "have" but the fundamental nature of what we and the entire Universe are. With this understanding, we can each transform our own lives and help co-create and in-form the world around us.

The Secrets of the Gods Claudiu Gilian, 2017-03-22 What would it be like to realize one day that everything you believed to be true was nothing but a lie? That you lived in an illusion constantly fed by those around you? That reality is often diametrically opposed to the chimera that was inoculated to you? That to learn the truth you need to forget everything you know? - What is God? - Are aliens real? - Is the material universe just an illusion? - Why are we here, where do we come from and where do we go after death? - Is Earth a prison? - Are humans the descendants of the gods of the past? - Is the Bible just a collection of plagiarized myths? - Was Christianity invented by Philo of Alexandria? - Was the Garden of Eden located on the territory of today's Romania? - Are Lucifer and Adam the same character? - Is Noah's Ark one of the Giza pyramids? - Is the Great Pyramid an interdimensional travel device? - Was the prophet Abraham a descendant of the Akkadian emperor Sargon the Great? - Was Moses really Pharaoh Akhenaton? - Is there an unseen war between the Aryan and Semitic races? - Did Alexander the Great discover the source of life in Dacia? - Did Pharaoh Tutankhamun's family practice black magic? - Does the Asteroid Belt come from the Mariana Trench? - Are the fallen angels at the top of the Masonic pyramid? - Is time travel possible? - Is the Apocalypse an event of the past? - Was Jesus possessed? All these questions (and many more) can be answered by **The Secrets of the Gods**, a secret history of the world, based on the decoding of ancient myths, as well as on the

results of modern scientific research. A unique and controversial interpretation of universal history, which brings to the general public the secrets of the gods, until now reserved only for the initiated.

Manifest Your Magnificence Joan E. Walmsley, 2015-10-22 This book describes the synthesis currently occurring between science and metaphysics that reveals the energetic nature of all life and the amazing truth behind physical reality. It discusses the relationship between energy and consciousness, and how management of your own energy signature can change your reality and even your physical body. It demonstrates how you can connect to the immense energy available at the higher frequencies of your own being to manifest abundance, love, and peace for yourself, your family, your business, your community, and your world. *** This book brings together energetic science and universal spiritual intelligence in a way that is understandable and practical. The Case Against Reality: Why Evolution Hid the Truth from Our Eyes Donald Hoffman, 2019-08-13 Can we trust our senses to tell us the truth? Challenging leading scientific theories that claim that our senses report back objective reality, cognitive scientist Donald Hoffman argues that while we should take our perceptions seriously, we should not take them literally. From examining why fashion designers create clothes that give the illusion of a more “attractive” body shape to studying how companies use color to elicit specific emotions in consumers, and even dismantling the very notion that spacetime is objective reality, *The Case Against Reality* dares us to question everything we thought we knew about the world we see.

Information—Consciousness—Reality James B. Glattfelder, 2019-04-10 This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age-old enigmas of existence. Over 300 years ago, the human mind discovered the machine code of reality: mathematics. By utilizing abstract thought systems, humans began to decode the workings of the cosmos. From this understanding, the current scientific paradigm emerged, ultimately discovering the gift of technology. Today, however, our island of knowledge is surrounded by ever longer shores of ignorance. Science appears to

have hit a dead end when confronted with the nature of reality and consciousness. In this fascinating and accessible volume, James Glattfelder explores a radical paradigm shift uncovering the ontology of reality. It is found to be information-theoretic and participatory, yielding a computational and programmable universe.
